MICROFILMED – 1978

Federal Register

VOLUME 43 • NUMBER 105

Monday, May 30, 1978

May 1978

Volume 43—Numbers 84-105

Pages 18533-23700

INDEX

This INDEX is based on a consolidation of contents entries appearing in the daily issues of the FEDERAL REGISTER together with broad subject references. It is published monthly, quarterly, and annually.

A general index to the entire Code of Federal Regulations, the CFR INDEX and finding aids, is revised as of July 1 each year.

Numerical Finding Aids. The LSA, a cumulative list of CFR sections affected, is published monthly and is cumulated for 12 months, keyed to the revision dates of the various CFR volumes.

All FEDERAL REGISTER publications are available for purchase from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

This publication was prepared under the editorial direction of Robert E. Lewis assisted by Rose Steinman, with Judie Craine as Chief Editor.

INQUIRIES may be made to the Finding Aids Unit at area code 202–523–5227.

SUGGESTIONS concerning this and other publications of the Office will be welcomed by Fred J. Emery, Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

National Telecommunications and Information Administration.
Rural Electrification Administration.

COMMUNITY PLANNING AND DEVELOPMENT, OFFICE OF ASSISTANT SECRETARY

RULES
Community development block grants:
New communities, applications and criteria for discretionary grants, 19229

PROPOSED RULES
Urban homesteading program, 23692

NOTICES
Authority delegations:
Regional Administrators et al.; urban homesteading, 23700

COMMUNITY SERVICES ADMINISTRATION

RULES
Emergency energy conservation program:
Funding requirements; time extension, 21461
Financial management, grantee:
Non-Federal share contribution; eligibility for waiver of increase; FY 1978 grants, 19394

PROPOSED RULES
Community food and nutrition program, 21016, 21904

NOTICES
Emergency energy assistance program:
Funding declarations, 19061, 20030, 22229
Improving Government regulations; inquiry, 22595
Summer Youth Recreation Program; application notice, 18739

COMPTROLLER OF CURRENCY

RULES
Rulings:
Charitable contributions, 19832
Supensions and prohibitions where felony charged; procedures and standards, 21868

UMI

INDEX

CONSTRUCTION INDUSTRY

See Employment Standards Administration.

CONSUMER PRODUCT SAFETY COMMISSION

RULES

Baby rattles; safety requirements, 22005
Hazardous substances and articles; administration and enforcement:
  Baby rattles; banning and safety standards, 22005
  Toys; technical requirements for determining sharp metal or glass edges; correction, 21324
  Vinyl chloride monomer, self-pressurized household substances containing; confirmation, 22936
Participants in rulemaking proceedings, financial compensation; policies and procedures, 23562
Policy or interpretation statements:
  Emergency exemptions, granting, 19216
Voluntary standards activities; policy statement, 19221

PROPOSED RULES

Benzene in consumer products as ingredient or contaminant:
  Product ban, 21839
  Regulatory action under CPSA, 21838
Christmas tree lights, minature; safety standards, 19136
Hazardous substances and articles:
  Benzene; special labeling, 21852
Poison prevention packaging:
  benzene, 21853

NOTICES

Committees; establishment, renewals, terminations, etc.:
  Product Safety Advisory Council et al.; extension of time, 19701
Electric water heaters; enforcement proceeding, hearing, 19431, 21346
Girl's sweatshirts, certain; Flammable Fabrics Act violation; prehearing conference, 20031
Home insulation; cellulose; mandatory safety standard, extension of time, 19905
Meetings:
  Product Safety Advisory Council, 23011
Meetings; Sunshine Act, 19103, 19751, 19752, 20891, 21562

CONSUMERS

See Consumer Product Safety Commission.
Federal Trade Commission.
National Highway Traffic Safety Administration.

COPYRIGHT ROYALTY TRIBUNAL

PROPOSED RULES

Cable systems; royalty fee claims filing, 19423
Phonorecord players (jukebox); royalty fee access; hearing, 20513

NOTICES

Meetings; Sunshine Act, 21976

COPYRIGHTED WORKS, NEW TECHNOLOGICAL USES NATIONAL COMMISSION

NOTICES

Meetings, 19080, 20570

COSMETICS

See Food and Drug Administration.

COST ACCOUNTING STANDARDS BOARD

PROPOSED RULES

Cost accounting standards:
  Insurance costs accounting, 20806, 22043

COUNCIL ON ENVIRONMENTAL QUALITY

See Environmental Quality Council.

CUSTOMS SERVICE

RULES

Antidumping:
  Steel plates, carbon, from Japan, 22937
Articles conditionally free, subject to reduced rate, etc.:
  Technical changes; correction, 20003
Customhouse brokers:
  Office title change, use of microfiche, etc., 21878, 23565
Drawback:
  Claims; accelerated payment, 22176
Liquidation of duties; countervailing duties:
  Handbags from Columbia, 18660
Merchandise, cartage and lighterage; payment of unclaimed merchandise, 23566
Organization and functions; field organization; ports of entry, etc.:
  Bar Harbor, Maine, 19833
  Corpus Christi, Tex., 19833
  Duluth, Minn., 19833
  Fairport Harbor, Ohio, 18659
  Los Angeles, Calif., 19833
  Morris County, N.J., 19833
Vessels in foreign and domestic trades:
  Cayman Islands, German Democratic Republic, and United Arab Emirates; special tonnage tax and light money, 22173
  Individuals boarding or leaving vessels without Customs permission; categories, 22174

PROPOSED RULES

Organization and functions; field organization; points of entry, etc.:
  Point Roberts, Wash., 22752
Vessels in foreign and domestic trades:
  Foreign repairs to, and equipment purchased for, American vessels; extension of time, 19417, 21693

NOTICES

Antidumping:
  Fabric, impression, of man-made fiber from Japan, 22345
Countervailing duty petitions and preliminary determinations:
  Ampicillin trihydrate from Spain, 22479
  Footwear from India, 18807
  Oleoresins from India, 21087
Reimbursable services; excess cost of preclearance operations, 21390
Tariff reclassification petitions:
  Bicycle reflectors, wide angle; extension of time, 20886
Tariff-rate quotas:
  Tuna fish, canned (classifiable), 20886
Trade name recordation applications:
  Aurora Steel Products, 18808
  Dawn Imports International, Inc., 18808

DRUG ENFORCEMENT ADMINISTRATION

RULES

Schedules of controlled substances:
  1-Phenylcyclohexylamine and 1-piperidinocyclo-hexanecarbonitrile, 21325

NOTICES

Registration applications, etc.; controlled substances:
  Argon Research Corp., 22461
  Berwick, Robert C., M.D., 19470
  Grega, Stephen, M.D., 19726
  Regis Chemical Co., 19470
  Sarmiento, Maximo R., M.D., 19726
Schedules of controlled substances; production quotas:
  Amphetamine, 23021
  Schedules I and II, 1978 aggregate production quotas, 20565

DRUGS

See Alcohol, Drug Abuse, and Mental Health Administration.
Drug Enforcement Administration.
Food and Drug Administration.

ECONOMIC ANALYSIS BUREAU

PROPOSED RULES

Direct investment surveys; mandatory reporting requirements, 22053

NOTICES

Improving Government regulations; inquiry, 23176

ECONOMIC DEVELOPMENT ADMINISTRATION

RULES

Economic development district organization; representation requirement, 18541

NOTICES

Business development program:
  Steel industry, basic; guarantee loan assistance applications, 18626
Import determination petitions:
  Bagatelle International, Ltd., et al., 21922
  Crewco, Inc., et al., 19060
  Fairfield-Noble Corp. et al., 21922
  Ronson Corp. et al., 18599
  Time Saver Tackle, Inc., et al., 22430
  Z. Dress Co. et al., 20525
Improving Government regulations; inquiry, 23177

ECONOMIC OPPORTUNITY, NATIONAL ADVISORY COUNCIL

NOTICES

Meetings, 22250

ECONOMIC OPPORTUNITY OFFICE

See Community Services Administration.

ECONOMIC REGULATORY ADMINISTRATION

RULES

Oil; administrative procedures and sanctions: Interpretations of General Counsel, 19816
Oil import allocation; 1978-79, 18990
Petroleum allocation and price rules, general: Interpretations, 19816
Petroleum allocation regulations, mandatory: Synthetic fuels under entitlements program, 21432
Petroleum price regulations, mandatory: Interpretations, 19816
Proceedings transfer to Energy Secretary and Federal Energy Regulatory Commission: Electric energy import and export proceedings; procedures, 21657

PROPOSED RULES

Petroleum allocation regulations, mandatory:
  Crude oil, lower tier; nonrefining uses; advance notice; extension of time, 21682
  Emergency standby mandatory crude oil and refinery yield control programs; hearing cancelled, 23587
Petroleum price regulations, mandatory:
  Emergency standby mandatory crude oil and refinery yield control programs; hearing cancelled, 23587

NOTICES

Canadian allocation program:
  Crude oil; priority designation evaluation; conference, 20856
Coal use, construction orders:
  General Electric Co., 20260, 21927
  Goodyear Tire & Rubber Co., 20855
Consent orders:
  Asphalt & Petroleum Industries, 20856
  Phillips Petroleum Co., 22771
Crude oil, domestic, allocation program; 1978, entitlement notices:
  March, 22435
Industrial plants burning natural gas or petroleum products, prohibition orders:
  Ash Grove Cement Co., 19064
  Central Telephone & Utilities Corp., 20538
  Martin Marietta Corp., 19070
  Public Utilities Department, 20534
  Scott Paper, Co., et al., 19910
Meetings:
  Fuel Oil Marketing Advisory Committee, 21347
Natural gas importation; petitions:
  Great Lakes Gas Transmission Co., 21715
Petroleum allocation regulations, mandatory:
  Applications; multiple allocation fractions for motor gasoline, 19431
Power rates and charges:
  Transmission rates; Bonneville Power Administration, 21716
Hearings, etc.:
  Arizona Public Service, 19908
  El Paso Eastern Co. et al., 19279
  New York Power Pool, 19908
  Northern States Power Co., 19909

FARM CREDIT ADMINISTRATION

NOTICES

Improving Government regulations; inquiry, 21984

FARMERS HOME ADMINISTRATION

RULES

Account servicing:
Routine; reamortization, 21640
Association, community facility loans:
Water and waste disposal systems, community domestic; development grants; inquiry, 20221
Watershed loans in certain States; provisions removed, 22671
Drought stricken areas, special assistance; project completion dates, 20956
Farm purchase and development loans (individual):
Land conservation and development; Appalachian Region discontinued, 20221
Insurance:
Flood Insurance Program, National; servicing companies, 18538
Insured association and organization loans, bonds and notes for; CFR Part removed, 19342
Loan and grant programs (group):
Community facility; cable television easements, 19342
Rural housing loans and grants:
Low-income families, maximum adjusted income for; increase, 22671

PROPOSED RULES

Appeals procedure, 21005

NOTICES

Business and industrial loans; insured loan interest rates, 22066
Disaster and emergency areas:
Arizona, 21026
Kentucky, 22428
Louisiana, 18724
Michigan, 18724
Montana, 21026
New Jersey, 21706
New Mexico, 18724
North Carolina, 20258
Tennessee, 21706
Texas, 19897, 21706
Improving Government regulations; inquiry, 21990

FEDERAL AVIATION ADMINISTRATION

RULES

Air carriers certification and operations:
Agricultural aircraft operations; operations review program, 22643
Air carriers, scheduled, with helicopters; operations review program, 22643
Air travel clubs using large airplanes, operations review program, 22642
Domestic, flag, and supplemental air carriers and commercial operators of large aircraft; operations review program, 22641, 22646
Air traffic operating and flight rules:
Operations review program, 22640
Parachute jumping; operations review program, 22641
Aircraft maintenance, preventive, etc.:
Operations review program, 22639
Airmen certification:
Airmen other than flight crewmembers; operations review program, 22640
Flight crew members other than pilots; operations review program, 22639
Pilots and flight instructors; operations review program, 22639
Airworthiness directives:
AiResearch, 22339
Beech, 20786, 22933
Bell, 19205, 22340
Bendix, 19209
Boeing, 19645
Britten-Norman, 21870
Cessna, 18542, 20785, 22341, 22935
Champion, 19207
Detroit Diesel Allison, 19206
General Dynamics, 19211

Piper, 21441, 22342
Pratt & Whitney, 21442, 22932
Rockwell International, 19209
Short Brothers, Ltd., 20786, 21870, 21871
Area high routes, 18551, 19212
Aviation maintenance technician schools:
Operations review program, 22643
Control areas, 21449
Control zones, 18550, 18551, 19645, 21444, 21445, 21873, 22935
Jet routes, 19212, 21451
Repair stations:
Operations review program, 22643
Restricted areas, 21450, 22936
Standard instrument approach procedures, 19214, 21452
Transition areas, 18550, 19212, 19213, 19646, 19647, 20225, 20787, 20788, 20789, 21448, 21872, 22342
VOR Federal airways, 19212, 21444, 21446, 21447

PROPOSED RULES

Air carriers certification and operations:
Air carriers, scheduled, with helicopters; operations review program, 20448
Air travel clubs using large airplanes; flight crewmember flight and duty time limitations and rest requirements; extension of time, 22650
Domestic, flag, and supplemental air carriers and commercial operators of large aircraft; flight crewmember flight and duty time limitations and rest requirements; extension of time, 22650
Domestic, flag, and supplemental air carriers and commercial operators of large aircraft; operations review program, 20448
Airworthiness directives:
Airbus Industrie, 20818
Boeing, 19666
McDonnell Douglas, 20237
Pratt & Whitney, 21463, 22374
Airworthiness standards:
Transport category airplanes; Douglas DC-3 airplanes with turboprop engines, 21900
Control zones, 20819, 20820
Jet routes, 20240
Restricted areas, 19238, 20239
Transition areas, 19235, 19236, 19237, 20238, 21464, 22375, 22376, 22377, 22985, 22986, 22987

NOTICES

Advisory circular checklist and status of FAA regulations, 19773
Airport and airway development legislation, post-1980; consultative planning conference, 19310
Airspace, navigable, objects affecting:
Hotel, proposed, Atlantic City, N.J.; hearing rescheduled, 20289
Meetings:
Aeronautics Radio Technical Commission, 19747, 20863, 21962, 23068
Airport and airway development legislation, post-1980; consultative planning conference, 19310
Organization and functions:
Air Carrier District Office, Ypsilanti, Mich.; address change, 20883
Air Traffic Control Tower, Martha's Vineyard, Mass.; commissioning, 20882

FEDERAL BUREAU OF INVESTIGATION

NOTICES

National Crime Information Center, Criminalistic Laboratory Information System (CLIS); establishment, 23022

FEDERAL COMMUNICATIONS COMMISSION

RULES

Accounts, uniform system; ratemaking, plant and expense items, etc., 21333
Amateur radio service:
Alien permit applications, 21886
Frequencies available for use by general class amateur radio operators, 19854
Aviation services:
License renewal applications, 20803
Cable television (SEE ALSO Radio broadcast services):
Network program exclusivity protection; responses to petitions for reconsideration, 22212
Systems; definition and creation of classes of system, 20235
FM broadcast stations; table of assignments (SEE ALSO Radio broadcast services):
Arkansas, 20499
Georgia, 21885
Illinois, 21678
Montana, 20498, 20989
North Carolina, 20498
Maritime services, land and shipboard stations:
Radiotelephone connection bridge-to-bridge, reserve energy, 20010
Radiotelephony; frequencies between 4000-27500 kHz; restrictions, 19853
Ship radio telegraph stations; assignment of frequencies; editorial changes, 22042
Transmitter power, increase, 18679
Radio broadcast services (SEE Cable television; FM stations)
Telephone companies:
Accounts, uniform system; ratemaking, plant and expense items, etc., 21333

PROPOSED RULES

Aviation services:
Stations, operation requirements; notification of commencement, 19690
Cable television relay services (SEE ALSO Radio broadcast services):
Band expansion, 12.7-12.95 to 12.7-1320 GHz; inquiry; extension of time, 23616
Experimental broadcast services:
CARS band expansion; inquiry, extension of time, 23616
FM translator stations; extension of time, 19695, 23619
FM broadcast stations; table of assignments (SEE ALSO Radio broadcast services):
Alaska, 18574
Arkansas, 19692
California, 20247, 20249, 23617
Florida; extension of time, 19896
Georgia, 19241
Idaho; extension of time, 19896
Iowa, 19895
Kentucky, 19691
Michigan, 19240
Wisconsin; extension of time, 21701
Frequency allocations and radio treaty matters:
CARS band expansion; inquiry, extension of time, 23616
Maritime services, land and shipboard stations:
Public coast station applicants; financial qualifications, 20026
Radiotelegraph services, interconnection and upgrading of public coast facilities; extenstion of time, 21701
Radiotelegraph stations, ship; communication with amateur stations, 20249
Stations, operation requirements; notification of commencement; 19690
Organization and functions:
Common Carrier Bureau, Chief; authority delegation; cable television pole attachment complaints, 19886
Practice and procedure:
Cable television; pole attachment complaint procedures, 19886
Stations, operation requirements; notification of commencement, 19690
Radio broadcast services (SEE Cable television; FM stations; Television stations)
Radio frequency devices:
UHF television receiver noise figures, 19893
Telephone companies; extension of lines and discontinuance of service:
MTS and WATS market structure; extension of time, 18711
Television broadcast stations:
Subscription television; authorization, cut-off procedures, etc.; extension of time, 23618
Television broadcast stations; table of assignments:
Idaho, 19693
Oregon, 18711, 20517

NOTICES

Canadian standard broadcast stations; notification list, 20081, 23013
CB radios, used 23-channel, marketing cut-off date extension; petition denied, 19718
Deaf and hearing impaired, telecommunications services; inquiry; extension of time, 19292
Domestic public radio services; applications accepted for filing, 19714, 20551, 22067
FM translator applications ready and available for processing, 22778
Meetings:
Marine Services Radio Technical Commission, 19920
National Industry Advisory Committee, 18767
Meetings; Sunshine Act, 19103, 19496, 19497, 19753, 20367, 21104, 21407, 21408, 22153, 23084
Mexican standard broadcast stations; notification list, 20082
Press use of domestic private line service, preferential rates, 19916
Rulemaking proceedings filed, granted, denied, etc.; petitions by various companies, 18738, 20553, 21938
Satellite communications services; applications accepted for filing, 19291, 21032, 22778
Telephone network, connection of terminal equipment:
"Grandfathered" PBX and key telephone systems, 21937
Television translator applications ready and available for processing, 22778
World Administrative Radio Conference, 18748, 18761, 19915, 19920, 20865, 21518, 21937, 21944, 22779
Hearings, etc.:
Madison County Broadcasting et al., 19918
Motion Picture Association of America, Inc., 19717
Offshore Telephone Co., 19715

NOTICES

Meetings; Sunshine Act, 22517

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

RULES

Fishery conservation and management:
Atlantic haddock, cod, and yellowtail flounder; emergency regulations, 19233, 20505
Foreign fishing, fee schedule, etc., 19232
Salmon fisheries off Wash., Oreg., and Calif.; interim regulations and inquiry; extension of time, 21681, 22214
Surf clam and ocean quahog fisheries, Atlantic; effort procedures and quantity; correction, 19396
Surf clam and ocean quahog fisheries, Atlantic; fishing time reduced, 19397
Whaling:
Bowhead whales; taking by Indians, Aleuts or Eskimos for subsistence purposes, 22214

PROPOSED RULES

Financial aid to fisheries:
Foreign vessel caused damage in U.S. Fishery Conservation Zone; compensation, 20255
Fishery conservation and management:
Atlantic sea herring management plan; hearings of New England Fishery Management Council, 20519
Foreign fishing; tanner crab fishery, commercial, off Alaska, 21170
Groundfish, Atlantic; annual allocations of cod and haddock by vessel classes; plan amendment approval, 21339
Herring, groundfish, and ocean perch fishery management plans, etc.; meeting, 22064
Surf clam fishery management plan, etc.; meeting, 22064
Tanner crab fishery, commercial, off Alaska, 21170
Tuna, Atlantic fisheries:
Bluefin tuna; extension of time, 20027

NOTICES

Coastal zone management programs; environmental statements, hearings, etc.:
California, 19259
Hawaii, 21925
Maine, 18734
New Jersey, 21029
Fishery conservation and management:
Cod, haddock, and yellowtail flounder; quota revisions, 19060
Cod, haddock and yellowtail flounder; landing restrictions, 19429
Foreign fishing; Mexican zone; licensing procedures; shrimp or snapper/grouper, 19257
Foreign fishing; U.S. ventures within fishery conservation zone; policy statement, 20532
Fishery conservation and management, closures:
Tuna, yellowfin, 19258
Fishery conservation and management plans, meetings:
Butterfish, squid and mackerel; Mid-Atlantic Fishery Management Council; 23629
Butterfish and shark fishery; Mid-Atlantic Fishery Management Council, 22770
Foreign fishing applications; Gulf of Mexico Fishery Management Council, 20029
Groundfish; New England Fishery Management Council, 23628
Management plans, etc.; South Atlantic Fishery Management Council, 19701, 23629
North Pacific Fishery Management Council et al., 20030
Pacific Fishery Management Council et al., 19258
Sea Grant Review Panel, 19700
Shallow-water reef fish, pelagics and mollusks, etc.; Caribbean Fishery Management Council, 22231
Shrimp, etc.; Gulf of Mexico Fishery Management Council, 23628
Snapper-grouper; South Atlantic Fishery Management Council, 23629
Weather Modification Advisory Board, 19430
Western Pacific Fishery Management Council, 19259
Fishery management plans, environmental statements, meetings, etc.:
Groundfish fishery, Atlantic, 20531
Foreign nations fishing for resources subject to U.S. jurisdiction, fees; workshop, 22067
Improving Government regulations; inquiry, 23188
Marine mammal permit applications, etc.:
Aquarium of Cape Cod, Inc., 19256
Japan Deep Sea Trawlers Association et al., 23629
Marineland Oceanarium and Aquariums, 19258
Montreal Zoological Park, 19257
Mystic Marinelife Aquarium, 19700
Northwest and Alaska Fisheries Center, 19257
S.E.E. Okeansky Ribolov, 19905
Sea World, Inc., 18735
Siniff, Dr. Donald B., 20029
Zoological Society of London, 21497
Meetings:
Coastal Zone Management Advisory Committee, 22231
Foreign nations fishing for resources subject to U.S. jurisdiction, fees, 22067

NATIONAL PARK SERVICE

RULES

Traffic speed limits; Yellowstone National Park, Wyo., 21460

NOTICES

Authority delegations:
Abraham Lincoln Birthplace National Historic Site; Administrative Services Assistant, 22458
Big Thicket National Preserve; Administrative Officer, et al., 22458
Everglades National Park, Fla., Administrative Officer, et al., 21519
Fort Pulaski National Monument, Ga., Administrative Services Assistant, 21519
Moores Creek National Military Park, Administrative Clerk, 22458
Concession permits, etc.:

Science and Society Advisory Committee, 22251
Science Education Advisory Committee, 19080
Steering Committee Advisory Council, 22251
Meetings; Sunshine Act, 19986

NATIONAL TECHNICAL INFORMATION SERVICE

NOTICES

Improving Government regulations; inquiry, 23193
Inventions, Government-owned; availability for licensing, 18735, 18736, 21344, 22231

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

NOTICES

Computer programs and data bases for predicting radio systems performance; catalogue information solicitation, 21713
Improving Government regulations; inquiry, 23190
Meetings:
Frequency Management Advisory Council, 22232

NATIONAL TRANSPORTATION POLICY STUDY COMMISSION

See Transportation Policy Study, National Commission.

NATIONAL TRANSPORTATION SAFETY BOARD

NOTICES

Aircraft accidents; investigation hearings, 20283
Meetings; Sunshine Act, 18628, 19499, 20368, 21563
Safety recommendations and accident reports; availability, responses, etc., 19306, 20284, 21520, 22465
Third party communications; policy statement, 20283

NAVY DEPARTMENT

NOTICES

"Complaints of Wrong and Reports of Wrong", index; availability internally, not published, 21030
Meetings:
CNO Executive Panel Advisory Committee, 18602, 20835
Education and Training Advisory Board, 23629

NEIGHBORHOODS NATIONAL COMMISSION

PROPOSED RULES

Freedom of information, 20512
Privacy Act; implementation, 20511

NOTICES

Meetings:, 19726, 21520
Privacy Act; systems of records, 20568

NUCLEAR MATERIALS

See Environmental Protection Agency; Nuclear Regulatory Commission.

NUCLEAR REGULATORY COMMISSION

RULES

Nuclear facilities and materials; export and import:
Nuclear uses, peaceful, exports of facilities and material for, 21643
Reporting and recordkeeping requirements, approval by Comptroller General, 18989
Practice rules:
Review of decisions and actions; time extension policy, 22346
Production and utilization facilities; licensing:
Application updates; service of copies, 18539
Radiation protection standards:
Containers, empty; radioactive materials label removal, 22172

PROPOSED RULES

Byproduct material licensing:
Decommissioning criteria for nuclear material licensing; extension of time, 19053
Exemptions and continued regulatory authority in agreement States:
Safeguard requirements; moderate and low strategic significance material, 22216
Safeguards on nuclear material, US/IAEA agreement; implementation, 22365
Nuclear facilities and materials,export and import:
Minor quantities, 19861
Nuclear material, special; domestic licensing:
Access to or control over restricted data, criteria and procedures; hearings, 18682
Decommissioning criteria for nuclear facilities; extension of time, 19053
Inspection, resident; facilities and access, 19860
Possession of special nuclear material in transit; license requirements, 22215
Safeguard requirements; moderate and low strategic significance material, 22216
Safeguards on nuclear material, US/IAEA agreement; implementation, 22365
Plants and material, physical protection:
Safeguard requirements; moderate and low strategic significance material, 22216
Production and utilization facilities; domestic licensing:
Access to or control over restricted data, criteria and procedures; hearings, 18682
Decommissioning criteria for nuclear facilities; extension of time, 19053
Financial qualifications requirement, 22373
Inspection, resident; facilities and access, 19860
Safeguards on nuclear material, US/IAEA agreement; implementation, 22365
Source material licensing:
Decommissioning criteria for nuclear facilities; extension of time, 19053
Safeguards on nuclear material, US/IAEA agreement; implementation, 22365

NOTICES

Environmental agreements for cooperation with listed States:
New York, 19485
South Carolina, 19485
Virginia, 19485
Environmental statements; availability, etc.:
Exxon Minerals Co., 22796
Fuel, spent light water power reactor; handling and storage; extension of time, 19305
Offshore power systems, floating nuclear power plants, 20283, 22111
Oxide fuels, mixed; decision memorandum, 20575
Wyoming Mineral Corp., 19488
Fuel cycle facilities, status report; availability, 21087
International Atomic Energy Agency codes of practice and safety guides; availability of drafts, 21385, 21956
International Atomic Energy Agency manual; availability of drafts, 19305
Material control and accounting; report availability, 19083
Meetings:
Reactor Safeguards Advisory Committee, 18805, 19081, 19303, 19729, 20282, 20283, 20571, 21086, 21383, 21384, 22107, 22259, 22260, 23037
Regional State Liaison Officers, 20879
Risk Assessment Review Group, 19083, 21958
Meetings; Sunshine Act, 18831, 19104, 19330, 19754, 20368, 21106, 21977, 22154, 23086, 23675
Nuclear waste management goals; report availability, 20879
Oxide fuels, mixed:
Decision memorandum, 20575

INDEX

UMI

Safeguard domestic industry against hypothetical threat; report availability, 20575, 23665
Production and utilization facilities, licensing:
Health cost figures reduction; low level radiation exposure; hearing denied, 22253
Regulatory guides; issuance and availability, 19943, 20882, 21386, 22109, 23664
Standard review plan; issuance and availability, 19944, 19945, 21386, 21387, 22110, 22111
Applications, etc.:

UMI

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the LSA (List of CFR Sections Affected), the "Federal Register Index," or both.

LSA (List of CFR Sections Affected)
$10.00
per year

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **$8.00**
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the LSA (List of CFR Sections Affected) will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

CODE

LSA—LIST OF CFR SECTIONS AFFECTED

The LIST OF CFR SECTIONS AFFECTED is designed to lead users of the Code of Federal Regulations (CFR) to amendatory actions published in the Federal Register (FR). It should be shelved with current CFR volumes. Entries are by CFR title, chapter, part, and section. Proposed rules are listed at the end of appropriate titles, except for Title 41, in which proposed rules follow each chapter.

HOW TO USE THIS FINDING AID

The CFR is revised annually according to the following schedule:

Titles 1–16—as of Jan. 1
17–27— as of April 1
28–41— as of July 1
42–50—as of Oct. 1

To bring these regulations up to date, consult this LIST OF CFR SECTIONS AFFECTED for any changes, additions, or deletions published after the revision date of the volume you are using. Then check the CUMULATIVE LIST OF PARTS AFFECTED appearing at the front of the latest Federal Register for less detailed but timely changes published after the final date included in this publication.

Cite a page reference from this publication as 43 FR for 1978 page numbers. Example: Page 15628 cite as 43 FR 15628.

ISSUES TO BE SAVED

There is no single annual issue of the LIST OF CFR SECTIONS AFFECTED. Four ANNUAL ISSUES must be saved: the DECEMBER issue is the ANNUAL for Titles 1–16; the MARCH issue is the ANNUAL for Titles 17–27; the JUNE issue is the ANNUAL for Titles 28–41; the SEPTEMBER issue is the ANNUAL for Titles 42–50. ANNUAL ISSUES to be saved are clearly designated on the cover.

PARALLEL TABLE OF STATUTORY AUTHORITIES AND RULES

A table is included after Title 50 which contains references to the U.S. Code sections cited as authority for CFR regulations added or revised since July 1, 1977.

TABLE OF FEDERAL REGISTER ISSUE PAGES AND DATES

A table is included at the end of this publication which identifies the inclusive page numbers and corresponding Federal Register issue dates for the period covered.

INDEXES

An INDEX to the daily Federal Register is published monthly, quarterly, and annually for the calendar year. A separate volume, the CFR INDEX and finding aids to the entire Code of Federal Regulations, is revised as of July 1 each year.

INQUIRIES AND SUGGESTIONS

This publication was prepared under the editorial direction of Robert E. Lewis assisted by Rose Steinman, with Loren Myers and Carol Blanchard as Chief Editors. INQUIRIES, telephone 202–523–5227.

SUGGESTIONS concerning this and other publications of the Office will be welcomed by Fred J. Emery, Director, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

Chapter heading revised; eff. 12-31-77 7
301 Nomenclature changes 7
Authority citation revised 8
301.1 (a) and (d) amended 8
301.3 (a) and (b) amended 8
303.1 corrected 753
303.8 (a) corrected 753
(b) introductory text corrected 2169
369.1 Revised 3512
369.2 Revised 3517
(d) example (xvi) revised; (d) example (xviii) added 11576
369.3 Revised 3525
369.4 Redesignated as 369.6; new 369.4 added 3534
369.5 Added 3536
Redesignated as 369.8 5512
369.6 Redesignated from 369.4 3512
369.8 Redesignated from 369.5 5512
369 Appendix added 16969
370.11 (c) added 12675
371.2 (c)(8) and (9) revised; (c)(10) added 7312
371.14 Removed 16713
371.18 (b)(2) revised 10341
371.19 Revised 16713
372.11 (e)(4) and (f)(3) revised; (e)(5) through (8) redesignated as (e)(6) through (9) and (f)(4) through (7) redesignated as (f)(6) through (9); new (e)(5) and (f)(4) and (5) added; (j) removed 16971
373 Supplement No. 1 amended 16714
373.1 (a) and (b) redesignated as (b) and (c); new (a) added 7312

Additions to Table 1, July 1977 through May 1978

This table lists the sections of the U.S. Code and U.S. Statutes at Large which are being added to Table 1 as a result of authority citations carried in the *Federal Register* from July 1977 through May 1978. Recent legislation is carried by public law number at the end of the list.

Table 1 is in the CFR Index and finding aids revised as of July 1, 1977.

In order to determine the *Federal Register* page numbers of the parallel CFR citations, consult the List of CFR Sections Affected above.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

COAST GUARD

Rules

Districts, marine inspection zones, and captain of port areas:
Eleventh District; Los Angeles-Long Beach Marine Inspection; office relocation 18553
Seventh District; boundary realignments; correction 18553

Proposed Rules

Regattas:
President's Cup Regatta, Potomac River, Wash., D.C 18571
Vessel traffic management:
Oil tanker ownership information; marine environment protection; hearing 18571
Waterfront facilities explosives handling; pollution; environment and safety; meeting 18571

COMMERCE DEPARTMENT

See also Census Bureau; Economic Development Administration; Industry and Trade Administration.

Notices

Committees; establishment, renewals, terminations, etc.:
Pacific Fishery Management Council Advisory Panel 18601

DEFENSE DEPARTMENT

See Army Department; Navy Department.

ECONOMIC DEVELOPMENT ADMINISTRATION

Rules

Economic Development districts; private citizen representation requirement 18541

Notices

Business Development Program; applications for assistance 18626
Import determination petitions:
Ronson Corp., et al 18599

EDUCATION OFFICE

Notices

Applications and proposals, closing dates:
School construction program; Federally affected areas 18613

ENERGY DEPARTMENT

See also Hearings and Appeals Office, Energy Department.

Notices

Administrator, Southwestern Power Administration; adjustment of salary 18611
Improving Government regulations; inquiry 18634

ENVIRONMENTAL PROTECTION AGENCY

Notices

Water pollution control; safe drinking water; public water systems designations:
New Hampshire 18611
Rhode Island 18611

FARMERS HOME ADMINISTRATION

Rules

Insurance:
Flood Insurance Program, National; servicing companies.. 18538

FEDERAL AVIATION ADMINISTRATION

Rules

Airworthiness directives:
Cessna 18541
Area high routes 18551
Control zones 18550
Control zones and transition areas 18550

FEDERAL COMMUNICATIONS COMMISSION

Proposed Rules

FM broadcast stations; table of assignments:
Alaska 18574

FEDERAL CROP INSURANCE CORPORATION

Rules

Crop insurance; various commodities:
Barley, et al 18536
Forage seeding 18537
Wheat (2 documents) 18537

FEDERAL DEPOSIT INSURANCE CORPORATION

Rules

Fair housing; advertising, poster, and recordkeeping requirements; effective date deferred 18540

FEDERAL HIGHWAY ADMINISTRATION

Notices

Bridge tolls, etc.:
Delaware River Port Authority 18618

FEDERAL INSURANCE ADMINISTRATION

Proposed Rules

Flood elevation determinations:
New Hampshire 18563
New York 18564
New York; correction 18564
Pennsylvania 18565
South Carolina 18565
Texas (4 documents) 18566–18567
Virginia (2 documents) 18568
Washington 18569
Wisconsin 18569

FEDERAL MARITIME COMMISSION

Proposed Rules

Practice and procedure:
Freight charges in foreign commerce; permission to refund or waive; applications.. 18572

Notices

Agreements filed, etc 18612

FEDERAL REGISTER OFFICE

Rules

CFR checklist; 1977 issuances ... 18535

FEDERAL RESERVE SYSTEM

Rules

Equal credit opportunity and truth-in-lending:
Official staff interpretations issuance; procedures 18537
Truth-in-Lending:
Official staff interpretations issuance; procedures 18537

Notices

Applications, etc.:
Community Bancorporation .. 18613
Republic of Texas Corp 18613
Weatherford Bancshares, Inc. 18613

FINE ARTS COMMISSION

Notices

Meetings 18602

FISH AND WILDLIFE SERVICE

Proposed Rules

Endangered species convention; lechwe and leopard, status review; inquiry 18583

Notices

Endangered and threatened species permits; applications (2 documents) 18614, 18615

FOREIGN ASSETS CONTROL OFFICE

Notices

Rhodesian sanctions; imports of ferrochromium and chromium-bearing steel products from listed countries:
Philippines 18619

GENERAL SERVICES ADMINISTRATION

See Federal Register Office.

HEALTH, EDUCATION, AND WELFARE DEPARTMENT

See also Education Office; Human Development Services Office.

Notices

Nondiscrimination:
Federally assisted programs; policy determinations 18630

HEARINGS AND APPEALS OFFICE, ENERGY DEPARTMENT

Notices

Applications for exception, etc.; cases filed (3 documents) 18605–18610

HOUSING AND URBAN DEVELOPMENT DEPARTMENT

See Federal Insurance Administration.

HUMAN DEVELOPMENT SERVICES OFFICE

Notices

Organization and functions:
Program elements, headquarters staff units, etc 18613

INDUSTRY AND TRADE ADMINISTRATION

Notices

Scientific articles; duty free entry:
Carnegie-Mellon University, et al.; correction 18601
National Institutes of Health 18599
National Radio Astronomy Observatory Associated Universities, Inc 18599
University of California, Los Alamos Scientific Laboratory (2 documents) 18600
University of Miami 18600

Table of Effective Dates and Time Periods—May 1978

This table is for use in computing dates certain in connection with documents which are published in the FEDERAL REGISTER subject to advance notice requirements or which impose time limits on public response.

Federal Agencies using this table in calculating time requirements for submissions must allow sufficient extra time for FEDERAL REGISTER scheduling procedures.

In computing dates certain, the day after publication counts as one. All succeeding days are counted except that when a date certain falls on a weekend or holiday, it is moved forward to the next Federal business day. (See 1 CFR 18.17)

A new table will be published monthly in the first issue of each month.

Dates of FR publication	15 days after publication	30 days after publication	45 days after publication	60 days after publication	90 days after publication
May 1	May 16	May 31	June 15	June 30	July 31

PROCLAMATION 4567

Loyalty Day, 1978

By the President of the United States of America

A Proclamation

Throughout the remainder of our third century of national existence, America will face problems that will differ markedly from those we have confronted in the past. Yet some things will remain constant. Among these is the loyalty of the American people.

Because we are a free people, the loyalty we feel to our country is deeper than that which any imposed political or ideological orthodoxy could possibly evoke. And as long as we continue to remain faithful to the principles and freedoms on which our republic was founded, that loyalty will see us through whatever challenges lie ahead.

To encourage the people of the United States to reflect upon the liberties and institutions that have inspired the loyalty of so many generations of Americans, the Congress, by joint resolution of July 18, 1958 (72 Stat. 369; 36 U.S.C. 162) has designated the first day of May of each year as Loyalty Day and has requested the President to issue a proclamation calling for its appropriate observance.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, call upon all Americans to observe Monday, May 1, 1978, as Loyalty Day. I ask the appropriate officials of the Government to display the flag of the United States on that day on all Government buildings.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-seventh day of April, in the year of our Lord nineteen hundred seventy-eight, and of the Independence of the United States of America the two hundred and second.

Jimmy Carter

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

[1505-01]

Title 1—General Provisions

CHAPTER I—ADMINISTRATIVE COMMITTEE OF THE FEDERAL REGISTER

CFR CHECKLIST

1977 Issuances

This checklist, prepared by the Office of the Federal Register, is published in the first issue of each month. It is arranged in the order of CFR titles, and shows the revision date and price of the volumes of the Code of Federal regulations issued to date for 1977. New units issued during the month are announced on the back cover of the daily FEDERAL REGISTER as they become available.

For a Checklist of current CFR volumes comprising a complete CFR set, see the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The rate for subscription service to all revised volumes issued for 1977 is $400 domestic, $100 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 6—IMPORT QUOTAS AND FEES

Subpart—Section 22 Import Quotas

PRICE DETERMINATION FOR CERTAIN CHEESE

AGENCY: Foreign Agricultural Service.

ACTION: Final rule.

SUMMARY: The subpart, section 22 Import Quotas, is amended to change the price, determined by the Secretary of Agriculture, which is used as a basis for establishing import restrictions under section 22 on certain cheese. The change from $1.05 to $1.10 per pound is required since one of the factors used in determining such price (the Commodity Credit Corporation purchase price for Cheddar cheese under the milk support program) has been increased.

EFFECTIVE DATE: May 1, 1978. (See Supplementary Information)

FOR FURTHER INFORMATION CONTACT:

Bryant H. Wadsworth, Head, Dairy

V 4 3 — 8 4

and Import Group, Dairy, Livestock and Poultry Division, FCA, Foreign Agricultural Service, Room 6621 So. Agricultural Building, United States Department of Agriculture, Washington, D.C. 20250, 202-447-5270.

SUPPLEMENTARY INFORMATION: Since the action taken herewith involves foreign affairs functions of the United States, this amendment falls within the foreign affairs exception to the notice and effective date provisions of 5 U.S.C. 553. (Sec. 3, 62 Stat. 1248, as amended, 7 U.S.C. 624; Part 3 of the Appendix to the Tariff Schedules of the United States, 19 U.S.C. 1202)

EFFECTIVE DATE

In accordance with headnote 3(a)(v) of Part 3 of the Appendix to the Tariff Schedules of the United States, the change in price effected by this amendment would not make the import restrictions contained in items 950.10B through 950.10E of Part 3 of the Appendix to the Tariff Schedules of the United States applicable to cheese having a purchase price of $1.05 or more per pound if such cheese had been exported to the United States on a through bill of lading or had been placed in a bonded warehouse on or before May 1, 1978.

The subpart, section 22 Import Quotas of Part 6, Subtitle A of Title 7, is amended as follows:

1. Section 6.16, under the heading "Price Determination for Certain Quotas," is amended to read as follows:

§ 6.16 Price determination.

The price referred to in items 950.10B through 950.10E of Part 3 of the Appendix to the Tariff Schedules, determined by the Secretary of Agriculture in accordance with headnote 3(a)(v) of said Part 3, is $1.10 per pound. This price shall continue in effect until changed by amendment of this section.

APPENDIX 1 [AMENDED]

2. Group V of Appendix 1, under the heading "Licensing Regulations," is amended by changing the description appearing immediately below "Group V" to read as follows:

Cheese described below, if shipped otherwise than in pursuance to a purchase, or if having a purchase price under $1.10 per pound.

Issued at Washington, D.C. this 25th day of April 1978.

BOB BERGLAND,
Secretary.

CHAPTER IV—FEDERAL CROP INSURANCE CORPORATION, DEPARTMENT OF AGRICULTURE

[Amdt. No. 97]

PART 401—FEDERAL CROP INSURANCE

Subpart—Regulations for the 1969 and Succeeding Crop Years

CLOSING DATES

AGENCY: Federal Crop Insurance Corporation.

ACTION: Final rule.

SUMMARY: This is an extension of the final dates for the filing of applications for crop insurance for the 1978 crop year on barley, corn, oats, potatoes, and wheat having an April 30 or earlier closing date in those counties where such insurance is otherwise authorized to be offered. The extension will be until May 1 for all crops listed. This extension will coincide with the ASCS acreage, offsetting compliance, and signup period of April 30 and allow farmers more time to make decisions on their insurance plans along with signup intentions.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-3325.

SUPPLEMENTARY INFORMATION: On January 12, 1978, the Agricultural Stabilization and Conservation Service (ASCS) issued notification of acreage, offsetting compliance, and signup period, which indicates the signup period for filing an intention to participate on farms with a crop subject to set-aside will be March 1 through April 30. Since April 30 is on a Sunday, intentions will be accepted by ASCS the following Monday, May 1, 1978.

The ASCS set-aside announcement will have significant impact on farm operations and farmers are presently involved in decisionmaking regarding the set-aside acreage. Since crop insurance is involved in the overall farm operation decisionmaking process and the closing dates for many crops insured by the Federal Crop Insurance Corporation falls long before the end of the ASCS signup date of May 1, 1978, the Corporation has determined that the closing dates for filing applications for crop insurance on barley, corn, oats, potatoes, and wheat, having an April 30 or earlier closing date, should be extended to coincide with the end of the ASCS signup period. This will allow farmers more time to include plans for crop insurance on those crops subject to set-aside.

Accordingly, under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), and in accordance with the applicable provision in the Federal crop insurance regulations for the 1969 and succeeding crop years (7 CFR § 401.103(c), 32 FR 15911, Nov. 21, 1967), allowing for such extensions, the Federal Crop Insurance Corporation is extending, effective for the 1978 crop year, the closing date for the acceptance of applications for crop insurance on barley, corn, oats, potatoes, and wheat through May 1, 1978, as indicated below.

Since these extensions will benefit producers by providing more time to file applications for crop insurance, and since producers need to be informed of these extensions immediately, it is found and determined that compliance with the procedure for notice and public participation in the proposed rulemaking process would be impracticable, unnecessary, and contrary to the public interest. Therefore, this amendment is issued without compliance with such procedure.

Accordingly, 7 CFR § 401.103(a) is amended by adding at the end thereof the following:

§ 401.103 Application for insurance.

(a) • • • The time for filing applications for the 1978 crop year on the following crops in those States and counties so indicated is hereby extended until the close of business on Monday, May 1, 1978. Such applications received during this period will be accepted only after it is determined that no adverse selectivity will result.

BARLEY

Modoc and Siskiyou Counties, Calif. All counties in Colorado, Minnesota, Montana, North Dakota, South Dakota, Utah, and Wyoming. Klamath and Malheur Counties, Oreg. All Idaho counties south of Idaho County.

CORN

All counties in all States.

OATS

All counties in all States.

POTATOES

Grant County, Wash., and Canyon County, Idaho.

WHEAT

All counties in Minnesota and North Dakota. The following counties in South Dakota: Aurora, Beadle, Bon Homme, Brown, Campbell, Clark, Codington, Corson, Day, Deuel, Douglas, Edmunds, Grant, Hamlin, Hutchinson, Jerauld, Kingsbury, McPherson, Marshall, Miner, Perkins, Roberts, and Spink.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended (7 U.S.C. 1506, 1516).)

Dated: April 25, 1978.

PETER F. COLE,
Secretary, Federal Crop Insurance Corporation.

Dated: April 25, 1978.

Approved:

BOB BERGLAND,
Secretary.

[FR Doc. 78-11734 Filed 4-28-78; 8:45 am]

[3410-08]

[Amdt. No. 98]

PART 401—FEDERAL CROP INSURANCE

Subpart—Regulations for the 1969 and Succeeding Crop Years

WHEAT ENDORSEMENT

AGENCY: Federal Crop Insurance Corporation.

ACTION: Final rule.

SUMMARY: This rule changes the wheat endorsement to add Gregory County, S. Dak., to the cancellation and termination for indebtedness date table. Gregory County was added for wheat crop insurance effective with the 1979 crop year.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-3325.

SUPPLEMENTARY INFORMATION: Under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), the Federal Crop Insurance Corporation is amending its regulations found in 7 CFR 401.126 The Wheat Endorsement (33 FR 2376, January 31, 1968), to list Gregory County, S. Dak., in the table at the end thereof which lists the cancellation and termination for indebtedness dates.

Gregory County was added as a new county for wheat crop insurance effective with the 1979 crop year. The amendment No. 98 to the Federal crop insurance regulations for the 1969 and succeeding crop years merely adds the name of the county to the list as indicated above.

In view of the foregoing, the Corporation has found and determined that compliance with the procedure for notice and public participation would be impracticable, unnecessary, and contrary to the public interest.

Accordingly, this amendment No. 98 is hereby issued without compliance with such procedure.

Pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), section 7 of the endorsement contained in § 401.126 of the Federal crop insurance regulations contained in 7 CFR, Part 401, is amended effective with the 1979 crop year in the following respect:

§ 401.126 The wheat endorsement (applicable in all States except North Dakota).

• • • • • •

7. Cancellation and termination for indebtedness dates.

• • • • • •

In the table at the end thereof, under the section listing counties in South Dakota, insert the word "Gregory" immediately after the work "Faulk" and immediately before the word "Haakon."

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U.S.C. 1506, 1516.)

Dated: April 25, 1978.

PETER F. COLE,
Secretary, Federal Crop Insurance Corporation.

Dated: April 25, 1978.

Approved:

BOB BERGLAND,
Secretary.

[Amdt. No. 1]

PART 414—FORAGE SEEDING CROP INSURANCE

Subpart—Regulations for the 1978 and Succeeding Crop Years

CLOSING DATES

AGENCY: Federal Crop Insurance Corporation.

ACTION: Final rule.

SUMMARY: This is an extension of the final date for the filing of applications for crop insurance for the 1978 crop year on forage seeding in counties where such insurance is otherwise authorized to be offered. The current closing date is April 15 in all States except New York, which is July 31 and need not be extended. This extension will be through May 6, 1978, for the 1978 crop year only and is being made to allow sufficient time for producers to become familiar with this new program inasmuch as the forage seeding crop insurance application period will only be open for approximately 15-20 days due to the late start of the program offer.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-3325.

SUPPLEMENTARY INFORMATION: It is expected that the forage seeding crop insurance program, recently enacted by the Board of Directors of the Federal Crop Insurance Corporation, will become effective with approximately 15-20 days before the April 15 closing date for accepting applications. In order to provide more time for producers to examine this new program, it has been determined by the Corporation to extend the closing date for the filing of applications for the 1978 crop year until the close of business on Saturday, May 6, 1978, thus allowing an additional 20 days. This extension of closing date will be applicable for the 1978 crop year only due to the short time available.

Accordingly, under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 et seq.), and in accordance with § 414.3(b) of the forage seeding crop insurance regulations for the 1978 and succeeding crop years (7 CFR Part 414), allowing for such extensions, the Federal Crop Insurance Corporation is extending, effective for the 1978 crop year, the closing date for accepting applications for forage seeding crop insurance through the close of business on Saturday, May 6, 1978, as indicated below.

Since this extension will benefit the producer by providing additional time for filing, and since producers need to be informed of this extension immediately, it is found and determined that compliance with the procedure for notice and public participation in the proposed rulemaking process would be impracticable, unnecessary, and contrary to the public interests. Therefore, this amendment is issued without compliance with such procedure.

Accordingly, 7 CFR § 414.3(a) is amended by adding at the end thereof the following sentence:

§ 414.3 Application for insurance.

(a) • • • The time for filing applications for the 1978 crop year for forage seeding crop insurance is hereby extended until the close of business on Saturday, May 6, 1978, in all States except New York. Such applications received during this period will be accepted only after it is determined that no adverse selectivity will result.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended (7 U.S.C. 1506, 1516).)

Dated: April 25, 1978.

PETER F. COLE,
Secretary, Federal Crop Insurance Corporation.

Dated: April 25, 1978.

Approved:

BOB BERGLAND,
Secretary.

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—GENERAL REGULATIONS

[FmHA Instruction 426.2]

PART 1806—INSURANCE

Subpart B—National Flood Insurance

SERVICING COMPANIES

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: Farmers Home Administration amends its regulations regarding servicing companies for the national flood insurance program. The intended effects of the action is to list the servicing company to be contacted for information regarding the national flood insurance. This action is necessitated by the new Federal Insurance Administration (FIA) contract which took effect January 1, 1978.

DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Jerry B. Ireton, 202-447-4296.

SUPPLEMENTARY INFORMATION: The table of sections of part 1806, and exhibit B of subpart B of part 1806, chapter XVIII, Title 7, Code of Federal Regulations, are amended. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This amendment, however, is not published for proposed rulemaking since the purpose of the change is to reflect the new agreement between FIA and the servicing company public participation as to this FmHA regulation is therefore unnecessary.

Accordingly, the table of contents of part 1806 and exhibit B of subpart B of part 1806 read as follows:

Subpart B—National Flood Insurance

Sec.

1806.21 General.
1806.22 Areas of responsibility.
1806.23 Definitions.
1806.24 Eligibility.
1806.25 Conditions.
1806.26 Coverage and premium rates.
1806.27 Acceptable policies and servicing.
Exhibit A—Coverage and premium rates.
Exhibit B—Servicing company.

• • • • •

EXHIBIT B—SERVICING COMPANY

The servicing company office to be contacted for information relative to the availability of coverage under the national flood insurance program, flood hazard boundary maps, insurance rate tables, and related material.

E.D.S. Federal Corporation, National Flood Insurance, P.O. Box 34294, Bethesda, Md. 20034, phone toll-free 800-638-6620; commercial phone 301-898-5900.

(7 U.S.C. 1989; 42 U.S.C. 1480; 42 U.S.C. 2942; 5 U.S.C. 301; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 and OMB Circular A-107.

Dated: April 17, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

[FR Doc. 78-11721 Filed 4-28-78; 8:45 am]

[7590-01]

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 50—LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

Minor and Clarifying Amendments

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Commission's "Licensing of Production and Utilization Facilities" is hereby amended. The amendments make changes relating to the service of copies of an updated application for a license to construct a production or utilization facility so as to reflect the current practice regarding the NRC officers who are to receive copies of such updated applications. The amendments also provide clarifying language as to when the application should be updated, and substitute clarifying language regarding the service of copies of any subsequent amendments to the application.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Royal J. Voegeli, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone 301-492-7437.

SUPPLEMENTARY INFORMATION: 10 CFR 50.30(c)(2) presently provides that an applicant for a license to construct a production or utilization facility who has updated its application shall, upon notification of the appointment of an atomic safety and licensing board to conduct the public hearing required by the Atomic Energy Act for the issuance of a construction permit, serve copies of such updated application on each atomic safety and licensing board member and alternate, the Chairman of the Atomic Safety and Licensing Board Panel, the Office of the Secretary, and the Director of Nuclear Reactor Regulation or the director of Nuclear Material Safety and Safeguards. The current NRC practice is to not require serving copies on the Office of the Secretary, the Chairman of the Atomic Safety and Licensing Board Panel, the Director of Nuclear Reactor Regulation or the Director of Nuclear Material Safety and Safeguards. Applicants are, however, requested to serve a copy on the Atomic Safety and Licensing Appeal Panel. In order to reflect the current practice, the present amendments delete the language designating the NRC officers who are to be served copies of the updated application, and provide instead that copies shall be served as directed by the atomic safety and licensing board appointed to conduct the public hearing on the application. In addition, the amendments provide that the applicant shall serve a copy on the Atomic Safety and Licensing Appeal Panel, and that at the time the application is offered into evidence at the public hearing on the application, the applicant shall provide sufficient updated copies so that one may be served by the Office of the Secretary upon the Atomic Safety and Licensing Appeal Panel. The amendments also provide clarifying language as to when the application is to be updated by providing that the applicant shall update its application when notified to do so by the atomic safety and licensing board appointed to conduct the public hearing on the application. The amendments also substitute clarifying language regarding the service of copies of any subsequent amendments to the application.

Because these amendments relate solely to minor matters, it has been found that good cause exists for omitting notice of proposed rule making, and public procedure thereon, as unnecessary, and for making the amendments effective upon publication in the FEDERAL REGISTER (May 1, 1978).

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 552 and 553 of Title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Part 50 are published as a document subject to codification.

1. Paragraph (c)(2) of § 50.30 of 10 CFR Part 50 is amended to read as follows:

§ 50.30 Filing of application for license; oath or affirmation.

• • • • •

(c) *Number of copies of applications.*

• • •

(2) With respect to an application for a license described in subdivision (1)(i) of this paragraph, the applicant shall, upon notification by the atomic safety and licensing board appointed to conduct the public hearing required by the Atomic Energy Act for the issuance of a construction permit, update the application and serve such updated copies of the application or parts thereof, eliminating all superseded information, together with an index of the updated application, as directed by the atomic safety and licensing board. In addition, at that time the applicant shall serve one such copy on the Atomic Safety and Licensing Appeal Panel. Further, at the time the application is offered into evidence at the public hearing on the application, the applicant shall provide sufficient updated copies so that one may be served by the Office of the Secretary on the Atomic Safety and Licensing Appeal Panel. Any subsequent amendments to the application shall be served on those served copies of the application, and three signed originals and the specified number of copies of such amendments shall be filed with the Director of Nuclear Reactor Regulation or Director of Nuclear Material Safety and Safeguards, as appropriate as provided in paragraph (c)(1)(i) of this section. At the time of filing of such an application, one copy shall be made available in an appropriate office near the site of the proposed facility for inspection by the public and updated as amendments to the application prior to the public hearing may be made. This updated copy shall be produced at the public hearing for the use of any other parties to the proceeding. The applicant shall certify that the updated copies of the application contain the current contents of the application submitted in accordance with the requirements of this part. The applicant shall also update and serve copies of the application and make available a copy of such updated application in an appropriate office near the site of the facility for inspection by the public at such time as the Commission may issue a notice of public hearing concerning the issuance of an operating license.

(Sec. 161, Pub. L. 83-703, 68 Stat. 948 (42 U.S.C. 2201); Sec. 201, Pub. L. 93-438, 88 Stat. 1242 (42 U.S.C. 5841).)

Dated at Bethesda, Md. this 24th day of April, 1978.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,
Executive Director for Operations.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Regs. B and Z; Docket No. R-0154]

PART 202—EQUAL CREDIT OPPORTUNITY

PART 226—TRUTH IN LENDING

Amendment to Procedures for Issuing Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This amendment to Regulation B, Equal Credit Opportunity, and Regulation Z, Truth in Lending, revises the Board's existing procedures for issuing official staff interpretations.

The amendment provides that official staff interpretations will be published in the FEDERAL REGISTER with a 30 day delayed effective date. If a request for public comment is received, the effective date will be suspended and the interpretation published for comment. Once the comments have been analyzed, a final version of the interpretation will be published. The current criteria for determining whether a question merits an official staff interpretation and the procedures for a request for reconsideration are eliminated.

EFFECTIVE DATE: Immediately.

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Chief Staff Attorney, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, 202-452-2761.

SUPPLEMENTARY INFORMATION: The Equal Credit Opportunity Act and Truth in Lending Act provide for the issuance of official staff interpretations. Regulations B and Z, which implement these laws, set forth procedures and criteria for requesting an official staff interpretation. Currently, official staff interpretations are issued when clarification of a technical ambiguity in the regulation is required or when a request does not involve significant policy implications. The interpretation is published in the FEDERAL REGISTER within a week or two of issuance, to be effective at the time of publication. The regulations also provide for reconsideration of an official staff interpretation if a request is submitted within 30 days of publication.

The Board is amending Regulations B and Z to provide for a delayed effective date and for an opportunity for public comment on official staff interpretations. The Board believes this change in procedure is appropriate because it will enable the public to review official staff interpretations before they become final. If an official staff interpretation is challenged, the new procedures will enable the new staff to reconsider it in the light of public comments.

The amendment provides that official staff interpretations will be published in the FEDERAL REGISTER within a week or two of issuance but will become effective only upon the expiration of thirty days. If a request for public comment is received or postmarked within the 30 days, the effective date of the interpretation will be suspended. Notice of the suspension of the effective date and the interpretation will then be published for public comment as soon as possible. Any comments received will be reviewed and a final interpretation issued to be effective upon publication in the FEDERAL REGISTER.

EXPLANATION OF AMENDMENT

The references to official or formal Board interpretations have been deleted because the Administrative Procedure Act and the Board's Rules of Procedure (12 CFR 262.3) independently provide opportunity for requests for Board action. Sections 202.1(d) and 226.1(d) deal only with staff action and procedures.

The language in the second and third sentences of subsection (d)(1) of the regulations regarding the signature of the requester or authorized agent, and copies of documents accompanying a request has been deleted because the Board believes that such requirements have proved unnecessary. In the same subsection, the language concerning a substantive response has been deleted as it is no longer applicable. The time for acknowledging the request for an offical staff interpretation has been reduced from fifteen to five business days.

The provision for requests for reconsideration of official staff interpretations has been deleted because this amendment provides an opportunity for public comment and the Board's Rules of Procedure independently provide for Board consideration of the underlying issue.

The requirements in subsection (d)(4)(ii) that official staff interpreta-

M Y 1 — 7 8
UMI

V 4 3 — 8 4 M Y 1 7 8 UMI

tions deal with clarification of a technical ambiguity in the regulation or have no significant policy implications have been deleted because the Board has determined that these criteria are not sufficiently specific to be useful. However, official staff interpretations will not address policy questions, which will be referred to the Board for its consideration.

The prohibition on issuance of interpretations approving creditors' or lessors' forms or language has been moved from subsection (d)(3) to (d)(2)(i). The description of the two types of staff interpretations, followed by a description of the manner in which they may be obtained, will enable an interested party to determine, first, which kind of interpretation to seek and, second, how to request it.

A new subsection (d)(3) has been added to provide for requests for public comment on official staff interpretations. Such requests must be postmarked or received by the Secretary, Board of Governors of the Federal Reserve System, within 30 days of the interpretation's publication in the FEDERAL REGISTER. A statement of the reasons why public comment is appropriate must accompany the request.

TEXT OF AMENDMENT

1. Pursuant to the authority granted under section 703 of the Equal Credit Opportunity Act (15 U.S.C. 1691(b)), the Board amends Regulation B, 12 CFR 202.1(d) as follows:

§ 202.1 Authority, scope, enforcement, penalties and liabilities, interpretations.

* * * * *

(d) *Issuance of staff interpretations.* (1) Unofficial staff interpretations will be issued at the staff's discretion where the protection of section 706(e) of the Act is neither requested nor required, or where a rapid response is necessary.

(2) (i) Official staff interpretations will be issued at the discretion of designated officials. No such interpretation will be issued approving creditors' or lessors' forms or statements. Any request for an official staff interpretation of this Part must be in writing and addressed to the Director of the Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The request must contain a complete statement of all relevant facts concerning the credit or lease transaction or arrangement and must include copies of all pertinent documents.

(ii) Within 5 business days of receipt of the request, an acknowledgment will be sent to the person making the request. If, in the opinion of the designated officials, issuance of an official staff interpretation is appropriate, it will be published in the FEDERAL REGISTER to become effective 30 days after the publication date. If a request for public comment is received, the effective date will be suspended. The interpretation will then be republished in the FEDERAL REGISTER and the public given an opportunity to comment. Any official staff interpretation issued after opportunity for public comment shall become effective upon publication in the FEDERAL REGISTER.

(3) Any request for public comment on an official staff interpretation of this Part must be in writing and addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, and postmarked or received by the Secretary's office within 30 days of the interpretation's publication in the FEDERAL REGISTER. The request must contain a statement setting forth the reasons why the person making the request believes that public comment would be appropriate.

(4) Pursuant to section 706(e) of the Act, the Board has designated the Director and other officials of the Division of Consumer Affairs as officials "duly authorized" to issue, at their discretion, official staff interpretations of this Part.

2. Pursuant to the authority granted under § 105 of the Truth in Lending Act (15 U.S.C. 1604), the Board amends Regulation Z, 12 CFR 226.1(d), as follows:

§ 226.1 Authority, Scope, Purpose, etc.

* * * * *

(d) *Issuance of staff interpretations.* (1) Unofficial staff interpretations will be issued at the staff's discretion where the protection of section 130(f) of the Act is neither requested nor required, or where a rapid response is necessary.

(2) (i) Offical staff interpretations will be issued at the discretion of designated officials. No such interpretation will be issued approving creditors' or lessors' forms or statements. Any request for an official staff interpretation of this Part must be in writing and addressed to the Director of the Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The request must contain a complete statement of all relevant facts concerning the credit or lease transaction or arrangement and must include copies of all pertinent documents.

(ii) Within 5 business days of receipt of the request, an acknowledgment will be sent to the person making the request. If, in the opinion of the designated officials, issuance of an official staff interpretation is appropriate, it will be published in the FEDERAL REGISTER to become effective 30 days after the publication date. If a request for public comment is received, the effective date will be suspended. The interpretation will then be republished in the FEDERAL REGISTER and the public given an opportunity to comment. Any official staff interpretation issued after opportunity for public comment shall become effective upon publication in the FEDERAL REGISTER.

(3) Any request for public comment on an official staff interpretation of this Part must be in writing and addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, and postmarked or received by the Secretary's office within 30 days of the interpretation's publication in the FEDERAL REGISTER. The request must contain a statement setting forth the reasons why the person making the request believes that public comment would be appropriate.

(4) Pursuant to section 130(f) of the Act, the Board has designated the Director and other officials of the Division of Consumer Affairs as officials "duly authorized" to issue, at their discretion, official staff interpretations of this Part.

By order of the Board of Governors, April 21, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

PART 338—FAIR HOUSING

Deferral of Effective Date for Fair Housing Advertising, Poster, and Recordkeeping Requirements

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Deferral of effective date for final rules.

SUMMARY: The Federal Deposit Insurance Corporation postpones to July 3, 1978 the effective date for its adopted Fair Housing Regulations published on pages 11563 through 11568 of the FEDERAL REGISTER dated March 20, 1978 because of requests for additional time to prepare for compliance and the need to disseminate information regarding the numerous inquiries that have been made concerning the proper interpretation of the regulations.

EFFECTIVE DATE: July 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Jerry L. Langley, Senior Attorney, Federal Deposit Insurance Corporation, 550-17th Street NW., Washington, D.C. 20429, telephone 202-389-4237.

By order of the Board of Directors, April 25, 1978.

ALAN R. MILLER,
Executive Secretary.

[FR Doc. 78-11763 Filed 4-28-78; 8:45 am]

[3510-24]

Title 13—Business Credit and Assistance

CHAPTER III—ECONOMIC DEVELOPMENT ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 303—ECONOMIC DEVELOPMENT DISTRICTS

Extension of Time To Comply with the Private Citizen Representation Requirement

AGENCY: Economic Development Administration (EDA), Department of Commerce.

ACTION: Final rule.

SUMMARY: This rule revises the regulation which requires certain district organizations to comply with the representation of private citizens requirement by May 1, 1978. EDA is making this change because it is currently reconsidering the amount of representation that private citizens must have on district organizations. The effect of this rule is to postpone the date by which district organizations must comply with this requirement until October 1, 1978 in order to give EDA time to conclude its deliberations.

DATES: Effective date: April 27, 1978. Comments by: May 31, 1978.

ADDRESSES: Send comments to: Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Information on Regulations:

James F. Marten, U.S. Department of Commerce, Room 7009, Washington, D.C. 20230, 202-377-5441.

SUPPLEMENTARY INFORMATION: EDA is currently reconsidering the requirement of § 303.4(c)(3) that one-third of the members of the governing boards of economic development districts must be private citizens. While EDA has not decided to change the requirement at this time, it will continue to reconsider the requirement for the next few months; § 303.4(a)(2) of 13 CFR requires compliance with the one-third private citizen provision no later than May 1, 1978. In that compliance with § 303.4(c)(3) will require districts to make changes in the composition of their governing boards over the course of the next several months. EDA believes it is unfair to require them to make these changes while it is considering modifying that requirement. In order to give EDA time to reconsider this requirement without burdening the districts with possibly needless reorganization of their boards, EDA is extending the time of compliance until October 1, 1978.

Because this rule relates to EDA grant and loan programs, it is exempted from the notice and comment procedures described in section 553 of the Administrative Procedure Act (5 U.S.C. 553). However, in the spirit of the public policy set forth in that Act, interested persons may submit written suggestions regarding this amendment to the above address.

Due to the technical nature of this rule, EDA has determined that this document does not constitute a significant regulation under Executive Order 12044 and that it is exempt from the procedural requirements imposed by that order.

Accordingly, 13 CFR 303.4 is amended to read as follows:

§ 303.4 District organization.

(a) * * *

(2) Each development organization shall comply with the representation requirement set forth in paragraph (c)(3) of this section no later than October 1, 1978.

* * * * *

(Sec. 701, Pub. L. 89-136, 79 Stat. 570 (42 U.S.C. 3211); Department of Commerce Organization Order 10-4, as amended (40 FR 56702, as amended).)

Dated: April 27, 1978.

ROBERT T. HALL,
Assistant Secretary for Economic Development.

[4910-13]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-CE-6-AD; Amdt. 39-3202]

PART 39—AIRWORTHINESS DIRECTIVES

Cessna 336, 337, T337, P337, and M337 Series Airplanes

AGENCY: Federal Aviation Administrative (FAA), DOT.

ACTION: Final rule, supersedure of existing airworthiness directive.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Cessna 336, 337, T337, P337, and M337 series airplanes, which supersedes AD 76-10-11. In addition to incorporating those provisions requiring repetitive inspections of wing front and rear spar lower caps for cracks originally set forth in AD 76-10-11, the new AD requires repetitive inspections of the inboard end of the wing front spar web and web doubler for cracks on certain airplanes. Approximately 490 additional airplanes are added to the AD applicability. This action will assure continued structural integrity of wing front and rear spar lower caps and the inboard end of the front spar web on affected airplanes and will preclude possible separation of the wing from the airplanes due to failure of these components.

DATES: Effective date. May 11, 1978. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: Cessna Multi-Engine Service Letter ME78-2, dated February 13, 1978, applicable to this AD, may be obtained from Cessna Aircraft Co., Marketing Division, Attention: Customer Service Department, Wichita, Kans. 67201; telephone 316-685-9111. A copy of the service letter cited above is contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Mo. 64106, and at Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

William L. Schroeder, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Central Region, 601 East 12th Street, Kansas City, Mo. 64106; telephone 816-374-3446.

SUPPLEMENTARY INFORMATION: Amendment 39-2621 (41 FR 22045-22048), AD 76-10-11, currently requires repetitive inspection of critical areas of the wing front and rear spar lower caps on certain 336, 337, T337, P337, and M337 series airplanes for fatigue cracks in accordance with Cessna Multi-Engine Service Letter ME76-3 and ME76-3, Supplement No. 1.

Subsequent to the issuance of AD 76-10-11 a fatigue crack was discovered in the wing front spar web and doubler on a Cessna Model 337C airplane operated on pipeline patrol. AD 76-10-11 does not require inspection of the wing front spar web for cracks.

The manufacturer has now issued Multi-Engine Service Letter ME78-2, dated February 13, 1978, which supersedes ME76-3 and ME76-3, Supplement No. 1. The new service letter recommends, in addition to the repetitive

V 4 3 — 8 4

front and rear spar lower cap inspections, repetitive inspections of the inboard end of the front spar web and web doubler for fatigue cracks.

The spar web and web doubler inspections are applicable to all airplanes currently affected by AD 76-10-11 plus approximately 490 additional airplanes which have improved front and rear spar lower caps installed that do not require repetitive inspection for cracks.

Accordingly the FAA has decided to supersede AD 76-10-11 with a new AD applicable to 336, 337, T337, P337, and M337 series airplanes that makes compliance with most of the recommendations in Cessna Service Letter ME78-2 mandatory. The new AD includes the inspection requirements currently in AD 76-10-11 plus repetitive inspections of the inboard end of the front wing spar web and web doubler on Cessna 336, 337, T337, P337, and M337 series airplanes which do not have the new improved front spar web and doubler installed. The new AD incorporates a clearer presentation of the more complicated compliance times resulting from the addition of the spar web inspections. In addition, paragraph IV of AD 76-10-11 is deleted from the new AD since owners/operators can best determine how they meet the compliance times in the AD. As is the case with the service letters cited in AD 76-10-11, ME78-2 recommends initiating wing spar cap and web inspections at 3,000 hours time in service and repetitive inspections each 300 hours on airplanes flown predominately at or below 1,500 feet above ground level. Since it is impossible to identify such aircraft because of a lack of operating records, we are prevented from making such inspections mandatory on these airplanes. However, as previously recommended in AD 76-10-11 the new AD strongly urges owners/operators to initiate inspections at 3,000 hours time in service and to perform repetitive inspections at 300-hour intervals on aircraft utilized in contour or terrain following operations at low altitudes, such as, power/pipe line patrol, fish or game spotting, aerial applications, police patrol, livestock management, etc.

The agency has coordinated this document with the manufacturer prior to issuance.

Since a situation exists that requires the adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Drafting Information

The principal authors of this document are: William L. Schroeder, Flight Standards Division, Central Region, and John L. Fitzgerald, Jr., Office of the Regional Counsel, Central Region.

Adoption of the Amendment

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Cessna. Applies to the following models and serial number airplanes certificated in all categories:
Model: 336; serial Nos.: 336-0001 through 336-0195.
Models: 337, 337A, 337B, T337B, 337C, T337C, 337D, and T337D; serial Nos.: 337-0001 through 337-1193.
Models: 337E, T337E, 337F, T337F, 337G, 337H, and T337H; serial Nos.: 33701194 through 33701852.
Models: T337G and P337H; serial Nos.: P3370001 through P3370313.
Model: M337B; serial Nos.: All serial numbers.

Compliance: Required as indicated in accordance with compliance table I set forth in this AD or as otherwise set forth herein, unless already accomplished.

To detect cracking of the wing front and rear spar lower caps, front spar web and web doubler—In accordance with instructions set forth herein and in Cessna Multi-Engine Service Letter ME78-2, dated February 13, 1978, or later revisions:

I. At time intervals noted in table I of this AD, inspect the right and left wing front and rear spar lower cap and front spar web and web doubler on airplanes having model and serial numbers shown below:

Table I.—*Compliance times*

Airplane type/operation	Inspection times for spar cap inspections required by par. I.A. Total time [1]	Initial inspection [2]	Interval for repetitive inspections (hours)	Inspection times for front spar web inspections required by par. I.B. Initial inspection	Interval for repetitive inspections* (hours)
Nonpressurized (see note 1)	0 to 4,999	None	None	None	None
	5,000 and up	Within 25 h time in service after the effective date of this AD for those airpanes which have not yet been inspected in accordance with AD 76-10-11 or 73-04-02 or; within 500 h time in service after the last inspection in accordance with AD 76-10-11 or 73-04-02.	500	Within 25 h time in service after the effective date of this AD.	500
Pressurized (see note 1)	0 to 9,999	None	None	None	None
	10,000 and up	Within 25 h time in service after the effective date of this AD for those airplanes which have not yet been inspected in accordance with AD 76-10-11 or 73-04-02 or; within 500 h time in service after the last inspection in accordance with AD 76-10-11 or 73-04-02.	500	Within 25 h time in service after the effective date of this AD.	500

Table I.—*Compliance times* —Continued

Airplane type/operation	Inspection times for spar cap inspections required by par. I.A. Total time [1]	Initial inspection [2]	Interval for repetitive inspections (hours)	Inspection times for front spar web inspections required by par. I.B. Initial inspection	Interval for repetitive inspections* (hours)
Note 1: For those airplanes which have engaged in contour or terrain following operations at low altitudes, such as power/pipeline patrol, fish or game spotting, aerial applications, police patrol, livestock management, etc., Cessna recommends and FAA strongly urges inspections at intervals shown to the right of this note.	0 to 2,999	None	None	None	None
	3,000 and up	Within 25 h time in service after the effective date of this AD for those airplanes which have not yet been inspected in accordance with the suggestion in AD 76-10-11 or 73-04-02 or, within 300 h time in service after the last inspection in accordance with AD 76-10-11 or 73-04-02.	300	Within 25 h time in service after the effective date of this AD.	300

[1] In service for each of the following: (1) front spar lower cap; (2) rear spar lower cap; and (3) front spar web and web doubler.
[2] In accordance with this AD.
*After initial inspection in accordance with this AD the compliance time for repetitive inspections may be adjusted to allow compliance at the same time as the inspections required by paragraph I.A. of this AD.

A. Front and rear spar lower cap inspection:
Model: 336; serial Nos.: 336-0001 through 336-0195.
Models: 337, 337A, 337B, T337B, 337C, T337C, 337D, and T337D; serial Nos. 337-0001 through 337-1193.
Models: 337E, T337E, 337F, T337F, and 337G; serial Nos.: 33701194 through 33701548.
Model: T337G; serial Nos.: P3370001 through P3370138.
Model: M337B; serial Nos.: All serial numbers.

1. Front spar lower cap inspection. (a) Inspect three fastener holes on the left wing and three fastener holes on the right wing for wing spar cracks using eddy current inspection procedures outlined in the above noted Cessna service letter. Figure 1 shows the area involved and the three fasteners (two NAS 221 screws at W.S. 64.41 and the jack point bolt hole at W.S. 68.45) that are to be inspected.

(b) Remove the two NAS 221 screws at wing station 64.41 one at a time for this inspection and hold the boom fairing firmly against underlying thicknesses of material to insure proper eddy current probe depth settings during this inspection. A cross-section with the screws at W.S. 64.41 removed is shown in figure 2. Figure 3 shows the spar assembly (less boom and wing skins) and the relationship of the lower cap to the other parts at the strut attachment. Figure 4 shows the spar cross-section through the jack point bolt hole.

(c) If cracks are found in either the right or left wing front spar lower cap during any inspection required by this AD, prior to approving the airplane for return to service replace the front spar lower cap in both the right and left wing with new spar caps.

2. Rear spar lower cap inspection. (a) Dye penetrant inspect the lower spar cap area between 2 and 3 inches (second rivet outboard of W.S. 66.00 rib) outboard of wing station 66.00 rib for spar cap cracks originating in the rivet hole in accordance with inspection provisions in the above noted Cessna service letter. Figures 5, 6, and 7 show the location of the area on the rear spar lower cap to be inspected.

(b) If cracks are found in either the right or left wing rear spar lower cap during any inspection required by this AD, prior to approving the airplane for return to service replace the rear spar lower cap in both the right and left wing.

B. Front spar web and web doubler inspection:
Model: 336; serial Nos.: 336-0001 through 336-0195.
Models: 337, 337A, 337B, T337B, 337C, T337C, 337D, and T337D; serial Nos.: 337-0001 through 337-1193.
Models: 337E, T337E, 337F, T337F, 337G, 337H, and T337H; serial Nos.: 33701194 through 33701852.
Models: T337G and P337H; serial Nos.: P3370001 through P3370313.
Model: M337B; serial Nos.: All serial numbers.

1. Remove wing root access panels and wing root fairings.

2. Visually inspect the radii of both the spar web and web doubler for cracks in the shaded critical area shown in figure 8 of this AD.

3. If cracks are found in either the right or left wing front spar web or web doubler during any inspection required by this AD, prior to approving the airplane for return to service, replace the discrepant components.

II. Airplanes found to have cracked spar caps, webs or web doublers during inspections required by this AD may be flown in accordance with FAR 21.197 to a base where the component replacement can be accomplished.

III. Accomplish the repetitive inspections made mandatory by this AD on those spar caps, webs and web doublers replaced in accordance with this AD upon accumulation of the total time in service shown in table I of this AD. Repetitive inspections "strongly urged" via note 1 in table I of this AD should also be accomplished on spar caps, webs and web doublers replaced in accordance with this AD upon accumulation of the total time in service shown in note 1, table I, of this AD.

IV. Notify in writing the Chief, Engineering and Manufacturing Branch, FAA, Central Region, of the location and length of any crack found during inspections required by this AD and also the total time in service of the component at the time the crack was discovered. (Reporting approved by the Office of Management and Budget under OMB No. 04-R0174.)

V. The time interval for repetitive inspections required by this AD, after compliance with initial inspection requirements, can be adjusted up to 25 hours to allow accomplishment of these inspections at regular scheduled maintenance periods.

VI. Equivalent methods of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

This AD supersedes AD 76-10-11, Amendment 39-2621 (41 FR 22405, 22406, 22407, and 22408).

This amendment becomes effective May 11, 1978.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and sec. 11.89 of the Federal Aviation regulations (14 CFR 11.89).)

Note.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Mo., on April 21, 1978.

John E. Shaw,
Acting Director,
Central Region.

[Airspace Docket No. 78-RM 12]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Control Zones and Transition Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the control zones and transition areas that operate on irregular schedules in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming. The operating hours of these facilities are being removed from the Airman's Information Manual and posted in the new Airport/Facility Directory. This rule is necessary to alter the controlled airspace descriptions to reflect the change of publication containing the operating hours.

EFFECTIVE DATE: 0901 G.m.t. May 18, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph T. Taber, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-530, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colo. 80010, telephone 303 837 3937.

SUPPLEMENTARY INFORMATION

HISTORY

There are part-time control zones and transition areas that operate on an irregular schedule. These facilities are presently described in Part 71 of the Federal Aviation Regulations (14 CFR Part 71) with a reference to consult the Airman's Information Manual (AIM) for effective hours. Parts 2 and 3 of the AIM will be placed in the new Airport/Facility Directory effective May 18, 1978. The operating hours and dates of part-time controlled airspace designations currently listed in the AIM Part 3 Special Notices will now be listed in the new directory in the airport remarks section.

RULE

Therefore, it is necessary to alter the named control zones and transition areas by this editorial change. Since this alteration is minor in nature, notice and public procedure hereon are not considered necessary.

DRAFTING INFORMATION

The principal authors of this document are Mr. Joseph T. Taber, Operations, Procedures and Airspace Branch, Air Traffic Divison, and Mr. Daniel J. Peterson, Office of Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective 0901 G.m.t. May 18, 1978 as follows:

Subpart F, §71.171 is amended by deleting: "• • • Airman's Information Manual • • •" and substituting "• • • Airport/Facility Directory • • •" in the following descriptions:

Alamosa, CO
Aspen, CO
Brookings, SD
Broomfield, CO
Cody, WY
Colorado Springs, CO (USAF Academy Airstrip)
Cortez, CO
Devils Lake, ND
Durango, CO
Fort Carson, CO (Butts AAF)
Gillette, WY
Glasgow (AFB)
Greenwood Village, CO (Arapahoe County Airport)
Livingston, MT
Mitchell, SD
Montrose, CO
Pueblo, CO
Riverton, WY
Vernal, UT
Yankton, SD

Subpart G, § 71 181 is amended by deleting: "• • • Airman's Information Manual • • •" and substituting "• • • Airport/Facility Directory • • •" in the following descriptions: West Yellowstone, MT.

(Sec. 307(a) Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A 107.

Issued in Aurora, Colo., 80010, on April 18, 1978.

M. M. MARTIN,
Director,
Rocky Mountain Region.

[FR Doc. 78-11603 Filed 4-28-78; 8:45 am]

[4910-13]

[Airspace Docket No. 78-RM 13]

PART 71—DESIGNATION OF FEDERAL AIRWAYS AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Redesignation of Control Zone, Havre, Mont.

AGENCY: Federal Aviation Aministration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises the effective time for the Havre, Mont. control zone from continuous to part-time to establish effectiveness for this control zone which coincides with the availability of weather reporting service at this location. The National Weather Service is reducing their hours of operation at Havre, Mont., making this amendment necessary.

EFFECTIVE DATE: May 18, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Joseph T. Taber, Operations, Procedures and Airspace Branch, Air Traffic Division, ARM-500, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colo. 80010, telephone 303-837-3937.

SUPPLEMENTARY INFORMATION:

HISTORY

The National Weather Service at Havre, Mont. currently provides full time weather reporting service supporting the full time control zone at Havre, Mont. Beginning May 18, 1978, operational hours for the National Weather Service at Havre, Mont. will be changed from full time to the periods from 0500 to 2100 hours local time daily and weather reporting service will not be available for an eight-hour period. Therefore, the present continuous effective period of the Havre, Mont. control zone must be revised to establish effective times for this control zone coincidental with the availability of weather reporting service by the National Weather Service.

Since effective periods for the Havre, Mont. control zone are contingent on the availability of weather reporting service at that location, it was further determined that issuance of a Notice of Proposed Rulemaking for this amendment would be impractical and not within the public interest.

RULE

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) revises the control zone at Havre, Mont. The reduced hours of weather reporting service by the National Weather Service at Havre, Mont. necessitates the changing of the effective hours of operation for the Havre, Mont. control zone.

DRAFTING INFORMATION

The principal authors of this document are Mr. Joseph T. Taber, Operations, Procedures and Airspace Branch, Air Traffic Division, and Mr. Daniel J. Peterson, Office of Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended effective May 18, 1978 as follows:

By amending Subpart F, Section 71.171 by adding the following:

HAVRE, MONT.

This control zone is effective during specific dates and times established in advance by a Notice to Airmen. The effective date and time, thereafter, will be continuously published in the Airport Facility Directory.

(Sec. 307(a) Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Aurora, Colo. 80010, on April 20, 1978.

ISAAC H. HOOVER,
Acting Director,
Rocky Mountain Region.

[Airspace Docket No. 77-WA-23]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Revocation of Area High Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revokes certain area high routes which do not respond to area navigation user requirements. This action is consistent with FAA Area Navigation Policy and is taken as a positive step to facilitate area navigation within the existing air traffic control environment by eliminating area navigation routes that are not required nor used by existing area navigation equipped aircraft operators.

EFFECTIVE DATE: July 13, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. John Watterson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8525.

SUPPLEMENTARY INFORMATION:

HISTORY

On January 12, 1978, the FAA proposed to amend Subpart D of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to revoke 81 area high routes that are not responsive to user requirements (43 FR 1802). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. The comments received expressed no objection to the route revocations. This amendment is that proposed in the notice. Section 75.400 was republished in the FEDERAL REGISTER on January 3, 1978, (43 FR 730).

THE RULE

This amendment to Part 75 of the Federal Aviation Regulations (14 CFR Part 75) revokes 81 area high routes that are not responsive to user requirements. Most area navigation equipped aircraft are using area navigation in the en route system on a random route basis as direct between two points with radar monitoring when traffic conditions permit such clearances by air traffic control. Except for these routes being handled in Airspace Docket No. 78-WA-1, which require coordination under the provisions of Executive Order 10854, this amendment revokes those area navigation routes not identified as being required by any area navigation user.

DISCUSSION OF COMMENTS

The notice stated that initially the agency intends to retain waypoints used to define the routes being deleted. Later, those waypoints would be relocated to more accurately serve the users and the ATC System. While there were no objections to the proposed route revocations, there were several comments that questioned the value of retaining those waypoints and recommendations were made for their deletion. FAA believes that these comments may have merit. Accordingly, FAA will reconsider this matter after several months experience has been gained and the benefits, if any, of the retained waypoints in facilitating pilot selection of direct routes can be determined.

DRAFTING INFORMATION

The principal authors of this document are Mr. John Watterson, Air Traffic Service, and Mr. Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart D of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as republished (43 FR 730) is amended, effective 0901 GMT, July 13, 1978, as follows:

In § 75.400 The following area high routes are revoked:

1. J804R—Tampa, Fla. to Atlanta, Ga.
2. J807R—New York, N.Y. to Sherbrooke, Canada
3. J813R—Atlanta, Ga. to New Orleans, La.
4. J814R—New Orleans, La. to Atlanta, Ga.
5. J816R—Atlanta, Ga. to Washington, D.C.
6. J821R—Chicago, Ill. to Minneapolis, Minn.
7. J822R—Minneapolis, Minn. to Chicago, Ill.
8. J823R—Detroit, Mich. to Chicago, Ill.
9. J824R—St. Louis, to Chicago, Ill.
10. J826R—Kansas City, Mo. to Chicago, Ill.
11. J827R—Chicago, Ill. to Kansas City, Mo.
12. J830R—St. Louis, Mo. to New York, N.Y.
13. J834R—Chicago, Ill. to Cleveland, Ohio
14. J835R—Cleveland, Ohio to Chicago, Ill.
15. J837R—Cincinnati, Ohio to Chicago, Ill.
16. J838R—Atlanta, Ga. to Jacksonville, Fla.
17. J839R—Jacksonville, Fla. to Atlanta, Ga.
18. J846R—Omaha, Nebr. to Chicago, Ill.
19. J847R—Chicago, Ill. to Omaha, Nebr.
20. J849R—Chicago, Ill. to Des Moines, Iowa
21. J850R—Los Angeles, Calif. to San Francisco, Calif.
22. J852R—Las Vegas, Nev. to San Francisco, Calif.
23. J854R—Los Angeles, Calif. to Sacramento, Calif.
24. J856R—Atlanta, Ga. to Pittsburgh, Pa.
25. J857R—Denver, Colo. to Salt Lake City, Utah
26. J858R—Denver, Colo. to Kansas City, Mo.
27. J859R—Kansas City, Mo. to Denver, Colo.
28. J860R—Memphis, Tenn. to Louisville, Ky.
29. J866R—Denver, Colo. to Chicago, Ill.
30. J867R—Chicago, Ill. to Denver, Colo.
31. J869R—Columbia, S.C. to Atlanta, Ga.
32. J871R—Atlanta, Ga. to St. Louis, Mo.
33. J872R—Atlanta, Ga. to Columbia, S.C.
34. J874R—Memphis, Tenn. to Atlanta, Ga.
35. J876R—Atlanta, Ga. to Savannah, Ga.
36. J877R—Savannah, Ga. to Atlanta, Ga.
37. J878R—Atlanta, Ga. to Cleveland, Ohio
38. J879R—Cleveland, Ohio to Atlanta, Ga.
39. J881R—Detroit, Mich. to Atlanta, Ga.
40. J882R—Atlanta, Ga. to Detroit, Mich.
41. J885R—St. Louis, Mo. to Memphis, Tenn.
42. J890R—Cleveland, Ohio to St. Louis, Mo.

V 43 | 84 MY 1 78 UMI

43. J891R—Chicago, Ill. to Memphis, Tenn.
44. J894R—Jacksonville, Fla. to Miami, Fla.
45. J897R—Philadelphia, Pa. to Chicago, Ill.
46. J901R—Seattle, Wash. to Spokane, Wash.
47. J902R—Portland, Oreg. to Los Angeles, Calif.
48. J904R—Los Angeles, Calif. to Denver, Colo.
49. J905R—Las Vegas, Nev. to Tucson, Ariz.
50. J908R—San Francisco, Calif. to Denver Colo.
51. J909R—Denver, Colo. to San Francisco, Calif.
52. J911R—Portland, Oreg. to Denver, Colo.
53. J913R—Portland, Oreg. to Salt Lake City, Utah.
54. J916R—San Antonio, Tex. to Hobby, Tex.
55. J923R—Albuquerque, N. Mex. to Denver, Colo.
56. J925R—Minneapolis, Minn. to Denver, Colo.
57. J926R—Denver, Colo. to Los Angeles, Calif.
58. J927R—Chicago, Ill. to Dallas, Tex.
59. J928R—Denver, Colo. to Seattle, Wash.
60. J931R—Salt Lake City, Utah to San Francisco, Calif.
61. J935R—Tucson, Ariz. to Albuquerque, N. Mex.
62. J936R—Phoenix, Ariz. to Chicago, Ill.
63. J942R—Dallas, Tex. to Lubbock, Tex.
64. J950R—Houston, Tex. to Oklahoma City, Okla.
65. J951R—Washington, D.C. to St. Louis, Mo.
66. J954R—Washington, D.C. to Detroit, Mich.
67. J956R—Memphis, Tenn. to Chicago, Ill.
68. J969R—Denver, Colo. to Phoenix, Ariz.
69. J970R—Denver, Colo. to Dallas, Tex.
70. J971R—San Antonio, Tex to Dallas, Tex.
71. J972R—Dallas, Tex. to San Antonio, Tex.
72. J973R—Seattle, Wash. to Salt Lake City, Utah
73. J975R—Dallas, Tex. to El Paso, Tex.
74. J977R—Portland, Oreg. to Chicago, Ill.
75. J978R—Chicago, Ill. to Portland, Oreg.
76. J982R—Los Angeles, Calif. to Kansas City, Mo.
77. J987R—Montreal, Canada to New York, N.Y.
78. J988R—New York, N.Y. to Montreal, Canada.
79. J989R—New York, N.Y. to Chicago, Ill.
80. J991R—Minneapolis, Minn. to Greater Southwest Texas, Tex.
81. J992R—Houston, Tex. to Tulsa, Okla.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on April 20, 1978.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

[T.D. 7542]

PART 301—PROCEDURE AND ADMINISTRATION

Procedures for the Abatement of the Civil Penalty for Failure To File Information Required by Section 6046

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to the abatement of the civil penalty for failure to file an information return regarding the organization or reorganization of foreign corporations and acquisitions of their stock. The regulations are intended to provide more efficient procedures for the abatement of the penalty. They affect potentially all persons who are required to file the described information return.

EFFECTIVE DATE: The regulations are effective May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

David Dolan of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3459) (not a toll free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains an amendment to the Regulations on Procedure and Administration (26 CFR Part 301) under section 6679 of the Internal Revenue Code of 1954. Because the regulations affect solely Departmental practice and procedure, a notice of proposed rulemaking was not published in the FEDERAL REGISTER.

Section 6046 requires certain persons to detail in a return information regarding the organization or reorganization of foreign corporations and acquisitions of the stock of those corporations. Section 6679(a) provides for a $1,000 penalty for failure to file a return required under section 6046 or for failure to furnish in full the information required on the return. Section 6679(a) also provides that the penalty will be abated if failure to file a proper return is due to reasonable cause. Section 301.6679-1(a)(3) specifies that the Director of International Operations or the Director of the Philadelphia Service Center shall make all determinations of reasonable cause.

The amendment to § 301.6679-1(a)(3) provides that district directors and service center directors, as well as the Director of International Operations, may make reasonable cause determinations. This amendment will permit the evaluation of reasonable cause to be undertaken by the district or service center director who can most conveniently make the evaluation.

DRAFTING INFORMATION

The principal author of this regulation was David Dolan of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation on matters of both substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, 26 CFR Part 301 is amended as follows:

§ 301.6679-1 Failure to file returns as to organization or reorganization of foreign corporations and as to acquisitions of their stock.

(a) *Civil penalties.* • • •

(3) *Showing of reasonable cause.* The district director, the director of the Internal Revenue service center, and the director of International Operations are authorized to make the determination that such failure was due to a reasonable cause and that, accordingly, the penalty imposed by section 6679 shall not apply. An affirmative showing of reasonable cause must be made in the form of a written statement, containing a declaration that it is made under the penalties of perjury, setting forth all the facts alleged as a reasonable cause. If the taxpayer exercises ordinary business care and prudence and is nevertheless unable to furnish any item of information required under section 6046 and the regulations thereunder, such failure shall be considered due to a reasonable cause. In determining the extent of a taxpayer's ability to obtain information, the percentage of stock owned by such taxpayer and the nature of the other interests in the foreign corporation will be considered.

• • • • •

Because this treasury decision affects solely Departmental practice and procedure, it is found that it is unnecessary to issue this Treasury decision with notice and public procedure thereon under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).)

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: April 18, 1978.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

[4910-14]

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 77-234]

PART 3—COAST GUARD AREAS, DISTRICTS, MARINE INSPECTION ZONES, AND CAPTAIN OF THE PORT AREAS

Administrative Change; Los Angeles-Long Beach Marine Inspection Office Relocation

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment reflects a recent change in the Eleventh Coast Guard District. The Los Angeles-Long Beach Marine Inspection Office has been moved from Wilmington, Calif. to Long Beach, Calif., where it is now collocated with the Los Angeles-Long Beach Captain of the Port Office.

EFFECTIVE DATE: This amendment is effective on May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Capt. George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

SUPPLEMENTARY INFORMATION: Since this amendment is related to agency organization, it is exempt from the notice of proposed rulemaking requirements in 5 U.S.C. 553(b)(3)(A), and since this amendment is not substantive, it may be made effective in less than 30 days after publication in the FEDERAL REGISTER under 5 U.S.C. 553(d)(2).

The Coast Guard has evaluated this final rule under the Department of Transportation Policies for Improving Government Regulations published on March 8, 1978 (43 FR 9582). Since this rule amounts to an address change, impacts are anticipated to be minimal.

DRAFTING INFORMATION

The principal persons involved with the drafting of this regulation are: Ens. G. W. Molessa, Jr., Project Manager, Office of Marine Environment and Systems, and Lt. G. S. Karavitis, Project Attorney, Office of Chief Counsel.

In accordance with the foregoing, Part 3 of Chapter 1, Title 33 of the Code of Federal Regulations is amended as follows:

1. By amending 33 CFR 3.55-10(a) to read as follows:

§ 3.55-10 Los Angeles-Long Beach Marine Inspection Zone and Captain of the Port Area.

(a) The Los Angeles-Long Beach Marine Inspection Office and the Los Angeles-Long Beach Captain of the Port Office are located in Long Beach, California.

• • • • • •

(Sec. 1, 63 Stat. 504; (14 U.S.C. 93).)

Dated: April 26, 1978.

O. W. SILER,
Admiral, U.S. Coast Guard Commandant.

[FR Doc. 78-11792 Filed 4-28-78; 8:45 am]

[4910-14]

[CGD 78-212]

PART 3—COAST GUARD AREAS, DISTRICTS, MARINE INSPECTION ZONES AND CAPTAIN OF THE PORTS AREAS

Boundary Realignments within the Seventh Coast Guard District

AGENCY: Coast Guard, DOT.

ACTION: Correction.

SUMMARY: This document makes a correction to a regulation which appeared in the Thursday, January 5, 1978 edition of the FEDERAL REGISTER.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Capt. George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

The following correction is made to Part III of the FEDERAL REGISTER of January 5, 1978, appearing on page 1055:

1. On page 1056, second column, in § 3.35-20(b), in the fourth line, the words "eastern Florida" should be deleted and the word "Georgia" should be inserted in their place.

Dated: April 14, 1978.

O. W. SILER,
Admiral, U.S. Coast Guard Commandant.

Title 49—Transportation

CHAPTER I—MATERIALS TRANSPORTATION BUREAU, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER D—PIPELINE SAFETY

[Amdts. 192-32, 195-14; Docket No. 77-10]

PART 192—TRANSPORTATION OF NATURAL AND OTHER GAS BY PIPELINE

PART 195—TRANSPORTATION OF LIQUIDS BY PIPELINE

Qualification and Design of Steel Pipe

AGENCY: Materials Transportation Bureau.

ACTION: Final rule.

SUMMARY: This amendment updates the existing incorporation by reference of API Standard 5LS, "API Specification for Spiral-Weld Line Pipe," and API Standard 5LX, "API Specification for High-Test Line Pipe," to include in Part 192, the March 1976 Supplement and the 1977 edition of each document and in Part 195, the 1977 edition of each document..

DATE: This amendment becomes effective June 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Frank E. Fulton, 202-426-2082.

SUPPLEMENTARY INFORMATION: This amendment makes Parts 192 and 195 conform with recent developments in the manufacture and design of steel pipe. These subjects are now regulated, in part, through an incorporation by reference of API Standard 5LS and API Standard 5LX. At present, the 1975 editions are the latest applicable editions of API 5LS and 5LX listed in Parts 192 and 195. This amendment updates the lists to include the 1977 editions in both parts and the March 1976 Supplements in Part 192.

Of particular importance is that by referencing the March 1976 Supple-

V 4 3 — 8 4

ments and the 1977 editions of API 5LS and 5LX, pipeline operators will be permitted to use Grade X-70 pipe in the transportation of gas. Grade X-70 is more economical for certain uses than other available grades of steel pipe because of its high strength, which permits the use of thinner walled pipe. It is projected for use in the pipeline approved under the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719) to transport gas from the North Slope to the lower 48 States.

The Office of Pipeline Safety Operations proposed adoption of the later editions of API 5LS and 5LX in a Notice of Proposed Rulemaking (Notice 77-7) issued on December 7, 1977 (42 FR 62397, Dec. 12, 1977). Interested persons were invited to participate in the rulemaking proceeding by submitting written data, views, or arguments by January 12, 1978. In addition, in accordance with Sec. 4(b) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1673(b)), the Technical Pipeline Safety Standards Committee (TPSSC) considered the proposal at its meeting in Washington, D.C., on January 17 and 18, 1978. The TPSSC's report is set forth below.

Twelve persons submitted comments in response to Notice 77-7, 3 trade associations and 9 gas pipeline companies. All the commenters favored adoption of the later editions of API 5LX and 5LS.

One person suggested that Grade X-70 pipe be required to pass the Charpy impact testing set forth in Supplementary Test SR5 in the 1977 editions of 5LS and 5LX. The SR5 test, which is intended to substantiate material quality and to mitigate the potential for brittle or shear pipe fractures, is not obligatory under the provisions of 5LS and 5LX and was not discussed in Notice 77-7. The test, therefore, could not be made binding under Part 192 or Part 195 without issuing an additional Notice of Proposed Rulemaking on the subject. Since the commenter did not submit evidence that would justify imposing the Charpy test as a general rule and the other available information does not show that potential fractures are a general problem in Grade X-70 pipe, there does not appear to be an immediate need to pursue the matter further. It is recognized, however, that under certain conditions of high stress and low temperature, the potential for fractures may increase in thin walled pipe. Under these conditions, operators are already required by the general design requirements of Parts 192 and 195 to take additional precautions (see §§ 192.53 and 195.102). Further consideration will be given to this problem in a future rulemaking proceeding on pipelines operating in low temperature environments.

Several commenters suggested that the introductory language in Section II of Appendix A and Section I of Appendix B to Part 192 and in § 195.3(a) be amended to permit the use of components which provide a comparable level of safety but do not comply with any of the listed editions of the documents incorporated by reference. Since the safety standards were adopted, the use of items in stock or the reuse of salvagable items has been permitted only if the items meet the requirements of Part 192 or Part 195, as the case may be, and where applicable, the requirements of a listed edition of a referenced document. Although this requirement may be too inflexible in certain situations, it was not proposed to be changed in Notice 77-7 and thus cannot be changed in the final rules. However, the problem will be given further attention in the future when action is taken on a petition for rulemaking filed by the Interstate Natural Gas Association of America. This petition proposes that criteria be established for the use of materials that do not conform with any listed edition of a listed document.

REPORT OF THE TECHNICAL PIPELINE SAFETY STANDARDS COMMITTEE

Section 4(b) of the Natural Gas Pipeline Safety Act of 1968 requires that all proposed standards and amendments to such standards pertaining to gas pipelines be submitted to the Committee and that the Committee be afforded a reasonable opportunity to prepare a report on the technical feasibility, reasonableness, and practicability of each proposal. This amendment to Part 192 was submitted as Item A in a list of items before the Committee at a meeting in Washington, D.C., on January 17 and 18, 1978. On March 10, 1978, the Committee filed the following favorable report. A minority report was not filed.

This communication is the official report of the Technical Pipeline Safety Standards Committee concerning the Committee's action on one amendment to 49 CFR Part 192 proposed by the Office of Pipeline Safety Operations, on revisions of Subpart I of Part 192, as proposed by Committee members, and on other matters the Committee decided should be brought to the attention of the Department of Transportation.

The following described actions were taken by the Committee at a meeting held in Washington, D.C., on January 17 and 18, 1978.

A. PROPOSAL BY OPSO TO AMEND THE REQUIREMENTS IN RESPECT TO QUALIFICATION AND DESIGN OF STEEL PIPE

OPSO proposed to amend the requirements of Appendix A and Appendix B of Part 192 pertaining to qualification and design of steel pipe as published in Notice 77-7, Docket No. 77-10. By a unanimous affirmative vote of the nine members present, the Committee found the following language to be technically feasible, reasonable and practicable.

[The language suggested is adopted in the final rules.]

• • • • • •

NOTE.—It has been determined that this document does not contain a major regulation requiring preparation of a Regulatory Analysis under DOT procedures or Executive Order 12044.

In consideration of the foregoing, Parts 192 and 195 of Title 49 of the Code of Federal Regulations are amended as set forth below.

1. Section II of Appendix A to Part 192 is amended to read as follows:

APPENDIX A—INCORPORATED BY REFERENCE

• • • • • •

II. Documents incorporated by reference. Numbers in parentheses indicate applicable editions. Only the latest listed edition applies except that an earlier listed edition may be followed with respect to pipe or components which are manufactured, designed, or installed in accordance with the earlier edition before the latest edition is adopted, unless otherwise provided in this part.

A. • • •

(5) API Standard 5LS "API Specification for Spiral-Weld Line Pipe" (1967, 1970, 1971 plus Supp. 1, 1973 plus Supp. 1, 1975 plus Supp. 1, and 1977).

(6) API Standard 5LX "API Specification for High-Test Line Pipe" (1976, 1970, 1971 plus Supp. 1, 1973 plus Supp. 1, 1975 plus Supp. 1, and 1977).

• • • • • •

2. Section I of Appendix B to Part 192 is amended to read as follows:

APPENDIX B—QUALIFICATION OF PIPE

I. Listed Pipe Specifications. Numbers in parentheses indicate applicable editions. Only the latest listed edition applies except that an earlier listed edition may be followed with respect to pipe or components which are manufactured, designed, or installed in accordance with the earlier edition before the latest edition is adopted, unless otherwise provided in this part.

• • • • • •

API 5LS, Steel pipe (1967, 1970, 1971 plus Supp. 1, 1973 plus Supp. 1, 1975 plus Supp. 1, and 1977).

API 5LX, Steel pipe (1967, 1970, 1971 plus Supp. 1, 1973 plus Supp. 1, 1975 plus Supp. 1, and 1977).

• • • • • •

(Sec. 3, Pub. L. 90-481, 82 Stat. 721, (49 U.S.C. 1672); for offshore gathering lines, sec. 105, Pub. L. 93-633, 88 Stat. 2157, (49 U.S.C. 1804); 49 CFR 1.53 and App. A to Part 1.)

3. In § 195.3, paragraphs (a) and (c)(1) (iv) and (v) are revised to read as follows:

§ 195.3 Matter incorporated by reference.

(a) There are incorporated by reference in this part all materials referred to in this part that are not set forth in full in this part. These materials are hereby made a part of this regulation. Applicable editions are listed in paragraph (c) of this section in parentheses following the title of the referenced material. Only the latest listed edition applies, except that an earlier listed edition may be followed with respect to components which are manufactured, designed, or installed in accordance with the earlier edition before the latest edition is adopted, unless otherwise provided in this part.

• • • • • •

(c) • • •

(1) • • •

(iv) API Specification 5LS "API Specification for Spiral-Weld Line Pipe" (1969, 1975, and 1977).

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1323]

PART 1033—CAR SERVICE

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Service Order No. 1323).

SUMMARY: There is a shortage of tri-level auto rack flatcars on the Burlington Northern (BN) and on the Union Pacific (UP) Railroads for the shipment of automobiles. Bi-level auto rack cars are available to these railroads but cannot be used because of tariff provisions requiring the use of tri-level cars. Service Order No. 1323 authorizes the BN and the UP to substitute three bi-level cars for each two tri-level cars ordered by shippers for transporting automobiles.

DATES: Effective 12:01 a.m., April 25, 1978; expires 11:59 p.m., June 30, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 25th day of April, 1978.

There are shortages of tri-level type multi-level auto rack flat cars on the Burlington Northern Inc., (BN) and on the Union Pacific Railroad Co. (UP) required to transport automobiles subject to tariff restrictions requiring the use of such tri-level cars. These railroads have available supplies of bi-level cars of similar type for which could be used for transporting these automobiles if tariff provisions permitted. The economic loss suffered by shippers dependent upon the BN and the UP for their car supplies can be alleviated by the substitution of bi-level cars for tri-level cars at the ratio of three bi-level cars for each two tri-level cars ordered.

In the opinion of the Commission, present regulations and practices with respect to the use and supply of auto rack flat cars are ineffective to overcome these shortages of auto rack flat cars and an emergency exists requiring immediate action. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1323 Distribution of freight cars.

(a) Subject to the concurrence of the shipper the Burlington Northern Inc., (BN), and the Union Pacific Railroad Co. (UP) may substitute three bi-level auto rack flat cars, listed in the Official Railway Equipment Register, I.C.C.-R.E.R. No. 407, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "FA" for each two tri-level auto rack flat cars ordered by the shipper for transporting automobiles.

(b) The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(c) *Rates and Minimum Weights Applicable.* The rates to be applied to shipments for which three bi-level cars have been substituted for two tri-level cars ordered as authorized by Section (a) of this order shall be the rates applicable to the larger cars ordered. The minimum weight to be applied to each group of three bi-level cars substituted for two tri-level cars shall be the combined minimum weights applicable to the two tri-level cars ordered.

(d) *Billing to be Endorsed.* The carrier substituting smaller cars for larger cars as authorized by Section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

Two tri-level cars ordered. Three bi-level cars furnished authority I.C.C. Service Order No. 1323.

(e) *Exception.* This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(f) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C. 20423. Requests for such exception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(g) *Rules and Regulations Suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(h) *Effective date.* This order shall become effective at 12:01 a.m., April 26, 1978.

(i) *Expiration date.* This order shall expire at 11:59 p.m., June 30, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

(49 U.S.C. 1(10-17).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-14711; File No. S7-648]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Quotations for Reported Securities

AGENCY: Securities and Exchange Commission.

ACTION: Postponement of effective date of rule.

SUMMARY: The Commission has amended its rule governing dissemination of quotation information with respect to reported securities to postpone the effective date of that rule from May 1, 1978 to August 1, 1978. The Commission has taken this action to permit the self-regulatory organizations to plan for the joint implementation of the rule in a manner which is designed to facilitate the development of a composite quotation system—an important element of a national market system.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

John W. Osborn, Division of Market Regulation, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, 202-755-8961.

SUPPLEMENTAL INFORMATION: The Commission today announced that it has amended Rule 11Ac1-1 [17 CFR § 240.11Ac1-1] (the "Rule") under the Securities Exchange Act of 1934 (the "Act") (15 U.S.C. 78a et seq., as amended by Pub. L. 94-29 (June 4, 1975)] to postpone the effective date of the Rule until August 1, 1978. The Rule governs dissemination of quotation information as to which last sale information is reported in the consolidated transaction reporting system contemplated by Rule 17a-15 under the Act (17 CFR 240.17a-15) ("reported securities") and, as adopted, would have become effective on May 1, 1978.[1]

Most of the self-regulatory organizations subject to the Rule have requested that the Commission delay the effective date of the Rule.[2] The requests state that the various self-regulatory organizations which are subject to the Rule have been meeting to discuss the feasibility of joint implementation of the Rule. The discussions contemplated the formation of a Consolidated Quotation Association, which would make available to vendors quotations in eligible securities from each participating self-regulatory organization through a single data stream. The self-regulatory organizations further state that joint implementation would provide several forms of cost savings to the industry and to vendors of quotation information by removing possible redundancies in equipment and personnel. In particular, they state that creation of a single, comprehensive quotation data stream would avoid multiple data transmission lines from self-regulatory organizations to vendors and facilitate the sequencing of quotation information.

In addition, certain exchanges have advised the Commission that they have encountered technical problems in connection with their plans to disseminate quotations in reported securities through the use of computer systems which permit market makers on those exchanges either to input quotations manually or generate updated quotations automatically in response to changes in quotations in the primary markets. These exchanges have been actively involved in developing such systems facilities for over a year and state that recently discovered technical problems (which became evident during the testing of certain new programs) make full compliance with the Rule technically impossible on May 1, 1978.

The Commission has frequently stated its belief that the availability of comprehensive quotation information is a fundamental building block of a national market system. In its recent Statement on the Development of a National Market System, the Commission noted that a composite quotation system should:

(i) lead to increased efforts by brokers to make informed order routing decisions from among the various competing market centers (in order to choose the particular market affording, at a particular point in time, the most favorable execution opportunities to their customers); (ii) foster improvements in existing methods of routing orders to all market centers; (iii) enhance fair competition among markets; and (iv) otherwise advance the objectives of a national market system specified by the Congress in Section 11A(a) of the Act.[3]

The Commission has also encouraged the self-regulatory organizations to plan for joint implementation of the Rule. In the release announcing the adoption of the Rule, the Commission stated its belief that "any arrangement among all of the various exchanges and associations leading to centralized processing, sequencing and validation of quotations would be beneficial."[4] The Commission continues to believe that joint implementation of the Rule would be in the public interest and would further the purposes of the Act by facilitating the development of an important facility of a national market system—a composite quotation system. It also appears that the creation of a single data stream would result in reduced costs for both the self-regulatory organizations and the vendors by eliminating the necessity for duplicative facilities, data transmission lines and personnel, and by resolving potential timing and sequencing problems. It is apparent, however, that joint implementation will not be possible by May 1, 1978, and that technical problems will delay the ability of certain exchanges to comply with the Rule on that date. Accordingly, the Commission has determined to amend the Rule by postponing its effective date from May 1, 1978, to August 1, 1978. The Commission wishes to emphasize that this action reflects its understanding that each of the self-regulatory organizations has acted, and will continue to act, as expeditiously as possible in implementing the facilities and procedures (including the proposed joint data stream) necessary to provide quotation information from all market centers in conformity with the Rule so that further delays will not be necessary.[5]

For the reasons stated above and pursuant to the Administrative Procedure Act (5 U.S.C. 551 et seq.), the Commission finds for good cause that notice and public procedure on this amendment to the Rule is both impracticable, unnecessary and contrary to the public interest and that there is good cause for making this amendment to the Rule effective immediately. The Commission also finds that adoption of this amendment to the Rule does not impose any burdens on competition that are not necessary or appropriate in furtherance of the purposes of the Act.

The Securities and Exchange Commission, acting pursuant to the Act, and particularly Sections 2, 3, 6, 9, 10, 11A, 15, 15A, 17, and 23 thereof (15 U.S.C. 78b, 78c, 78f, 78i, 78j, 78k-1, 78o, 78o-3, 78q, and 78w) hereby amends paragraph (e) of § 240.11Ac1-1 of Title 17 of the Code of Federal Regulations to postpone until August 1, 1978, the effective date of that section. The text of the amendment is as follows:

Rule 11Ac1-1 under the Act (17 CFR 240.11Ac1-1) is amended to read as follows:

§ 240.11Ac1-1 Dissemination of quotations for reported securities.

. . . . . .

(e) The effective date of this section shall be August 1, 1978.

. . . . . .

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

APRIL 27, 1978.

[FR Doc. 78-11826 Filed 4-28-78; 8:45 am]

[1] Securities Exchange Act Release No. 14415 (January 26, 1978), 43 FR 4342.

[2] Requests for a delay in the effective date of the Rule have been received from the American, Boston, Cincinnati, Midwest and New York Stock Exchanges and the National Association of Securities Dealers, Inc.

[3] Securities Exchange Act Release No. 14416 (January 26, 1978) at 28, 43 FR 4358.

[4] Securities Exchange Act Release No. 14415 (January 26, 1978) at 51, 43 FR 4349.

[5] In addition, the Commission notes that, to the extent a self-regulatory organization participates in the Intermarket Trading System ("ITS") recently approved by the Commission on a temporary basis prior to the revised effective date of the Rule, it will be necessary for organizations to provide quotation information to the other ITS participants in accordance with the terms of the ITS Plan approved pursuant to Section 11A(a)(3)(B) of the Act (15 U.S.C. 78k-1 (a)(3)(B)). See Securities Exchange Act Release No. 14661 (April 14, 1978), 43 FR 14419.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

PART 241—INTERPRETATIVE RELEASES RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

Securities Transactions by Members of National Securities Exchanges

AGENCY: Securities and Exchange Commission.

ACTION: Temporary rules and interpretations.

SUMMARY: Section 11(a) of the Securities Exchange Act of 1934 prohibits members of national securities exchanges from effecting transactions for certain types of accounts. The Commission is announcing the adoption of: (i) A new temporary rule under section 11(a) permitting members to effect exchange transactions in listed bonds and other forms of indebtedness; (ii) amendments to temporary rules previously adopted concerning (a) proprietary trading, and (b) transactions effected by exchange members through other members; and (iii) certain interpretations of the section and the rules thereunder.

EFFECTIVE DATES: May 1, 1978. Comments should be received by June 1, 1978.

ADDRESSES: Interested persons should submit six copies of their views and comments to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, and should refer to File No. S7-613. All submissions will be made available for public inspection at the Commission's Public Reference Section, Room 6101, 1100 L Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Richard A. Steinwurtzel, Esq., 202-755-7974 or Charles M. Horn, Esq., 202-755-8747, Division of Market Regulation, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION:

INTRODUCTION

Section 11(a)(1) of the Securities Exchange Act of 1934 (the "Act")[1] prohibits, subject to certain exemptions, a member of a national securities exchange from effecting a transaction on that exchange for its own account, the account of an associated person, or an account as to which it or its associated person exercises investment discretion (collectively referred to as "covered accounts"). Section 11(a)(1) became effective upon its enactment with respect to persons who became exchange members after May 1, 1975. Pursuant to section 11(a)(3),[2] its effectiveness was delayed until May 1, 1978, with respect to transactions by persons who were exchange members on May 1, 1975.[3]

On March 14, 1978,[4] the Commission announced the adoption of several rules and interpretations under section 11(a), including: (i) Interpretation of the meaning of the term "investment discretion" for purposes of the section 11(a) prohibition; (ii) adoption of technical amendments to the "proprietary trading" rule (Temporary Rule 11a1-1(T));[5] (iii) adoption of the "look-through" rule (Rule 11a1-2);[6] (iv) adoption of the "effect versus execute" rule (Rule 11a2-2(T));[7] and (v) discussion of the scope of exemptions under section 11(a)(1) for members' proprietary transactions.

In recent weeks, the Commission has received numerous inquiries with respect to the operation of section 11(a) and the existing final and temporary rules thereunder. Particularly in view of the widespread uncertainty concerning the meaning and application of section 11(a), and in order to provide further guidance by May 1, 1978, for members and others in complying with the section and the Commission's rules, the Commission has determined to clarify in this Release several matters. In so doing, the Commission is adopting amendments to the proprietary trading rule and the effect versus execute rule.

[1] 15 U.S.C. 78k(a)(1).

[2] 15 U.S.C. 78k(a)(3).

[3] The Commission has rulemaking authority under section 11(a)(2), 15 U.S.C. 78k(a)(2), to extend the prohibitions of section 11(a)(1) to: (i) members' transactions (other than market maker and odd-lot dealer transactions) exempted thereunder; (ii) over-the-counter transactions (other than market maker transactions); and (iii) non-members' exchange transactions (other than market maker transactions). The Commission's authority under that section is complemented by sections 11(b) and 15(c)(5) of the Act, 15 U.S.C. 78k(b) and 78o(c)(5). In addition, under section 11(a)(1)(H), 15 U.S.C. 78k(a)(1)(H), the Commission is authorized to exempt from section 11(a)(1) any transaction of a kind which the Commission, by rule, determines is consistent with the purposes of section 11(a)(1), the protection of investors, and the maintenance of fair and orderly markets.

V 43 | 84

In addition, the Commission has determined to adopt, effective May 1, 1978, Temporary Rule 11a1-4(T) under section 11(a)(1)(H) to exempt from the section's prohibition exchange transactions by members in bonds and other forms of indebtedness. Interested persons are invited to submit comments with respect to any of the matters raised in this release.

The remainder of this Release consists of the following sections:

I. Exemptive Rule for Bond Transactions (Temporary Rule 11a1-4(T))

II Amendments to, and Interpretations Under, the Proprietary Trading Rule Temporary Rule 11a1-1(T))

III. Interpretations Under the Look-Through Rule (Rule 11a1-2)

IV. Amendment to, and Interpretations Under, the Effect Versus Execute Rule (Temporary Rule 11a2-2(T))

V. Application of the Natural Person Exemption Under Section 11(a)(1)(E) to Certain Accounts

VI. Relationship of Exemptions Under Section 11(a) to One Another

VII. Statutory Basis

I. Exemptive Rule for Bond Transactions (Temporary Rule 11a1-4(T))

As discussed above, section 11(a)(1) prohibits a member of a national securities exchange from effecting transactions on such exchange for its own account or the account of its associated person. That proscription encompasses transactions in any type or class of security listed or admitted to trading on the exchange.

Commentators on the March 1978 Release and the Commission's two prior releases on section 11(a), the January 1976 Release and Securities Exchange Act Release No. 13388 (Mar. 18, 1977) (the "March 1977 Release"),[8] requested that the Commission exercise its exemptive authority under section 11(a)(1)(H) to permit members to effect transactions for their own accounts in bonds listed on an exchange. In support of that request, they contended that the over-the-counter market is the primary market in listed bonds; that bond trading on exchanges is essentially an odd-lot business; and that bond transactions on the exchange are overwhelmingly conducted by members on a principal basis and therefore section 11(a)(1) could and probably will eliminate the great majority of exchange transactions in listed bonds. Commentators further urged that such principal bond transactions are not subject to the member trading advantages identified by the Congress as a reason for enacting section 11(a). Bond trading is different in that respect, they suggested, because among other things, bonds are priced on the basis of factors, such as the money supply and interest rates, which are independent of the influence of exchange market activities. Consequently, they argued, fluctuations in bond prices are usually small, and the ability of members to avail themselves of time and place advantages in bond transactions for their own accounts is limited.[9]

In December 1977, the New York Stock Exchange, Inc. (the "NYSE"), requested the Commission to adopt rules under section 11(a)(1)(H) exempting certain types of member transactions from the prohibition of section 11(a). Among the rules suggested was a rule which would exempt proprietary transactions in listed bonds which are effected to facilitate an order of a public customer.[10] In the March 1978 Release, the Commission determined that the NYSE had not provided a sufficient rationale for such an exemption.[11] Upon further consideration of members' principal transactions in exchange-traded bonds, however, the Commission has determined to adopt Temporary Rule 11a1-4(T) (the "bond trading rule") under section 11(a)(1)(H) of the Act to exempt from section 11(a)(1) all bond transactions on an exchange for the account of a member or its associated person. The Commission has taken this action in recognition of several factors.

First, principal bond trading on exchanges provides a relatively liquid market for transactions of small size. The primary market in listed bonds is over-the-counter and is characterized by large-sized transactions among financial institutions and bond dealers. Bond transactions on exchanges, on the other hand, are generally effected as principal on behalf of exchange members' retail customers and often involve transactions of less than 100 bonds, which normally would be the minimum size of an institutional over-the-counter transaction.

The second reason for the Commission's adoption of an exemptive rule for bond trading is its belief that, because the primary market for listed bond trading currently is in the over-the-counter market, the exchange bond markets do not appear to offer to exchange bond traders the special "time and place" trading advantages which the Congress identified as a basis for section 11(a).[12] Unlike other types of securities, the pricing of listed bonds on the exchanges appears to be directly related to the pricing of simular forms of indebtedness traded in the over-the-counter market. Finally, since the institutional trading market in bonds currently is conducted over-the-counter, an exemption for exchange bond trading would not appear to raise any of the problems of institutional exchange membership articulated by the Congress when it enacted section 11(a).[13]

The bond trading rule covers transactions involving any bond, debenture, or other form of indebtedness listed or admitted to trading on national securities exchanges.[14] Transactions permitted by the rule will continue to be governed by applicable exchange rules as well as provisions of the Act (other than section 11(a)) and rules thereunder. The relief provided by that rule extends to transactions for the account of a member or its associated person,[15] but not to transactions effected by a member on behalf of a managed institutional account.[16] Transactions for managed institutional accounts are not being exempted since the potential fiduciary problems which the Congress identified with respect to such accounts would not appear to be substantially less significant in debt securities than they were perceived to be in the case of equity securities.

The Commission is adopting Rule 11a1-4(T) on a temporary basis, effective May 1, 1978, in order to avoid any disruption of the exchange bond market on and after May 1, 1978. The Commission will consider carefully commentators' views on the bond trading rule and may act at any time to modify, or indeed to rescind, the rule. The Commission may also need to revise the rule if exchange bond trading activities undergo a substantial change of character or begin to exhibit any substantial member trading abuses.

(Apr. 19, 1976, May 10, 1977, and Apr. 14, 1978); Merrill Lynch, Pierce, Fenner & Smith Inc. (Apr. 13, 1978); the New York Stock Exchange, Inc. (June 25, 1976, undated response received July 25, 1977, and Apr. 20, 1978); and the Securities Industry Association (July 14, 1977), Securities and Exchange Commission File No. S7-613 (hereinafter "File No. S7-613").

[10] Letter from James E. Buck to Andrew M. Klein (Dec. 23, 1977), File No. S7-613.

[11] March 1978 Release, at text following note 80.

[12] Securities Reform Act of 1975, Report of the House Comm. on Interstate and Foreign Commerce, Together With Minority Views, to Accompany H.R. 4111 (the "House Report"), H.R. Rept. No. 94-123, 94th Cong., 1st Sess. 54-57 (1975).

[13] House Report, at 55-57; Securities Acts Amendments of 1975, Report of the Senate Comm. on Banking, Housing, and Urban Affairs to Accompany S. 249 (the "Senate Report"), S. Rept. No. 94-75, 94th Cong., 1st Sess. 60-69 (1975). In 1964, the Commission concluded that floor trading activities in bonds did not pose serious problems. The Commission permitted the NYSE and the American Stock Exchange, Inc. (the "Amex"), to amend their floor trading plans under Rule 11a-1, 17 CFR 240.11a-1, to exempt bond trading from all of the prohibitions contained in that rule and in the plans adopted by the exchanges thereunder. In that connection, the Commission concluded that: (i) bond trading on the NYSE and the Amex comprises a minimal part of the business transacted on those exchanges; (ii) the low volume of activity in the exchange markets for bonds, coupled with the fact that the principal market for bonds exists in the over-the-counter market, eliminates the possibilities of harm which the Commission had earlier identified as arising from floor trading in equity securities; (iii) the floor trader in bonds does not have a significant competitive advantage over the public and, in fact, must adjust his own quotations to meet those he receives from off the floor; and (iv) because of the limited activity in bonds, there is considerable doubt whether the exchanges could continue making markets in bonds if the restrictions in Rule 11a-1 and the plans of the exchanges were to apply to the activities of members trading bonds on the floor. Securities Exchange Act Release No. 7375 (July 13, 1964).

[14] The phrase "other form of indebtedness" would include, for example, notes, obligations of the United States, foreign government obligations, guaranteed loan certificates, equipment trust certificates, and convertible debt securities. It would not, of course, include any equity security other than a convertible debt security. See Rule 3a11-1 under the Act, 17 CFR 240.3a11-1.

[15] The Commission continues to believe that, for purposes of section 11(a), there should be no difference between transactions for the account of a member allowed under section 11(a)(1) and transactions for the account of a person associated with that member, provided that those transactions are effected in the same manner and are subject to the same conditions. March 1978 Release, at text following note 58.

[16] Such transactions may, of course, be effected pursuant to an available statutory or rule exemption under section 11(a)(1), such as the effect versus execute rule (Rule 11a2-2(T)). In that regard, a member (the "initiating member") entering transactions into the NYSE Automated Bond System for execution should be regarded as meeting the off-floor transmission requirement contained in paragraph (a)(2)(ii) of the effect versus execute rule regardless of the location of the terminal at which the order is entered. See also March 1978 Release, note 41. If the order is matched by that system with an order on the contra side also entered by the initiating member and the transaction is thereafter effected under the conditions and limitations built into that system, the transaction will nevertheless comply with paragraph (a)(2)(iii) of the effect versus execute rule even though the initiating member's orders were so effected as a cross transaction.

[17] 15 U.S.C. 78k(a)(1)(G).

II. Amendments to, and Interpretations Under, the Proprietary Trading Rule (Temporary Rule 11a1-1(T))

The proprietary trading rule was adopted under Section 11(a)(1)(G)[17] to implement that provision's exemption for members' proprietary transactions. Under Section 11(a)(1)(G), as implemented by the proprietary trading rule, a member may effect a transaction for its own account if (i) the member derives more than 50% of its gross income from certain types of business (the "business mix" test), and (ii) the transaction yields priority, parity, and precedence in execution to orders for the accounts of persons who are not members or associated with members of the exchange. Questions have been raised concerning (i) the revenues which are included within the categories of business enumerated in the "business mix" test, and (ii) procedures that should be implemented by exchanges and their members concerning the identification of members' orders.

A. Treatment of revenues derived from transactions exempted under Section 11(a)(1).

The "business mix" test contained in Subparagraph (G)(i) of Section 11(a)(1) is intended to limit the Section 11(a)(1)(G) exemption to members which are engaged in certain aspects of the securities business.[18] Specifically, that test limits the availability of the exemption to members which are "primarily engaged in the business of underwriting and distributing securities issued by other persons, selling securities to customers, and acting as broker, or any one or more of such activities, and whose gross income normally is derived principally from such business and related activities" (referred to as "eligible income").

The determination as to whether revenue derived from a particular transaction or series of transactions is eligible income turns solely on the Section 11(a)(1)(G)(i) test itself rather than on whether the transaction or series of transactions is exempted under Paragraphs (A) through (H) of Section 11(a)(1). For example, revenue from an arbitrage transaction exempt under Section 11(a)(1)(D) would not necessarily be eligible income, since the arbitrage transaction might not involve any of the activities enumerated in Section 11(a)(1)(G)(i).

The phrase "selling securities to customers" in Section 11(a)(1)(G)(i) refers to an exchange member's principal transactions with its own customers. While purchasing securities from customers should be considered a "related" activity,[19] an exchange member's purchase of securities from, or sale to, other broker-dealers is not a transaction with the member's own customers,[20] even though the broker-dealers with whom the transactions are effected may be acting as agent for their customers. For example, an exchange specialist would derive eligible brokerage income from his book, but would derive eligible dealer income only in transactions with the specialist's own non-broker-dealer "customers." [21] Similarly, an upstairs market maker would derive eligible income from effecting principal transactions with its own customers[22] but not from market-making transactions with other broker-dealers who are acting as principal or as agent for their customers.

While this result represents what the Commission believes to be a proper reading of the language of Section 11(a)(1)(G)(i), the "business mix" test in the Section 11(a)(1)(G) exemption, as so interpreted, is too restrictive. It fails to recognize a number of exchange member dealer activities which also have been considered part of a "traditional" securities business. Accordingly, the Commission is amending Paragraph (b) of the proprietary trading rule, pursuant to its authority under Section 11(a)(1)(H), to permit members to count revenues from market-making, odd-lot dealer, and arbitrage and hedge transactions towards the satisfaction of the Section 11(a)(1)(G)(i) "business mix" test. All of these activities are expressly exempted from the prohibitions of Section 11(a)(1), in part because the Congress determined that their impact on exchange markets was beneficial, or at least not deleterious.[23]

In assessing compliance with the "business mix" test under Paragraph

[18] The "business mix" test is derived from a comparable provision in Section 3(c)(2) of the Investment Company Act of 1940, 15 U.S.C. 80a-3(c)(2). See Securities Acts Amendments of 1975, Report of the Committee on Conference to Accompany S. 249, H.R. Rep. 94-229, 94th Cong., 1st Sess. 105 (1975). The Commission's interpretations and actions with respect to Section 11(a)(1)(G)(i) should not, however, be viewed as implying any necessary interpretation or action with respect to that Section of the Investment Company Act of 1940.

[19] Income derived from activities "related" to such business would include income from activities which are directly incidental to one of the activities enumerated in Section 11(a)(1)(G)(i). For example, activities "related to" the sale of securities to customers or brokerage would include clearance and settlement, custodial services, and the extension of credit to customers.

[20] The term "customer" is generally used to refer to persons other than registered broker-dealers. See, e.g., Rule 15c1-1 under the Act, 17 CFR 240.15c1-1.

[21] NYSE Rule 113, for example, permits NYSE specialists to carry accounts for certain types of non-institutional customers. New York Stock Exchange Guide (CCH) ¶2113.

[22] Investment advisory activities would not, however, represent activities "related" to those set forth in Section 11(a)(1)(G)(i). March 1978 Release, note 65.

[23] Senate Report, at 68. Market-making transactions are exempted under Section 11(a)(1)(A), odd-lot dealer transactions under Section 11(a)(1)(B), and arbitrage and hedge transactions under Section 11(a)(1)(D).

MY 1 78 UMI

V 4 3 — 84

(b) of the proprietary trading rule, an exchange may rely on a financial report prepared by independent accountants in accordance with generally accepted accounting principles. Certain classes of members, however, are not required to file such reports with exchanges under Rule 17a-5,[24] and, as a result, would not be able to supply such reports to exchanges without incurring additional costs. The Commission believes that, in the absence of a report of independent accountants under Rule 17a-5, an exchange may rely on a final report filed under rule 17a05(a)(4) unless the exchange knows or should know that the report is inaccurate.[25]

B. Pre-May 1, 1978 limit orders.

Under current practices on the exchanges, limit orders left with an exchange specialist or other person maintaining a limit order book may be designated as "good 'til cancelled" or otherwise designated as not expiring if unfilled at the end of the trading day on which they were entered.[26] In view of those practices, the Commission understands that limit orders entered before May 1, 1978 generally will not have been marked, for purposes of the proprietary trading rule, to indicate whether they must yield to non-members' orders if effected on or after May 1, 1978.[27]

In order to avoid undue burdens with respect to those orders, the Commission has adopted, effective May 1, 1978, a new Paragraph (c) to the proprietary trading rule. That Paragraph, adopted pursuant to Sections 11(a)(1)(G) and (H), provides that any limit order which was left with a specialist or any other person maintaining a limit order book on a national securities exchange before May 1, 1978, and not executed before that date, shall be deemed, if executed before January 1, 1979, to be an order for the account of a person who is not, and is not associated with, a member.

C. Identification of orders.

Subparagraph (G)(ii) of Section 11(a)(1) requires all members' proprietary orders effected thereunder to comply with Commission rules assuring that such orders yield priority, parity, and precedence in execution to orders for the accounts of persons which are not members or associated with members of the exchange (collectively referred to as "yielding orders"). Paragraph (a) of the proprietary trading rule implements that provision by requiring (i) that a member's proprietary order be identified at all steps in the process of effecting the order, and (ii) that, notwithstanding exchange yielding rules otherwise applicable, such order yields to any non-member order at the same price regardless of size or the time when entered. Members' yielding orders under the proprietary trading rule are not required to yield to other members' yielding orders, or to other members' or associated persons' proprietary orders otherwise exempt under Section 11(a)(1).

The proprietary trading rule sets forth an order identification requirement only with respect to yielding orders. In order for the yielding requirement of the proprietary trading rule to work properly, however, it would appear necessary for all members of the trading crowd to identify all orders, including those not required to yield, as to whether they are (i) non-member orders, (ii) members' or associated persons' yielding orders, or (iii) members' or associated persons' non-yielding orders.[28]

III. Interpretations Under the Look-Through Rule (Rule 11a1-2)

The look-through rule permits a member to effect a transaction for the account of its associated person or the public customers of its associated person if, assuming such account were carried on the same basis by a member, the member itself would have been permitted under Section 11(a) and the rules thereunder to effect the transaction. The look-through rule is based on the principle that there should be no difference between transactions for the account of a member allowed under Section 11(a)(1) and transactions for the account of a person associated with that member, provided that these transactions are effected in the same manner and are subject to the same conditions.[29]

The look-through rule provides that a member proposing to effect a transaction for the account and benefit of an associated person in reliance on Section 11(a)(1)(G) and the proprietary trading rule thereunder may do so if the associated person, during its preceding fiscal year, met the "business mix" text of Paragraph (G)(i). While the associated person's order must yield to public orders to satisfy the conditions of Section 11(a)(1)(G)(ii), the member effecting such a transaction for its associated person is not itself required to satisfy the "business mix" test.

IV. Amendment to, and Interpretations Under, the Effect Versus Execute Rule (Temporary Rule 11a2-2(T))

The effect versus execute rule was adopted by the Commission in the March 1978 Release. It provides an exemption for all member transactions for covered accounts that are referred to other members for execution and are executed in accordance with certain conditions. The effect versus execute rule was designed to put members and non-members on the same footing, to the extent practicable, in light of the purposes of Section 11(a).[30]

A. Effective date. The effect versus execute rule was adopted pursuant to the Commission's rulemaking authority under Sections 11(a)(1)(H) and 11(a)(2).[31] Pursuant to Section 11(a)(3), the provisions of Section

[24] 17 CFR 240.17a-5.

[25] The proprietary trading rule does not define the procedures to be followed in the case of new members which have not been in business long enough to have financial statements for the preceding fiscal year. The Commission believes that it would be appropriate for exchanges to permit a new member to use the Section 11(a)(1)(G) exemption if the new member represents to the exchange its bona fide intention to conduct a business meeting the "business mix" test in Section 11(a)(1)(G)(i). Thereafter, the exchange should obtain unaudited quarterly statements from the member (until such time as its audited financial statement for the preceding fiscal year is available) and allow the new member to use the Section 11(a)(1)(G) exemption only if its revenues in each quarter meet the "business mix" test. See Nadell-Lodge, Inc. (1976-77 Transfer Binder) Fed. Sec. L. Rep. (CCH) ¶80,964 (Jan. 3, 1977).

[26] See, e.g., NYSE Rule 13, New York Stock Exchange Guide (CCH) ¶2013; Amex Rule 131, American Stock Exchange Guide (CCH) ¶9281.

[27] Response of the New York Stock Exchange, Inc. (April 20, 1978), File No. S7-613.

[28] For example, if upstairs member firm A transmits an order for the account and benefit of its associated person or its managed institutional account to floor member B pursuant to the effect versus execute rule, it would appear necessary for member B to identify the class of its order to the trading crowd immediately prior to execution in order to facilitate operation of the yielding requirement.

[29] March 1978 Release, at text following note 56.

[30] See March 1978 Release, at text accompanying notes 24-52. Three commentators on the March 1978 Release objected to the contractual modification and disclosure provisions of the effect versus execute rule on the ground that those provisions were inconsistent with the purposes of Section 11(a). Responses of the American Council of Life Insurance (April 14, 1978) and the American Insurance Association (April 13, 1978), File No. S7-613. One of those commentators suggested that compliance with those provisions would put exchange members at a competitive disadvantage with respect to non-member money managers. Response of Sanford C. Bernstein & Co., Inc. (April 13, 1978), File No. S7-613. But see Report of the House Comm. on Interstate and Foreign Commerce, Together With Additional Views, to Accompany H.R. 11567, H.R. Rept. No. 95-1010, 95th Cong., 2d Sess. 4 (1978); 121 Cong. Rec. H2431 (daily ed. April 4, 1978) (remarks of Congressman Moss).

[31] Under Section 11(a)(2) and other provisions of the Act, the Commission has general authority to extend, by rule, the Section 11(a) prohibition to nonmember, exempt, and over-the-counter transactions. See note 3 supra.

11(a)(1) will not become effective until May 1, 1978, with respect to persons who were exchange members on May 1, 1975. Section 11(a)(3), however, also provides that the Commission is not prohibited from exercising its Section 11(a)(2) rulemaking authority to adopt regulations prior to May 1, 1978, prohibiting or regulating the kinds of transactions subject to Section 11(a)(1). Consequently, the Commission is authorized under Sections 11(a)(2) and 11(a)(3) to apply the prohibition of Section 11(a)(1) to exchange members who were members on May 1, 1975, and otherwise not subject to Section 11(a)(1) until May 1, 1978.

The House of Representatives[32] and the Senate[33] recently passed legislation to extend the "grandfather" provision of Section 11(a)(3). The effect versus execute rule, because it was adopted in part under Section 11(a)(2), might be construed to become effective on May 1, 1978 as to all exchange members, notwithstanding any legislative extension of Section 11(a)(3). If the delay legislation is enacted into law, however, the Commission does not intend the effect versus execute rule to be effective with respect to those grandfathered members. Accordingly, the Commission today is amending the effect versus execute rule by the addition of a new Paragraph (f), to eliminate any uncertainty as to the Commission's intention in that regard.

B. Participation of member's floor employees.

Paragraph (a)(2)(iii) of the effect versus execute rule prohibits the initiating member or an associated person thereof from participating in the execution in the transaction at any time after the order for the transaction has been transmitted. The prohibition would thus extend to any order-handling function performed by the initiating broker (or one of its associated persons) after the order was transmitted. Accordingly, the Commission wishes to make it clear that the participation prohibition in Paragraph (a)(2)(iii) would not allow a member to transmit a covered account order from off the exchange floor to its employee on the floor for the purpose of having that employee refer the order to an unaffiliated member. That employee is an associated person of the member and is prohibited from participating in the execution of any transaction pursuant to the effect versus execute rule after transmission of the order by the member from its facilities off the exchange floor. That application of the prohibition on participation helps to ensure that members do not retain any special trading advantages not available to non-members in connection with effecting orders for covered accounts under the effect versus execute rule.

V. Application of the Natural Person Exemption Under Section 11(a)(1)(E) to Certain Accounts

Section 11(a)(1)(E)[34] exempts from the prohibition of section 11(a)(1) any transaction for the account of a "natural person, the estate of a natural person, or a trust (other than an investment company) created by a natural person for himself or another natural person." That exemption was discussed in earlier releases.[35] The application of that exemption as to certain kinds of customer accounts requires clarification.

One reading of section 11(a)(1)(E) might lead to the conclusion that accounts of two or more natural persons are excluded from its coverage, even though many such accounts are substantially similar to individual natural person accounts. The Commission believes that that exemption should be available to certain accounts which, in light of the purposes of section 11(a), may be considered "natural person accounts," provided that such accounts are not established for the purpose of avoiding section 11(a) or the rules thereunder: (i) husband and wife joint accounts and other joint tenancies where the tenants are related by blood or marriage or are members of the same household; (ii) accounts of family trusts with one or more beneficiaries who are related to the settlor by blood or marriage, or who are members of the settlor's household; and (iii) an individual retirement account established by a natural person.[36]

An account established by an entity with a separate legal existence (e.g., an unincorporated business association, a general or limited partnership, a joint venture, a professional association, a personal holding company, or a corporation) would not qualify for the natural person exemption. A personal holding company established under the laws of another country, however, may be a "natural person" for purposes of section 11(a)(1)(E) if the company is able to demonstrate that: (i) it is established under the laws of a country which does not recognize or permit the equivalent of a common law joint tenancy or trust; (ii) the company is established for the benefit of persons who are related by blood or marriage, or who are members of the same household; and (iii) the company is not established for the purpose of avoiding section 11(a) or the rules thereunder.

VI. Relationship of Exemptions Under Section 11(a) To One Another

Section 11(a)(1) prohibits a member of a national securities exchange from effecting a transaction for any covered account in the absence of a statutory exemption or one created by rule. In many cases, a member may be able to effect a transaction pursuant to more than one statutory or rule exemption. As the Commission observed in the March 1978 Release,[37] each exemption under section 11(a), whether provided by the section or by rule, is independent of each other exemption under that provision.[38] The number of questions, however, received by the Commission's staff with respect to the interaction of exemptions under section 11(a) suggests that further explanation of this matter would be appropriate.

A member effecting a transaction that could fall within more than one statutory or rule exemptions is only required to satisfy the terms of one exemption. For example, a member which qualifies for the exemption for members' proprietary transactions under section 11(a)(1)(G) or one of the other statutory exemptions may properly decide to rely instead upon the provisions of the effect versus execute rule to effect a proprietary transaction. If the member chooses to rely upon the provisions of the effect versus execute rule, it need comply only with the conditions of that rule and need not comply with the conditions of any other available statutory or rule exemption.

VII. Statutory Basis

The Securities and Exchange Commission, acting pursuant to the Securities Exchange Act of 1934, and particularly sections 2, 3, 6, 10, 11, 11A, 15, and 23 thereof (15 U.S.C. 78b, 78c, 78f, 78j, 78k, 78k-1, 78o, and 78w), hereby adopts Temporary Rule 11a1-4(T), amendments to Temporary Rule 11a1-1(T), and an amendment to Temporary Rule 11a2-2(T). The Commission has determined that Temporary Rule 11a1-4(T), the amendments to Temporary Rule 11a1-1(T), and the amendment to Temporary Rule 11a2-

[32] H.R. 11567, 95th Cong., 2d Sess., Section 2(a) (1978).

[33] S. 8331, 95th Cong., 2d Sess., Section 19 (1978).

[34] 15 U.S.C. 78k(a)(1)(E).

[35] See January 1976 Release, at text accompanying notes 26-27 and note 27; March 1977 Release, at text accompanying notes 86-123; March 1978 Release, at text following note 67.

[36] Group retirement accounts, such as group Keogh plans and so-called "master IRA" accounts maintained by a member or its associated person, would not be included within the ambit of the natural person exemption.

[37] March 1978 Release, note 10.

[38] The look-through rule, however, does not provide any exemption that would not separately be available to a member trading for its own account, one which it managed, or the account of an unaffiliated public customer.

MY 1 78 UMI

V 43 | 84 MY 1 78 UMI

2(T) are consistent with the purposes of section 11(a), the protection of investors, and the maintenance of fair and orderly markets.

With respect to the adoption of Temporary Rule 11a1-4(T), the Commission believes that failure to adopt this rule prior to May 1, 1978 would be likely to disrupt exchange trading in bonds and other forms of indebtedness without furtherance of the purposes of section 11(a). Such a disruption could interfere with the execution of transactions for retail customer orders in exchange-listed bonds and other forms of indebtedness.[39] In view of the foregoing discussion and the May 1, 1978 effective date of section 11(a), the Commission finds that notice and public procedures in accordance with Section 4(b) of the Administrative Procedure Act ("APA")[40] would be impracticable and contrary to the public interest. Accordingly, the Commission finds, pursuant to 5 U.S.C. 553(b)(B), that good cause exists to adopt Temporary Rule 11a1-4(T) without notice and public procedures in connection therewith. For the same reasons, the Commission finds good cause to make Temporary Rule 11a1-4(T) effective less than 30 days after its adoption, in accordance with Section 4(d) of the APA.[41] In addition, publication of notice is not required because Temporary Rule 11a1-4(T) grants an exemption under section 11(a).[42]

With respect to the amendments to Temporary Rule 11a1-1(T), the Commission believes that the amendment should eliminate unjustifiable distinctions between classes of securities transactions, will avoid anticompetitive discrimination in various aspects of the securities business, and will avoid unnecessary disruptions of exchange markets. In view of the May 1, 1978 effective .date of section 11(a), the Commission finds that notice and public procedures in accordance with section 4(b) of the APA would be impracticable and contrary to the public interest and that good cause exists to adopt the amendments to Temporary Rule 11a1-1(T) without notice and public procedure in connection therewith. In addition, the Commission finds good cause to make the amendments to Temporary Rule 11a1-1(T) effective less than 30 days after its adoption in accordance with section 4(d) of the APA,[43] in view of the foregoing and the fact that the amendment broadens an existing exemption under section 11(a).

With respect to the amendment to Temporary Rule 11a2-2(T), the Commission finds that the amendment is interpretive in nature, and that notice and public procedure under Section 4 of the APA[44] are unnecessary in connection therewith, and that 30 days' notice of its effective date is likewise unnecessary.

The Commission finds that the rule and rule amendments being adopted today will not impose any burdens on competition that are not necessary or appropriate in furtherance of the purposes of the Act. The adoption of Temporary Rule 11a1-4(T) will establish an exemption for members' exchange proprietary transactions in listed bonds and other forms of indebtedness, and may increase competition on exchanges. The amendment to Temporary Rule 11a1-1(T) which concerns the "business mix" test may increase competition by broadening the availability of the exemptions under Section 11(a)(1)(G). The second amendment to Temporary Rule 11a1-1(T) relieves problems with respect to the handling of certain limited price orders and will not impose any unnecessary or inappropriate burdens on competition. The amendment to Rule 11a2-2(T) is interpretive in nature and does not impose any burden on competition.

Part 241 of Chapter II of Title 17 of the Code of Federal Regulations is amended, effective immediately, by the inclusion of this release therein. Part 240 of Chapter II of Title 17 of the Code of Federal Regulations is amended, effective May 1, 1978, as follows:

§ 240.11a1-4(T) Bond transactions on national securities exchanges.

A transaction in a bond, note, debenture, or other form of indebtedness effected on a national securities exchange by a member for its own account or the account of an associated person thereof shall be deemed to be of a kind which is consistent with the purposes of section 11(a)(1) of the Act, the protection of investors, and the maintenance of fair and orderly markets.

§ 240.11a1-1(T) Transactions yielding priority, parity and precedence.

. . . . . .

(b) A member shall be deemed to meet the requirements of section 11(a)(1)(G)(i) of the Act if during its preceding fiscal year more than 50 percent of its gross revenues was derived from one or more of the sources specified in that section. In addition to any revenue which independently meets the requirements of section 11(a)(1)(G)(i), revenue derived from any transaction specified in paragraph (A), (B), or (D) of section 11(a)(1) of the Act shall be deemed to be revenue derived from one or more of the sources specified in section 11(a)(1)(G)(i). A member may rely on a list of members which are stated to meet the requirements of section 11(a)(1)(G)(i) if such list is prepared, and updated at least annually, by the exchange. In preparing any such list, an exchange may rely on a report which sets forth a statement of gross revenues of a member if covered by a report of independent accountants for such members to the effect that such report has been prepared in accordance with generally accepted accounting principles.

(c) Any limited price order which was left with a specialist or any other person maintaining a limit order book on a national securities exchange before May 1, 1978, and not executed before that date, shall be deemed, if executed before January 1, 1979, to be an order for the account of a person who is not, and is not associated with, a member.

§ 240.11a2-2(T) Transactions effected by exchange members through other members.

. . . . . .

(f) The provisions of this section shall not apply to transactions by exchange members to which, by operation of section 11(a)(3) of the Act, section 11(a)(1) of the Act is not effective.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-4102]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Town of Hooksett, Merrimack County, N.H.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Hooksett, Merrimack County, N.H. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Office, 16 Main Street, Hooksett, N.H. Send comments to: Mr. Raymond Langer, Chairman, Board of Selectmen, Town Office, 16 Main Street, Hooksett, N.H. 03106.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Hooksett, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Merrimack River	At southern corporate limit.	185
	4100 ft upstream of confluence of Peters Brook.	190
	Just downstream of Main St.	191
	Just upstream of Hooksett Dam.	194
	At northern corporate limit.	198
Dalton Brook	At confluence with Merrimack River.	187
	800 ft upstream of Boston & Maine RR.	188
	1050 ft upstream of Boston & Maine RR.	218
	2300 ft upstream of Boston & Maine RR.	236
	3700 ft upstream of Boston & Maine RR.	249
	1950 ft downstream of Benton Rd.	264
	300 ft downstream of Benton Rd.	273
	Just upstream of Benton Rd.	295
	Upstream end of U.S. Route 3 Culvert.	298
	Downstream end of State Route 28 Bypass.	299
	Just upstream of Route 28 Bypass Culvert.	302
Messer Brook	At confluence with Merrimack River.	186

[Docket No. FI-4103]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Town of Eastchester, Westchester County, N.Y.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Eastchester, Westchester County, N.Y. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Department of Planning and Community Development, 40 Mill Road, Eastchester, N.Y. Send comments to: Mr. Anthony J. Colavita, Town Supervisor, town of Eastchester, Town Hall, 40 Mill Road, Eastchester, N.Y. 10709.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Eastchester, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures reuired by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Bronx River	Bronx River Parkway approximately 1,890 ft upstream of Harney Rd[1].	123
	Harney Rd[1]	120
	Bronx River Parkway approximately 240 ft downstream of Harney Rd[2].	117
	Bronx River Parkway approximately 4,040 ft downstream of Harney Rd[1].	113
	Bronx River Parkway approximately 4,720 ft downstream of Harney Rd[2].	111
Hutchinson River	Hutchinson Blvd[1]	212
	Wilmot Rd[2]	192
	Dam holding reservior No. 1[1].	186
	Exit ramp—upstream Hutchinson River Parkway[1].	150
	Entrance/exit ramp downstream of Hutchinson River Parkway[2].	137
	Dam holding reservior No. 3[1].	124
	Hutchinson River Parkway ramp[1].	103
	Dam holding reservior No. 2[1].	103
	Driveway bridge[2]	69
	New Rochelle Rd[1]	66

[1]Upstream.
[2]Downstream.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: April 12, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Oneonta, N.Y.; Correction

AGENCY: Federal Insurance Administration, HUD.

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 42 FR 53765 of the FEDERAL REGISTER of October 3, 1977.

EFFECTIVE DATE: October 3, 1977.

FOR FUTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Oneonta Creek	625 ft upstream of Spruce St.	1,143
	Upstream of High School Dr.	1,191
Mill Race	Downstream of Gas Ave.	1,084
	150 ft upstream of Gas Ave.	1,085
Silver Creek	500 ft upstream of Center St.	1,175
Glenwood Creek	50 ft upstream from private dam located 900 ft upstream of Main St.	1,224
	City limit (1,650 ft upstream of Main St.).	1,270

Should be corrected to read:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Oneonta Creek	675 ft upstream of Spruce St.	1,143
	60 ft upstream of High School Dr.	1,191
Mill Race	50 ft upstream of Gas Ave.	1,084
	325 ft upstream of Gas Ave.	1,085
Silver Creek	550 ft upstream of Center St.	1,175
Glenwood Creek	70 ft upstream from private dam located 900 ft upstream of Main St.	1,224
	City limit (1670 ft upstream of Main St.).	1,270

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968, as amended

NATIONAL FLOOD INSURANCE PROGRAM

Revision of Proposed Flood Elevation Determinations for the Borough of West Easton, Northampton County, Pa.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the borough of West Easton, Northampton County, Pa. Due to recent engineering analysis, this proposed rule revises the proposed determinations of base (100-year) flood elevations published in 41 FR 42208 on September 27, 1976, and in The Easton Express published on August 30, 1976, and August 31, 1976, and hence supersedes those previously published rules.

DATE: The period for comment will be ninety (90) days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review in the front window of Borough Hall, 6th and Center Streets, West Easton, Pa. Send comments to: Mayor James R. Kelly, Borough Hall, 6th and Center Streets, West Easton, Pa. 18042.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed base (100-year) flood elevations are listed below for selected locations in the borough of West Easton, Northampton County, Pa., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)).

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing building and their contents.

The proposed base (100-year) flood elevations are:

Source of flooding	Location	Elevation in feet, above mean sea level
Lehigh River	Main St	192
	Closed highway bridge	196
	Corporate limit, upstream.	197

(National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 12, 1978.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of West Columbia, Lexington County, S.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevation listed below for selected locations in the city of West Columbia, Lexington County, S.C. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 1053 Center Street, West Columbia, S.C. 29169. Send comments to: Mayor Paul Waites or Mr. Jack Carraway, 1053 Center Street, P.O. Box 44, West Columbia, S.C. 29169.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of West Columbia, Lexington County, S.C., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on it own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on exisiting buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Congaree River	Intersection of Gervais St. and corporate limits.	157
Saluda River	Natchez Ter. (extended)	162

(National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delega-

[Docket No. FI-4109]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the Town of Chatham, Pittsylvania County, Va.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Chatham, Pittsylvania County, Va. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Bulletin Board at the Town Hall, Chatham, Va. Send comments to: Mr. Paul J. Harold, Town Manager of Chatham, 24 Depot Street, Chatham, Va. 24531.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Chatham, Pittsylvania County, Va., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-488)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevation, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community much change any existing ordinances that are more stringent in their flood plan management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Cherrystone Creek.	City boundary (downstream).	586
	Davis Rd.	587
	U.S. 29	592
	South Ry.	600
	VA-57	610
	City boundary (upstream).	613

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 12, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

Requirements Relating to Certain Exchanges Involving a Foreign Corporation.

AGENCY: Internal Revenue Service, Treasury.

ACTION: Extension of Time for Comments and Requests for a Public Hearing.

SUMMARY: This document provides notice of an extension of time for submitting comments and requests for a public hearing concerning the notice of proposed rulemaking with respect to Requirements Relating to Certain Exchanges Involving a Foreign Corporation. The extended deadline for submission of comments and requests for a public hearing is August 1, 1978.

DATES: Written comments and requests for a public hearing must be delivered or mailed by August 1, 1978.

ADDRESS: Send comments and request for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-2-78), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Katherine A. Newell of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, CC:LR:T, 202-566-3740, not a toll-free call.

SUPPLEMENTARY INFORMATION: By a notice of proposed rulemaking published in the FEDERAL REGISTER for Friday, December 30, 1977 (42 FR 65152 and 65204), comments and requests for a public hearing with respect to the proposed rules were to be delivered or mailed to the Commissioner of Internal Revenue, Attention: CC:LR:T (LR-2-78), Washington, D.C. 20224, by February 28, 1978. By a notice published in the FEDERAL REGISTER for Tuesday, February 21, 1978, (42 FR 7245), this date was extended to May 1, 1978. The date by which such comments or requests must be delivered or mailed is hereby further extended to August 1, 1978.

[29 CFR Part 575]

WAIVER OF CHILD LABOR PROVISIONS FOR AGRICULTURAL EMPLOYMENT OF 10- AND 11-YEAR-OLD MINORS IN HAND-HARVESTING OF SHORT SEASON CROPS

Hearing Concerning Provisions Governing Application for an Issuance of a Waiver

AGENCY: Wage and Hour Division.

ACTION: Notice of hearing concerning proposed rule.

SUMMARY: The Administrator of the Wage and Hour Division has proposed regulations to implement section 13(c)(4) of the Fair Labor Standards Amendments of 1977. This proposed regulation would provide a waiver from the child labor provisions of the Act for the agricultural employment of 10- and 11-year-old minors in the hand-harvesting of short season crops under certain conditions as provided in the proposal published in the FEDERAL REGISTER on April 4, 1978, at page 14068. This hearing will provide an additional forum for comment.

DATES: All comments are due on or before the close of the hearing. The hearing will commence on May 11, 1978, at 9:30 a.m., e.d.t.

ADDRESS: The hearing will be held in Room S-5215 A, B and C, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Lucille C. Pinkett, Wage and Hour Division, Room S-3022, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C., 20210, telephone 202-523-8412.

SUPPLEMENTARY INFORMATION: In order to give all interested parties an opportunity to present supporting and contrary views and to assist the Administrator in reaching a decision in this matter the Administrator of the Wage and Hour Division, has determined that an informal hearing is desirable.

Beginning at 9:30 a.m., e.d.t., on May 11, 1978, the presiding officer will hold a prehearing conference in order to establish the order and time for the presentations and in order to settle any other matters relating to the proceedings. All persons intending to make presentations should attend the prehearing conference, which is open to the public. The public hearing will immediately follow the prehearing conference.

The oral proceedings shall be reported verbatim. The use of prepared statements by witnesses is encouraged. An original and two copies of all documents to be used should be submitted at the hearing.

Comments submitted in accordance with the notice of April 4, 1978, need not be resubmitted as they will be incorporated in and made a part of this record.

The presiding officer shall have all the powers necessary or appropriate to conduct a full and fair informal hearing, including the powers:

(a) To regulate the course of the hearing;

(b) To dispose of procedural requests, objections, and comparable matters;

(c) To confine the presentations to matters pertinent to the requested information;

(d) To regulate the conduct of those present at the hearing by appropriate means;

(e) To permit and to limit cross examination; and

(f) In his discretion, to keep the record open for a short, stated period

of time to receive written data from any person who has participated in the oral proceeding.

Following the close of the hearing, the presiding officer shall certify the record thereof to the Administrator of the Wage and Hour Division. The Administrator of the Wage and Hour Division shall, after consideration of the record and other pertinent information, take such action as he deems appropriate.

A copy of the record or portions thereof as it becomes available will be open for public inspection and examination at the office of Xavier M. Vela, Administrator, Room S-3502, Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210. The entire record or any part thereof may be purchased as provided in 29 CFR 70.62(c) at the actual cost of duplication as computed pursuant to the fee schedule in 29 CFR 70.62(b).

The harvest season during which the 10- and 11-year-old minors will be employed commences about June 1. In order that appropriate action may be promptly taken it is necessary that less than 15 days notice of the hearing be given.

Signed at Washington, D.C., on this 27th day of April 1978.

HERBERT J. COHEN,
Assistant Administrator, Wage and Hour Division.

SAFETY OF LIFE ON NAVIGABLE WATERS

Establishment of Special Local Regulations for the President's Cup Regatta, Washington, D.C.

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: This proposed rule details the special local regulations which are intended to be established for the President's Cup Regatta. The special local regulations will be established to ensure the safety of life on the Potomac River at Washington, D.C., immediately before, during, and immediately after the regatta.

DATES: All comments received before May 31, 1978, will be considered. Proposed effective dates: From 10 a.m. EDST until 6 p.m. EDST on June 15, 16, 17 and 18, 1978.

FOR FURTHER INFORMATION CONTACT:

LCDR C. C. Atkins, Commander(b), Fifth Coast Guard District, Portsmouth, Va. 23705, 804-393-9611.

SUPPLEMENTARY INFORMATION: The establishment of special local regulations to ensure the safety of life on the navigable waters of the United States immediately before, during and immediately after a regatta is authorized by the Act of April 28, 1908 (35 Stat. 69) as amended, and 33 CFR 100.35, as amended.

Accordingly, the following local regulations are proposed:

§ 100.35 Special local regulations.

(a) Location. The area subject to these regulations is those waters enclosed by a line drawn from the southern tip of Haines Point northwards along the eastern seawall to a point 1,000 feet from the southern tip of Haines Point; thence easterly to a point 400 feet from the seawall; thence in a southerly direction to a point 1,400 feet distant; thence along a line of bearing 240° T. to the Virginia shore; thence upstream along the Virginia shoreline to the Penn Central Railroad bridge between Washington, D.C., and Arlington, Va.; thence 034° T. to the Potomac Park-Potomac River shoreline; thence along the Potomac Park-Potomac River shoreline to the southern tip of Haines Point.

(b) Regulations. (1) Except for participants in the President's Cup Regatta or persons or vessels authorized by the Coast Guard patrol officer, no person or vessel may enter or remain in the area specified in paragraph (a) of these regulations.

(2) The operator of any vessel in the immediate vicinity of the area specified in paragraph (a) above of these regulations shall:

(i) Stop his vessel immediately upon hearing five or more short blasts of a horn or whistle from any vessel displaying a Coast Guard emblem; and

(ii) Proceed as directed by any Coast Guard officer or petty officer.

(3) Any spectator vessel may anchor outside of the area specified in paragraph (a) of these regulations.

(4) The Coast Guard patrol officer is a commissioned officer of the Coast Guard who has been designated by the Commander, Fifth Coast Guard District.

(5) These regulations and other applicable laws and regulations shall be enforced by Coast Guard officers and petty officers on board Coast Guard, public, and private vessels displaying the Coast Guard emblem.

(Sec. 1, 35 Stat. 69 as amended, sec. 6(b)(1) 80 Stat. 937; 46 U.S.C. sec. 454, 49 U.S.C. sec. 1655(b)(1); 33 CFR 100.35, 49 CFR 1.46(b).)

NOTIFICATION OF TANK VESSEL OWNERSHIP INFORMATION, NAMES AND COUNTRY OF REGISTRY

Public Hearing

AGENCY: Coast Guard, DOT.

ACTION: Supplemental notice—Public hearing.

SUMMARY: In the FEDERAL REGISTER of Thursday, April 13, 1978 (43 FR 15586), the Coast Guard proposed amending the rules for protection of the marine environment relating to tank vessels carrying oil in bulk to require all oil tankers of 20,000 tons deadweight (dwt) or more, United States and foreign vessels, that call at U.S. ports, places or deepwater ports to engage in commercial service to report certain ownership information,

V 4 3 — 8 4

all registered names the vessel has had since it began operation, and the country of current registry. This proposal announced a public hearing to be held on May 26, 1978, in Houston, Tex. Because of scheduling problems, it has become necessary to change the location of the hearing in Houston. The new location of the hearing is set out below.

DATES: The public hearing will be held on May 26, 1978, beginning at 9:30 a.m., in the Ballroom, Whitehall Hotel, 1700 Smith Street, Houston, Tex.

FOR FURTHER INFORMATION CONTACT:

FEDERAL MARITIME COMMISSION

[46 CFR Part 502]

[Docket No. 78-12]

RULES OF PRACTICE AND PROCEDURE

Simplification of Rules Governing Special Docket Applications for Permission To Refund or Waive Portions of Freight Charges in Foreign Commerce

AGENCY: Federal Maritime Commission.

ACTION: Proposed Rule Changes.

SUMMARY: The Federal Maritime Commission proposes to amend its rules of practice and procedure to simplify the process by which common carriers by water in the foreign commerce of the United States or conferences of such carriers seek permission to refund or waive a portion of freight charges because of tariff errors. The amendments are necessary to eliminate unnecessary technicalities and uncertainties which interfere with the prompt processing of applications. The effect of the amendments will be to eliminate participation of unnecessary parties, clarify requirements as to the time required to file, and simplify the standard form used to submit relevant information.

DATES: Comments on or before: May 26, 1978.

ADDRESSES: Comments to: Secretary, Federal Maritime Commission, Room 11101, 1100 L Street NW., Washington, D.C. 20573.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, Federal Maritime Commission, Room 11101, 1100 L Street NW., Washington, D.C. 20573, 202-523-5725.

SUPPLEMENTARY INFORMATION: In 1968, section 18(b)(3) of the Shipping Act, 1916, 46 U.S.C. 817(b)(3), was amended by Pub. L. 90-298 to authorize the Commission to grant permission to common carriers by waters in the foreign commerce of the United States or conferences of such carriers to refund or waive portions of freight charges under certain conditions. The amending legislation was enacted because of rigid application of tariff law requiring strict adherence to rates published at time of shipment often resulted in inequitable financial injury to shippers when carriers or conferences committed certain types of errors in tariff publication. For example, if the carriers or conferences had no intention of charging a particular higher rate but through bona fide mistake on the part of the carrier or conference, a tariff reflecting a lower intended rate had not been timely filed, the shipper would nevertheless be compelled to pay the higher rate even though such shipper might have been promised the lower rate. To correct such inequities and others specified, section 18(b)(3) was amended to permit the Commission to eliminate the harmful effects flowing from the carriers' or conferences' errors and give relief to shippers.

Although the Commission must exercise care to insure that mistakes committed by carriers or conferences are bona fide and that the various procedural requirements of Pub. L. 90-298 are met, the basic thrust of the amending legislation is remedial. However, the Commission has observed that under the present regulation which implements the amending legislation confusion and uncertainty has arisen which causes unnecessary delay and frustrates the remedial pruposes of the law. The particular areas of uncertainty and confusion concern the status of shippers as parties to proceedings commenced by the filing of applications and the methods used to determine the period of time within which such applications must be filed.

Pub. L. 90-298 gives carriers or conferences the right to file applications to correct the results of their own mistakes for the benefit of shippers. Proceedings arising under that law are therefore not truly adversary in nature. However, the Commission's present regulation, Rule 92(a), 46 CFR 502.92(a), establishes any proceeding begun under law in question as "the equivalent of a complaint and answer thereto admitting the facts complained of." Furthermore, the standard form prescribed by the present regulation requires the notarized concurrence of the shipper as "complainant." As a result of this situation, the processing of applications has been delayed. In some instances, it has been necessary to obtain the concurrence of shippers located overseas, or assignments of their rights to persons located in the United States, or affidavits from nominal complainants whose only function is to promise to pass the refund or the benefit of the waiver through to the real party in interest, i.e., the shipper or consignee who was responsible for payment of the freight and did make payment in whole or in part.

The Commission believes that the primary objective of the law in question was to remedy obvious inequites and give relief when the conditions set forth in that law are met and that relief, when deserved, should not be impeded by unnecessary technicalites. The proposed amendments to Rule 92(a) will eliminate such technicalities while at the same time providing the Commission with sufficient information upon which to base a proper decision. This will be done by restructuring the proceedings arising under the law into non-adversary applications and removing the requirement that shippers submit concurrences with the applications. To insure that the the proper person receives the benefit of the refund or waiver, however, the applicant will be required to furnish specific information regarding payment of the freight and the person responsible for payment. The standard form prescribed by the regulation will also be restructured to eliminate unnecessary information and simplify the format for easier utilization.

The second major problem concerns the method used to determine whether the application has met the statutory requirement that it be "filed with the Commission within one hundred and eighty days from the date of shipment." Although the Commission has determined in special-docket cases that the term "filing" may be construed to mean date of placing the application in the mail,[1] there is as yet no clear definition of the term "date of shipment." In most cases applications are filed early enough in time so that is has been unnecessary to fix a particular point in time as the "date of shipment." Usually, the date shown on the bill of lading issued by the carrier, whether rated or not, has been used as a convenient standard. However, in some instances the date of the on-board bill of lading has been used.[2] Furthermore, it has not been settled as to whether some other point of reference could be used such as date of payment of the feight or date of delivery. The problem stems from the fact that the legislative history to Pub. L. 90-298 is not illuminating because the term "date of shipment" found its way into the statute without discussion of definition.

[1] *Ghiselli Bros.* v. *Micronesia Interocean Line, Inc.*, 13 F.M.C. 179, 182 (1970).

[2] *Id.*, at pp. 182, 186.

The Commission believes that it is necessary to define these statutory terms so that prospective applicants will not have to function in a state of uncertainty and to insure that applications which qualify in other respects are treated equally. Accordingly, the Commission proposes to define the term "filing" to mean date the application is received by the Commission or the date the application is deposited in the mail, as duly certified by the applicant, whichever occurs sooner. This difinition codifies the Commission's ruling in the *Ghiselli* case and permits an alternative date of the application is filed by hand. The Commission proposes to define the term "date of shipment" to mean the date of issuance of the rated bill of lading, a point of reference which has often been employed in previous cases. However, the Commission realizes that an argument can be made in favor of date of payment, since such date may have more meaning to the shipper and has been recognized as having significance in determining when causes of action accrue in compliant cases filed under section 22 of the Shipping Act. 1916.[3] The Commission therefores invites comments addressed to the question of which standard should be used.

In addition to the major changes discussed above, certain other changes have been made to the regulation and the standard form. This, the proposed regulation will codify the present practice of the Commission in ordering applicants to take action to collect undercharges if applications for waiver are denied and will require that the new tariff filed to conform to the carrier's or conference's original intent actually be received by the Commission. The Commission has observed that in at least one instance a conforming tariff was not actually received by the Commission although the applicant published such tariff.[4]

The standard form has been modified to require conferences, when appropriate, to join in applications of individual carriers by verified concurrence. It has also been Modified to insure against the possibility of discrimination among shippers by requiring more definite information concerning carriage of the same or similar commodities on the same voyage or at relevant time periods based on bill of lading and conforming tariff dates. The present form merely requests such information about similar shipments during "approximately the same period of time." Furthermore, the form has been reworded and physically restructured to make it easier to prepare.

The regulation has been further amended to advise applicants that the requirements of the regulation must be met and that legible information and documentation must be furnished. Failure to meet these requirements may result in summary rejection of the application. The Commission has observed that inadequately prepared applications have caused undue delay in the decisional process. Although Pub. L. 90-298 is remedial in nature, as mentioned, the Commission must take care that the relief requested is fully qualified and that the rights conferred by Congress are not abused. The regulation is also consistent with the Commission's Rule 11(a), 46 CFR 502.11(a), which authorized rejection of any pleding, document, writing, etc., not in conformity with the Commission's rules.

Paragraph (c) of the rule is also being clarified to remove possible confusion resulting from the current use of the word "filed" in this paragraph.

Therefore, pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 553), and sections 18(b)(3), 21, and 43 of the Shipping Act, 1916 (46 U.S.C. 817(b)(3), 820, and 841(a), Part 502 of Title 46, Code of Federal Regulations, is proposed to be amended as set forth below:

1. Paragraph (a) of § 502.92 is proposed to be revised and the first sentence of (c) is revised as follows:

§ 502.92 **Special docket applications.**

(a)(1) Application for permission to refund a portion of freight charges collected from a shipper or to waive collection of a portion of freight charges from a shipper where it appears that there is an error in a tariff of a clerical or administrative nature or an error due to inadvertence in failing to file a new tariff and that such refund or waiver will not result in discrimination among shippers may be filed by a common carrier by water in foreign commerce which publishes its own tariff or by such carrier and conference of such carriers if the error involves a tariff published by a conference.

(2) Prior to filing the application, the applicant must file and the Commission must have received an effective tariff setting forth the rate on which such refund or waiver would be based.

(3) The application for refund or waiver must be filed with the Commission within one hundred and eighty days from the date of shipment. For the purposes of this paragraph filing shall be construed to mean the date the application is received by the Commission or the date the application is deposited in the mail, as duly certified by the applicant, whichever occurs sooner. For the purposes of this paragraph date of shipment shall mean the date of issuance of the rated bill of lading.

(4) By filing the application the applicant(s) agrees that if permission is granted by the Commission, an appropriate notice will be published in the tariff, or such other steps will be taken as the Commission may require, which give notice of the rate on which such refund or waiver would be based, and additional refunds or waivers as appropriate shall be made with respect to other shipments in the manner prescribed by the Commission in its order approving the application and also agrees that if the application is denied by the Commission, other steps will be taken as the Commission may require in its order denying the application.

(5) Application for refund or waiver shall be made in accordance with the form set forth below. Any application which does not furnish the information required by the prescribed form or otherwise comply with this rule may be returned to the applicant by the Secretary without prejudice to resubmission within the 180-day limitation period.

FEDERAL MARITIME COMMISSION

SPECIAL DOCKET NO.

Application of ——— for (Applicant(s)) the benefit of ——— (Name of person who paid or is responsible for payment of freight charges).
(1) Shipment(s)
Commodity (according to tariff description) ——
Number of shipments ——
(a) weight or measurement of individual shipment ——
(b) aggregate weight or measurement of all shipments ——
Shipper and place of origin ——
Consignee and place of destination ——
Name of carrier and date shown on bill of lading (furnish legible copies of rated bill(s) of lading) ——
Names of participating ocean carriers and routing ——
Name(s) of vessel(s) involved in carriage ——
Amount of freight charges collected (a) per shipment ——
(b) in the aggregate ——
(c) by whom paid ——
(d) who responsible for payment if different ——
Date of payment (collection) (furnish supporting evidence) ——
Was shipment prepaid or collect? ——
Rate applicable at time of shipment (furnish legible copies of tariff page(s)) ——

(c) Applications under paragraphs (a) and (b) of this section shall be submitted in an original and three (3) copies to the Office of the Secretary, Federal Maritime Commission, Washington, D.C. 20573. • • •

Since the proposals set forth in this rulemaking proceeding concern procedural matters limited to the conduct of formal proceedings before the Commission, their adoption could in no way be considered to result in major federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.). Consequently no environmental impact statement will be issued in this proceeding.

By Order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[BC Docket No. 78-140; Rm-3019]

FM BROADCAST STATION IN FAIRBANKS, ALASKA

Proposed changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Action taken herein proposes the assignment of a fourth FM channel to Fairbanks, Alaska, in response to a petition filed by the Interior Broadcasting Corp. Petitioner claims that the additional station is needed to provide service to the rapidly increasing population of Fairbanks.

DATES: Comments must be filed on or before June 20, 1978, reply comments on or before July 10, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: April 21, 1978.

Released: May 2, 1978.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations. (Fairbanks, Alaska), BC Docket No. 78-140, RM-3019.

1. *Petitioner, Proposal and Comments.* (a) Petition for rulemaking[1] filed November 29, 1977, by the Interior Broadcasting Corp. ("petitioner"), proposing the assignment of Class C FM Channel 273 as a fourth assignment to Fairbanks, Alaska. No responses where make to the petition.

(b) The channel could be assigned without affecting any existing FM assignments.

(c) Petitioner states that it will apply for authority to construct an FM station on the channel, if assigned.

2. *Demographic Data*—(a) *Location.* Fairbanks, in Fairbanks North Star Borough, is located in central Alaska, approximately 400 kilometers (250 miles) north of Anchorage.

(b) *Population.* Fairbanks—14,771; Fairbanks North Star Borough—30,618.[2]

(c) *Local Aural Service.* Noncommercial educational FM Station KUAC-FM (Channel 284); Station KJNP-FM (Channel 262, used at North Pole); full-time AM Stations KFAR, KFRB and KIAK. There is a pending application on Channel 266 (BPH-9530).

3. *Economic Considerations.* Petitioner states that the population of Fairbanks, which is one of the two leading cities in the State of Alaska, has doubled since 1970. Petitioner claims that Fairbanks has experienced a 670 percent increase in gross business receipts between 1973 and 1975. It adds that the bank deposits in the Fairbanks area rose from $92 million to 218 million, an increase of 137 percent between 1973 and 1976. Petitioner details other economic and statistical data to demonstrate the need for a fourth broadcast voice in Fairbanks. it also asserts that the "Alcan" gas pipeline construction is expected to begin in 1978 and 1979, and continue for four or five years setting off another upward spiral in Fairbanks' population. It notes that Fairbanks has become the transporation and service center for the oil and gas industry and will serve in the same capacity for the mining industry which is exploiting the vast abundance of minerals in Alaska.

4. *Preclusion Studies.* Two unincorporated communities (Aurora, pop. 1,100 and College, pop. 3,000), which are adjacent to Fairbanks, would be precluded as a result of the proposed assignment. However, use of the channel could be proposed in an application for either place under the "10-mile" rule.

5. Petitioner states that although there are presently three Class C channels assigned to Fairbanks, one is an educational station and another is used at North Pole, Alaska, rather than Fairbanks, and broadcasts religious programs exclusively. It contends that the remaining channel (266) has a pending application on it (BPH-9530), and assuming it is granted, would be the only one of the three assignments which would be used as a commercial channel in Fairbanks. Petitioner asserts that there is a serious need for an additional Class C channel assignment to serve the growing Fairbanks area.[3]

6. The request for a fourth FM assignment to a community of 14,771 persons exceeds the FM population guidelines. However, one of the channels is used by an educational institution, From petitioner's showing, it appears that the population of Fairbanks has had a significant increase and, from all indications, will continue to do so. For this reason and because of the minimal preclusionary effect, we are willing to consider the proposal even though it is in excess of the population criteria.

7. Since Fairbanks is located within 420 kilometers (250 miles) of the U.S.-Canada border, the proposed Channel 273 assignment to Fairbanks, Alaska, requires coordination with the Canadian Government.

8. Comments are invited on the following proposal to amend the FM Table of Assignments with regard to the community of Fairbanks, Alaska, as follows:

City	Channel No. Present	Channel No. Proposed
Fairbanks, Alaska	262, 266, 284	262, 266, 273, 284

9. The Commission's authority to institute rulemaking proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached Appendix and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

10. Interested parties may file comments on or before June 20, 1978, and reply comments on or before July 10, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rulemaking* to which this Appendix is attached.

2. *Showing required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rulemaking to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rulemaking* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[FR Doc. 78-11722 Filed 4-28-78; 8:45 am]

---

[1] Public Notice of the petition was given on December 19, 1977, Report No. 1094.

[2] Population figures are taken from the 1970 U.S. Census.

[3] We also note that in all likelihood, no significant first or second FM or first or second aural service would be provided because of the operating stations in Fairbanks and the sparse population in the potential service area.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[49 CFR Part 531]

[Docket No. LVM 77-01; Notice 2]

PASSENGER AUTOMOBILE AVERAGE FUEL ECONOMY STANDARDS

Decision to Grant Exemption

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Proposed decision to grant exemption from average fuel economy standards.

SUMMARY: This notice is being issued in response to a petition by Avanti Motor Corp. (Avanti) requesting that it be exempted from the generally applicable average fuel economy standard of 18.0 miles per gallon (mpg) for 1978 model year passenger automobiles and that a lower, alternative standard be established for it. This notice proposes that the requested exemption be granted and that an alternative standard of 16.1 mpg be established for Avanti.

COMMENT CLOSING DATE: May 31, 1978.

ADDRESS: Comments on this notice must refer to Docket LVM 77-01 and should be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Douglas Pritchard, Office of Automotive Fuel Economy Standards, National Highway Traffic Safety Administration, Washington, D.C. 20590, 202-755-9384.

SUPPLEMENTARY INFORMATION: Section 502(c) of the Motor Vehicle Information and Cost Savings Act, as amended (the Act), provides that a low volume manufacturer of passenger automobiles may be exempted from the generally applicable average fuel economy standards for passenger automobiles if those standards are more stringent than the maximum feasible average fuel economy for that manufacturer and if the National Highway Traffic Safety Administration (NHTSA) establishes an alternative standard for the manufacturer at its maximum feasible level. Under the Act, a low volume manufacturer is one which manufactured less than 10,000 passenger automobiles worldwide in the model year for which the exemption is sought ("the affected model year") and which manufactured less than 10,000 passenger automobiles

V 4 3 — 8 4 M Y 1 7 8 UMI

worldwide in the second model year before the affected model year. In determining maximum feasible average fuel economy, the agency is required by section 502(e) of the Act to consider:

(1) Technological feasibility;

(2) Economic practicability;

(3) The effect of other Federal motor vehicle standards on fuel economy; and

(4) The need of the Nation to conserve energy.

To implement section 502(c), NHTSA issued Part 525, Exemptions from average fuel economy standards (42 FR 38374; July 28, 1977). Part 525 prescribes the contents of exemption petitions and sets forth the procedures for processing those petitions. After receipt of a complete petition, the agency publishes a notice of receipt which summarizes the petition and invites comments on it. Subsequently, the agency publishes a proposed decision to grant or deny the petition and provides a further opportunity for comment. Finally, the agency publishes a final decision to grant or deny the petition.

Avanti originally filed a petition in June 1977 for exemption from the generally applicable standards for 1978–1980 model year passenger automobiles. By letter of August 16, 1977, the agency informed Avanti that its petition was incomplete and identified the additional information needed by the agency. Avanti submitted further information in a letter dated September 12, 1977. This letter essentially completed Avanti's petition for exemption from the 1978 model year standard but left still incomplete the portion of the petition relating to model years 1979 and 1980.

Accordingly, NHTSA issued a notice announcing the receipt of a petition for exemption from the model year 1978 standard (42 FR 64168; December 22, 1977). That notice summarized the portion of the Avanti petition relating to that model year and invited public comment on it.

Only one comment on the notice of receipt was submitted. The commenter urged that Avanti be exempted "in the name of common sense."

Requested Alternative Standard

Avanti requested that its alternative standard for model year 1978 be set at the same level of average fuel economy as it achieved in model year 1977. Avanti's request was premised on the assumption that it would have a single vehicle configuration for model year 1978 that would meet both Federal and California emissions standards and that the configuration would have the same fuel economy as the single Avanti configuration for model year 1977. The combined city-highway fuel economy for the model year 1977 configuration was 15.6 mpg. Avanti's assumption regarding fuel economy was based on the model year 1978 configuration being identical to the model year 1977 configuration.

Since the agency issued its notice of receipt, it has learned of several events that have invalidated Avanti's original premise. Since the Environmental Protection Agency (EPA) instituted, beginning in this model year, a new test procedure (known as the SHED test) for hydrocarbon emissions from sources other than the exhaust, that agency required that the model year 1977 configuration be retested and recertified. When the configuration was retested, higher fuel economy values were achieved. The new combined figure, as reported by the EPA, is 16.1 mpg. The 0.5 mpg increase is presumably due to vehicle to vehicle or test to test variability or both and is well within the expected range of variability.

Further, the single configuration planned for model year 1978 failed to pass the California emission certification test. In an attempt to achieve certification, Avanti decided to submit a running change and thus created a second model year 1978 configuration. Avanti had that second configuration tested and achieved a combined fuel economy of 14.9 mpg. However, the second configuration also failed the California emissions certification test.

Thus, there are some slight uncertainties about the average fuel economy that Avanti will achieve for model year 1978. It is uncertain whether Avanti will try to recertify its second configuration and whether those efforts will be successful. If further technical changes are necessary to meet the durability test, the 14.9 mpg figure may change. Finally, the number of second or California configuration Avantis for model year 1978 that might ultimately be sold is uncertain. Avanti informed this agency in early March that not more than 6 California configuration Avantis would be sold if certification were achieved.

Nevertheless, it appears from currently available information that barring any changes to the configuration sold in States other than California (49-State configuration), the final average fuel economy for Avanti in model year 1978 should be 16.1 mpg. In view of Avanti's plan to produce and sell 174 49-State configuration Avantis in model year 1978, the California configuration Avantis, if any, are not expected to affect that final average. If information received in response to this notice suggests otherwise, the agency will reexamine its assumption about the final average.

Technological Feasibility and Economic Practicability

In considering whether Avanti could improve its average fuel economy for model year 1978, the agency examined the same methods for improving average fuel economy that it examined in establishing average fuel economy standards for model year 1981–1984 passenger automobiles (42 FR 33534; June 30, 1977) and for model year 1980–1981 light trucks (43 FR 11995; March 23, 1978). These methods were weight reduction, aerodynamic improvements, engine efficiency improvements, engine accessory efficiency improvements, alternative engines, turbochargers, automatic transmission improvements, improved lubricants, reduced rolling resistance, engine displacement or drive ratio reductions, and mix shifts.

NHTSA's examination of these methods in this proceeding was significantly less detailed than in those earlier proceedings since there is almost no leadtime now for making running changes to the model year 1978 Avantis. There will be even less leadtime when the final decision on the exemption petition is issued.

To use most of these methods, Avanti would have to discard components that it has already made or purchased (Avanti purchases its engines, transmissions, and emission control systems from General Motors) and obtain new ones. NHTSA has no information regarding Avanti's ability to produce or purchase and incorporate the new components before the end of the model year. Even if these problems could be surmounted, Avanti would be potentially faced with probably having to write off completely the discarded components and raise the prices on its cars to recover the loss. The price increases could be of sufficient magnitude to place the Avanti at a significant disadvantage in the marketplace.

In addition to these substantial uncertainties and the very short leadtime, there is the possibility that changes to the Avanti's components to improve fuel economy could create a need to certify the Avantis for compliance with the model year 1978 emissions standards again. Depending on the type and magnitude of change, the recertification could entail rerunning the 50,000 mile durability test and the 4,000 mile test. Certification testing is ordinarily done for Avanti by General Motors as a part of selling Avanti its drivetrain. If Avanti were able to persuade General Motors to retest the Avanti, there could still be serious problems of time and cost for Avanti. It would take at least 60 days to complete the testing if both tests were necessary. Until the Avantis were recertified, Avanti would have to choose between (1) producing its automobiles with the changes and running the risk that the automobiles would not be certified and therefore could not be sold, (2) not producing any automobiles until certification was granted, thus potentially causing serious financial problems for Avanti, or (3) continuing to produce Avanti's as currently certified. Regardless of which course was selected, only a small portion of the entire Avanti fleet would have the changes and thus have improved fuel economy. The first and second course would involve a high degree of financial risk for a small company like Avanti. Both could lead to serious disruptions of its cash flow. The third course would not involve that type of financial risk, but also would produce the least fuel economy benefit. Indeed, none of the courses would produce much of a fuel economy benefit since only a small portion of the entire Avanti fleet would have the changes and thus have improved fuel economy.

Finally, mix shifts were considered. At most, Avanti will have only two vehicle configurations for model year 1978. A mix shift could be achieved only by curtailing sales of its California configuration. As suggested above, even total abandonment of the California market would not increase Avanti's final average.

Based on the foregoing considerations, the NHTSA concludes that running changes to improve the fuel economy of Avanti's model year 1978 passenger automobiles are not technologically feasible and economically practicable.

The Effect of Other Federal Vehicle Standards

Avanti stated that other Federal motor vehicle standards (safety, emissions, and damageability) have not helped their 1978 average fuel economy. Avanti did not claim that the other Federal motor vehicle standards hurt their 1978 average fuel economy, either. Further, no manufacturer applied under section 502(d) of the Act for a reduction of the generally applicable standard for model year 1978 passenger automobiles due to the effect of other model year 1978 standards. In the absence of any showing to the contrary, this agency will assume that no fuel economy penalty has been caused by the other Federal standards.

The Need of the Nation to Conserve Energy

The daily extra U.S. demand for petroleum that will result from Avanti achieving an average fuel economy of 16.1 mpg rather than the generally applicable level of 18.0 mpg is estimated to average 0.77 barrel per day over the life of the model year 1978 Avantis. To give a perspective on this number, the fuel consumed by passenger automobiles in the United States is about 5 million barrels each day. The United States currently consumes about 17 million barrels of petroleum each day.

Selection of the Type of Alternative Standard

The Act permits NHTSA to establish an alternative average fuel economy standard applicable to exempted manufacturers in one of three ways: (1) A separate standard may be established for each exempted manufacturer; (2) classes, based on design, size, price, or other factors, may be established for the automobiles of exempted manufacturers, with a separate average fuel economy standard applicable to each class; or (3) a single standard may be established for all exempted manufacturers.

The NHTSA believes that it is appropriate to establish a separate standard for Avanti. The analyses of the petitions submitted by other low volume manufacturers has not been completed, so the agency cannot practicably use the second or third approaches described in the preceding paragraph.

Proposed Alternative Standards

Based on its tentative conclusions that it is not technologically feasible and economically practicable for Avanti to improve the fuel economy of the model year 1978 Avantis remaining to be produced, that other Federal vehicle standards have not adversely affected achievable fuel economy, that the national effort to conserve energy will be negligibly affected by the granting of requested exemption and alternative standard, the agency believes that the maximum feasible average fuel economy for Avanti for model year 1978 is 16.1 mpg. Therefore, the agency proposes to exempt Avanti from the generally applicable standard of 18.0 mpg and to establish an alternative standard of 16.1 mpg for Avanti for model year 1978.

In consideration of the foregoing, it is proposed that 49 CFR Chapter V be amended to read as set forth below:

PART 531—AVERAGE FUEL ECONOMY STANDARDS FOR PASSENGER AUTOMOBILES

1. By amending § 531.1 to read as follows:

§ 531.1 Scope.

This part establishes average fuel economy standards pursuant to section 502 (a) and (c) of the Motor Vehicle Information and Cost Savings Act, as amended, for passenger automobiles.

2. By amending § 531.5 to read as follows:

§ 531.5 Fuel economy standards.

(a) Except as provided in paragraph (b) of this section, each manufacturer of passenger automobiles shall comply with the following standards in the model years specified:

Model year:	Average fuel economy standard (miles per gallon)
1978	18.0
1979	19.0
1980	20.0
1981	22.0
1982	24.0
1983	26.0
1984	27.0
1985 and thereafter	27.5

(b) The following manufacturers shall comply with the standards indicated below for the specified model years:

(1) Avanti Motor Corp.:

Model year:	Average fuel economy standard (miles per gallon)
1978	16.1

Persons are invited to submit comments on this proposed decision. Comments must be limited so as not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion.

All comments received before the close of business on the comment closing date indicated at the beginning of this proposal will be considered, and will be available for public inspection in the docket both before and after the comment closing date. To the extent possible, comments filed after the comment closing date will also be considered. The agency will continue to file relevant material in the docket as it becomes available after the comment closing date, and it is recommended that interested persons continue to examine the docket for new material.

(Sec. 9, Pub. L. 89-670, 80 Stat. 981 (49 U.S.C. 1657); sec. 301, Pub. L. 94-163, 89 Stat. 901 (15 U.S.C. 2002); delegation of authority at 41 FR 25015, June 22, 1976, and 43 FR 8525, March 2, 1978.)

The program official and attorney principally responsible for the development of this proposed regulation are Douglas Pritchard and Stephen Kratzke, respectively.

Issued on April 26, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

[49 CFR Part 571]

[Docket No. 1-21; Notice 4]

FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Theft Protection

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

V 4 3 — 1 8 4

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes to amend Standard No. 114, Theft protection, to extend its applicability to additional types of vehicles, to upgrade its requirements, and to clarify certain of its provisions. The proposal is being issued to reduce vehicle theft because of the continuing disproportionately high accident rate of stolen vehicles.

DATES: Comments must be received on or before July 31, 1978. Proposed effective dates: September 1, 1980, for passenger cars and September 1, 1981, for trucks with a gross vehicle weight rating (GVWR) of 10,000 pounds or less and multipurpose passenger vehicles.

ADDRESSES: Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. Kevin Cavey, Office of Crash Avoidance, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-2720.

SUPPLEMENTARY INFORMATION: On March 4, 1976, the National Highway Traffic Safety Administration (NHTSA) published an advance notice of proposed rulemaking (41 FR 9374) which stated that the agency was considering issuing a proposal to upgrade and extend the applicability of Federal Motor Vehicle Safety Standard No. 114 dealing with theft protection for passenger cars (49 CFR 571.114).

A total of 61 comments were received in response to the advance notice of proposed rulemaking (ANPRM). Those responding included automobile, truck, lock and motorcycle manufacturers. In addition, private citizens (a number of whom proposed their own inventions), manufacturer associations, States, consumer groups, and a university submitted comments to the docket. Of the commenters, 35 were in favor of upgrading the requirements and 26 were against. Most of the objections concerned specific portions of the proposal. All comments have been considered and the most significant are discussed below.

Summary of Comments

The automobile industry commented, in general, that the present standard has considerably reduced vehicle theft by joyriders and petty thieves, and that current thefts are by professional thieves (as contrasted with joyriders and petty thieves). This assertion was based on Federal Bureau of Investigation data which demonstrate that the recovery rate of stolen vehicles has decreased by 20 percent from 1966 to 1974. As unrecovered vehicles are generally assumed to have been stolen by professional thieves, these data would imply that less vehicles are being stolen by joyriders and petty thieves. The industry commented further that strict law enforcement and more accurate vehicle registration, identification and titling are necessary now to combat this problem since, the industry stated, a vehicle's security could not be upgraded on a cost effective basis to deal with professional thieves. Based on their assumption that the problem of theft by joyriders and petty thieves, who pose the threat to safety, had been solved, they also contended that the proposal is beyond the agency's authority. They argued that the several studies mentioned in their comments indicate that additional requirements will not yield sufficient safety benefits. They stated further that any changes should, as a matter of law and policy, be cost effective, and that the Federal Interagency Committee on Auto Theft Reduction should develop new approaches in the area of police enforcement and State administrative measures to the problem. Finally, they urged that the NHTSA cooperate with the Economic Commission for Europe (ECE) on Regulation 18, a European motor vehicle safety standard to improve vehicle security. That standard was published as an appendix to the ANPRM.

The trucking industry opposed extending the requirements to trucks, particularly heavy trucks. They concluded, based on the skills needed by the thief and the apparent theft of trucks for their cargo, that truck thefts are performed by professionals and that the additional requirements under consideration would be ineffective against this caliber of thief. The motorcycle industry was in favor of reducing motorcycle thefts through a motor vehicle safety standard, but proposed that a separate rulemaking be undertaken because of the different design characteristics of motorcycles. The lock industry favored lock improvement by manufacturers to deter vehicle theft. Consumer groups and associations approved the requirements being considered, but believed cost effectiveness and innovation should be stressed.

Vehicle Theft and Safety

The automobile industry raised the threshold question of the relation of safety and the requirements listed in the ANPRM. To summarize their argument, they concluded, based on stolen vehicle recovery data, that the current Standard No. 114 has been effective in limiting the number of vehicles stolen for joyriding or petty theft. Vehicle theft today, they further concluded, is being carried out primarily by highly professional thieves who are often organized into rings. Further, they suggested that the professional thief has sophisticated tools and expertise for which no cost-effective deterrents exist. Further, they believe professional thieves drive stolen vehicles safely to avoid being stopped by a law enforcement officer who might discover the vehicles are stolen.

To help determine the validity of this position, the NHTSA funded a study by Arthur D. Little, Inc., which addressed this question and considered, among other data, the data cited by the automobile manufacturers in the comments. (DOT-HS-7-01723). A copy of the Little study has been placed in the docket. After reviewing this study and other data, the NHTSA concludes:

(1) Stolen cars are involved in one out of every 350 accidents and account for approximately 5,100 disabling injuries and 130 fatalities annually.

(2) Stolen cars are from 47 to 200 times more likely than unstolen cars to be involved in accidents.

(3) Approximately 1 million vehicles were stolen during 1976, of which a conservative estimate of those stolen for joyriding purposes is 350,000.

The data used in reaching these conclusions are essentially the same as those used by the manufacturers, except that the manufacturers utilized 1974 data and the NHTSA 1976 data. There was no significant difference, however, between the data for these years.

In view of the association of theft by joyriders and petty thieves with highway accidents and the significant number of accidents, deaths and injuries involving stolen vehicles found in the study, NHTSA believes that a serious safety problem still exists with regard to stolen vehicles and that further rulemaking in this area is justified. It should be noted that the consumer impact of vehicle theft is substantial. Vehicle theft costs society from $1.8 billion to $2.9 billion annually, and represents 8.4 percent of all the crimes committed in this country, placing a substantial burden on law enforcement agencies and the courts.

Extending the Application of Standard No. 114

The ANPRM stated that the agency was considering the extension of the requirements of Standard No. 114 to all motor vehicles except trailers. Truck and bus manufacturers opposed this extension. They believed that the low number of thefts of these vehicles, particularly of heavy trucks and of buses, does not justify having their vehicles comply with the requirements. In their comments, truck manufacturers submitted data which indicated

that trucks are often stolen for their cargo and later abandoned. The Motorcycle Industry Council commented that the proposed requirements were not appropriate for motorcycles because of their design and said that theft of these vehicles should be addressed in a separate rulemaking action.

The contention that heavy trucks, buses and special trucks, such as fire and refuse vehicles should not be included in the standard on the basis of their low theft rates has merit. This position is supported by the report "Preliminary Study of Effectiveness of Auto Anti-Theft Devices" prepared for the Department of Justice. A copy of that report is in the docket. This report concludes that the theft rate for heavy trucks and buses is much lower than for passenger cars, and, when stolen, 67 percent of these vehicles are recovered.

Theft report data from the States, however, indicates that the theft rate for light trucks and multipurpose passenger vehicles is similar to that for passenger cars. It shows too that currently available devices to protect light trucks (those rated at 10,000 pounds or less GVWR) from theft are relatively unsophisticated. For example, the ignition locks in many light trucks and multipurpose vehicles are frequently of a type that proved unsatisfactory in pre-1970 automobiles because of their susceptibility to tampering. Due to the popularity and increasing use of these vehicles (sales of new light trucks and multipourpose passenger vehicles have more than doubled in the past 7 years to 3,000,000 sales per year) and a reported increase by the FBI and the State of California in the theft rate of these vehicles, especially vans, the NHTSA concludes that anti-theft deterrents are appropriate for trucks with a GVWR of 10,000 pounds or less and multipurpose vehicles.

The suggestion of separate rulemaking for motorcycles also has merit because of the construction and design differences between those vehicles and enclosed vehicles. The agency has decided that further consideration should be devoted to specific anti-theft measures for motorcycles.

Stronger Ignition Locking Systems

The ANPRM listed a number of requirements relating to greater protection for a vehicle's ignition system against tampering. Domestic manufacturers stated that the present ignition system lock requirements, implemented in January 1970, had reduced automobile thefts and that further requirements were unnecessary and related to design rather than performance characteristics.

Foreign manufacturers objected to changes in ignition locks stating that current locks were sufficiently effective, and recommended that the NHTSA cooperate with the ECE to revise Regulation No. 18, if necessary, rather than independently establish new requirements. Lock manufacturers and consumer groups recommended more intricate and stronger locking systems to deter motor vehicle thefts.

After a review of the state of the art in lock design and the difficulty of articulating performance standards for stronger locks, the NHTSA has tentatively concluded that it would be more effective to approach the problem of the susceptibility of locks to tampering by limiting the utility of removing the lock. Consequently, a new requirement is being proposed which requires the ignition systems to be inoperative if any part of the ignition lock is removed. To further protect the ignition system, the agency proposes also that the wires which activate this system shall be shielded so that they cannot be directly contacted from within the passenger compartment. The shielding could be provided by the vehicle structure or by other means. The agency is considering establishing a requirement that would necessitate the use of metal or other similar strong shielding materials which would have to be cut by special cutting tools before access to the ignition wires could be gained. Comments are invited on whether requirements should be specified for the type of material that may be used to provide the shielding or for the type of actions (e.g., cutting, bending) necessary to removing the shielding.

In deciding to make these proposals, the NHTSA took note of the significant progress already achieved by the industry in making locks stronger. The NHTSA does intend, however, to monitor closely the efforts of the industry in this area and, if appropriate, propose a further amendment to Standard No. 114 to ensure all manufacturers are taking advantage of improved lock technology.

Interior Latch Release for Hood

The ANPRM stated that the agency was considering a requirement that each vehicle have a trunk lock and a hood lock operable only from within the vehicle. Comments from automobile manufacturers were not in agreement on this requirement. Some manufacturers felt a hood release could delay motor vehicle theft by denying ready access to the ignition system, but questioned NHTSA's authority to issue this requirement on the basis of safety. Other manufacturers felt that since a thief would have to eventually enter the passenger compartment in order to steal the vehicle, there was no compelling reason for this requirement. Generally, the other comments did not address this requirement.

The NHTSA concludes that a hood release located inside the passenger compartment would delay the vehicle's theft since "hot wiring" of a vehicle would be made more difficult. Since time is of the essence in theft (5 to 10 minutes being the most time a thief would devote to a theft under optimal conditions), a hood release represents an effective deterent. The NHTSA also notes that many automobile manufacturers already provide an internal hood release, and it would not be a burden to require this for all vehicles. Consequently, it is proposed that Standard No. 114 be amended to require that the primary hood latch position or, if a vehicle has two hood latch systems, the primary hood latch system be operable only from within the passenger compartment.

The NHTSA also concludes that an interior release mechanism for the trunk, which was suggested in the ANPRM would serve primarily to protect valuables within the trunk, rather than deter theft of the vehicle. Therefore, the agency is not proposing a similar requirement for trunk locks.

Two Key System

The ANPRM listed a requirement that vehicles be designed so that different keys are necessary for the steering ignition lock and for door and trunk locks.

The automobile manufacturers and private sector generally opposed the two key system because they said it would be inconvenient and would not aid safety. The lock manufacturers stated their belief that two keys would delay the vehicle thief for the reasons described below.

Some police departments in high vehicle theft areas recommended the use of two keys as a delay to the theft because after a thief has entered the vehicle, he or she would then have to defeat the ignition system lock to start the vehicle. The one key system enables thieves to obtain an ignition system lock key by stealing a trunk or door lock and reproducing the key which fits it. General Motors uses a two key system which, according to the police comments, has helped in reducing thefts. The additional cost of a two key system is so small as to be unquantifiable, and the NHTSA concludes that it will be of benefit in slowing down the theft of a vehicle. A system requiring a separate key to operate the ignition lock system is therefore proposed.

Prevention of Accidental Locking of Steering System

As a result of a petition received from Mr. R. L. Beal, the NHTSA proposed that steering lock systems be incapable of activation with the vehicle in motion. Currently, S4.2 permits the driver of an automobile to turn off the

MY 1 78 UMI

V 4 3 — 8 4 M Y 1 7 8 UMI

engine while the car is in motion without activating the steering column lock or impeding forward self-mobility. Automobile manufacturers stated that their vehicles already meet the intent of this requirement, and that the steering lock cannot be activated under these conditions. Nonetheless, the NHTSA has concluded that this danger should be guarded against with certainty, even if the key is actually removed from the ignition. Therefore, it is proposed that, when the vehicle is in motion and the key is either removed from the ignition lock or rotated to a different position in the lock, neither steering nor the ability of the vehicle to move forward under its own power shall be impeded.

ALARM TO PREVENT LEAVING THE KEY IN THE IGNITION

The ANPRM suggested improvements in current alarm systems for discouraging the driver from leaving the key in the ignition system. The majority of comments from the automobile industry felt that the current alarm system provision, which requires a warning to the driver when the key has been left in the ignition, and the door is open, has been effective in getting the driver to remove the key from the ignition and that any further requirements would not be cost effective. They based this conclusion on the decreasing number of vehicles reported as stolen because the driver has left the key in the ignition. They further opposed the requirement as they considered removal of the key to be the driver's responsibility. On the other hand, lock manufacturers and consumers felt that the system could be improved because vehicles were still being stolen by thieves using a key left in the vehicle's ignition system.

NHTSA agrees with the manufacturers that the present requirements have had a beneficial effect. Recovered stolen vehicles with owner's keys still in the ignition have dropped from a pre-Standard 114 rate of 47 percent to an estimated current rate of 13.5 percent. However, the actual rate may be higher since laws imposing liability for accidents involving vehicles which have had their keys left in them and have then been stolen may lead to underreporting of such thefts. Further, a thief may not wish to draw attention to himself or herself by leaving the key in the ignition and thus causing the alarm to be activated when he or she opens the door to abandon the vehicle.

The agency is proposing requirements for improvements to the warning system that would further discourage the driver from leaving the key in the ignition and could be effective at a minimal cost. Under the proposal, an audible warning to the driver, measuring 65 decibels A at a point outside the vehicle and 1 foot from the driver's door with all doors and windows closed, would be activated whenever the engine or other source of motive power has been turned off, the key has not been removed from the ignition lock, and the door has been opened. the warning would continue until the key was removed. Specific information is requested concerning the sound level within the passenger compartment of specific vehicles of a warning device which achieves that the proposed sound level outside the vehicle.

ECE REGULATION NO. 18

The ANPRM also requested comments on a proposed regulation of the ECE relating to vehicle security (Regulation No. 18). Consumers, lock manufacturers, truck industry, and motorcycle industry comments did not address this issue. The automobile industry recommended that the United States and Europe issue identical regulations concerning motor vehicle theft. The domestic manufacturers, however, stated that the ECE should be urged to amend Regulation No. 18 to conform to Standard No. 114 in the interests of international harmonization. ECE Regulation No. 18, which is considerably different from the NHTSA proposal, is more design oriented than appears to be necessary. Inasmuch as NHTSA regulations are required by statute to be written in as performance-oriented terms as possible, the NHTSA has decided to work closely with the International Standards Organization (ISO) ISO/TC22/SC20 Committee, which deals with vehicle security, to arrive at a standard consistent with that statutory requirement.

DOOR LOCKING SYSTEM

The ANPRM also sought comments on stronger and more secure door locking systems. Comments on this subject generally followed the pattern of comments relating to other stronger locking systems. In essence, most commenters felt that the cost of substantially increasing the strength of door locks would not be justified in terms of benefits of overall vehicle security. The agency agrees and consequently is not proposing stronger door locks in this rulemaking, although the matter will be considered again in amending Federal Motor Vehicle Safety Standard No. 206, door locks and door retention components. Nonetheless, the NHTSA has concluded that simpler and more cost effective methods of protecting door locking systems have been developed by automobile manufacturers. Therefore, the notice proposes that door lock buttons shall be of uniform thickness or tapered with the thicker end at the bottom to prevent thieves from unlocking a car door by using a tool to hook the button and pull it upward. It is also proposed that the door lock mechanism within the door be shielded to prevent direct access to the mechanism by such manipulative devices as a "Slim Jim." Comments are requested on what sort of shielding should be required. It appears that less rigid shielding is needed then in the case of the shielding for the ignition wires.

CLARIFICATION OF CURRENT REQUIREMENTS

Based upon the agency's experience with the current Standard No. 114, minor clarifying amendments have also been proposed to requirements currently in effect.

COST OF THE PROPOSAL

In determining the cost of the proposal, the NHTSA made the assumptions that all vehicles covered by the standard would require some upgrading, although a significant number already meet one or more of the proposed requirements. The NHTSA estimates that the proposal will add approximately $1.50 to the cost of manufacturing a passenger car, and $3.70 to the cost of manufacturing a truck or multipurpose passenger vehicle. The aggregate manufacturing cost of the proposal would be $20.92 million annually for passenger cars and $16.53 million annually for trucks and multipurpose passenger vehicles.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted. All comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. Any claim of confidentiality must be supported by a statement demonstrating that the information falls within 5 U.S.C. section 552(b)(4), and that disclosure of the information is likely to result in substantial competitive damage; specifying the period during which the information must be withheld to avoid that damage; and showing that earlier disclosure would result in that damage. In addition the commenter or, in the case of a corporation, a responsible corporate official authorized to speak for the corporation must certify in writing that each item for which confidential treatment is requested is in fact confidential within the meaning of section 552(b)(4) and that a diligent search has been conducted by the commenter or its employees to assure that none of the specified items has previously been released to the public.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

In consideration of the foregoing, it is proposed to amend 49 CFR 571.114 to read as follows:

S.1 *Scope.* This standard specifies requirements for vehicle theft protection.

S.2 *Application.* This standard applies to passenger cars, trucks with a GVWR of 10,000 pounds or less, and multipurpose passenger vehicles.

S.3 *Definitions.*

"Combination" means one of a number of configurations of a lock which allows it to be operated by a specific key to permit activation of the locked system.

"Key" means a device designed to operate a specific lock.

"Lock" means a device designed to control the movement or activation of a vehicle system or component.

S4. *Requirements.*

S4.1 Each vehicle shall have an ignition system lock that, whenever the key is removed, will prevent—

(a) Normal activation of the vehicle's engine or other main source of motive power; and

(b) Either steering or forward self-mobility of the vehicle, or both.

S4.2 When the vehicle is in motion and the key is either removed from the ignition system lock or rotated to a different key position in the lock, neither steering nor forward self-mobility shall be impeded.

S4.3 Each manufacturer, in meeting the requirements of S4.1, shall employ a locking system with at least 1,000 different combinations or with a separate combination for each vehicle manufactured annually.

S4.4 The ignition system lock shall not be operable with a key which operates any exterior lock in the vehicle.

S4.5 An audible warning to the driver, measuring 65 decibels A at a point outside the vehicle and 1 foot from the driver's door with all doors and windows closed, shall be activated whenever the engine or other main source of motive power has been turned off, the key has not been removed from the ignition lock, and the door has been opened. The warning shall operate continuously, even if the door is subsequently closed, until the key is removed.

S4.6 The door lock mechanism contained within the door shall be shield so that it can not directly be contacted by external manipulative devices.

S4.7 Any vertical protrusion designed to move vertically and to operate the door lock within the passenger compartment shall be either of uniform thickness or tapered with the thicker end at the bottom.

S4.8 Wires which activate the ignition system shall be shielded so that they can not be directly contacted from within the passenger compartment.

S4.9 The removal of any part of the ignition lock shall cause the ignition system to be inoperative.

S4.10 The hood latch position, in the case of vehicles with one hood latch system, or primary hood latch system, in the case of vehicles with two hood latch systems, shall be operable only from within the passenger compartment.

The principal authors of this proposal are Kevin Cavey of the Office of Crash Avoidance and Frederic Schwartz, Jr., of the Office of Chief Counsel.

(Sec. 103, 112, 119, Pub. L. 89563, 80 Stat. 718 (15 U.S.C. 1392, 1401, 1407); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on April 26, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate
Administrator for Rulemaking.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1065]

[Ex Parte No. 55 (Sub-No. 8B)]

GATEWAYS AND TACKING—IRREGULAR ROUTE MOTOR COMMON CARRIERS OF PROPERTY

Motor Common Carriers of Property Routes and Service

AGENCY: Interstate Commerce Commission.

ACTION: Notice of filing of petition for modification of 49 CFR 1065.1

SUMMARY: The purpose of this document is to gather public comment concerning; (1) The petition filed by the Common Carrier Conference—Irregular Route, Steel Carriers Conference of the American Trucking Association and Heavy-Specialized Carrier Conference of the American Trucking Association seeking elimination of the requirement of filing of gateway elemination applications in acquisitions under section 5 and transfers under section 212(b) of the Interstate Commerce Act where the most direct highway distance between points to be served is not less than 80 percent of the highway distance over routing through the resulting gateway or where movements would be less than 300 miles; and (2) whether a vendee, which acquires two pieces of authority with which the vendor had been performing service by tacking onmovements of less than 300 miles, should be able to continue to perform that service.

SCHEDULE FOR SUBMISSION OF COMMENTS: Must be submitted on or before May 31, 1978.

FOR FURTHER INFORMATION CONTACT:

G. M. Bober, Assistant Deputy Director, Section of Finance, Room 5417, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, 202-275-7564.

SUPPLEMENTARY INFORMATION: This proceeding was instituted by a petition filed June 21, 1977, by the Common Carrier Conference—Irregular Route, Steel Carriers Conference of the American Trucking Association, and Heavy Specialized Carriers Conference of the American Trucking Association (petitioners) seeking modification of the application of the gateway elimination rules, 49 CFR 1065, as they relate to section 5 and 212(b) transactions.

The regulations in question were issued in *Gateway Elimination*, 119 MCC 530 (1974), and, as noted by petitioners, do not specifically consider their effect on acquisition proceedings.

It was found in *Gateway Elimination*, supra, that were the direct highway distance was more than 80 percent of the distance between two points by observing the gateway, carriers operating through the gateway were effective competitors with directline operators. Carriers meeting this so-called "20-percent rule" (the circuity in utilizing the gateway is less than 20 percent), which demonstrated that such a service was offered by an appropriate tariff being on file, could eliminate the gateway. The new direct services would not, the Commission believed, materially affect the existing competitive balance. This applied only to certificated authorities issued pursuant to an application pending on or before November 23, 1973.

As a corollary, where the circuity would be more than 20 percent, tack-

V 4 3 — 8 4 M Y 1 7 8 UMI

ing would be prohibited, unless the carrier could demonstrate a public need for the service, in conformity with *Childress—Elimination Sanford Gateway*, 61 MCC 421 (1952), cf. 119 MCC at 549-50. Carriers which did not follow one of these paths, except for movements of 300 miles or less, were prohibited from tacking irregular routes.

The Commission has stated that this 300-mile exemptiojn was applicable only to authorities issued pursuant to applications pending on or before November 23, 1973.

The Commission in its report did briefly consider the effect of the new regulation on acquisitions. It stated that if two irregular routes are to be joined, the applicant carriers would be required to file an application demonstrating that public convenience and necessity required joinder, and if a need was shown, direct service would be authorized. If no such showing was made, a "no-tacking" restriction would be imposed. 119 MCC at p. 552-3.

On December 3, 1974, the Commission issued a policy statement concerning ex parte 55 (Sub-No. 8) and Applications under sections 5(2) and 212(b) of the Interstate Commerce Act. In that policy statement the Commission instructed carriers with pending section 5 or 212 (b) applications filed after November 23, 1973, to file applications to eliminate any gateways, the failure to do so resulting in the imposition of a "no-tacking" restriction. The Commission, further, asserted that in future section 5 proceedings, parties would be required to file a directly related application to avoid imposition of a "no-tacking" restriction. The Commission determined that the criteria in *Childress, supra*, would be applicable to such gateway elimination applications, i.e., a showing of public convenience and necessity would be required.

PETITIONERS' REQUEST

Petitioners seek to modifications in the Commission's application of the regulations to acquisitions and mergers under section 5 and transfers under section 212(b). Petitioners would permit the elimination of gateways resulting from an acquisition, i.e., the point of joinder of the vendee's existing authority and the authority being acquired without requiring a showing of public convenience and necessity where circuity through the gateway point would not exceed 20 percent. An applicant would only have to demonstrate the existence of a tariff for interline service through the joinder point. Secondly, petitioners want the Commission to apply the "300-mile exemption" to gateways resulting from section 5 and 212(b) acquisitions.

Pettioners suggest that the 20-percent rule was promulgated on the rationale that where the direct service route is 80 percent or more of the distance utilizing the gateway, a persumption arises that existing carriers providing service have felt the competitive impact of the service through the gateway. Since this presumption was valid in section 5 applications filed before November 23, 1973, petitioners believe it should have equal validity on applications filed after that date.

Petitioners refer to the findings of the Commission's Bureau of Economics, that the elimination of gateways resulted in significant savings in fuel, and man-hours. It is argued that granting of the requested relief would add to the savings because the present policy constitutes a major deterrent to applicants entering into acquisition transactions.

Rater than enter into such transactions, it is urged that carriers continue to interline, thereby wasting fuel, dollars and manpower. Petitioners also assert that the relief sought would lessen the disparity in treatment between irregular route carriers and regular route carriers with regard to joinder. A regular route carrier which acquires another regular route under section 5, can perform a through service without a showing of public convenience and necessity, as well as join an irregular route with a regular route. Petitioners plead that imposing the requirement of demonstrating public convenience and necessity on irregular rount carriers, even if no circuity is involved results in discrimination in favor of the regular route carrier.

Petitioners, also, reiterate the Commission's rationale for the "300-mile exemption", that on such shipments the added cost and fuel use from tacking would be more than made up through increased efficiencies and operational savings. The same reasoning, it is urged, applies to hauls of 300 miles or less resulting from a joinder of two irregular routes by an acquisition, and accordingly the 300-mile exemption should be broadened to include such traffic.

If, after considering all the comments submitted, the Commission deems a rulemaking proceeding appropriate, one will be instituted.

We also wish to consider the situation of a vendee acquiring two certificates presently utilized by a vendor under the "300-mile exemption."(e.g.,X, a vendor holds irregular route authority from A to B, and also from B to C. The distance from A to C (through B) is less than 300 miles, and X has been tacking the two authorities pursuant to the exemption. X proposes to sell both certificates to Y.)

The issue for consideration is whether the vendee should be permitted to continue the service previously performed by the vendor pursuant to the "300-mile exemption."

We seek comments on five questions related to the issues discussed above:

(1) Should the "20-percent rule" be applied to future acquisitions of irregular route authority authorized under sections 5(2) or 212(b), to permit elimination of the gateway resulting from joinder of vendee's irregular route authority with the authority authorized to be acquired by filing an E letter notice rather than filing a gateway elimination application?

(2) Should the "300-mile exemption" be applied to future acquisitions authorized under sections 5(2) or 212(b) of irregular route authority to permit the tacking of vendee's existing irregular route authority with the authority authorized to be acquired on movements of less than 300 miles?

(3) Should the "20-percent rule" and the "300-mile exemption" be applied to applications under section 5(2) and 212(b) filed after November 23, 1973, and disposed of prior to the Commission's action on the request presented by petitioners; and, if so, should a distinction be made between those applications that have been consummated and those that have not?

(4) If the relief sought by petitioners is granted, should a similar rule be applied if the new authority is acquired by an extension application pursuant to section 207, rather than by an application pursuant to sections 5 or 212(b); i.e., if the applicant can show that it had a tariff on file for interline service through the joinder point, should it be permitted to utilize the "20-percent rule" through filing of an E letter notice?

(5) Should a vendee who acquires two portions of irregular route authority, which the vendor has been tacking pursuant to the "300-mile exemption", be permitted to continue to tack the operating rights in this manner; and, if so, should the vendee provide information in its application of its intention to so use the authority?

Any interested person may participate in this proceeding by submitting a statement of views, arguments, or other comments regarding petitioners' proposals, and the questions we have set forth. We also will entertain comments on the environmental impact of the proposals. Any person intending to participate in this proceeding shall on or before 30 days from publication in the FEDERAL REGISTER of this notice file with the Office of Proceedings, Room 5349, Interstate Commerce Commission, Washington, D.C. 20423, an original and 12 copies of each statement.

All written submissions will be available for public inspection during regular business hours at the Office of the Interstate Commerce Commission, 12th Street and Constitution Avenue, Washington, D.C. 20423.

It is ordered: Notice of the institution of this proceeding be given to the general public by depositing a copy of this notice in the Office of the Secretary, Interstate Commerce Commission, Washington, for public inspection and by delivering a copy of the attached notice to the Director of Federal Register for publication in the FEDERAL REGISTER as notice to interested persons.

Decided: April 17, 1978.

By the Commission, Commissioners Murphy, Brown, and Stafford dissenting.

H. G. HOMME, JR.,
Acting Secretary.

COMMISSIONER BROWN DISSENTING

In this instance, we would save much time and effort by following a two-step procedure proposing some rules for all parties to consider now, rather than simply requesting comments on the question of whether we should propose rules.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 23]

REVIEW OF STATUS OF THE LECHWE AND LEOPARD UNDER THE ENDANGERED SPECIES CONVENTION

Advance Notice of Potential Rulemaking

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Advance notice of potential rulemaking.

SUMMARY: On January 3, 1978, Safari Club International (4615 North Camino Nuestro, Tucson, Ariz. 85705) petitioned the Department of the Interior to propose reclassifying the leopard (*Panthera pardus*) from Appendix I to Appendix II and to propose deleting the lechwe (*Kobus leche*), an African antelope from Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora. The Department has determined that substantial evidence has been presented by the petitions, and that such evidence warrants a review of the status of these species to learn whether changes in their Appendix listings should be proposed for consideration by other countries that are Parties to the Convention.

DATE: Submit information in writing by June 30, 1978.

ADDRESS: Please send information to the Director, U.S. Fish and Wildlife Service, Federal Wildlife Permit Office, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Dr. Richard L. Jachowski, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240, phone 202-632-8796.

SUPPLEMENTARY INFORMATION: The Fish and Wildlife Service is seeking the views of the governments of other countries in which these species occur. All interested persons are hereby invited to submit any factual information, including publications and written reports, that pertains to this review. This information, together with that provided in the petition from Safari Club International and that obtained from other sources, will be reviewed to determine whether the leopard and lechwe should be proposed for reclassification or deletion from appendices to the Convention.

All information used in this review will be available for public inspection during normal business hours in Room 546, 1717 H Street NW., Washington, D.C.

This document was prepared by Dr. Richard L. Jachowski, Federal Wildlife Permit Office.

NOTE.—The Service has determined that this document does not contain a major action requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: April 24, 1978.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

BIG SANDY CREEK WATERSHED, TEXAS

Intent to Prepare an Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, give notice that an environmental impact statement is being prepared for the Big Sandy Creek Watershed, Clay, Jack, Montague, Tarrant, and Wise Counties, Tex.

The environmental assessment of this Federal action indicates that the project will cause significant, local, regional, or national impacts on the environment. As a result of these findings, Mr. George C. Marks, State Conservationist, Soil Conservation Service, has determined that the preparation and review of an environmental impact statement is needed for installing the remaining measures in this project.

The project concerns a plan for watershed protection, flood prevention, improved water quality and quantity, and improved quality of life for the area. The planned action for the remaining project provides for the installation of 43 floodwater retarding structures, one multiple-purpose structure with recreational facilities, 31 grade stabilization structures, land stabilization measures on 825 acres of critically eroding lands, land treatment measures for stabilization of critical sediment source areas on 2,100 acres of privately owned land and 1,455 acres of federally owned land in the L. B. J. National Grasslands, and technical assistance for application of land treatment measures on watershed lands. Accelerated technical assistance for land treatment has been provided for approximately 75 percent of the land treatment goals for the watershed, and 13 floodwater retarding structures have been installed.

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The Soil Conservation Service invites participation of agencies and individuals with expertise or interest in the preparation of the draft environmental impact statement. The draft environmental impact statement is being developed by Mr. George C. Marks, State Conservationist, Soil Conservation Service, W. R. Poage Federal Building, 101 South Main Street, Temple, Tex. 76501, 817-774-1255.

[3410-16]

LITTLE WYACONDA-SUGAR CREEK WATERSHED, MISSOURI

Intent To Prepare an Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the Little Wyaconda-Sugar Creek Watershed, Clark, Lewis, and Scotland Counties, Mo.

The environmental assessment of this federally-assisted action indicates that the project may cause local, regional, or national impacts on the environment. As a result of these findings, Mr. Kenneth G. McManus, State Conservationist, has determined that the preparation and review of an environmental impact statement is needed for this project.

The project concerns a plan for flood prevention and watershed protection. The planned works of improvement include accelerated land treatment and a system of flood prevention structures.

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The SCS invites participation of agencies and individuals with expertise or interest in the preparation of the draft environmental impact statement. The draft environmental impact statement will be developed by Mr. Kenneth G. McManus, State Conservationist, Soil Conservation Service, 555 Vandiver Drive, Columbia, Mo. 65201, 314-442-2271, extension 3155.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program, Public Law 83-566, 16 USC 1001-1008.)

Dated: April 20, 1978.

JOSEPH W. HAAS,
Assistant Administrator for Water Resources, Soil Conservation Service, U.S. Department of Agriculture.

CIVIL AERONAUTICS BOARD

[Docket No. 32470; Order 78-4-110]

ALLEGHENY AIRLINES, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 97

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority[1] in 22 minor markets[2] where Allegheny Airlines also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Allegheny as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

[1] I.e., markets which generate fewer than 20 true O. & D. plus interline connecting passengers a day.

[2] The minor markets where both Allegheny and Delta currently hold restricted authority are set forth in Appendix A to this order.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Allegheny's operations in the 22 markets listed in Appendix A is required by the public convenience and necessity and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly it is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Allegheny's certificate for route 97 so as to remove operating restrictions in the markets listed in Appendix A.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in Appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix K of Order 78-4-109.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[5]
Secretary.

[Docket No. 32471; Order 78-4-111]

AMERICAN AIRLINES, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 4

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority in 2 minor markets[1] where American also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on American as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impace on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on American operations in the 2 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

According, it is ordered, that:

1. All interested persons be directed to show cause why the Board should

[1] I.e., markets which generate fewer than 20 true O. & D. plus interline connecting passengers a day.

[2] The minor markets were both American and Delta currently hold restricted authority are set forth in Appendix A to this order.

[3] We further find and conclude that Allegheny is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4] All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5] All Members concurred.

[3] We further find and conclude that American is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

V 43 | 84 MY 1 78 UMI

not issue an order making final the tentative findings and conclusions stated here and amending American's certificate for Route 4 so as to remove operating restrictions in the markets listed in Appendix A.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in Appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issued raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix K of Order 78-4-109.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[Docket No. 32472; Order 78-4-112]

BRANIFF AIRWAYS, INC.

Order to show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 9

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in manner which would, among other things, give Delta unrestricted authority in 3 minor markets[1] where Braniff Airways also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Braniff as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109 and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Braniff's operations in the 3 markets listed in appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, in is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Braniff's certificate for Route 9 so as to remove operating restrictions in the markets listed in appendix A.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issued raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in appendix K of Order 78-4-109.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[5]
Secretary.

[Docket 32473; Order 78-4-113]

EASTERN AIR LINES, INC.

Order to Show Cause Regarding Amendment of Certificates of Public Convenience and Necessity for Routes 5, 6, and 10

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority in 70 minor markets[1] where Eastern Air Lines also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Eastern as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109 and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Eastern's operations in the 70 markets listed in appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, *it is ordered,* That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Eastern's certificates for Routes 5, 6, and 10 so as to remove operating restrictions in the markets listed in appendix A.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in appendix K of Order 78-4-109.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.[5]

[6320-01]

FRONTIER AIRLINES, INC.

[Docket No. 32474; Order 78-4-114]

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessary for Route 73

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority in Las Vegas-Little Rock minor market[1] where Frontier Airlines also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Frontier as well as the other carriers certificated to serve the Las Vegas-Little Rock minor market will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in the market, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Frontier's operations in the Las Vegas-Little Rock market is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, it is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Frontier's certificate for Route 73 so as to remove its operating restriction in the Las Vegas-Little Rock market.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in Appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix K of Order 78-4-109.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[5]
Secretary.

[6320-01]

[Docket No. 32475; Order 78-4-115]

NATIONAL AIRLINES, INC.

Order To Show Cause Regarding Amendment of Certificates of Public Convenience and Necessity for Routes 31 and 39

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority in 5 minor markets[1] where National Airlines also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on National as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on National's operations in the 5 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, it is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending National's certificates for Routes 31 and 39 so as to remove operating restrictions in the markets listed in Appendix A.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in Appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix K of Order 78-4-109.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[5]
Secretary.

[Docket No. 32476; Order 78-4-116]

OZARK AIR LINES, INC.

Order to Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 107

Adopted by the Civil Aeronautics Board, at its office in Washinton, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner

[1]*I.e.*, markets which generate fewer than 20 true O&D plus interline connecting passengers a day.

[2]The Las Vegas-Little Rock market consisted of 4,390 ture O&D plus interline connecting passengers in the year ended June 30, 1976. Frontier's current authority in the market requires 3 intermediate stops with specific stops required at Albuquerque and Dallas-Fort Worth.

[3]We further find and conclude that Frontier is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4]All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5]All Members concurred.

[1]*I.e.*, markets which generate fewer than 20 true O&D plus interline connecting passengers a day.

[2]The minor markets where both Piedmont and Delta currently hold restricted authority are set forth in Appendix A to this order.

[3]We further find and conclude that National is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4]All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5]All Members concurred.

V 43 — 84 MY 1 78 UMI

which would, among other things, give Delta unrestricted authority in 4 minor markets[1] where Ozark also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Ozark as well as the other carriers certificated to serve on these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Ozark's operations in the 4 markets listed in Appendix A is required by the the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, it is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Ozark's certificate for Route 107 so as to remove operating restrictions in the markets listed in Appendix A.

2. Any interested person having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in Appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix K of Order 78-4-109.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[5]

[Docket No. 32477; Order 78-4-117]

PIEDMONT AVIATION, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 87

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority in 6 minor markets[1] where Piedmont also holds restricted authority.[2] As discussed in orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Piedmont as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Piedmont's operations in the 6 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, it is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Piedmont's certificate for Route 87 so as to remove operating restrictions in the markets listed in Appendix A.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in Appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

5. A copy of this order shall be served upon all persons listed in Appendix K of Order 78-4-109.

[Docket No. 32478; Order 78-4-118]

SOUTHERN AIRWAYS, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 98

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority in 46 minor markets[1] where Southern Airways also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Southern as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Southern's operations in the 46 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, it is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Southern's certificate for Route 98 so as to remove operating restrictions in the markets listed in Appendix A.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in Appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

[1]I.e., markets which generate fewer than 20 true O. & D. plus interline connecting passengers a day.

[2]The minor markets where both Ozark and Delta currently hold restricted authority are set forth in Appendix A to this order.

[3]We further find and conclude that Ozark is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[1]I.e., markets which generate fewer than 20 true O&D plus interline connecting passengers a day.

[2]The minor markets where both Piedmont and Delta currently hold restricted authority are set forth in Appendix A to this order.

[3]We further find and conclude that Piedmont is a citizen of the United States within the meaning of the Act, and is fit, willing, and able to perform properly the air transportation proposed here and to conform to the provisions of the Act and the Board's rules, regulations, and requirements.

[4]All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

[5]All Members concurred.

[1]I.e., markets which generate fewer than 20 true O&D plus interline connecting passengers a day.

[2]The minor markets where both Southern and Delta currently hold restricted authority are set forth in Appendix A to this order.

[Docket No. 32479; Order 78-4-119]

TEXAS INTERNATIONAL AIRWAYS, INC.

Order To Show Cause Regarding Amendment of Certificate of Public Convenience and Necessity for Route 82

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority in 2 minor markets[1] where Texas International Airways also holds restricted authority.[2] As discussed in Orders 78-4-109, 77-11-74 and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on Texas International as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Orders 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on Texas International's operations in the 2 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, it is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending Texas International's certificate for Route 82 so as to remove operating restrictions in the markets listed in Appendix A.

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth here shall, within 60 days after the date of service of this order, file with the Board and serve upon all persons listed in Appendix K of Order 78-4-109, a statement of objections together with a summary of testimony, statistical data, and such evidence as is expected to be relied upon to support the stated objections; answers to objections shall be filed 20 days thereafter;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board;[4]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action; and

[1]*I.e.*, markets which generate fewer than 20 true O&D plus interline connecting passengers a day.

[2]The minor markets where both Texas International and Delta currently hold restricted authority are set forth in Appendix A to this order.

[3]We further find and conclude that Texas International is a citizen of the United States within the meaning of the Act, and is

Docket No. 32480; Order 78-4-120]

UNITED AIR LINES, INC.

Order to Show Cause Regarding Amendment of Certificates of Public Convenience and Necessity for Routes 1 and 51

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 19th day of April 1978.

By Order 78-4-109, issued concurrently with this Order, the Board has proposed to realign the domestic route system of Delta Air Lines in a manner which would, among other things, give Delta unrestricted authority in 66 minor markets[1] where United Air Lines also holds restricted authority.[2] As discussed in orders 78-4-109, 77-11-74, and 76-5-101, it is our view that such small markets do not, as a practical matter, present competitive considerations of significant magnitude, and accordingly, we have proposed as a matter of policy to grant unrestricted authority to all carriers authorized to serve such minor markets. The removal of operating restrictions on United as well as the other carriers certificated to serve these minor markets will give these carriers greater flexibility to establish more logical aircraft routings, and may enable the carriers to offer new or additional service in these small markets, thereby benefiting the traveling public without any significant adverse impact on other carriers.

Upon consideration of the above matters, and consistent with our tentative findings and conclusions set forth in Order 78-4-109, and 76-5-101, we tentatively find and conclude that the elimination of restrictions on United's operations in the 66 markets listed in Appendix A is required by the public convenience and necessity, and is consistent with the Board's policy of removing restrictions which serve no useful purpose and which are otherwise wasteful and undesirable.

Interested persons will be given 60 days following the date of service of this order to show cause why the tentative findings and conclusions set forth here should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If a full-blown evidentiary hearing complete with the opportunity for oral cross examination is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.[3]

Accordingly, it is ordered, That:

1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending United's

PREHEARING CONFERENCE AND HEARING

Notice is hereby given that a prehearing conference in this preceeding is assigned to be held on May 18, 1978, at 10 a.m. (local time), in Room 1003, Hearing Room C, Universal North Building, 1875 Connecticut Avenue NW., Washington, D.C., before the undersigned.

Notice is also given that the hearing may be held immediately following conclusion of the prehearing conference unless a person objects or shows reason for postponement on or before May 11, 1978.

Ordinary transcript will be adequate for the proper conduct of this proceeding.

Dated at Washington, D.C., April 25, 1978.

RICHARD V. BACKLEY,
Administrative Law Judge.

[Docket 30332, Agreement C.A.B. 26701, R-5, R-6 and R-7, Agreement C.A.B. 26707, R-19; Order 78-4-78]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Agreements Relating to Cargo Matters; Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 14th day of April, 1978.

By Order 77-8-114, August 23, 1977, the Board acted on numerous resolutions of the International Air Transport Association (IATA) dealing with air cargo matters such as rate construction rules and procedures, and charges for ancillary services. The resolutions were adopted either at the Composite Cargo Conference held in Vancouver during May 1977, or at the 9th Meeting of the Cargo Traffic Procedures Committee held in Geneva, February 28-March 4, 1977. The Board stated that it would not act on resolutions governing live animal regulations, or the resolution proposing a $2.50 charge for preparation of air waybills, until we had received carrier justification and comments from interested persons. These resolutions are the subject of this order.

LIVE ANIMAL REGULATIONS

Resolution 511a (IATA Live Animal Regulations) establishes as binding on IATA members the standards for acceptance and carriage of live animals set forth in the 6th Edition of a separately published manual entitled "IATA Live Animals Regulations." [1] A proposed amendment to Resolution 511a, as well as to Resolution 512a (c.o.d. Procedures), would prohbiit the acceptance of live animals collect on delivery (c.o.d.), and is based on Recommendation No. 7 of the April 1977 meeting of the International Conference on Transportation of Live Animals. [2] Justification for the Live Animals Regulations and c.o.d. prohibition has been filed by Pan American World Airways, Inc. (Pan American), and by Trans World Airlines, Inc. (TWA). Objections, and a reply to TWA's justification, have been submitted by the Animal Shipper Parties (ASP). [3]

In its justification, Pan American states that: shippers often offer animals on a c.o.d. or charges collect basis on speculation, without advance notice to consignee, and in some instances the animals are not picked up at the destination airport; and the proposed c.o.d. ban seeks to prevent possible injury, distress and unnecessary suffering of live animals. TWA submits that under the Board's domestic rules, [4] when live animal c.o.d. shipments are not accepted, and the carrier returns the shipment to the shipper, the shipper must pay for the return transportation, which results in disputes between carriers and shippers; the longer distances and higher charges, as well as strict country-by-country rules on transport of animals in international transportation, exacerbate this problem; c.o.d. services are discretionary in any event and many carriers do not accept c.o.d. shipments; and, of the major European countries, only Greece accepts c.o.d. shipments without restrictions.

In its comments, ASP alleges that: the Board should not approve Resolution 511a and thus give sanction to the separately published "Live Animal Regulations" manual until all interested parties have had an opportunity to comment on it, and in the meantime the Board should require IATA to distribute warning stickers to all recipients of the latest edition of the manual stating that the regulations are not effective to/from the United States until the Board has approved them; the proposed c.o.d. ban, which is traceable to the International Conference on Transportation of Live Animals sponsored by IATA and which had no shipper participation, is unwarranted and conflicts with the U.S. Animal Welfare Act, and there is not reason not to apply the U.S. domestic c.o.d. rule to international shipments. [5] ASP also objects to the Board's approval in Order 77-8-114 of the revalidation of IATA Resolution 511b (IATA Live Animals Board), and seeks procedures such as opportunity for direct shipper comments and appearances before the Live Animals Board to safeguard shipper interests in the preparation of the Live Animals Regulations. [6]

In reply to TWA's justification ASP contends that: TWA has not offered any justification whatsoever for the revalidation of Resolution 511a; the outside (non-IATA) groups included at the International Conference on transporation of Live Animals were primarily preservation and conservation organizations with no expertise in the production, breeding and shipping of live animals; shippers have tendered live animals c.o.d. for years without encountering the problems alleged by TWA; the domestic tariff rule, which contains the consignor guarantee, is now federal law and should be applied to international shipments; the higher costs and more complex rules in international transportation are not unique to live animal shipments and do not warrant a c.o.d. ban on this one class of traffic; responsible shippers should not be penalized for the unsubstantiated misdeeds of a few abusers; and TWA's justification contains factual errors. [7]

[1]The IATA live animals manual is produced by the IATA Live Animals Board which operates under procedures set forth in Resolution 511b (IATA Live Animals Board).

[2]The conference was attended by representatives of governments, carriers, the IATA Secretariat, the Air Transport Association, the International Committee on Laboratory Animals, the International Society for the Protection of Animals, the International Union for Conservation of Nature and Nature Resources, and the World Wildlife Fund.

[3]These parties are named in the Attachment.

[4]See Order 77-8-72, August 16, 1977, in Docket 23610, *Rules and Practices Relating to the Acceptance and Carriage of Live Animals in Domestic Air Freight Transportation.*

[5]The standard domestic tariff rule requires a written guarantee from consignor to pay all transportation and other charges associated with the live animal c.o.d. shipments, including return to sender, in the event of nonpayment at destination.

[6]Finally, ASP requests that the Board direct the carriers to submit full economic justification before September 30, 1978, for the 110 percent rate premium on warm-blooded animals, which ASP contends should not be universally applicable to all categories of animal shipments, citing the Board's decisions in Docket 22859, Domestic Air Freight Rate Investigation (DAFRI). The initial decision in DAFRI states that the per-shipment charge for live animals should be reduced to eliminate the customer service element, which would be covered by separate accessorial charges on those shipments where the carrier assisted the shipper in preparing documentation, or rented him a kennel.

[7]For example, TWA states that the United Kingdom requires a 6-month quarantine for all live animal shipments destined to or transiting the United Kingdom, but ASP states that this regulation applies only to canine and feline species.

V 4 3 — 8 4 M Y 1 7 8 UMI

CHARGE FOR PREPARATION OF AIR WAYBILL

In support of the proposed $2.50 charge for preparing the air waybill Pan American and TWA assert that: in international air transportation, most air waybills are prepared by agents or consolidators, and the charge would not be or substantial benefit to the air carriers; and the $2,50 level is fully justified by costs, which Pan American estimates at $2.54 and TWA at $2.84.[8] Eastern Airlines, Inc., and Compagnie Nationale Air France have submitted letters stating that they support the air waybill charge.

Comments in support of the proposed charge have also been submitted by the International Airfreight Agents Association (IAAA), which alleges that: when the cargo agent prepares the air waybill, it would retain the fee, an arrangement which has long been in effect worldwide except in the United States; the proposed charge would be an important means of redressing agent grievances in terms of their overall compensation, which has been inadequate because of IATA's fixed-commission agreement and resultant monopsony, as well as the Board's policies which have disallowed commissions on consolidations and charges for air waybill preparation;[9] the Board is reviewing cargo agents' compensation in Docket 28672 and 28776, IATA Commissions Rate Agreements investigation, and Docket 30362, EDR-330, Advance Notice of Proposed Rulemaking Concerning Commissions or Other Payments for International Air Freight Shipments, thus indicating a desire to alter the status quo; and as a form of "conscience money," the air waybill fee requires no further justification, but in any event is fully warranted by costs[10] and by the agents' needs, since IAAA has produced solid evidence in Dockets 28672 and 28776 that U.S. cargo agents are losing money on their operations and require a revenue increase, although most agents enter the business for reasons totally unrelated to its profitability.[11]

[8]The estimates are based on data developed in DAFRI, where the Parsons study showed an average of 3.5 man-minutes for preparation of each air waybill, with domestic terminal labor and support costs estimated at 72.51 cents per man-minute. Both carriers use the 3.5 man-minute averge, and Pan American uses the domestic cost figure while TWA uses its Atlantic division freight handling cost estimate of 81.22 cents per man-minute.

[9]In Order 72-3-106, March 30, 1972, the Board disapproved an IATA air waybill fee on grounds that there was no specific cost justification or response from the agents. IAAA contends that those grounds no longer exist.

[10]IAAA cites the findings and data in DAFRI in a manner similar to Pan American and TWA.

[11]IAAA states that cargo agents generally enter the business because their customers in a previously established line of operations, such as the trucking or cartage business or customs brokerage business, also have need of air cargo service and seek their services as a matter of convenience.

FINDINGS

The Board has decided to disapprove Resolution 511a (IATA Live Animals Regulations); to disapprove the proposed ban on C.O.D. shipment of live animals; to apply certain conditions on our outstanding approval of Resolution 511b (Live Animals Board); and to disapprove the proposed air waybill charge in Resolution 512c.

LIVE ANIMALS

In Order 75-7-43, July 10, 1975, the Board declined to approve the revalidation of Resolution 511a (IATA Live Animals Regulations), which sets forth the IATA Live Animals Manual, due to adverse shipper comment and our own reservations. Although we also had reservations about the nonpuplic procedures of the IATA Live Animals Board at that time, we approved the revalidation of Resolution 511b through September 30, 1977, since, even without shipper participation, it continued to perform a useful function in the exchange of information and furthered the welfare of live animals transported by air. Similarly, in Order 77-8-114 we did not approve Resolution 511a, but approved the extension of Resolution 511b.

The Board addressed the various complaints against the two resolutions, which have again been highlighted by ASP in this proceeding, in Order 75-9-27, September 11, 1975, where we directed the IATA carriers and all interested persons to show cause:

(a) Why the Board's earlier approval of Resolution 511a should not be withdrawn until the Live Animals Regulations are filed with and accepted by the Board as a tariff;

(b) Why Resolution 511b should not be disapproved in the absence of public (shipper, consignee, or other interested person) input and participation relating to amendment of the Live Animals Regulations by the IATA Live Animals Board;

(c) Why the Board's earlier approval of Resolution 607, insofar as it relates to standard labels for live animals shipments, should not be withdrawn in view of the fact that certain standard labels are at variance with those contained in the Live Animals Regulations;

(d) Why all current tariff rules of the IATA and non-IATA carriers participating in the Live Animals Regulations (except liability and rate provisions) should not be canceled when the Live Animals Regulations are filed in tariff forms;

(e) Why the Live Animals Regulations should not reflect the participation of all IATA member carriers for all local and interline traffic from and to the United States; and

(f) Why all non-IATA carriers serving the United States, and which elect to participate in the IATA Live Animals Regulations for interline traffic from and to the United States, should not be required to adopt the IATA Regulations for local traffic from and to the United States.

The parties were also directed to comment upon various technical aspects of the Live Animals Manual cited in Order 75-9-27. Comments and responses to that order were received, but the Board has delayed final resolution of the issues pending decision of Rules and Practices Relating to the Acceptance and Carriage of Live Animals in Domestic Air Freight Transportation, Docket 26310, as well as recent amendments of the Animal Welfare Act of 1970.

The domestic investigation has been completed, the Animal Welfare Act has been amended, and it is now time to resolve the outstanding issues pertaining to international live animal shipment rules.

In Order 75-9-27, the Board tentatively found that the provisions of the IATA Live Animals Regulations, which are made binding on all IATA members by agreement of the carriers, should be filed by the carriers in their tariffs. The Board has ruled many times that any provisions by which carriers seek to bind shippers must be filed in tariffs.[12] We continue to believe that a single document containing all the usual tariff material as to the acceptance, nonacceptance, packaging, documentation, etc., of live animal shipments as well as any relevant informational or advisory (nontariff) material would be a useful publication for both shippers and carriers.[13] Without such a single document, carriers would very likely continue to apply the IATA Regulations as they now exist, as an IATA agreement binding on all carrier participants, and on shippers, without notice to shippers of all the mandatory requirements for animal shipments or opportunity for them to participate in establishment of the rules. Thus duplication and perhaps conflicts could exist between the present regulations and present tariff rules and shippers would be denied the advantages of a single reference. A variety of local and interline tariff provisions could result as the carriers separately decide which portions, if any, of the IATA Regulations warrant publication in their tariffs. Certain carriers have tariff rules which conflict with the regulations and thus their use would mislead shippers as to the acceptability and transportation of various live animals;[14] in addition, the IATA regulations contain a statement that they "are approved by the appropriate governmental authorities," which is patently false and misleading as far as this Government is concerned.

[12]See, for instance, Order 73-6-103, June 26, 1973, and Order 76-3-139, March 22, 1976.

[13]By nontariff material we mean such good sense advice that is included in the Live Animals Manual, such as that bovine and ungulate species should receive their normal ration prior to departure and should not be overfed in order to avoid internal injury through movement of the stomach during transportation; or that female animals shipped during estrus should be stowed in the aircraft as far apart from males as possible.

As noted above, the IATA Live Animals Regulations as now constituted are not an appropriate document for filing as a tariff in their present form since they contain much ambiguous language and certain specific provisions which appear to us of questionable validity. In fact, the unsuitability of the IATA manual for tariff publication in its potential conflicts with the tariff conditions of contract were raised by carriers which filed comments in opposition to the Board's tentative findings in its 1975 show cause order.[15]

For these reasons, we have decided that we will not restrict the carriers to a particular publication procedure or require them to file such a document, since under the Act only provisions binding shippers and carriers are required to be filed in tariff form. We do, however, put the carriers on notice that all requirements they seek to impose on shippers as to acceptance, nonacceptance, packaging, documentation, etc., of live animal shipments must be fully supported and based on their lawfully filed tariff rules; and that the Board will not view lightly the imposition of extra-tariff requirements.[16] Moreover, we specifically invite shippers to bring to our attention any requirements imposed by carriers which appear to deviate from lawfully filed tariffs.

Although we are disapproving Resolution 511a and the IATA Live Animals Regulations manual, we believe the manual might be revised in an acceptable manner, and for this reason we will continue our approval of Resolution 511b governing the IATA Live Animals Board, which has the responsibility for amending the manual. The Board is also sympathetic to the views of specialized shippers of this particular class of traffic on liaison with the IATA Live Animals Board, considering their unique interests and expertise. Resolution 511b now contains no provision for regular contributions and input from shippers, and we will therefore condition our approval to insure that shippers have an opportunity to submit their views and recommendations.

We will also disapprove the proposed ban on c.o.d. shipment of live animals. The carriers have provided no evidence that the potential problems in international air transportation are so much more significant than in U.S. domestic transportation that they cannot be adequately dealt with by the guarantee provisions of the standard domestic tariff rules and the amended Animal Welfare Act.[17]

AIR WAYBILL CHARGE

We are not persuaded that the proposed $2.50 charge for preparation of the air waybill is justified in international air transportation. While it is true that the Board, in its decision in *DAFRI*, endorsed a customer service charge of up to $5.33 for assisting the customer to prepare freight documentation and for collecting payment for transportation from the consignee in U.S. domestic transportation, such charge was to be applied in addition to cost-based rates for transportation developed through an extensive formal investigation.[18] No such investigation has been conducted covering international cargo transportation rates, and all costs including the cost to the carrier when it is required to prepare air waybills are already included in the rate base as a cost of doing business.[19] In these circumstances, charging the shipper for preparation of the air waybill, when the cost of that service is already covered by the basic cargo rate, would be analogous to exacting a surcharge from the passenger for writing his ticket, regardless of whether he booked directly with the carrier or through a travel agent and in spite of the fact that passenger rates already reflect the cost of ticketing. One of the primary functions of both passenger and cargo agents is to prepare documentation such as tickets and air waybills for their customers. They are compensated for these services by commission payments. While it may be desirable to segregate charges so that the customer pays only for services actually used, the proposed air waybill fee is not an attempt at "unbundling," since as proposed it is a surcharge on top of rates which are already intended to cover the cost of providing this particular service.

A more general question which the Board is considering in a formal investigation is presented by this agreement. IAAA argues forcefully that the standard five percent commission to freight agents is inadequate and that approving the IATA-agreed air waybill charge, which the agent would retain when he performs the service, would be a means to partially redress the agents' longstanding grievances. The broad question of whether compensation to intermediaries should be established by inter-carrier agreement within IATA is before the Board in the *IATA Commissions Rate Agreements Investigation*. The IATA agreement presented here on the air waybill charge, which would directly affect cargo agents' overall compensation, presents the same general public interest issue involving antitrust considerations as does the investigation, and the Board believes it is far better to resolve that broad question in the context of the major case. Therefore, until we issue a decision in the *IATA Commission* case we are not prepared to approve any new inter-carrier agreements fixing the compensation

[14]For example, many carriers have tariff provisions limiting the acceptability of certain animals, which are not in the IATA Live Animals Regulations; conversely, there are limitations in the IATA manual which do not appear in tariffs.

[15]Comments were filed by Pan American, TWA, Delta Airlines, Inc., Seaboard World Airlines, Inc., United Air Lines, Inc., and the Flying Tiger Line, Inc. Responses were also submitted by IAAA, the American Association of Zoological Parks and Aquariums, and the Zoological Action Committee.

[16]Section 403(a) of the Federal Aviation Act and Part 221.3 of the Board's regulations require carriers to file tariffs containing, in addition to rates, fares and charges, "*all* classifications, rules, regulations, practices, and services" governing air transportation (emphasis supplied).

[17]Finally, we will not limit our approval of the 110-percent premium for warm-blooded animals to September 30, 1978, as ASP requests, or require the carriers to rejustify the premium. The Board's decision in DAFRI, on which ASP relies, is now subject to petitions for reconsideration, and reevaluation in light of the recent deregulation of U.S. domestic cargo rates. Moreover, the IATA-agreed 110-percent premium for warm-blooded animals is consistently with current U.S. domestic cargo tariffs which show the same 110-percent level.

[18]In domestic transportation, regular shippers normally prepare their own air waybills and usually only unsophisticated shippers require assistance by carrier personnel at the customer service counter.

[19]In fact, a tariff format consisting of rates based on weightbreaks can result in including a shipment-related cost, such as that of preparing an air waybill, more than once for a given weight. For example, a shipper tendering a shipment of 200 kilograms (kg.) to a carrier with weight breaks of 100, 300, 500, etc., kg. would pay twice the 100 kg. rate. Presumably, the 100 kg. weightbreak already contains the total costs for 100 kg., including the fixed cost for one shipment. Thus, the 200 kg. shipment is, in effect, being assessed two shipment charges.

V 4 3 — 8 4

for intermediaries in the sale of international air transportation.

The Board, acting pursuant to the Federal Aviation Act of 1958 and particularly sections 102, 204(a), and 412 thereof, makes the following findings:

1. It is found that the following resolutions, incorporated in the agreements indicated, are adverse to the public interest and in violation of the Act insofar as they would apply in air transportation as defined by the Act;

Agreement CAB	IATA No.	Title	Application
26701:			
R-5	511a	IATA Live Animals Regulations (Revalidating and Amending).	1;2;3
R-7	512a	C.O.D. Procedures (Amending)	1;2;3;1/2;2/3;3/1;1/2/3
26707:			
R-19	512c	Charge for Preparation of Air Waybill (Revalidating and Amending).	1;2;3

2. It is found that approval of the following resolution, incorporated in Agreement CAB 26701 as indicated, should be subject to the conditions stated below;

Agreement CAB	IATA No.	Title	Application
26701:			
R-6	511b	IATA Live Animals Board (Revalidating and Amending).	1;2;3

(a) The carriers shall keep complete and accurate minutes of each meeting of the IATA Live Animals Board and all other bodies dealing with live animals matters, and a true copy of each minutes and all documentation shall be filed in Docket 30332 not later than two weeks after close of each meeting:

(b) Any interested person may advise the International Air Transport Association or a direct air carrier participant of his interest in these discussions and upon request all meeting notices and agendas shall be mailed to such interested persons with such notice to include an invitation to submit comments upon the agenda matters and to request appointments for personal appearance; and

(c) Any agreement or agreements reached as a result of such discussions shall be filed with the Board in accordance with section 412 of the Federal Aviation Act of 1958 and approved by the Board prior to being incorporated in a tariff filing or otherwise placed in effect.

Accordingly, *It is ordered*, That:

1. Those portions of Agreements CAB 26701 and 26707 set forth in finding paragraph 1 above are disapproved;

2. The Board's approval of Resolution 511b is subject to the conditions of finding paragraph 2 above; and

3. Copies of this order shall be served upon the International Air Transport Association, Pan American World Airways, Inc., Trans World Airlines, Inc., Eastern Airlines, Inc., Compagnie Nationale Air France, counsel for the Animal Shipper Parties, and counsel for the International Airfreight Agents Association.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.[20]

PHYLLIS T. KAYLOR,
Secretary.

Bureau of the Census

SPECIAL CENSUSES

The Bureau of the Census conducts a program whereby a local or State government can contract with the Bureau to conduct a special census of population. The content of a special census is ordinarily limited to questions on household relationship, age, race, and sex, although additional items may be included at the request and expense of the sponsor. The enumeration in a special census is conducted under the same concepts which govern the decennial census.

Summary results of special censuses are published semiannually in the Current Population Reports—Series P-28, prepared by the Bureau of the Census. For each area which has a special censes population of 50,000 or more, a separate publication showing data for that area by age, race, and sex is prepared. If the area has census tracts, these data are shown by tracts.

The data shown in the following table are the results of special censuses conducted since June 30, 1977, for which tabulations were completed between April 1, 1978 and April 30, 1978.

Dated: April 26, 1978.

MANUEL D. PLOTKIN,
Director,
Bureau of the Census.

Economic Development Administration

RONSON CORP. AND RAINBOW GIRL COAT CO., INC.

Petitions for Determinations of Eligibility To Apply for Trade Adjustment Assistance

Petitions were accepted for filing on April 24, 1978, from two firms: (1) Ronson Corp., One Ronson Road, Bridgewater, N.J. 08807, a producer of lighters, gas and electric appliances, and aerospace products; and (2) Rainbow Girl Coat Co., Inc., 40 Congress Street, Springfield, Mass. 01104, a producer of outerwear for women, girls, and infants. The petitions were submitted pursuant to section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

CHARLES L. SMITH,
Acting Chief, Trade Act Certification Division, Office of Planning and Program Support.

NATIONAL INSTITUTES OF HEALTH

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00066. Applicant: DHEW, National Institutes of Health, NIAID, Building 7, Lobby Bethesda, Md. 20014. Article: Ultramicrotome, Ultrotome III and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article will be used to section gastroenteritis, animal, and fungal tissues embedded in hardened epoxy resins. Investigations will include ultrastructural studies on normal and pathologic specimens and animal tissues, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions at host-parasite interfaces, and subcellular changes in cell induced by changes in their biochemical and physical environments.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article has a cutting speed range of 0.1 to 60 millimeters/second (mm/sec). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by the National Bureau of Standards in its memorandum dated March 30, 1978, that (1) the cutting speed range of the foreign article is pertinent to the applicant's research studies, and (2) the domestic instrument does not provide the pertinent feature. We, therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

NATIONAL RADIO ASTRONOMY OBSERVATORY—TUCSON

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00101. Applicant: National Radio Astronomy Observatory Associated Universities, Inc., 2010 North Forbes Boulevard, Suite 100, Tucson, Ariz. 85705. Artice: Repair of Klystron, Model VRB2113A30 and SN0139A7. Manufacturer: Varian Associates of Canada, Ltd., Canada. Intended use of article: The article is intended to be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a frequency in the range between 80-110 gigahertz. The National Bureau of Standards (NBS) advises in

MY 1 78 UMI

UNIVERSITY OF CALIFORNIA—LOS ALAMOS

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 78-00049. Applicant: University of California—Los Alamos Scientific Laboratory, P.O. Box 990, Los Alamos, N. Mex. 87545. Article: Laser, Multigas, Model TEA-203-2. Manufacturer: Lumonics Research Ltd., Canada. Intended use of article: In order to extend the capability of already ongoing efforts in the studies of polyatomic molecular multiphoton photodissociation, laser induced chemistry, isotopically selective photochemical processes and laser induced fluorence, the article will be used to excite specific infrared energy transmitions in molecules such as UF_6, SF_6, Cl_2, NOCl, CRO, CF_2Cl_2, BCl_3, SF_2CL, MOF_4, etc. As a result of these studies chemical reaction rates with reaction partners in known vibrational quantum states will be determined.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides continuous wave operation in either carbon monoxide or carbon dioxide wave lengths. The National Bureau of Standards (NBS) advises in its memorandum dated April 6, 1978 that (1) the capability of the article described above is pertinent to the applicant's intended purposes and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

THE UNIVERSITY OF TEXAS MEDICAL BRANCH

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 78-00079. Applicant: The University of Texas Medical Branch, Department of Pathology, Galveston, Tex. 77550. Article: LKB 14800-1 Cryokit Complete and with Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is an accessory to an existing ultramicrotome which allows it to be used to section frozen tissues at ultra low temperatures so that sites of sodium, potassium, calcium and phosphorus accummulation in tissues are not disturbed. The materials to be studied are mammalian—liver, heart, kidney and parts of cells derived therefrom. The article is intended to be used to train graduate and medical students in biomedical research in the courses Pathology 6 x 97—Research and Pathology 6 x 98—Thesis.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to an accessory for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument with which the article is intended to be used and is pertinent to the applicant's purposes. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated March 23, 1978 that it knows of no domestic instrument of equivalent scientific value to the article for its intended uses.

The Department of Commerce knows of no other similar accessory being manufactured in the United States, which is interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

Office of the Secretary

ADVISORY PANEL FOR THE PACIFIC FISHERY MANAGEMENT COUNCIL

Establishment

In accordance with the provisions of the Federal Advisory Committee Act, as amended, (5 U.S.C. App. (1976)); and Office of Management and Budget Circular A-63 of March 1974, and after consultation with the General Services Administration, the Department of Commerce has determined that the establishment of the Advisory Panel for the Pacific Fishery Management Council is in the public interest in connection with the performance of duties imposed on the Department by the Fishery Conservation and Management Act of 1976, Pub. L. 94-265 (16 U.S.C. 1852).

The Panel will provide the Council with advice and counsel with respect to the Council's activities on matters of fishery management policy, the preparation and review of fishery management plans, and the effectiveness of plans which have been implemented.

The Panel shall be composed of Council-appointed individuals who are knowledgeable or experienced with regard to the management, conservation, or recreational or commercial harvest of the fishery resources of the Council's geographical area of concern. The Panel will operate through sub-panels, each concerned with carrying out the objectives and duties of the Panel with respect to a particular fishery management unit. Eight subpanels will be initially established.

The Panel will function solely as an advisory body in compliance with the Federal Advisory Committee Act. Its charter will be filed 15 days from the publication date of this notice. On that filing date, the following five existing advisory panels for the Pacific Fishery Management Council will be terminated:

Anchovy Advisory Panel for the Pacific Fishery Management Council (FMC)
Groundfish Advisory Panel for the Pacific (FMC)
Jack Mackerel Advisory Panel for the Pacific (FMC)
Sablefish Advisory Panel for the Pacific (FMC)
Salmon Advisory Panel for the Pacific (FMC)

Interested persons are invited to submit comments regarding the establishment of the Advisory Panel for the Gulf of Mexico Fishery Management Council. Such comments, as well as inquiries, may be addressed to the Committee Liaison Officer, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Rockville, Md. 20852, telephone 443-8731.

DEPARTMENT OF DEFENSE

Department of the Army

CHANGE OF MISSION AT FORT STEWARD, GA.

Filing of Environmental Impact Statement

In compliance with the National Environmental Policy Act of 1969, the Army, on 21 April 1978, provided the Environmental Protection Agency, as required by the Council on Environmental Quality, a Final Environmental Impact Statement (FEIS) concerning the permanent stationing of the 24th Infantry Division (—) at Fort Stewart and Hunter Army Airfield, Ga., and the conversion of this unit from an infantry to a mechanized infantry division.

Copies of the statement have been forwarded to concerned Federal, State and local agencies. Interested organizations or individuals may obtain copies from Commander, 24th Infantry Division (—) and Fort Stewart, Attention: AFZP-FEC, Fort Stewart, Ga. 31313, telephone 912-767-4798.

In the Washington area, inspection copies may be seen during normal duty hours in the Environmental Office, Office of Assistant Chief of Engineers, Room 1E676, Pentagon, Washington, D.C. 20310, telephone 202-694-3434.

BRUCE A. HILDEBRAND,
Deputy for Environmental Affairs, Office of the Assistant Secretary of the Army (Civil Works).

MILITARY TRAFFIC MANAGEMENT COMMAND

Military Personal Property Symposium; Open Meeting

Announcement is made of a meeting of the Military Personal Property Symposium. This meeting will be held on May 25, 1978, at the Ramada Inn, Rosslyn, Va., and will convene at 0900 hours and adjourn at approximately 1500 hours.

Proposed agenda: The purpose of the symposium is to provide an open discussion and free exchange of ideas with the public on procedural changes to the personal property traffic management regulation (DOD 4500.34-R), and the handling of other matters of mutual interest relating to the movement and/or storage of household goods and unaccompanied baggage, as well as proposed changes and innovations in the Department of Defense personal property moving and storage program.

All interested persons desiring to submit topics to be discussed should submit them in writing to the Commander, Military Traffic Management Command, Attn.: MT-PPM, Washington, D.C. 20315. Topics to be discussed should be received on or before May 18, 1978.

Dated: April 21, 1978.

DONALD H. MENSCH,
Colonel, GS,
Director of Personal Property.

Department of the Navy

CHIEF OF NAVAL OPERATIONS EXECUTIVE PANEL ADVISORY COMMITTEE

Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee will meet on May 30-31, 1978, at the U.S. Naval War College, Newport, R.I. Sessions of the meeting will commence at 8:30 a.m. and terminate at 5:30 p.m. on both days. All sessions of the meeting will be closed to the public.

The agenda will consist of matters required by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order, including discussions of U.S. Navy-NATO plans, Navy advanced research studies, intelligence application to naval tactical developments, and related intelligence items. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of Title 5, United States Code.

For further information concerning this meeting, contact: Commander Robert B. Vosilus, U.S. Navy, Executive Secretary of the CNO Executive Panel Advisory Committee, 1401 Wilson Boulevard, Room 405, Arlington, Va. 22209, telephone No. 202-594-3191.

Dated: April 25, 1978.

K. D. LAWRENCE,
Captain, JAGC, U.S. Navy, Deputy Assistant Judge Advocate General (Administrative Law).

[3128-01]

DEPARTMENT OF ENERGY

ISSUANCE OF PROPOSED DECISIONS AND ORDERS BY THE OFFICE OF HEARINGS AND APPEALS

Week of April 3, 1978 through April 7, 1978

Notice is hereby given that during the period April 3, 1978 through April 7, 1978, the Proposed Decisions and Orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of the Proposed Decision and Order in final form may file a written Notice of Objection within ten days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except Federal holidays.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

APRIL 19, 1978.

Proposed Decisions and Orders

M. J. Mitchell, Dallas, Tex., FXE-0534, Crude oil

M. J. Mitchell filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted and would permit Mitchell to continue to sell certain of the crude oil which he produces from the Pickrel Ranch Minnelusa Sand Unit, Pickrel Ranch Field, Campbell County, Wyoming at market prices. On April 7, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

A. T. Skaer, Denver, Colo., DEE—0408, Crude oil

A. T. Skaer filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Skaer to sell crude oil which he produces from the Wiant lease at upper tier ceiling prices as specified in the Mandatory Petroleum Price Regulations. On April 3, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

Texas Gas Exploration Corp., Washington, D.C., FEE-4460, Propane

Texas Gas Exploration Corp., filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart K. The exception request, if granted, would permit the firm to increase its banks of unrecovered product costs which it is permitted to reflect in price increases for propane in future months in recognition of the fact that it charged prices below its base price in previous periods. On April 4, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request should be granted.

Requests for Exception Received From Natural Gas Processors

The Office of Hearings and Appeals of the Department of Energy has issued Proposed Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The proposed exception relief permits the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product cost increases:

Company	Case No.	Plant	Location	Amount of price increase (per gallon)

CASES FILED WITH THE OFFICE OF ADMINISTRATIVE REVIEW

Week of March 17 Through March 24, 1978

Notice is hereby given that during the week of March 17 through March 24, 1978, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in such cases may file with the DOE written comments on the application within ten days of ser-

V 43 — 84 MAY 1 78 UMI

vice of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

APRIL 24, 1978.

RICHARD T. TEDROW,
DIRECTOR,
Office of Hearings and Appeals.

APPENDIX.—*List of cases received by the Office of Administrative Review*

[Week of Mar. 17 through Mar. 24, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Mar. 17, 1978	Basin Petroleum, Inc., Los Angeles, Calif. If granted: Basin Petroleum, Inc., would receive an exception from 10 CFR 211.67 with respect to its entitlement obligations.	DEE-0933	Exception from the entitlement program (sec. 211.67).
Do	Bassett Oil & Equipment Co., Bassett, Va. If granted: The appeal which Bassett Oil & Equipment Co. filed from a revised remedial order which was issued to the firm would not be considered under the procedural regulations applicable to the original remedial order issued to the firm.	DRX-0052	Supplemental order.
Do	Buck's Butane & Propane Service, San Jose, Calif. If granted: The provisions of DOE's Nov. 15, 1977, decision and order covering the issuance of a revised remedial order to Buck's Butane & Propane Service would be modified.	DRX-0051	Supplemental order in *Buck's Butane & Propane Service*, 1 DOE's par. 80,119 (Nov. 15, 1977).
Do	Northland Oil & Refining Co., Tulsa, Okla. If granted: Northland Oil & Refining Co. would be granted retroactive and prospective exception relief from the provision of 10 CFR 211.67.	DEE-0934 and DES-0934	Exception from the entitlement program (sec. 211.67), stay request.
Do	Tenneco Oil Co., Houston, Tex. If granted: The Feb. 15, 1978, revised remedial order issued to Tenneco by region VI would be rescinded and the firm would not be required to refund overcharges made in its sales of motor gasoline during the period November 1973 through January 1976.	DRA-0156	Appeal of the DOE's Feb. 15, 1978, revised remedial order.
Mar. 20, 1978	Raye Benham, Rico, Colo. If granted: Raye Benham would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-0935	Exception to reporting requirements.
Do	Energy Action Educational Foundation, Washington, D.C. If granted: The Energy Action Educational Foundation would receive access to deleted portions of the transcript of an Aug. 31, 1976, meeting of subcommittee A of the Industry Advisory Board of the International Energy Agency.	DFA-0157	Appeal of an information request denial.
Do	Hines Standard Service, Morgantown, Ky. If granted: Hines Standard Service would not be required to file form EIA-8 (retail motor fuels service station survey).	DEE-0936	Exception to reporting requirements.
Do	Hunt Petroleum Co., Dallas, Tex. If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Kinder plant.	DXE-0940	Extension of the relief granted in *Hunt Petroleum Corporation*, case No. FEE-4473 (decided Jan. 10, 1978) (unreported decision).
Do	Osage Tribe of Indians, Pawhuska, Okla. If granted: The Osage Tribe of Indians would receive an exception from the provisions of 10 CFR 212.52 which govern the maximum price that may be charged in first sales of crude oil.	DEE-0939	Price exception (sec. 212.52).
Do	Pennzoil Producing Co., Houston, Tex. If granted: Pennzoil Producing Co. would be permitted to sell the crude oil produced from the Perry Sand Waterflood unit located in Yazoo County, Miss., at upper tier ceiling prices.	DXE-0938	Extension of the relief proposed in the DOE's Jan. 19, 1978, proposed decision and order.
Do	Red Triangle Oil Co., Fresno, Calif. If granted: A Mar. 1, 1978, order issued by region IX, with respect to the withdrawal by Gulf from a market area, would be rescinded.	DEA-0158	Appeal of region IX's Mar. 1, 1978, order issued to Gulf.
Do	Sun Co., Inc., Dallas, Tex. If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Peoria, Sun, and Victoria plants.	DXE-0941 through DXE-0943	Extension of the relief proposed in the DOE's Sept. 30, 1977, proposed decison and order.
Do	W. E. Allford, Inc., McAlester, Okla. If granted: W. E. Allford, Inc., would be assigned a new, lower priced supplier of propane to replace its base period supplier, Mobil Oil Corp.	DEE-0937	Exception to change suppliers.
Mar. 21, 1978	Crest Resources & Exploration Corp., Houston, Tex. If granted: Crest Resources & Exploration Corp. would be permitted to sell the crude oil produced from the Cecile Williams lease located in Brazoria County, Tex., at upper tier ceiling prices.	DEE-0944	Price exception (sec. 212.73).
Do	Gas Engine & Compressor Service Inc., Longview, Tex. If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products.	DXE-0945	Extension of the relief granted in *Gas Engine & Compressor Service*, case No. DEE-0087 (decided Dec. 7, 1977) (unreported decision).

APPENDIX.—*List of cases received by the Office of Administrative Review*—Continued

[Week of Mar. 17 through Mar. 24, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Knowles Oil Co., Seymour, Ind. If granted: Knowles Oil Co. would receive a stay of the denial by DOE region V of the firm's application to quash subpena pending a final determination on a request for special redress filed by the Knowles Oil Co.	DES-0048	Stay request.
Do	Laketon Asphalt Refining, Inc., Laketon, Ind. If granted: DOE would review the entitlements exception relief granted to Laketon Asphalt Refining, Inc., during its 1977 fiscal year in order to determine whether the level of relief approved was appropriate.	DEX-0053	Supplemental order.
Do	Leonard E. Belcher, Inc., Alexandria, Va. If granted: The DOE's Feb. 15, 1978, information request denial would be rescinded and Leonard E. Belcher, Inc., would receive access to additional DOE data concerning the procedures of the Office of Administrative Review and of its predecessor, the Office of Exceptions and Appeals.	DFA-0159	Appeal of DOE's information request denial.
Do	Marathon Oil Co., Washington, D.C. If granted: The DOE's Feb. 9, 1978, information request denial would be rescinded and Marathon Oil Co. would receive access to additional DOE data regarding the issuance of notices of proposed disallowance.	DFA-0160	Do.
Do	Meason Operating Co., Natchez, Miss. If granted: Meason Operating Co. would be permitted to sell the crude oil produced from the Arnold Perry unit, well No. 1, located in Wilkinson County, Miss., at upper tier ceiling prices.	DXE-0946	Extension of the relief granted in *Meason Operating Company*, 1 DOE par. 81,038 (Dec. 14, 1977).
Do	Murphy Oil Corp., Washington, D.C. If granted: The DOE's Feb. 9, 1978, information request denial would be rescinded and Murphy Oil Corp. would receive access to additional DOE data regarding the issuance of notices of proposed disallowance.	DFA-0160	Appeal of DOE's information request denial.
Do	Texaco, Inc., White Plains, N.Y. If granted: The DOE's Feb. 21, 1978, information request denial would be rescinded and Texaco, Inc., would receive access to additional DOE data regarding the clarification and/or revision of the property definition as contained within 10 CFR 212.72.	DFA-0162	Do.
Do	Texaco, Inc., Los Angeles, Calif. If granted: Texaco, Inc., would be permitted to sell the crude oil produced from platform A located in the Cook Inlet, Alaska, at exempt price levels.	DEE-0947	Price exception (sec. 212.73).
Do	Texaco, Inc., Houston, Tex. If granted: Texaco, Inc., would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Dover Hennessey gas plant.	DEE-0948	Price exception (sec. 212.165).
Mar. 23, 1978	Adams Oil Co., Inc., Charlotesville, Va. If granted: A Mar. 7, 1978, modified remedial order issued to Adams Oil Co., Inc., would be rescinded and the firm would not be required to refund overcharges made in its sales of motor gasoline and diesel fuel.	DRA-0163	Appeal of the modified remedial order.
Do	Commonwealth Oil Refining Co., Inc., San Antonio, Tex. If granted: Commonwealth Oil Refining Co., Inc., would receive a stay of the operation of the provisions of 10 CFR 211.67 pending a final determination on its application for exception.	DES-0611	Stay request.
Do	Doric Petroleum, Inc., Washington, D.C. If granted: The applicant would be permitted to increase its prices to reflect nonproduct cost increases incurred in producing natural gas liquids and natural gas liquid products at its Hennessey and Newcastle plants.	DXE-0953 and DXE-0954	Extension of the relief granted in *Doric Petroleum, Inc.* case Nos. DXE-0047 and DXE-0048 (decided Dec. 6, 1977) (unreported decision).
Do	FS Service, Inc., and Affiliated Cos., Alexandria, Va. If granted: FS Services, Inc., and Affiliated Cos., would receive an exception from the pricing regulations as they apply to sales of Gasahol.	DEE-0950	Price exception (sec. 212.129).
Do	Illinois Petroleum Marketers Association, Alexandria, Va. If granted: Illinois Petroleum Marketers Association would receive an exception from the pricing regulations as they apply to sales of Gasohol.	DEE-0949	Do.
Do	IU International Oil & Gas Co., Inc., Washington, D.C. If granted: IU International Oil & Gas Co., Inc., would receive a stay pending judicial review of the refund requirements of an Aug. 31, 1977, remedial order issued to the firm.	DRS-0049	Stay request.

ISSUANCE OF PROPOSED DECISIONS AND ORDERS BY THE OFFICE OF ADMINISTRATIVE REVIEW

March 20 through March 24, 1978

Notice is hereby given that during the period March 20 through March 24, 1978, the Proposed Decisions and Orders which are summarized below were issued by the Office of Administrative Review of the Economic Regulatory Administration of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of the Proposed Decision and Order in final form may file a written Notice of Objection within ten days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any futher proceeding involving the exception matter.

Copies of the full text of these proposed Decision and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except federal holidays.

Dated: April 24, 1978.

RICHARD T. TEDROW,
Acting Director,
Office of Hearings and Appeals.

APPENDIX

Proposed Decisions and Orders

Adams Oil Co., Inc., Dillwyn, Va., Fee-4816, Petroleum Products

Adams Oil Co., Inc, filed an Application for Exception from the provisions of 10 CFR 212.93. The exception request, if granted, would permit Adams to retain the revenues which it received as a result of charging unlawful price levels for petroleum products. On March 20, 1978 the DOE issued a Proposed Decision and Order which determined that the exception request be granted in part.

Charter Oil Co., Jacksonville, Fla., DXE-0491, Crude oil

Charter Oil Co., filed an Application for Exception from the provisions of 10 CFR 211.67 (the old Oil Entitlements Program). The exception request, if granted, would relieve charter of its obligations to purchase entitlements for a six month period. On March 20, 1978 the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

Cologne Production Co., San Antonio, Tx., DXE—0857, Crude oil

Cologne Production Co., filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The request, if granted, would result in the extension of exception relief previously granted and would permit the firm to continue to sell certain quantities of the crude oil at upper tier prices which it produces from two Units on the Algoa Field Located in Galveston County, Tex. On March 24, 1978, the DOE issued a Proposed Decision and Order which determined that Cologne be permitted to sell 100 percent of the crude oil produced from Algoa Unit 4-2 and 54.07 percent of the crude oil produced from Algoa Unit 8 at upper tier ceiling prices.

Crystal Oil Co., Shreveport La., FPI—0128, Crude and Unfinished oils

Crystal Oil Co., filed an Application for Exception from the provisions of 10 CFR 213.12. The exception request, if granted, would result in an increase in the amount of crude oil and unfinished oils which the firm may import on a license fee-exempt basis. On March 20, 1978, the DOE issued a Proposed Decision and Order which determined that exception relief should be granted.

Getty Oil., Oklahoma City, Okla., DEE-0479, Crude oil

Getty Oil Co., filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Getty to sell the crude oil produced from the Ed Dillon No. 2 Well located in Oklahoma County, Okla., at upper tier ceiling prices. On March 20, 1978, the DOE issued a Proposed Decision and Order which determined that the request be granted in part.

Golden Eagle Refining Co., Inc., Washington, D.C., DEE-0513, Crude oil

Golden Eagle Refining Co., Inc. filed an Application for Exception from the provisions of 10 CFR 211.67(a)(4). The exception request, if granted, would increase the number of entitlements which the firm is permitted to sell in every month. On March 22, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be denied.

Little America Refining Co., Washington, D.C., DXE-0495, Crude oil

Little America Refining Co. filed an Application for Exception from the provisions of 10 CFR 211.67 (the old Oil Entitlements Program). The exception request, if granted, would relieve LARCO of its obligations to purchase entitlements for a six month period. On March 20, 1978 the DOE issued a Proposed Decision and Order which determined that the exception request be granted in part.

Martin Exploration Co., Metairie, La., FEE-4789, Crude oil

On September 6, 1977, Martin Exploration Co., (Martin) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Martin to sell at market price levels all of the condensate which the firm produces in connection with a gas cycling process at the Wilcox B Sand Unit located in the Fields Field, Beaureguard Parish, La. On March 22, 1978 the DOE issued a Proposed Decision and Order which determined that the request be granted in part.

Natrogas, Inc., Minneapolis, Minn., DMR-0013, Propane

Natrogas, Inc. filed an Application for Exception from the provisions of 10 CFR 211.9. The exception request, if granted, would result in an extension of the exception relief previously granted to Natrogas and the assignment of a new, lower-priced supplier(s) of propane to supply a portion of the firm's base period use. On March 24, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

Allen K. Trobaugh, Midland, Tex., DXE-0908, Crude oil

Allen K. Trobaugh filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted and would permit Trobaugh to continue to sell certain of the crude oil produced from the No. 1 well on the Bailey Lease at upper tier ceiling prices. On March 24, 1978, the DOE issued a Proposed Decision and Order which determined that exception request be granted.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Administrative Review of the Department of Energy has issued decisions and orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exception relief permits the firms involved to increase the prices of the production of the gas plants listed below to reflect certain nonproduct costs increases:

ENVIRONMENTAL PROTECTION AGENCY

[FRL 889-7]

NEW HAMPSHIRE DRINKING WATER

Approval of State Application for Primary Enforcement Responsibility

APRIL 25, 1978.

In accordance with the provisions of Section 1413 of the Safe Drinking Water Act (SDWA), (88 Stat. 1661; 42 U.S.C. 300f et seq.) and 40 CFR 142 (41 FR 2918, January 20, 1976), Mr. William A. Healy, Executive Director of the New Hampshire Water Supply and Pollution Control Commission, has submitted an application to assume primary enforcement responsibility under the Safe Drinking Water Act to the Environmental Protection Agency (EPA) for approval.

Notice is hereby given that the Regional Administrator, EPA, Region I, has approved this application for primary enforcement authority, to become effective on May 31, 1978. This action is based on a thorough evaluation of the State's water supply supervision program in relation to the requirements of 40 CFR 142.10, including the adoption and implementation of:

(1) State primary drinking water regulations; (2) an inventory of public water systems; (3) a systematic program of sanitary surveys; (4) a State program for certification of laboratories; (5) State laboratory facilities certified by EPA; (6) a plan review program; (7) adequate statutory or regulatory enforcement authority; (8) record-keeping and reporting procedures; (9) a program for issuing variances and exemptions; (10) a plan for providing safe drinking water under emergency circumstances.

This evaluation has shown that the program which will be carried out by the Water Supply and Pollution Control Commission's Division of Water Supply fulfills all requirements for obtaining primary enforcement authority.

Any interested person may request a public hearing to consider the Regional Administrator's determination on or before May 31, 1978. If a public hearing is requested and granted, this determination shall not become effective until such time, following the hearing, as the Regional Administrator issues an order affirming or rescinding the determination. Requests for hearing shall be addressed to:

William R. Adams, Regional Administrator, U.S. Environmental Protection Agency, Room 2203, John F. Kennedy Federal Building, Boston, Mass. 02203.

and shall include the following information:

(1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing.

(2) A brief statement of the requesting person's interest in the Regional Administrator's determination and of information that the requesting person intends to submit at such hearing.

(3) The signature of the individual making the request, or, if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

A complete copy of the Water Supply and Pollution Control Commission's application for primary enforcement responsibility is available for public inspection during normal business hours at the Office of the Regional Administrator and at the following location in New Hampshire.

State of New Hampshire, Water Supply and Pollution Control Commission, Division of Water Supply, Prescott Park, 105 Loudon Road, Concord, N.H. 03301.

Dated: April 25, 1978.

WILLIAM R. ADAMS, JR.,
Regional Administrator,
Region I.

[FRL 889-8]

RHODE ISLAND DRINKING WATER

Approval of State Application for Primary Enforcement Responsibility

APRIL 25, 1978.

In accordance with the provisions of Section 1413 of the Safe Drinking Water Act (SDWA), (88 Stat. 1661; 42 U.S.C. 300f et seq.) and 40 CFR 142 (41 FR 2918, January 20, 1976), Dr. Joseph E. Cannon, Director of the Rhode Island Department of Health has submitted an application to assume primary enforcement responsibility under the SDWA to the Environmental Protection Agency (EPA) for approval.

Notice is hereby given that the Regional Administrator, EPA, Region I, has approved this application for primary enforcement authority, to become on May 31, 1978. This action is based on a thorough evaluation of the State's water supply supervision program in relation to the requirements of 40 CFR 142.10, including the adoption and implementation of:

(1) State primary drinking water regulations; (2) an inventory of public water systems; (3) a systematic program of sanitary surveys; (4) a State program for certification of laboratories; (5) State laboratory facilities certified by EPA; (6) a plan review program; (7) adequate statutory or regulatory enforcement authority; (8) record-keeping and reporting procedures; (9) a program for issuing variances and exemptions; (10) a plan for providing safe drinking water under emergency circumstances.

This evaluation has shown that the program which will be carried out by the Health Department's Division of Water Supply fulfills all requirements for obtaining primary enforcement authority.

Any interested person may request a public hearing to consider the Regional Administrator's determination within 30 days of the publication of this notice. If a public hearing is requested and granted, this determination shall not become effective until such time, following the hearing, as the Regional Administrator issues an order affirming or rescinding the determination. Requests for hearing shall be addressed to:

William R. Adams, Regional Administrator, U.S. Environmental Protection Agency, Room 2203, John F. Kennedy Federal Building, Boston, Mass. 02203.

and shall include the following information:

(1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing.

(2) A brief statement of the requesting person's interest in the Regional

Dated: April 21, 1978.

A. VERNON WEAVER,
Administrator.

FEDERAL MARITIME COMMISSION

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street NW., Room 10218, or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., Chicago, Ill., and San Juan, P.R. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by May 22, 1978. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: T-3283-2.

Filing party: Dwight Green, Traffic Consultant, Port of Palm Beach, P.O. Box 9935, Riviera Beach, Fla. 33404.

Summary: Agreement No. T-3283-2, between the Port of Palm Beach District (Port) and Palm Beach Steamship Agency (PBSA), modifies the parties' basic agreement providing for PBSA's lease of certain premises at the Port of Palm Beach Terminal, Palm Beach, Fla., for use as office space, together with the nonexclusive right to use the Port's lands and dock facilities for the loading and unloading of vessels for which PSBA acts as agent. The purpose of Agreement No. T-2283-2 is to provide for the renewal of the basic agreement's lease term for an additional one-year period and to increase the monthly rental from $349.73 to $372.04.

Agreement No.: T-3627.

Filing party: Ronaldo Rodriguez Ossorio, Esq., General Counsel, Puerto Rico Ports Authority, G.P.O. Box 2829, San Juan, P.R. 00936.

Summary: Agreement No. T-3627, is between the Puerto Rico Ports Authority (Port) and Sea-Land Service, Inc. (Sea-Land), and provides for Sea-Land's month lease to 3.5455 cuerdas of land located at Piers J and K, Puerto Nuevo, San Juan, P.R., for the parking of container vans. As compensation, the Port is to receive a monthly rental of $5,500.

Agreement No.: T-3635.

Filing party: Betty I. Crefoot, House Counsel, Port of Portland, Box 3529, Portland, Oreg. 97208.

Summary: Agreement No. T-3635, between Port of Portland (Port) and Fred F. Noonan Co., Inc. (Noonan), consists of a terminal services contract between the parties. Under this agreement, Noonan will perform services relating to the receipt, inventory, and delivery of import vehicles at Terminal 6, Portland, Oreg. As compensation for its services, Noonan will be paid $2.62 per vehicle by Port. The agreement's term will be for a period of 10 years.

Agreement No.: T-3637.

Filing party: John H. Schulte, Esq., Smathers & Thompson, Alfred I. DuPont Building, Miami, Fla. 33131.

Summary: Agreement No. T-3637, between Lavino Shipping Co. (Lavino) and S.E.L. Maduro (Florida), Inc., (Maduro), is a covenant not to compete for a period of five years. Subsequent to Maduro's purchase of Lavino's assets and properties within the Southern Division, Lavino, in consideration of $25,000, agrees as follows: (1) not to compete with Maduro within the State of Florida or any other territories in which the Southern Division operates, except for Lavino's subsidiary, Shipside Packing Co. or car preparation activities in Jacksonville, Fla., as presently being conducted or contemplated by Hobelman, Inc.; (2) not to solicit or otherwise do business with any of its present or future accounts of the Southern Division; and (3) not to solicit or pirate any present or future employees of the Southern Division.

Agreement No.: T-3638.

Filing party: Ronaldo Rodriquez Ossorio, Esq., General Counsel, Puerto Rico Ports Authority, Apartado 2829, San Juan, P.R. 00936.

Summary: Agreement No. T-3638, between the Puerto Rico Ports Authority (Port) and the Puerto Rico Maritime Shipping Authority (PRMSA), is a preferential use agreement whereby the Port grants PRMSA the right of preference for the use of certain marine facilities at Puerto Nuevo, San Juan, P.R., for the docking and mooring of vessels which are engaged in the loading and unloading of cargo or supplies transported or to be transported by such vessels. As compensation, PRMSA shall pay the Port an annual fee of $8,188.94 subject to a minimum annual dockage and wharfage guarantee of $140,000, plus all applicable Port tariff charges. The amount of dockage and wharfage collected annually on cargo moving through the pier from or to vessels not operated by or for PRMSA shall be credited to PRMSA's minimum guarantee only when and to the extent that the dockage and wharfage charges paid by PRMSA are less than the minimum annual guarantee.

Agreement No.: T-3638-A.

Filing party: Ronaldo Rodriquez Ossorio, Esq., General Counsel, Puerto Rico Ports Authority, Apartado 2829, San Juan, P.R. 00936.

Summary: Agreement No. T-3638-A, between the Puerto Rico Ports Authority (Port) and the Puerto Rico Maritime Shipping Authority (PRMSA), provides for the Port's 25-year lease to PRMSA of certain premises at Puerto Nuevo, San Juan, P.R., to be used for the purpose of conducting shoreside operations pertaining to PRMSA's oceanborne common carrier service. PRMSA shall have the exclusive use of approximately 617,461.2638 square feet, plus an office consisting of approximately 1,152 square feet. As compensation, PRMSA shall pay the Port an annual ground rental of $151,736 for the exclusive use areas and $2,592 per year for the office space rental.

Agreement No.: 9973-4.

Filing party: John R. Mahoney, Esq., Burlingham, Underwood & Lord, One Battery Park Plaza, New York, N.Y. 10004.

Summary: Agreement No. 9973-4 modifies the basic agreement to provide that Johnson ScanStar May serve ports within its scope either by direct all-water service or by transshipment and, in the event of a strike, canal closure or other situation preventing all-water service through the Panama Canal, by overland movements from and to Pacific Coast ports via U.S. Atlantic, Gulf, and Great Lakes ports.

Agreement No.: 9981-6.

Filing party: Charles F. Warren, Attorney, Warren & Associates, P. C., 1100 Connecticut Avenue NW., Washington, D.C. 20036.

Summary: Agreement No. 9981-6 would extend the term of the Far East Discussion Agreement for one year from the date of approval by the Federal Maritime Commission. Agreement No. 9981, as amended, is presently set to expire with June 20, 1978.

Agreement No.: 10331.

Filing party: Mr. Enrique Landa, General Delegate, Empresa Lineas Maritimas Argentinas S.A., Five World Trade Center, Suite 6167, New York, N.Y. 10048.

Summary: Agreement No. 10331, between Empresa Lineas Maritimas Argentinas S.A. and A. Bottacchi Sociedad Anonima De Navegacion Comercial Industrial E Inmobiliaria, is an association agreement which sets forth the percentage share and the sailing requirements for each carrier under the Argentine flag share and obligations in Agreement No. 10039, a cargo revenue pooling agreement in the U.S. Gulf/Argentine trades. The agreement further spells out each carrier's rights and obligations with respect to their joint participation in Agreement No. 10039.

Dated: April 26, 1978.

By Order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

SCHOOL CONSTRUCTION IN AREAS AFFECTED BY FEDERAL ACTIVITIES

Cutoff Date for Receipt of Applications for Fiscal Year 1978

Under the authority contained in section 3 of Pub. L. 81-815 (school construction in areas affected by Federal activities; 72 Stat. 548, 20 U.S.C. 633) notice is hereby given that the U.S. Commissioner of Education has established a cutoff date for the receipt of applications for increase periods ending June 1978 or June 1979, for assistance under sections 5, 6, 9, and 14 of Pub. L. 81-815. Approval of these applications will be subject to the availability of funds. Applications must be received by the U.S. Commissioner of Education from the State educational agencies on or before the cutoff date.

Cutoff date: June 30, 1978.

A. *Application forms and information.* Information and application forms may be obtained from the appropriate State educational agency which serves the applicant local educational agency.

B. *Applications sent by mail.* An application sent by mail should be addressed to the Commissioner of Education, U.S. Office of Education, 400 Maryland Avenue SW., Room 2107A, Washington, D.C. 20202. An application sent by mail will be considered to be received on time if:

(1) The application was sent by registered or certified mail not later than June 26, 1978, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service; or

(2) The application is received on or before the cutoff date by either the Department of Health, Education, and Welfare or the U.S. Office of Education mail rooms. In establishing the date of receipt, the Commissioner will rely on the time-date stamp of such mail rooms or other documentary evidence of receipt maintained by the Department of Health, Education, and Welfare, or the U.S. Office of Education.

C. *Hand-delivered applications.* An application to be hand-delivered must be taken to the Office of Education, 400 Maryland Avenue SW., Room 2107A. Washington, D.C. Hand-delivered applications will be accepted daily between the hours of 8 a.m. and 4 p.m. Applications will not be accepted after 4 p.m. on the cutoff date.

D. *Applicable regulations.* The regulations applicable to this program include: (1) The Office of Education General Provisions Regulations (45 CFR Parts 100 and 100a) published in the FEDERAL REGISTER on November 6, 1973, at 38 FR 30661 and as amended at 41 FR 1395, January 7, 1976, and (2) Part 114 of 45 CFR published in the FEDERAL REGISTER on April 6, 1975, at 40 FR 16019.

(20 U.S.C. 633.)

(Catalog of Federal Domestic Assistance No. 13.477, School Assistance in Federally Affected Areas—Construction.)

Dated: April 26, 1978.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Office of Human Development Services

REORGANIZATION ORDER

Notice of Amendments

The Reorganization Order of July 26, 1977, redesignated the Office of Human Development as the Office of Human Development Services and made certain organizational changes in that Office. The purpose of this

V 43 — 84

Amendment to the Reorganization Order of July 26, 1977, is to order further organizational changes in the Office of Human Development Services and to set forth the organizational structure of each of the principal program elements, headquarters staff units, and regional offices of the Office of Human Development Services.

The Reorganization Order dated July 26, 1977, is hereby amended as follows:

1. Paragraph C of Section *I. Organization* is deleted and the following is substituted therefor:

The Office of Human Development Services will consist of the following principal program elements and headquarters staff units, the heads of which report directly to the Assistant Secretary for Human Development Services:

IMMEDIATE OFFICE STAFF

Office of Public Affairs.
Office of Legislative Affairs.
Office of Regional and Intergovernmental Relations.

PRINCIPAL PROGRAM ELEMENTS

Administration on Aging.
Administration for Children, Youth, and Families.
Administration for Public Services.
Administration for Native Americans.
Rehabilitation Services Administration.

HEADQUARTERS STAFF UNITS

Office of Planning, Research, and Development.
Office of Administration and Management.
Office of Policy and Management Control.

2. Paragraph D of Section *I. Reorganization* is amended as follows:

The Office of Human Development Services will have ten Regional Offices headed by Regional Administrators for Human Development Services, who report directly to the Assistant Secretary for Human Development Services. The Regional Program Directors on Aging will report directly to the Commissioner, Administration on Aging. The Regional Program Directors for Children, Youth, and Families will report directly to the Commissioner, Administration for Children, Youth, and Families. The Regional Directors for Rehabilitation Services will report directly to the Commissioner, Rehabilitation Services Administration. The Regional Program Directors for Public Services and the Native American staff (in regions with full-time positions) will report directly to the Regional Administrators.

3. *Section I. Organization* is amended by adding the following paragraph E thereto:

E. The principal program elements, headquarters staff units, and regional offices of the Office of Human Development Services shall consist of the following organizational units:

(a) Administration on Aging: (1) Federal Council on Aging Staff; (2) Office of Policy, Planning, and Management Control; (3) Office of Field Operations; (4) Public Information Office; (5) Office of Education and Training; (6) Office of Development, Evaluation, and Research; (7) Nation Clearinghouse on Aging; (8) Office of State and Community Programs; and (9) Office of Special Programs.

(b) Administration for Children, Youth, and Families: (1) Office of Public Information/Education; (2) Office of Regional/State and Community Affairs; (3) Office of Planning, Research, and Evaluation; (4) Office of Services for Children and Youth, (a) Children's Bureau, (b) Youth Development Bureau; (5) Office of Developmental Services, (a) Head Start Bureau, and (b) Day Care Division.

(c) Administration for Native Americans: (1) Intra-Departmental Council on Indian Affairs; (2) Office of Program Operations; and (3) Office of Planning and Program Development.

(d) Administration for Public Services: (1) Regional Liaison Staff; (2) Office of Administration and Management; (3) Executive Secretariat; (4) Office of Public Information; (5) Office of Policy Coordination; (6) Office of Program Operations; and (7) Office of Program Development.

(e) Rehabilitation Services Administration: (1) President's Committee on Mental Retardation Staff; (2) National Disability Advisory Council; (3) Public Affairs Staff; (4) Agency Monitoring Staff; (5) Regional Liaison Staff; (6) Executive Office; (7) Office for Handicapped Individuals; (8) Architectural and Transportation Barriers Compliance Board; (9) Office of Advocacy and Coordination; (10) Office of Policy, Planning, and Legislation; (11) Office of Administration and Management; (12) Bureau of Program Operations, (a) Office of Blind and Visually Handicapped, (b) Office of Vocational Rehabilitation, Operations, (c) Office of Developmental Disabilities; (13) Bureau of Program Development—The Office for Handicapped Individuals will continue to report directly to the Assistant Secretary, but for organizational purposes will be placed in the RSA. The ATBC Board will also be placed in the RSA for organizational purposes, although this Board is an interagency body headed by the Assistant Secretary.

(f) Office of Policy and Management Control: (1) Division of Management Analysis and Review; (2) Executive Secretariat; (3) Division of Policy Coordination; and (4) Division of Equal Opportunity and Civil Rights.

(g) Office of Planning, Research, and Evaluation: (1) Administration and Management Staff; (2) Office of Planning and Evaluation; and (3) Office of Program Systems Development.

(h) Office of Administration and Management: (1) Division of Budget and Financial Management; (2) Division of Grants and Contracts Administration; (3) Division of Administrative Services; and (4) Division of Personnel Administration.

(i) Regional Office (Typical organization in each of ten regions): (1) Office of the Regional Administrator; (2) Regional Office for Public Services; (3) Regional Office on Aging; (4) Regional Office for Children, Youth, and Families; and (5) Regional Office for Rehabilitation Services.

The functional statements for the organizational units described in this paragraph will be published in approximately 60 days.

4. All organizational transfers ordered by the Reorganization Order of July 26, 1977, inconsistent with the terms of this Amendment to the Reorganization Order are hereby repealed.

5. Section III, Continuation of Regulations, Section IV, Continuation of Delegations of Authority and Section V, Funds, Personnel, and Equipment of the Reorganization Order of July 26, 1977, shall continue in full force and effect except that all references therein to the Reorganization Order shall be deemed to include this Amendment to the Reorganization Order, and all references therein to the Office of Human Development, Assistant Secretary of Human Development, and the Office of the Assistant Regional Directors for Human Development shall be deemed to include the Office of Human Development Services, the Assistant Secretary for Human Development Services, and the Office of the Regional Administrators for Human Development Services, respectively.

Effective date: This Amendment to the Reorganization Order shall be effective April 18, 1978.

Dated: April 18, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-313]

ARKANSAS POWER & LIGHT CO.

Granting of Relief From ASME Section XI Inservice Inspection (Testing) Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Arkansas Power & Light Co. The relief relates to the inservice inspection (testing) program for the Arkansas Nuclear One, Unit No. 1 (the facility) located in Pope County, Ark. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of its date of issuance.

The relief is granted on an interim basis, pending completion of our detailed review from those inservice inspection and testing requirements of the ASME Code that the licensee has determined to be impractical within the limitations of design, geometry and materials of construction of components, because compliance would result in hardships or unusual difficulties without a compensating increase in the level of quality or safety.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief. Prior public notice of this action was not required since the granting of this relief from ASME Code requirements does not involve a significant hazards consideration.

The Commission has determined that the granting of this relief will not result in any significant invironmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the request for relief dated October 19, 1977, and (2) the Commission's letter to the licensee dated April 20, 1978.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Arkansas Polytechnic College, Russellville, Ark. 72801. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 20th day of April, 1978.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4 Division of Operating Reactors.

[7590-01]

[Docket No. 50-471A]

BOSTON EDISON CO. ET AL.

Receipt of Attorney General's Advice and Time for Filing of Petitions To Intervene on Antitrust Matters

In the matter of Boston Edison Co. and Massachusetts Municipal Wholesale Electric Co., Taunton Municipal Lighting Plant, Vermont Electric Cooperative, Inc.

The Commission has received, pursuant to section 105c of the Atomic Energy Act of 1954, as amended, the following additional advice from the Attorney General of the United States, dated April 20, 1978:

You have requested our advice pursuant to the provisions of Section 105 of the Atomic Energy Act, as amended, in regard to the above-cited application. [Pilgrim Nuclear Generating Station, Unit No. 2]

On June 26, 1974, we advised the Commission that review of the information submitted by the lead applicant, Boston Edison Co., as well as other information relating to electric utility competition in New England, did not indicate any need for an antitrust hearing on this nuclear facility. You have now provided us with antitrust information submitted by three other applicants, Massachusetts Municipal Wholesale Electric Co. (MMWEC), Taunton Municipal Lighting Plant, and Vermont Electric Cooperative, Inc.

The MMWEC, which will own a 13.240 percent share in the unit, it is a public corporation of the Commonwealth of Massachusetts. It is engaged in the acquisition, development and sale of bulk power to its 30 member municipal electric systems[1] and others. MMWEC has contracted for the sale of all of its ownership share of the output of this unit to 25 of its members through power sales agreements covering the life of the facility. These 25 members provide retail or wholesale electric service to 32 communities in Massachusetts. The non-coincident peak of all members of MMWEC was 671.3 MW in 1977. In that year the smallest member had a peak of 3.2 MW, the largest a peak of 74.6 MW.

Taunton, which supplies electric power in the Taunton, Mass. area, will own a 0.60 percent share of the unit. In 1976 Taunton experienced a peak load of 62 MW. Vermont Electric Cooperative serves rural areas primarily in northern Vermont, and had a peak load of 2.38 MW in 1975. Vermont's share of the unit will be 0.20 percent.

With the present changes in ownership the current ownership of the 1180 MW Pilgrim Unit No. 2 is as follows:

	Percent ownership
Boston Edison Co.	59.026
Burlington Electric Dept.	0.330

[1]The 30 Massachusetts Municipal electric systems which are members of the MMWEC are: Ashburnham, Baldwinville, Belmont, Boylston, East Braintree, Chicopee, Danvers, Georgetown, Groton, Hingham, Holden, Holyoke, Hudson, Hull, Ipswich, Littletown, Mansfield, Marblehead, Middleborough, Middletown, North Attleborough, Paxton, Peabody, Reading, Shrewsbury, South Hadley, Sterling, Wakefield, West Boylston and Westfield.

Our review three new applicants, as well as other relevant information, has disclosed no basis upon which to change our earlier conclusion that an antitrust hearing will not be necessary in this matter.

Any person whose interest may be affected by this proceeding may, pursuant to §2.714 of the Commission's "Rules of Practice", 10 CFR Part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by May 31, 1978, either (1) by delivery to the NRC Docketing and Service Section at 1717 H Street NW., Washington, D.C. or (2) by mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

For the Nuclear Regulatory Commission.

JEROME SALTZMAN,
Chief, Antitrust and Indemnity Group, Office of Nuclear Reactor Regulations.

[Docket No. 50-219]

JERSEY CENTRAL POWER & LIGHT CO.

Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatoy Commission (the Commission) has issued Amendment No. 31 to Provisional Operating License No. DPR-16, issued to Jersey Central Power & Light Co. (the licensee), which revised Technical Specifications for operation of the Oyster Creek Nuclear Generating Station (the facility) located in Ocean County, N.J. The amendment is effective as of its date of issuance.

The amendment deleted the Respiratory Protection Program which was superseded by the amended § 20.103 of 10 CFR Part 20 of the Commission's regulations.

This amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the Commission's letter to Jersey Central Power & Light Co. dated July 29, 1977, (2) Amendment No. 31 to License No. DPR-16, and (3) the Commission's related evaluation that is included in the concurrently issued letter to the licensee. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Ocean County Library, Brick Township Branch, 401 Chambers Bridge Road, Brick Town, N.J. 08723. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 19th day of April, 1978.

For the Nuclear Regulatory Commission,

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[7590-01]

[Docket No. 50-336]

NORTHEAST NUCLEAR ENERGY CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 38 to Facility Operating License No. DPR-65 to Northeast Nuclear Energy Co., The Connecticut Light and Power Co., The Hartford Electric Light Co., and Western Massachusetts Electric Co., which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 2 located in the Town of Waterford, Conn. The amendment is effective as of its date of issuance.

The amendment authorizes operation with sleeved guide tubes for the Control Element Assemblies (CEAs), burnable poison pin perforations, modified containment electrical penetrations, and revises the Appendix A Technical Specifications by: (1) incorporating changes resulting from the analyses of Cycle 2 reload fuel; (2) authorizing the removal of all part length CEAs; (3) changes relating to a new water hole peaking factor; and (4) deleting the requirement for two reactor protection system trips.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with operation with sleeved guide tubes for the CEAs was published in the FEDERAL REGISTER on February 10, 1978 (43 FR 5908). No request for a hearing or petition for leave to intervene was filed following this notice of proposed action. Prior public notice of the other actions mentioned above was not required since these actions do not involve a significant hazards consideration. Steam generator tube support plate cracking problems were also the subject of the above Notice. This action is being handled separately.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendment dated September 2, 1977, February 22 and 23, 1978, and March 20, 1978, as supplemented August 25, September 2 and 28, October 12, November 14, 17, and 23, December 15, 1977, January 12, 24, and 25, February 1, 10, 21, and 28, March 8, 15, and 16, April 6 and 13, 1978, (2) Amendment No. 38 to License No. DPR-65 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Conn. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 19th day of April 1978.

For the Nuclear Regulatory Commission.

[Docket No. 27-39]

NUCLEAR ENGINEERING CO., INC.

Withdrawal of Application

The Nuclear Regulatory Commission has previously issued a Notice of Opportunity for Hearing (43 FR 14781, April 7, 1978) on an application submitted by Nuclear Engineering Co., Inc. (NECO), 9200 Shelbyville Road, Suite 526, P.O. Box 7246, Louisville, Ky. 40207, for use of an additional compact and fill burial trench at the Sheffield, Ill. burial ground known as "Trench 15". By letter dated April 19, 1978, NECO informed the Commission that it was withdrawing the application for use of Trench 15. Therefore the previous Notice of Opportunity for Hearing on Trench 15 is no longer appropriate and should be disregarded.

Dated at Silver Spring, Md. this 27th day of April 1978.

For the Nuclear Regulatory Commission.

MICHAEL J. BELL,
Chief, Low-Level Waste Branch Division of Fuel Cycle and Material Safety.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on April 25, 1978 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; an indication of who will be the respondents to the proposed collection; the estimated number of responses; the estimated burden in reporting hours; and the name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

NEW FORMS

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Health Care Financing Administration (Medicare), Request to Establish Eligibility in the Health Insurance for the Aged and Disabled Program to Provide Rural health clinic Services, HCFA-29, single time, 700 rural health clinic sites, Clearance Office, 395-3772.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. 78-15T]

IN THE MATTER OF TOLL BRIDGES OWNED BY THE DELAWARE RIVER PORT AUTHORITY

Appointment of Investigation Team

AGENCY: Federal Highway Administration, DOT.

ACTION: Notice.

SUMMARY: Notice of appointment of investigation team.

EFFECTIVE DATE: March 6, 1978.

FOR FURTHER INFORMATION CONTACT:

Gerald M. Tierney, Office of the Chief Counsel, 202-426-0346, Federal Highway Administration. Office hours are 7:45 a.m. to 4:15 p.m. e.t., Monday-Friday.

Discussion: On March 6, 1978, the Federal Highway Administrator, in response to complaints received concerning tolls charged on bridges owned by the Delaware River Port Authority, issued an order starting an investigation and appointing an investigation team. A copy of the order follows.

Issued on this 20th day of April 1978, in Washington, D.C.

(49 U.S.C. 526; 49 CFR Part 310.)

WILLIAM M. COX,
Federal Highway Administrator.

[Docket No. 78-15T]

ORDER APPOINTING AN INVESTIGATION TEAM

In the matter of bridges owned by the Delaware River Port Authority.

Complaints having been received about a recent toll increase on bridges owned by the Delaware River Port Authority, an investigation is hereby commenced. The investigation, which shall be performed in accordance with the bridge toll procedural rules, 49 CFR Part 310, is to be carried out by the following members of my staff: James J. Stapleton, Gerald M. Tierney, and Edward A. Gladstone. The investigation team shall send the complaints to the Delaware River Port Authority and commence the investigation immediately.

WILLIAM M. COX,
Federal Highway Administrator.

National Highway Traffic Safety Administration

[Docket No. IP78-2; Notice 1]

GENERAL MOTORS CORP.

Receipt of Petition for Determination of Inconsequential Noncompliance

General Motors Corp. of Warren, Mich., has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.208, Motor Vehicle Safety Standard No. 208, *Occupant Restraint Systems.* The basis of the petition is that the noncompliance is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Paragraph S7.3.1 of Standard No. 208 requires motor vehicles to contain a seat belt warning system part of which consists of a light "displaying the words 'Fasten Seat Belts' or 'Fasten Belts' • • • ." General Motors manufactured 196,118 "full size" 1977 model Pontiac passenger cars that displayed only the words "Seat Belt". Further, the word "Belt" appeared in the singular rather than the plural in the display "Fasten Seat Belt" in 77,549 Oldsmobile intermediate size cars for 1977 and in 71,714 intermediate sized Buick cars in the model years 1974 through 1977.

With respect to the first noncompliance, the petitioner argues that its omission of the word "Fasten" does not degrade the information transmitted to the vehicle occupants, and that the words "Seat Belt" by implication instruct the operator to fasten his belt. "There is no other reasonable interpretation that the driver could be expected to give to this message". As for its omission of the plural "s", petitioner notes that the initial NHTSA proposal was "Fasten seat belt" and that there was no explanation in the preamble of the final rule to explain the change from the singular to the plural, which, in GM's view, indicates "that in this instance, there is a distinction without a real difference."

Interest persons are invited to submit written data, views and arguments on the petition of General Motors Corporation described above. Comments should refer to the docket number and be submitted: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the FEDERAL REGISTER pursuant to the authority indicated below.

Comment closing date: June 15, 1978.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on April 26, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

[FR Doc. 78-11769 Filed 4-28-78; 8:45 am]

[4910-59]

[Docket No. IP77-6; Notice 2]

MACK TRUCKS, INC.

Grant of Petition for Determination of Inconsequential Noncompliance

This notice grants the petition by Mack Trucks, Inc. of Allentown, Pa. ("Mack" herein) to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.108 Motor Vehicle Safety Standard No. 108, Lamps, Reflective Devices, and Associated Equipment, on the basis that it is inconsequential as it relates to motor vehicle safety.

Notice of the petition was published on May 26, 1977 (42 FR 27082) and an opportunity afforded for comment. Standard No. 108 requires each motor vehicle to be equipped with an amber reflex reflector as far to the front of the vehicle as practicable. These reflectors must be mounted on the vehicle not less than 15 inches or more than 60 inches above the road surface. Mack has determined that the front reflex reflectors on approximately 260 DMM Model construction-type truck chassis, manufactured between December 1973 and February 1977, may exceed the 60-inch maximum by up to 5 inches. The company stated that construction type vehicles are normally used only in daylight hours, and when not in use, are parked on the owner's premises. It argued that the noncompliance is inconsequential because of the limited number of vehicles involved, and the general limitations on their use.

One comment was received on the petition, from Grove Manufacturing Co., which supported it. In Grove's opinion a construction vehicle such as the Mack DDM functions primarily in an off-road environment and when in motion on the public highways more than likely operates with the hazard warning lights engaged, thereby reducing the chances that another motor vehicle will run into it.

The National Highway Traffic Safety Administration concurs with the opinion that operation of the DDM series vehicles appears normally limited to daylight hours and primarily in offroad locations. The primary function of a reflex reflector is to reduce accidents by permitting early detection of a motor vehicle which is unlighted, and approaching an intersection or parked by the side of a road. Construction sites where the DDMs would be parked overnight are generally not accessible to the public. The vehicles are equipped with front reflex reflectors, and the agency considers it unlikely that the noncomplying mounting height poses any consequential effect upon motor vehicle safety.

Accordingly petitioner has met its burden of persuasion and it has been determined that the noncompliance is inconsequential as it relates to motor vehicle safety. The petition by Mack Trucks is hereby granted.

(Sec. 102, Pub. L. 93-492, 88 Stat. 1470 (15 U.S.C. 1417) delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on April 26, 1978.

MICHAEL M. FINKELSTEIN,
Acting Associate Administrator for Rulemaking.

TREASURY DEPARTMENT

Office of Foreign Assets Control

IMPORTATION FROM THE PHILIPPINES OF FERROCHROMIUM AND CHROMIUM-BEARING STEEL MILL PRODUCTS UNDER THE RHODESIAN SANCTIONS REGULATIONS

Availability of Special Certificates for Imports from The Republic of the Philippines

Special certificates of origin issued by the Bureau of Customs of the Government of the Republic of the Philippines are available as of April 1, 1978 for imports from that country of ferrochromium and chromium-bearing steel mill products. The certificates will be issued pursuant to a formal certification agreement between the Government of the Republic of the Philippines and the Government of the United States. They will serve to establish that Philippine materials exported to the United States do not contain any chromium of Rhodesian origin. Materials imported after April 1, 1978 may only be imported if a special certificate or origin is presented to Customs at the time of entry.

Importers are reminded that a special certificate must be procured and filed with Customs on or before May 31, 1978 to complete liquidation of entries covering certifiable materials imported between July 18, 1977 and September 18, 1977.

Dated: April 26, 1978.

STANLEY L. SOMMERFIELD,
Acting Director.

Office of the Secretary

VISCOSE RAYON STAPLE FIBER FROM BELGIUM

Antidumping; Determination of Sales at Less Than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Determination of sales at less than fair value.

SUMMARY: This notice is to advise the public that an antidumping investigation has resulted in a determination that viscose rayon staple fiber from Belgium is being sold at less than fair value within the meaning of the Antidumping Act, 1921. Appraisement for the purpose of determining the proper duties applicable to entries of this merchandise was previously suspended for six months. Interested parties were invited to comment on that action. The case is being referred to the International Trade Commission for a determination of possible injury to a United States industry.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Mary S. Clapp, Operations Officer, Office of Operations, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On June 17, 1977, information was received in proper from pursuant to sections 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of Avtex Fibers, Inc., Valley Forge, Pa. alleging that viscose rayon staple fiber from belgium is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921 as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). An "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of July 22, 1977 (42 FR 37610-11). The "Antidumping Proceeding Notice" indicated that there was evidence on record concerning injury to, or likelihood of injury to, or prevention of establishment of an industry in the United States. A "Withholding of Appraisement" notice was published in the FEDERAL REGISTER of January 23, 1978, (43 FR 3233) for a 6-month period.

The merchandise covered by this determination is "viscose rayon staple fiber, except solution dyed, in non-continuous form, not carded, not combed, and not otherwise processed, wholly of filaments (except laminated filaments and plexiform filaments)."

DETERMINATION OF SALES AT LESS THAN FAIR VALUE:

On the basis of the information developed in the Customs investigation and for the reasons noted below, pursuant to section 201(b) of the Act (19 U.S.C. 160(b)), I hereby determine that the purchase price of viscose rayon staple fiber from Belgium is less than the fair value, and thereby the foreign market value, of such or similar merchandise.

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED:

a. *Scope of investigation.* It has been determined 100 percent of imports of the subject merchandise from Belgium were sold for export to the United States by S.A. Fabelta N.V. (Fabelta). The investigation was therefore limited to sales by Fabelta.

b. *Basis of comparison.* For the purposes of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the

V 43 — 84

proper basis of comparison has been determined to be between purchase price and home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162) was used since all export sales by Fabelta were made to a non-related importer in the United States. Home market price, as defined in §153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise was sold in the home market in sufficient quantities to provide a basis for comparison.

In accordance with §153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning sales to the United States and in the home market during the period February 1, through July 31, 1977.

c. *Purchase price.* For the purpose of this determination of sales at less than fair market value, purchase price has been calculated on the basis of the f.o.b. Antwerp price to the United States importer, adjusted for inland freight and loading costs.

d. *Home market price.* For purposes of this determination, the home market price has been calculated on the basis of the ex-factory price to an unrelated Belgian dealer who operates at the same level of trade as the U.S. importer. Purchases of the subject merchandise by the dealer constituted 19 percent of total home market sales by Fabelta in the investigatory period, and were determined to be an adequate basis for fair value comparisons.

Adjustments have been made for discounts granted on home market sales, differences in the merchandise sold to the United States and in the home market and differences in credit costs in the two markets. Claims for adjustments for expenditures on insurance and technical assistance in the home market have been rejected because it does not appear that these costs were incurred on the specific sales under investigation.

A claim was made by the petitioner that a discount in the home market should be disallowed since it was based in part upon "customer loyalty". It is Treasury policy to adjust for discounts granted on either home market sales or export sales to the United States if it is verified that such discounts were in fact granted in the alleged amounts. Having found that this discount was granted on the home market sales used for fair value comparisons, the claim made by petitioner has been rejected and an adjustment to home market price granted for this discount.

Following publication of the Tentative Determination in this case an additional claim was made that Fabelta's home market sales had been made at less than the cost of producing the merchandise, invoking section 205(b) of the Act (19 U.S.C. 164(b)). This allegation is currently being investigated. Should this investigation establish that some or all home market sales must be disregarded and that another basis (i.e., third country sales prices or constructed value) for determining fair value must be used, the new basis will be published and we will immediately advise the U.S. International Trade Commission of any revised LTFV margins for its consideration.

e. *Results of fair value comparisons.* Using the above criteria, comparisons were made on 100 percent of the sales of the subject merchandise to the United States during the period of investigation. Those comparisons indicated that the purchase price of viscose rayon staple fiber was less than the home market price of such or similar merchandise. A margin of 6.7 percent was found on all sales compared.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.46, Customs Regulations (19 CFR 153.46).

The U.S. International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

APRIL 24, 1978.

[Dept. Circular, Public Debt Series—No. 10-78]

TREASURY NOTES OF MAY 15, 1988

Series A-1988

APRIL 27, 1978.

1. INVITATION FOR TENDERS

1.1. The Secretary of the Tresury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $2,500,000,000 of United States securities, designated Treasury Notes of May 15, 1988, Series A-1988 (CUSIP No. 912827 HS 4). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated May 15, 1978, and will bear interest from that date, payable on a semiannual basis on November 15, 1978, and each subsequent 6 months on May 15 and November 15, until the principal becomes payable. They will mature May 15, 1988, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry securities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Tuesday, May 2, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, May 1, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.11 percent. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed $1,000,000.

3.3. All bidders must certify that they have not made and will not make

any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a one-eight of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 97.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Monday, May 15, 1978, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Wednesday, May 10, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Tuesday, May 9, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are au-

MY 1 78
UMI

V 43 — 84 MY 1 78 UMI

thorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,
Acting Fiscal
Assistant Secretary.

[Dept. Circular Public Debt Series—No. 11-78]

8¾ PERCENT TREASURY BONDS OF 1995-2000

APRIL 27, 1978.

1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately $1,500,000,000 of United States securities, designated 8¾ percent Treasury Bonds of 1995-2000 (CUSIP No. 912810 BV 9). The securities will be sold at auction, with bidding on the basis of price. Payment will be required at the bid price of each accepted tender in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks, as agents of foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities offered will be identical to the 8¾ percent Treasury Bonds of 1995-2000 (CUSIP No. 912810 BV 9) issued under Department of the Treasury Circular, Public Debt Series—No. 25-75, dated July 24, 1975, except that interest will accrue from May 15, 1978, and payment for the securities will be calculated on the basis of the auction price determined in accordance with this circular, plus accrued interest from February 15, 1978. With this exception, the securities are as described in the following excerpt from the above circular:

"1. The bonds will be dated August 15, 1975, and will bear interest[1] from that date, payable semiannually on February 15 and August 15 in each year until the principal amount becomes payable. They will mature August 15, 2000, but may be redeemed at the option of the United States on and after August 15, 1995, in whole or in part, at par and accrued interest on any interest day or days, on 4 months' notice of redemption give in such manner as the Secretary of the Treasury shall prescribe. In case of partial redemption, the bonds to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. From the date of redemption designated in any such notice, interest on the bonds called for redemption shall cease.

"2. The income derived from the bonds is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

"3. The bonds will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

"4. Bearer bonds with interest coupons attached and bonds registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000 and $1,000,000. Book-entry bonds will be available to eligible bidders in multiples of those amounts. Interchanges of bonds of different denominations and of coupon and registered bonds, and the transfer of registered bonds will be permitted.

"5. The bonds will be subject to the general regulations of the Department of the Treasury, now or hereafter prescribed, governing United States bonds."

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Wednesday, May 3, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, May 2, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is $1,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the price offered, expressed on the basis of 100 with two decimals, e.g., 100.00. Common fractions may not be used. Only tenders at a price more than the original issue discount limit of 94.50 will be accepted. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified price. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5 percent of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and price range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the highest prices, through successively lower prices to the extent required to attain the amount offered. Tenders at the lowest accepted price will be prorated if necessary. Successful competitive bidders will be required to pay the price that they bid. Those submitting noncompetitive tenders will pay the weighted average price in two decimals of accepted competitive tenders. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the price. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the weighted average price of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full or when the price is over par.

[1] On July 31, 1975, the Secretary of the Treasury announced that the interest rate on the bonds would be 8¾ percent per annum.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Monday, May 15, 1978, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted, and must include accrued interest from February 15 to May 15, 1978, in the amount of $20.59047 per $1,000 of securities allotted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

(a) Wednesday, May 10, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or

(b) Tuesday, May 9, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,
Acting Fiscal
Assistant Secretary.

INTERSTATE COMMERCE COMMISSION

[Notice No. 648]

ASSIGNMENT OF HEARINGS

APRIL 26, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 139269 Sub 12, C.P. Craska, Inc., now assigned May 22, 1978 at New York, N.Y., will be held in Room F-2220, Federal Building, 26 Federal Plaza.

MC 141820 Sub 1, Roman Rurak, now assigned May 24, 1978 at New York, N.Y., will be held in Room F-2220, Federal Building, 26 Federal Plaza.

MC 56678 (Sub-No. 90), Brown Transport Corp., now assigned May 2, 1978, at Atlanta, Ga. and continued to June 20, 1978, at Chattanooga, Tenn. is postponed to June 20, 1978 (9 days), at the Holiday Inn-Downtown, I-124, 401 West 9th Street, Chatanooga, Tenn. and continued to September 26, 1978 (9 days), at the Holiday Inn-Downtown, 175 Piedmont Avenue NE., Atlanta, Ga.

MC 142059 Sub 13, Cardinal Transport, Inc., is now assigned for hearing June 28, 1978 (1 day) at St. Louis, Mo., at a location to be later designated.

MC 140768 Sub 13, American Trans-Freight, Inc., is now assigned for hearing June 1, 1978 at the offices of the Interstate Commerce Commission, Washington, D.C.

MC 114273 Sub 309, CRST, Inc., is now assigned for hearing June 1, 1978 at the offices of the Interstate Commerce Commission, Washington, D.C.

MC 109638 Sub 32, Everette Truck Line, Inc., is now assigned for hearing June 6, 1978 at the offices of the Interstate Commerce Commission, Washington, D.C.

MC 143945 Sub 3, Artransport, Inc., is now assigned for hearing June 26, 1978 at the offices of the Interstate Commerce Commission, Washington, D.C.

MC 124887 Sub 45, Shelton Trucking Service, Inc., now assigned May 2, 1978 at Atlanta, Ga., is cancelled, application dismissed.

MC 111231 Sub 214, Jones Truck Lines, Inc. now assigned May 9, 1978 at Little Rock, Ark., is postponed indefinitely.

MC 126574 Sub 3, M.L. Hatcher Pickup & Delivery Services, Inc., now being assigned July 11, 1978 (3 das) in Raleigh, N.C. in a hearing room to be later designated.

MC-F-13300, Stevens Van Lines, Inc.—Control and Merger—Airline Van, Inc. and MC 74681 Sub 6 and Sub 7, Stevens Van Lines, Inc., now assigned May 9, 1978 at Detroit, Mich., in the 13th Courtroom, Second Floor, Old Federal Building and

[7035-01]

[No. 36819; Ex Parte No. 343]

COLORADO INTRASTATE RATES

By joint petition filed January 26, 1978, petitioners, 10 common carriers by railroad[1] subject to Part I of the Interstate Commerce Act (Act) and also operating in intrastate commerce in Colorado, request that this Commission institute an investigation of their Colorado intrastate freight rates and charges, under section 13 of the Act. They seek an order authorizing them to increase such rates and charges in the same amounts approved for interstate application by this Commission in Ex Parte No. 343 effective November 30, 1977. Petitioners have stated grounds sufficient to warrant instituting an investigation.

It is ordered: The petition is granted. An investigation, under section 13 of the Act, is instituted to determine whether the Colorado state rail freight rates in any respect cause any unjust discrimination against or any undue burden on interstate of foreign commerce, or cause undue or unreasonable advantage, preference, or prejudice as between persons or localities in intrastate commerce and persons or localities in interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to include the full increases authorized for interstate application by this Commission in Ex Parte No. 343. The investigation shall also determine if any rates or charges, or maximum or minimum charges, or both, shall be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law, found to exist.

All common carriers by railroad operating in Colorado subject to the jurisdiction of the Commission are made respondents in this proceeding.

All persons who wish to participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20432, on or before May 16, 1978. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. This Commission desires participation of only those who intend to take an active part in this proceeding.

As soon as practicable after the last day for indicating a desire to participate in the proceeding, this Commission will serve a list of names and addresses on all persons upon whom service of all pleadings must be made. Thereafter, this proceeding will be assigned for oral hearing or handling under modified procedure.

A copy of this order shall be served upon each of the petitioners and respondents herein. Colorado shall be notified of the proceeding by sending copies of this order by certified mail to the Governor of Colorado, and the Public Utilities Commission of the State of Colorado. Further notice of this proceeding shall be given to the public by depositing a copy of this order in the Office of the Secretary of the Interstate Commerce Commission at Washington, D.C., and by filing a copy with the Director, Office of the FEDERAL REGISTER, for publication in the FEDERAL REGISTER.

This is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 20th day of April, 1978.

By the Commission, Robert J. Brooks, Director, Office of Proceedings.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-11783 Filed 4-28-78; 8:45 am]

[7035-01]

[Notice No. 34]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission on or before May 31, 1978. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protests contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-77550, filed April 17, 1978. Transferee: BRUCE D. KING, d.b.a. BRUCE KING TRUCKING, 202 Cliff Street, Mohawk, MI 49950. Transferor: Alphie J. Bousley, Inc. Route 3, Armstrong Creek, WI 54103. Applicant's representative: Robert W. Hansley, 120 North 6th Street, Escanaba, MI 49829. Authority sought for purchase of a portion of the operating rights of transferor as set forth in Permit No. MC-139930 issued October 31, 1975: Unfinished lumber from Mohawk, MI to points in IL, MI, MN, and WI for the account of Louisiana-Pacific Seaway Division. Transferee presently is authorized to operate as a common carrier in MC-138892 (Sub-No. 2); temporary authority is not sought under section 210a(b).

No. MC-FC-77584, filed April 26, 1978. Transferee: LARMER TRANSFER CO., a corporation, P.O. Box 706, Eugene, OR 97401. Transferor: Williams Transfer Co., a corporation, Eugene, OR 97401. Applicant's representative: Russell M. Allen, 1200 Jackson Tower, Portland, OR 97205. Authority sought for purchase of the operating rights set forth in Certificate No. MC-7156 (Sub-No. 3) issued December 6, 1967 as follows: *Lumber* from points in Lane County, OR to Portland, OR and points in Clarke and Cowlitz Counties, WA. Transferee holds Commission authority in Certificate No. MC-77051; it does not seek section 210a(b) authority.

No. MC-FC-77601, filed March 30, 1978. Transferee: MARGARET C. NIEHAUS, 2659 North Mascher St., Philadelphia, PA 19133. Transferor: Harry B. Niehaus, Jr., (Margaret C. Niehaus, Executrix), 2659 North Mascher St., Philadelphia, PA 19133. Applicant's representative: Margaret C. Niehaus, 2659 North Mascher St., Philadelphia, PA 19133. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-693, issued May 20, 1941, as follows: *Machinery* and *tramrails* and *materials and supplies* used or useful in the erection of tramrails, between Philadelphia, PA, on the one hand, and, on the other, New York, NY, Wilmington and Worth, DE and points in NJ. *Metal sponges,* between Philadelphia, PA, on the one hand, and, on the other, New York, NY, and Atlantic City, NJ. *Rugs,* between Philadelphia, PA, and New York, NY. *Tanning materials,* between Wilmington, DE, Newark, NJ, New York, NY, and Philadelphia, PA. *Water softeners, filters* and *purifiers,* and *materials* and *supplies,* used or useful in the erection of these commodities, between Philadelphia, PA, New York, NY, Wilmington, DE, and points in NJ. *Refrigerators* and *refrigerated showcases,* from Philadelphia, PA, to Atlantic City, NJ, and Wilmington, DE, transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under section 210a(b).

No. MC-FC-77617 filed April 7, 1978. Transferee: RICHARD A. JONES, d.b.a. JONES TRUCK LINE, 717 North 13th Street, Fort Dodge, IA 50501.Transferor: Wenger Truck Line, Inc., 3909 West rusholme, P.O. Box 3427, Davenport, IA 52808. Applicants' representative: Larry D. Knox, 600 Hubbell Building, Des Moines, IA 50309. Authority sought for purchase by transferee of a portion of the operating rights of transferor, as set forth in Certificate No. MC 109818, issued May 15, 1964, as follows: *Malt beverages,* from Milwaukee, WI to Algona, IA; *Empty malt beverage containers,* from Algona, IA to Milwaukee, WI; *Beer,* from Milwaukee, WI to Fort Dodge, IA; and *Empty beer containers,* from Fort Dodge, IA to Milwaukee, WI. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77622 filed April 9, 1978. Transferee: J. P. NOONAN TRANSPORTATION, INC., 436 West Street, West Bridgewater, MA 02379. Transferor: Northern Trucking Co., 29 Andover Street, Danvers, MA 01923. Applicants' representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Permit No. MC 27474, issued May 13, 1946, as follows: *Petroleum products,* over irregular routes, from Providence, RI, and Revere and Chelsea, MA, to points in MA. Transferee is presently authorized to operate as a contract carrier under Permit No. MC-134677 and as a common carrier under Certificate No. MC-127610. Dual operations are involved. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-77631 filed April 18, 1978. Transferee: ROBERT DAVIS, Pleasant Mount, PA 18453. Transferor: Edmund R. Owens, Uniondale, PA 18470. Applicant's representative: Joseph F. Hoary, 121 South Main Street, Taylor, PA 18517. Authority sought for purchase by transferee of the operating rights set forth in Permits No. MC 113408 and MC 113408 (Sub-No. 1) issued February 4, 1953 and November 25, 1958, as follows: *Livestock and poultry feed* over a specified regular route from Binghamton, NY to Pleasant Mount and Lakewood, PA. Transferee holds no Commission authority and does not seek Section 210a(b) temporary authority.

[Finance Docket No. 28731]

STANLEY E. HILLMAN, TRUSTEE OF THE PROPERTY OF CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO.

Trackage Rights Over Chicago & North Western Transportation Co. Between Cliff and Mankato, MN

Stanley E. G. Hillman, trustee of the property of Chicago, Milwaukee, St. Paul & Pacific Railroad Co. (Milwaukee Road), represented by Thomas H. Ploss, Rodger K. Johnson, William C. Sippel, and William L. Phillips, 516 West Jackson Boulevard, Chicago, IL 60605, has filed an application with the Interstate Commerce Commission for authorization to acquire trackage rights to operate its engines and trains over the tracks of the Chicago & North Western Transportation Co. (CNW) between Cliff (near St. Paul) and Mankato, MN.

The tracks of the CNW over which applicant proposes to operate extend from milepost No. 4.2 at Cliff, MN (near St. Paul) in a southwesterly direction to milepost No. 85.8 at Mankato, MN, for a distance of 81.6 miles. That line of trackage passes through Dakota, Scott, Le Sueur, and Blue Earth Counties, in the State of MN, and through the towns of Cliff, Mendota, Nicols, Savage, Shakopee, Jordan, Blakeley, Le Sueur, Ottawa, Kasota, Benning, and Mankato, in the State of MN.

The trackage rights arrangement with CNW is part of a plan of the Milwaukee Road to abandon branch lines

[1] The Atchison, Topeka & Santa Fe Railway Co., Burlington Northern, Inc., Chicago, Rock Island & Pacific Railroad Co., The Colorado & Southern Railway Co., The Colorado & Wyoming Railway Co., The Denver & Rio Grande Western Railroad Co., Missouri Pacific Railroad Co., San Luis Central Railroad Co., Southern San Luis Valley Railroad Co., and Union Pacific Railroad Co.

between Farmington and Benning, MN (Docket No. AB-7, (Sub-No. 56), and between Farmington and Shakopee, MN (Docket No. AB-7) (Sub-No. 57), and to operate over tracks which will permit service at faster speeds, and carrying heavier loads.

Interested persons may participate formally in a proceeding by submitting written comments regarding the application. Such submissions shall indicate the proceeding designation Finance Docket No. 28731, and the original and two copies shall be filed with the Secretary, Interstate Commerce Commission, Washington, DC 20423, not later than 45 days after the date notice of the filing of the application is published in the FEDERAL REGISTER. Such written comments shall include the following: the person's position, e.g., party protestant or party in support, regarding the proposed transaction; specific reasons why approval would or would not be in the public interest; and a request for oral hearing if one is desired. Additionally, interested persons who do not intend to participate formally in a proceeding but who desire to comment on it, may file such statements and information as they may desire, subject to the filing and service requirements specified in this notice. Persons submitting written comments to the Commission shall, at the same time, serve copies of such written comments upon the applicant, the Secretary of Transportation and the Attorney General.

H. G. HOMME, Jr.,
Acting Secretary.

FEDERAL ENERGY REGULATORY COMMISSION.

TIME AND DATE: 10 a.m., May 3, 1978.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth F. Plumb, Secretary, telephone 202-275-4166.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda, however, all public documents may be examined in the Office of Public Information.

GAS AGENDA—88TH MEETING, MAY 3, 1978, REGULAR MEETING, 10 a.m.

I. PIPELINE RATE MATTERS

A. Pipeline rates

RP-1.—Docket Nos. RP72-127 and R. & D. 75-1, Northern Natural Gas Co.
RP-2.—Docket Nos. RP78-39 and RP78-40, Panhandle Eastern Pipe Line Co.
RP-3.—Docket No. RP77-31, Southern Natural Gas Co.

II. PRODUCER MATTERS

A. Producer certificates

CI-1.—Docket No. CI77-702, Pennzoil Louisiana & Texas Offshore Co., Inc. Docket No. CI77-703, Pennzoil Offshore Gas Operators, Inc. Docket No. CI78-96, Pennzoil Oil & Gas, Inc.
CI-2.—Reserved.
CI-3.—Reserved.

B. Producer rates

CI-4.—Docket No. AR64-2, et al., Area Rate Proceeding, et al. (Texas Gulf Coast area). Docket No. AR67-1, et al., Area Rate Proceeding, et al. (other southwest area). Docket No. AR61-2, et al., and AR69-1, et al., Area Rate Proceeding, et al., (southern Louisiana area).

III. PIPELINE CERTIFICATE MATTERS

A. Pipeline certificates

CP-1.—Docket No. CP78-1, Sea Robin Pipeline Co., Transcontinental Gas Pipe Line Corp.
CP-2.—Docket Nos. CP75-580, Sea Robin Pipeline Co.
CP-3.—Docket Nos. CP75-372 and CP75-373, Tennessee Gas Pipe Line Co., a division of Tenneco, Inc.
CP-4.—Docket Nos. CP78-123, et al., Northwest Alaskan Pipeline Co.
CP-5.—Reserved.
CP-6.—Reserved.

B. Storage.

CP-7.—Docket No. CP76-499, Natural Gas Pipeline Co. of America.
CP-8.—Reserved.
CP-9.—Reserved.

C.—LNG.

CP-10—(A) Transfer of proceedings to the Secretary of Energy and the Federal Energy Regulatory Commission. (B) Docket Nos. CP75-140, et al., Pacific Alaska LNG Co., et al. Docket Nos. CP74-160, et al., Pacific Indonesia LNG Co., et al. Docket Nos. CI78-453, Pacific Lighting Gas Development. Docket Nos. CI78-452, Pacific Simpco Partnership.
CP-11.—Docket No. CP66-43, Texas Eastern Transmission Corp.
CP-12.—Docket No. CP77-448, NPG-LNG, Inc. Docket No. CP77-449, Natural Gas Pipeline Co. of America.
CP-13.—Docket No. CP76, Tenneco LNG, Inc.

IV. OIL PIPELINE MATTERS

OR-1.—Docket No. OR78-1, Trans Alaska Pipeline System: Investigation and suspension.

GAS AGENDA—88TH MEETING, MAY 3, 1978, REGULAR MEETING

CAG-1.—Docket Nos. AR61-2, AR69-1, et al., RP67-23, RP71-6, et al., G-1980, et al., and RP73-114, Tennessee Gas Pipeline Co.
CAG-2.—Docket Nos. AR61-2, AR69-1, et al., and RP74-41, Texas Eastern Transmission Corp.
CAG-3.—Docket Nos. AR61-2, AR69-1, et al., and RP73-35, Trunkline Gas Co.
CAG-4.—Docket No. RP77-32, South Georgia Natural Gas Co.
CAG-5.—Docket No CP77-193, Northern Natural Gas Co.
CAG-6.—Docket Nos. C162-1184, Atlantic Richfield Co. (operator), et al.
CAG-7.—Docket Nos. CI77-851, et al., Alminex U.S.A., Inc. et al.
CAG-8.—Docket No. CI77-839, Forest Oil Corp. Docket No. CI77-850, Columbia Gas Development Corp.
CAG-9.—Docket No. CP77-525, United Gas Pipe Line Co. Docket No. CP77-529, Delhi Gas Pipeline Corp.
CAG-10.—Docket No. CP78-76, Transcontinental Gas Pipe Line Corp.
CAG-11.—Docket No. CP78-104, Natural Gas Pipeline Co. of America.
CAG-12.—Docket No. CP78-217, Tennessee Gas Pipeline Co., a division of Tenneco Inc.
CAG-13.—Docket No. CP76-500, Cities Service Gas Co.
CAG-14.—Docket No. CP78-129, Texas Eastern Transmission Corp. Docket No. CP78-141, Consolidated Gas Supply Corp. Docket No. CP78-158, Columbia Gas Transmission Corp.

MISCELLANEOUS AGENDA—88TH MEETING, MAY 3, 1978, REGULAR MEETING

M-1.—Docket No. RM78- , risk distribution and profit policy for the Alaska Natural Gas Transportation System, including variable rate of return and risk premiums.
M-2.—Docket No. RM76-13, the need for site selection and facility operation criteria for liquefied natural gas importation and storage facilities.
M-3.—Docket No. RM78- , amendments to regulations under the Government in the Sunshine Act.

POWER AGENDA—88TH MEETING, MAY 3, 1978, REGULAR MEETING

I. ELECTRIC RATE MATTERS

ER-1.—Docket No. ER78-220, Central Hudson Gas & Electric Corp.
ER-2.—Docket No. ER78-291, Northern States Power Co. (Minnesota).
ER-3.—Docket No. ER76-716, Indiana & Michigan Electric Co.
ER-4.—Docket Nos. E-8586 and E-8587, Public Service Co. of Indiana, Inc.

II. LICENSED PROJECT MATTERS

P-1.—Project No. 553, City of Seattle, Wash.
P-2.—Project No. 176, Escondido Mutual Water Co.
P-3.—Project No. 372, Southern California Edison Co.

POWER AGENDA—88TH MEETING, MAY 3, 1978, REGULAR MEETING

CAP-1.—Docket No. ER78-154, Wisconsin Power & Light Co.
CAP-2.—Docket No. ER78-286, New Bedford Gas & Electric Light Co.
CAP-3.—Docket No. ER77-211, Mt. Carmel Public Utility District.
CAP-4.—State Director, Bureau of Land Management (2320) (943) (1785), Cheyenne, Wyo.
CAP-5.—Project No. 2716, Virginia Electric & Power Co.
CAP-6.—Project No. 2207, Mosinee Paper Corp.
CAP-7.—Project No. 2336, Georgia Power Co.
CAP-8.—Docket No. ER78-249, Appalachian Power Co., Ohio Power Company, and Wheeling Electric Co.

KENNETH F. PLUMB,
Secretary.

FEDERAL HOME LOAN BANK BOARD.

TIME AND DATE: 9:30 a.m., May 5, 1978.

PLACE: 1700 G Street NW., Sixth Floor, Washington, D.C.

STATUS: Open meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Marshall, 202-377-6679.

MATTERS TO BE CONSIDERED:

Consideration of proposed amendments regarding maturities of certificate accounts.
Application for permission to organize a Federal association—E. L. Kittrell Smith, et al., Fort Oglethorpe, Ga.
Consideration of request to permit a commercial bank to operate ATM's located on the outside wall of a Federal association office—Hudson Valley Federal Savings & Loan Association, Kingston, N.Y.
Branch office application—Home Federal Savings & Loan Association of Lakewood, Lakewood, Ohio.
Branch office applications to be considered concurrently: (1) First Federal Savings & Loan Association of Chickasha, Chickasha, Okla. (2) Frontier Federal Savings & Loan Association, Ponca City, Okla.
Agency office application—Home Federal Savings & Loan Association of San Diego, San Diego, Calif.
Request for commitment for insurance of accounts—Farmington Valley Savings & Loan Association, Farmington, Conn.
Applications to be considered concurrently: (1) Branch office application—Clearwater Federal Savings & Loan Association, Clearwater, Fla. (2) Satellite office application—First Federal Savings & Loan Association of Tarpon Springs, Tarpon Springs, Fla.
Consideration of proposed amendments relating to State housing corporations.
No. 148, April 27, 1978.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS

Policy Determinations

V 4 3 — 8 4 M Y 1 7 8 UMI

[4110-12]

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

Office of the Secretary

NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS

Policy Determinations

INTRODUCTION

The Office for Civil Rights will hereafter publish all major policy determinations in the FEDERAL REGISTER and systematically provide copies to organizations representing beneficiaries and recipients of Federal financial assistance.

Policy determinations will fall into one of three categories:

1. *Policy Interpretations* will clarify and explain regulatory provisions.

2. *Procedural Announcements* will outline the specific procedures recipients must follow to comply with regulatory provisions or the procedures this office will follow to obtain compliance.

3. *Decision Announcements* will illustrate how this office has applied regulatory provisions to specific fact patterns developed through investigations.

Following are the first five policy determinations issued in accordance with this procedure. Three relate to Title IX of the Education Amendments of 1972 which prohibits discrimination on the basis of sex; two relate to Section 504 of the Rehabilitation Act of 1973 which prohibits discrimination on the basis of handicap.

Dated: April 26, 1978.

DAVID S. TATEL,
Director,
Office for Civil Rights.

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

Coverage: The following two policy interpretations apply to any public or private institution, person or other entity that operates an educational program or activity which receives or benefits from financial assistance authorized or extended under a law administered by the Department. This coverage includes educational institutions whose students participate in HEW funded or guaranteed student loan or assistance programs. For further information see definition of "recipient" in Section 86.2 of the Title IX regulation.

POLICY INTERPRETATION NO. 1

Subject: Requests for applicants' "marital status."

Policy Interpretation: Recipients may not ask prospective students or employees for their marital status including their maiden or former married name. However, applicants may be asked to state any names by which they may have been identified in relevant academic or employment records.

Discussion: the Title IX regulation prohibits discrimination on the basis of marital status and expressly prohibits inquiry into the marital status of prospective students and employees, including whether they are "Miss" or "Mrs." Recipients have asked whether requests for an applicant's "former married name" or "maiden name" would violate the regulation. The Department finds such requests indistinguishable from a request that an applicant state whether she is "Miss" or "Mrs."

The Department acknowledges that relevant employment or academic information may be filed under an applicant's former names. For the purpose of locating such relevant information all applicants, regardless of sex, may be asked to state other names under which such information can be found; but if the question is asked of persons of one sex it must be asked of persons of both sexes. This policy effectively reconciles the legitimate need to locate information about an applicant with the Title IX regulation's prohibition against discrimination on the basis of marital status.

Application forms must accommodate this policy. For example, the application form may include the following request: "If information necessary to process this application is located under a different name, please include such name(s) in the space provided."

Current supplies of forms which ask for maiden name or former married names may be exhausted if questions which would directly or indirectly reveal marital status are deleted or modified to conform to this policy interpretation.

Authority: Regulation issued under Title IX of the Education Amendments of 1972, 45 CFR 86.21(c)(4) and 86.60(a).

Section 86.21(c)(4): (c) *Prohibitions relating to marital or parental status.* In determining whether a person satisfies any policy or criterion for admission, or in making any offer of admission, a recipient to which this subpart applies:

(4) Shall not make pre-admission inquiry as to the marital status of an applicant for admission, including whether such applicant is "Miss" or "Mrs." • • •

Section 86.60(a): (a) *Marital status.* A recipient shall not make pre-employment inquiry as to the marital status of an applicant for employment, including whether such applicant is "Miss or Mrs."

POLICY INTERPRETATION NO. 2

Subject: Religious objections to participation in coeducational classes.

Policy Interpretation: Students who demonstrate that their religion prohibits certain coeducational courses may be excused from such courses or offered them on a sex segregated basis.

Discussion: The Title IX regulation's requirement that recipients offer classes on a coeducational basis is subject to several exceptions. For example, students may be grouped by objective standards of ability within physical education classes, or separated by sex for those portions of physical education activities devoted to participation in contact sports, or for those portions of elementary and secondary school classes which deal exclusively with human sexuality. Students may also be separated on the basis of vocal range for participation in chorus.

Recipients have asked whether they may offer sex segregated classes for students who object to coeducational classes on religious grounds. Although the regulation does not expressly authorize such classes, recipients must accommodate religious beliefs protected by the First Amendment. Therefore, students who demonstrate that they belong to religions which prohibit certain activities on a coeducational basis (e.g. swimming) may, at the option of the recipient, either be excused from unitary classes or offered sex segregated classes.

Authority: First Amendment to the Constitution of the United States. Regulation issued under Title IX of the Education Amendments of 1972, 45 CFR 86.34.

Section 86.34: A recipient shall not provide any course or otherwise carry out any of its education program or activity separately on the basis of sex, or require or refuse participation therein by any of its students on such basis, including health, physical education, industrial, business, vocational, technical, home economics, music, and adult education courses • • •.

(b) This section does not prohibit grouping of students in physical education classes and activities by ability as assessed by objective standards of individual performance developed and applied without regard to sex.

(c) This section does not prohibit separation of students by sex within physical education classes or activities during participation in wrestling, boxing, rugby, ice hockey, football, basketball and other sports the purpose of major activity of which involves bodily contact.

(d) Where use of a single standard of measuring skill or progess in a physical education class has an adverse effect on members of one sex, the recipient shall use appropriate standards which do not have such effect.

(e) Portions of classes in elementary and secondary schools which deal exclusively with human sexuality may be conducted in separate sessions for boys and girls.

(f) Recipients may make requirements based on vocal range or quality which may result in a chorus or choruses of one or predominantly one sex.

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

DECISION ANNOUNCEMENT NO. 1

Subject: Facts constituting adequate proof of unlawful sex discrimination.

Discussion: The complainant was a female elementary school principal who alleged that her employment contract was limited to 1 year because of her sex.

The recipient, a public school district, employed twelve principals, eleven of whom were men with 2-year contracts. The length of a contract offered by the recipient was determined entirely by "performance evaluation," under which the complainant was superior to at least six of the men. (See Exhibit "A") The school district's only response to these disparities was an unsubstantiated general denial of sex discrimination.

Decision: Sex discrimination barred by Title IX, like other forms of unlawful discrimination, may be proved by unrebutted statistical analyses. The school district failed to offer an adequate explanation for the statistical disparities and a "letter of findings" in favor of the complainant was issued.

The school district was required to lengthen the complainant's contract to 2 years and assure future compliance with Title IX. There was no claim or proof of a lower salary resulting from the 1-year contract and, accordingly, no back pay was required.

EXHIBIT A.—*Evaluation of principals*

SECTION 504 OF THE REHABILITATION ACT OF 1973

Coverage: The following two policy interpretations apply to any public or private institution, person, or other entity that receives or benefits from HEW financial assistance. For further information see definition of "recipient" at 45 CFR 84.3(f).

POLICY INTERPRETATION NO. 1

Subject: Discrimination that occurred before the effective date of the regulation.

Policy interpretation: The Office for Civil Rights will investigate complaints of alleged discrimination that occurred after September 26, 1973, the date section 504 became law, and prior to June 3, 1977, the date the section 504 regulation became effective, if those complaints charge violations of the statute which do not require for their resolution the interpretative language of the regulation.

Discussion: Section 504 of the Rehabilitation Act of 1973 became law on September 26, 1973. The implementing regulation became effective on June 3, 1977. It would therefore be unreasonable for the Department to investigate the pending complaints alleging violations of section 504 occurring between September 26, 1973 and June 3, 1977 unless a clear violation of the statute is at issue.

The question, to be answered on a case-by-case basis is whether the language of the statute provides notice that the challenged policy or practice is unlawful. For example, the exclusion of qualified handicapped students from a college or university or the prohibition of tape recorders in classrooms by students whose handicap impairs their ability to take notes, will be considered violations of section 504. Discrimination against a qualified applicant for employment will be considered a violation of section 504 if adjustments would not have been needed to accommodate the applicant's handicap. However, failure to provide auxiliary aids in colleges and universities or to reasonably accommodate the needs of handicapped applicants for employment will not be considered unlawful unless it occurs after June 3, 1977.

This policy interpretation has no affect on obligations established by the Federal Architectural Barriers Act which predates Section 504.

Authority: Section 504, Rehabilitation Act of 1973, Pub. L. 93-112, 87 Stat. 394 (29 U.S.C. 794).

Section 504: No otherwise qualified handicapped individual in the United States . . . shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.

POLICY INTERPRETATION NO. 2

Subject: Application of the 180-day limitations period to discrimination occurring before the effective date of the regulation.

Policy interpretation: The 180-day limitations period for complaints of discrimination will not be applied to acts of discrimination occurring prior to the effective date of the regulation.

Discussion: The regulation requires that complaints of discrimination be filed within 180 days of the unlawful act. This requirement was not imposed until the effective date of the regulation (June 3, 1977), and it will therefore not apply to complaints alleging discrimination that occurred before the effective date of the regulation but after the effective date of the statute (September 26, 1973). For these complaints, the 180-day limitations period will begin to run from June 3, 1977. Such complaints, however, will

V 43 | 84 MY 1 78 UMI

be investigated only if they allege clear violations of the statute. See Section 504 Policy Interpretation No. 1.

Authority: Regulation issued under Section 504 of the Rehabilitation Act of 1973 and Title VI of the Civil Rights Act of 1964, 45 CFR 84.61 and 80.7(b).

Section 84.61: The procedural provisions applicable to title VI of the Civil Rights Act of 1964 apply to this part. These procedures are found in §§ 80.6-80.10 and Part 81 of this Title.

Section 80.7(b): (b) *Complaints.* Any person who believes himself or any specific class of individuals to be subjected to discrimination prohibited by this part may by himself or by a representative filed with the responsible Department official or his designee a written complaint. A complaint must be filed not later than 180 days from the date of the alleged discrimination, unless the time for filing is extended by the responsible Department official or his designee.

IMPROVING GOVERNMENT REGULATIONS

Proposals for Implementing Executive Order 12044

V 43 1 84

[3128-01]

DEPARTMENT OF ENERGY

IMPROVING ENERGY REGULATIONS

Response to Executive Order No. 12044 Improving Government Regulations

AGENCY: Department of Energy.

ACTION: Request for public comment.

SUMMARY: The Department of Energy ("DOE") is issuing this notice to obtain comments on its proposals for implementing Executive Order No. 12044, Improving Government Regulations (43 FR 12661, March 24, 1978) ("the Executive Order"). The proposals include procedures for developing new regulations; analyzing their potential impacts; reforming existing, but outdated or excessively burdensome regulations; and increasing public participation in regulatory development.

DATE: Comments by June 30, 1978.

ADDRESS: Send comments to William A. Strauss, Director, Regulatory Programs Division, Office of Policy and Evaluation, Department of Energy, Room 4108, 1200 Pennsylvania Avenue NW., Washington, D.C. 20461. 202-566-9919.

FOR FURTHER INFORMATION CONTACT:

Deanna Williams (DOE Reading Room), 1200 Pennsylvania Avenue NW., Room 2107, Washington, D.C. 20461, 202-566-9161.

Ed Vilade (DOE Media Relations), 1200 Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461, 202-566-9833.

Joseph C. Vanzant (DOE Policy and Evaluation), 1200 Pennsylvania Avenue NW., Room 4121, Washington, D.C. 20461, 202-566-7438.

Thomas B. DePriest (DOE Office of General Counsel), 1200 Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461, 202-566-9565.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Comments Requested.
III. Comment Procedure.

I. Background

In his first State of the Union message and in the Executive Order, the President indicated his desire to reduce the regulatory burdens imposed by the Federal Government on the American people. The Secretary of Energy supports this objective, especially as it will increase public participation in DOE regulatory decisionmaking.

Regulatory reform is particularly important to the Department of Energy. First, one of the reasons the Department of Energy was created was to address the sometimes overlapping or conflicting regulations of the many energy-concerned agencies which existed before 1977. Second, the National Energy Plan calls upon this Department to move away from binding and costly regulatory strategies, while moving toward nonregulatory means of achieving energy objectives. Third, many of the laws administered by DOE give the Department substantial discretion in developing regulatory policies; when those policies become outmoded or are found to be excessively burdensome, changes can frequently be made without new legislation. Fourth, the energy legislation now pending before Congress may require this Department to develop many regulations which will directly and significantly affect the public (especially in the conservation area). Fifth, the Nation's long-term energy needs may not be met unless the public participates more actively in energy policymaking; increased conservation and development of renewable energy resources are important goals of the National Energy Plan, and they both require a substantial dialogue between this Department and the public.

For these reasons, the Department of Energy's proposals for improving regulations go well beyond the minimum requirements of the President's Executive Order.

II. Comments Requested

The DOE invites written comments on its proposals to implement Section II of the Executive Order. The complete proposal to reform the process for developing significant regulations is described in Section V of the appendix to this notice. The proposed procedures can be summarized as follows:

1. A proposed regulation will be considered significant if it may substantially affect important policy concerns (e.g., long-term energy supplies, the economy, or the environment), if it is expected to be a matter of major concern to the President, Congress, or the public, or if it would require substantial DOE resources to develop and enforce it.

2. If an Assistant Secretary, Office Director, or Administrator considers a proposed regulation to be significant, that regulation will be developed by a working group representing various DOE staffs, reviewed by the Deputy Secretary or Under Secretary, approved for final publication through a special clearance process, and published for comment for a minimum of 60 days. In addition, a plan will be developed for the subsequent evaluation of the impacts of the regulation.

3. The office developing the regulation and other working group members will work with the Office of Intergovernmental and Institutional Relations to develop means for including the public throughout the regulatory development process.

4. If public hearings are held, panels will be chaired by the office developing the regulation and will include the other members of the working group. When the period for public comment is completed, the office developing the regulation will summarize and, in coordination with the other working group members, analyze the public comment and revise the regulation accordingly.

5. Before a significant regulation is published in final form, it must be reviewed and approved by the Deputy Secretary or Under Secretary. The Office of Policy and Evaluation, Office of the General Counsel, and Energy Information Administration will assist in this review to ensure that the regulation is:

(a) Consistent with DOE policy and the goals of the National Energy Plan;
(b) Not unnecessarily burdensome;
(c) Preferable to other policy alternatives (especially nonregulatory alternatives) which might achieve the same objectives;
(d) Carefully drafted, legally sufficient, and enforceable; and
(e) Understandable; and
(f) Responsive to public comment.

6. Regulations not considered "significant" will be developed through other procedures, and will be published with a statement explaining why they are not "significant."

7. The Department will publish a semiannual agenda of regulations approved for development. This agenda will list the name and telephone number of the DOE point of contact for each regulation, and will be personally approved by the Secretary.

The DOE also invites written comments on its proposals to implement Section III of the Executive Order. The complete proposal to establish a systematic regulatory analysis scheme is described in Section VI of the appendix to this notice. The proposed procedures can be summarized as follows:

1. A significant regulation will be considered to have a major impact, thereby requiring analysis,

(a) If it is likely to have a substantial effect on any of the goals of the National Energy Plan;

(b) If it is likely to impose gross economic costs of $100 million per year, or cause a major increase in costs or prices for individual industries, levels of government, geographic regions, or demographic groups; or

(c) If the Secretary, Deputy Secretary, or Under Secretary considers a regulation to have a major impact for any other reason.

2. The office developing the regulation, in cooperation with the working group, will determine whether it has a major impact.

3. The office developing the regulation will be responsible for preparing a draft regulatory analysis, which will describe

(a) The mandate for government action and policy problem to be addressed;

(b) The policy objectives and their relationship to the goals of the National Energy Plan;

(c) Alternative means of achieving those objectives, analyzed in terms of their respective costs and benefits; and

(d) The preferred alternative, with an explanation of the reasons for selecting it.

4. The regulatory analysis will include a summary, which will be published in the Federal Register along with the draft of final regulation. The supporting documentation will also be made available to the public.

5. The public will be invited to comment on the findings of the regulatory analysis.

6. If a significant regulation is found not to have a major impact, the reasons justifying this decision will be published in the Federal Register.

To implement Section IV of the Executive Order and to review existing regulations, the DOE created a Regulatory Reform Task Force, chaired by the Deputy Secretary, and consisting of each Assistant Secretary, Administrator, and Office Director. This Task Force reviewed DOE's regulatory programs in search of reform initiatives which would accomplish the following objectives:

(1) Ensure that regulations are the best alternative means of achieving energy goals;

(2) Identify regulations which are conflicting, unnecessary, or otherwise contrary to DOE policy;

(3) Make regulatory reporting and compliance requirements less burdensome, without impairing the enforceability of regulations;

(4) Simplify the language of regulations, enabling nonlawyers to understand their purpose and effect;

(5) Minimize the burden on industry and the public caused by the need to collect energy data; and

(6) Enhance public participation and intra-agency and inter-agency cooperation in the development of regulations.

The 15 regulatory reform initiatives include regulations which will be amended or abolished and other internal reforms which will improve the regulatory development process. These initiatives should be substantially completed by the end of 1978 fiscal year and are just the start of what the Department of Energy expects will be a sustained effort to update, amend, or abolish regulations which are identified by sources inside or outside the Department as needing reform. By September 30, 1978, the Regulatory Reform Task Force will have identified a new reform agenda for the 1979 fiscal year.

The DOE invites comments regarding the 15 items on the Task Force's agenda. (Any proposed regulatory amendments resulting from these reform initiatives will be published in the Federal Register as notices of proposed rulemaking, and further comments will be solicited at that time). The DOE would also appreciate suggestions from the public for other regulatory reform initiatives. The 15 agenda items can be summarized as follows:

1. Economic Regulatory Administration:

(a) Options will be developed for the decontrol of kerosene jet aviation fuel, aviation gasoline, butane, and natural gasoline. Current efforts to decontrol motor gasoline will be continued. For further information, contact John P. Woods (aviation gasoline and kerojet aviation fuel decontrol), 202-254-3234; Robert A. Reinstein (butane and natural gasoline decontrol), 202-254-9766; or William E. Caldwell (motor gasoline decontrol), 202-254-8034.

(b) Crude oil pricing regulations will be reviewed, with consideration given to a possibly expanded use of market mechanisms throught the intitlements system, rather than the current schedules dictating the first-sale prices for crude oil. For further information, contact Douglas G. Robinson, 202-254-8675.

(c) Based upon this review of crude oil pricing regulations, the 1973 freeze on supplier/purchaser relationships will be examined to see if it inhibits competition or unnecessarily burdens producers and purchasers of domestic crude oil. For further information, contact Douglas G. Robinson, 202-254-8675.

(d) The current Mandatory Oil Import Program will be revised to reduce unnecessary reporting burdens, to support existing U.S. refinery capacity, and to provide incentives for increasing domestic capacity. For further information, contact Stephen W. Hall, 202-632-8494.

(e) Current procedures governing the import and export of natural gas and liquified natural gas will be reduced to help specify responsibilities of the Economic Regulatory Administration and the Federal Energy Regulatory Commission, to expedite import processing of those applications. For further information, contact Lynn Church, 202-632-4721.

(f) Current enforcement procedures will be reviewed to determine (a) whether the DOE should voluntarily restrict its enforcement audits (for nonwillful violations) to relatively recent violations), (b) whether the DOE should reduce enforcement efforts directed to very small firms, and (c) how the DOE might reduce the burden on small businesses imposed by recordkeeping and record-retention requirements. For further information, contact Phil White, 202-254-6990.

(g) The Transfer Pricing Regulations will be revised to establish a more realistic method of determining imported crude oil prices at the time of transfer between companies and components of companies. For further information, contact Daniel J. Thomas 202-254-7477.

(h) Proposed regulations involving the collection of information from 10 or more people will be published in the Federal Register along with a copy of the proposed form. This notice will include the need for information, the effect of the proposed form, an analysis of the burden to business which could result from the form, other alternatives considered, and a finding that the proposed form imposes no unnecessary regulatory burdens. For further information, contact Doug Robinson, 202-254-8675.

2. Procurement and Contracts Management:

(a) A procurement guide will be prepared, explaining the procedures through which small businesses and independent entrepreneurs can obtain DOE grants, contracts, and other financial support. For further information, contact Colonel C. Armstrong, 202-376-9215.

3. Resource Applications:

(a) Procedures will be developed for streamlining the geothermal leasing process, and the geothermal loan guarantee application forms, especially for small businesses and public bodies. For further information, contact Robert J. Kalter (leasing process), 202-566-9421; or Lawrence Falick (loan guarantee application forms) 202-376-1710.

(b) Procedures will be established for Federal power authorities to contact their customers and encourage participation in rate-setting procedures. Procedures for public hearings, conducted in consumers' communities, will be developed. For further information, contact David Ogden, 202-566-9615.

4. Energy Information Agency:

(a) Energy data systems and other existing reporting requirements will be examined to identify overlaps, duplications, and unnecessary demands on industry and others. These requirements will be eliminated or consolidated where possible. For further information, contact Rosalind Singleton, 202-254-5077.

(b) An element-by-element justification will be required of all newly-proposed reporting requirements. Criteria will be developed for maintaining these requirements, and those that do not meet these criteria will be eliminated. For further information, contact John Gross, 202-254-8600.

MY 1 78
UMI

V 43 | 84 MY 1 78 UMI

5. Office of the General Counsel:

(a) Preambles will be drafted for each proposed and final regulation, clearly and concisely describing the need for the regulation, its basic objectives, and the rights and responsibilities it bestows on industries, consumers, or other parties. For further information, contact J. Peter Luedtke, 202-566-9199.

6. Office of Intergovernmental and Institutional Relations:

(a) A number of outreach efforts will be conducted to bring the public into the regulatory development and reform processes. A pamphlet will be prepared to explain DOE regulatory procedures and opportunities for public participation. Inquiries will be sent to regulated industries, consumers, and state and local governments, asking for their suggestions, as to what regulatory programs need reform and how the DOE can expand public participation. Options will be developed to provide DOE funding to pay the fees and expenses of lawyers or other experts who participate in DOE regulatory and policy development on behalf of consumers or other public interests. For further information, contact Ed Vilade (pamphlet), 202-566-9833; Sandra L. Schneider (inquiries), 202-376-1673; or Jerry A. Penno (funding for public testimony), 202-566-9021.

III. Comment Procedure

The DOE invites the public to participate in the development of the procedures which will implement the Executive Order by submitting comments to William A. Strauss, Director, Regulatory Programs Division, Office of Policy and Evaluation, Room 4108, 1200 Pennsylvania Avenue NW., Washington, D.C. 20461. Identify the comments on the outside envelope and on the documents that are submitted. The DOE will consider all comments received by June 30, 1978, before taking further action on these matters.

Any information or data submitted pursuant to the above procedures and considered to be confidential must be so identified and submitted in one copy only. The DOE reserves the right to determine the confidential status of the information or data and to treat it accordingly.

Issued in Washington, D.C., April 25, 1978.

John F. O'Leary,
Deputy Secretary,
Department of Energy.

Interim Management Directive—United States Department of Energy

Subject: Procedures for the Development and Analysis of Regulations, Standards, and Guidelines

I. Summary

This directive establishes procedures for the development and anaylsis of regulations by the Department of Energy. It implements Sections 2 and 3 of Executive Order No. 12044 on "Improving Government Regulations."

A proposed regulation will be considered significant if it may substantially affect important policy concerns, if it is expected to be a matter of major concern to the President, Congress, or the public, or if it would require substantial DOE resources to develop and enforce it.

If an Assistant Secretary, Office Director, or Administrator considers a proposed regulation to be significant, that regulation will be developed by the lead office, in coordination with a working group representing various DOE staffs, reviewed by the Secretary, Deputy Secretary, or Under Secretary for final publication through a special clearance process, and published for comment for a minimum of 60 days.

In addition, if the lead office and working group determine that a significant regulation may have a major impact (e.g., imposing economic costs of $100 million or more), then a regulatory analysis will be prepared. This analysis will consist of a five-to-ten page summary that will be published in the Federal Register with the proposed regulation, plus supporting documentation.

A regulation not considered significant, or a significant regulation not expected to have a major impact, will be published in the Federal Register with a statement justifying that determination.

II. Objectives

This directive has been drafted, and should be implemented, to serve the following objectives:

(1) Regulations must be developed through an orderly process, with responsibilities clearly assigned, and with each interested Secretarial Officer having an opportunity to participate;

(2) Regulated industries, state and local governments, other Federal agencies, consumer groups, and interested members of the public must be encouraged to participate in the development of regulations as early in the process as possible;

(3) Regulations must be written clearly and concisely, in language understandable to those who may be affected by them.

III. Applicability

This directive applies to all regulations, except those developed by the Federal Energy Regulatory Commission. In extraordinary circumstances, the Secretary, Deputy Secretary, or Under Secretary may waive some or all of this directive's requirements for a particular regulation.

IV. Definitions

For the purposes of this directive:

"Lead office" means the Secretarial Office responsible for administering a proposed regulation.

"Working group" is the *ad hoc* group, representing interested Secretarial Officers, which works with the lead office in developing a regulation.

"Secretarial Officers" include the Administrators of the Economic Regulatory Administration and the Energy Information Administration; the Assistant Secretaries for Conservation and Solar Applications, Resource Applications, Energy Technology, Environment, Defense Programs, Intergovernmental and Institutional Relations, International Affairs, and Policy and Evaluation; the Directors of Procurement and Contracts Management, Administration, the Executive Secretariat, the Office of Energy Research, and the Office of Hearings and Appeals; the General Counsel; the Controller; and the Inspector General.

"Regulations" include notices of inquiry, advance notices of proposed rulemaking, proposed or final regulations, amendments, standards, and guidelines which are published in the Federal Register.

"Significant regulations" are those regulations which meet the criteria described in Section V (A)(3) of this directive.

"Regulatory analysis" means the examination of various policy alternatives and their impacts.

A "significant regulation" is deemed to have a "major impact" if it is likely to impose gross costs of $100 million or meets other criteria described in Section VI (C) of this directive.

V. Procedures for the Development of Regulations

A. Initiation

1. A lead office proposing to develop a regulation must first notify all Secretarial Officers and the Deputy Secretary or Under Secretary of its intent. This notification can be either oral or written, and can take place during the weekly meeting of the Action Coordination Tracking System ("ACTS"). In this notification, the lead office must indicate whether it considers the proposed regulation significant.

2. The Secretarial Officers will then notify the lead office whether they consider the regulation to be significant and whether they wish to participate in its development.

3. A regulation will be significant if the lead office or another Secretarial Officer determines that:

(1) It may substantially affect:

(a) The goals of the National Energy Plan or other energy objectives,

(b) Inflation, unemployment, economic growth, or the ability of all population groups to have adequate energy supplies at reasonable prices,

(c) The ability of individual entrepreneurs and small businesses to compete fairly in the marketplace,

(d) The quality of the environment, and the public health and safety,

(e) State and local government programs, or

(f) Existing regulatory programs of the Department of Energy or other Executive agencies;

(2) It may impose heavy compliance and reporting burdens, especially on small businesses;

(3) It is a matter of major concern to the President, Congress, or the public (especially if substantial public comments are anticipated); or

(4) It will require substantial Department of Energy resources to develop and enforce it.

B. Development of Significant Regulations

1. If the regulation is significant, the lead office, with the assistance of the Assistant Secretary for Policy and Evaluation, will establish a working group to aid in its development. This working group will include representatives from Policy and Evaluation, the Office of the General Counsel, and other interested Secretarial offices. Working group members will assist the lead office in reviewing alternative means of solving the perceived problem and setting target dates for the completion of each phase of the regulatory development process. The working group members will also perform other duties, as assigned by the lead office.

2. In coordination with the Office of Policy and Evaluation, the lead office and other working group members will prepare a plan for the subsequent evaluation of the regulation's actual impact.

3. The lead office and other working group members will work with the Office of Intergovernmental and Institutional Relations to develop a plan for including the public in the regulatory development process.

4. If the lead office and working group members find that a significant regulation is likely to have a major impact, then a regulatory analysis will be prepared. (See Section VI.) If it is found that a significant regulation requires an Environmental Impact Statement under the National Environmental Policy Act, then that statement will be prepared in coordination with the regulatory analysis.

5. After a proposed significant regulation is drafted, the draft will be circulated for comment to the Special Assistant to the Secretary and the Secretarial Officers represented on the working group. Orally or in writing, in coordination with the working group members, the lead office will inform the Secretary, Deputy Secretary, or Under Secretary of the issues considered in the regulation, the alternative approaches that have been explored, and a tentative plan for obtaining public comment. The Secretary, Deputy Secretary, or Under Secretary must approve publication of proposed significant regulations in the Federal Register.

6. Upon the approval of the Secretary, Deputy Secretary, or Under Secretary, the Office of Administration will transmit the approved regulation to the Federal Register.

7. Regulations proposed to implement any function transferred to the Secretary under Section 301 or Section 306 of the Department of Energy Organization Act will be referred to the Federal Energy Regulatory Commission (FERC) in accordance with the Memorandum of Understanding between the Secretary and FERC.

8. Proposed significant regulations will be published in the Federal Register with a statement explaining why the regulation is considered significant. The notice will provide at least a 60-day public comment period, except that the Secretary, Deputy Secretary, or Under Secretary may approve a shorter comment period under extraordinary circumstances (see Section III). Notices of inquiry and advance notices of proposed rulemaking are not subject to this 60-day comment requirement. If public hearings are held, panels will be chaired by the lead office and will include the other members of the working group and such other persons as the lead office designates.

9. When the period for public comment is completed, the lead office will summarize all comments received. Then, together with the other working group members, the lead office will analyze the public comments and revise the regulation accordingly.

10. The proposed final regulation will be circulated for comment to the Special Assistant and Secretarial Officers represented on the working group. Orally or in writing, in coordination with the working group members, the lead office will then request approval from the Secretary, Deputy Secretary, or Under Secretary to publish the final regulation. Upon final approval, the Office of Administration will transmit the regulation to the Federal Register.

C. Development of Nonsignificant Regulations

1. If the proposed regulation is not considered significant, the lead office will so inform the other Secretarial Officers and the Deputy Secretary or Under Secretary. The lead office, in coordination with representatives of other interested Secretarial Officers, will then develop and publish the regulation.

2. When a proposed nonsignificant regulation is published in the Federal Register, the notice will provide at least a 30-day public comment period and will include statements explaining the need for and probable effect of the regulation and why the regulation was not considered significant.

VI. Procedures For the Analysis of Regulations

A. No formal regulatory analysis will be required if a regulation is not considered significant.

B. For every significant regulation, the lead office and other working group members will determine whether it is likely to have a major impact. If so, a regulatory analysis will be required.

C. A significant regulation will be considered likely to have a major impact:

(1) If the regulation is likely to have a substantial effect on any of the goals of the National Energy Plan;

(2) If the regulation is likely to impose

(a) Gross economic costs of $100 million per year, or

(b) A major increase in costs or prices for individual industries, levels of government, geographic regions, or demographic groups; or

(3) If the Secretary, Deputy Secretary or Under Secretary considers the regulation likely to have a major impact for any other reason.

In determining whether a regulatory proposal is likely to have a major impact, attention should be directed to the incremental effect of the proposal on the existing regulatory environment, not to the effect of the regulation on an unregulated environment.

D. The regulatory analysis will consist of a five-to-ten page summary and supporting documentation. The summary will be prepared by the lead office, in cooperation with the working group, and will include the following:

(1) A succinct statement of the problem and the mandate for government action;

(2) A statement of policy objectives and their relationship to the goals of the National Energy Plan;

(3) A description of the major alternatives, including nonregulatory alternatives, for dealing with the problem and achieving the policy objectives;

(4) A brief analysis of the economic consequences of each of these alternatives; and

(5) An explanation of the reasons for choosing the preferred alternative.

E. The supporting documentation will be provided by the lead office, the Energy Information Administration

(EIA) and other DOE offices that have been assigned tasks by the lead office, and will include the following:

(1) A more extensive statement of the problem;

(2) A description and analysis of each reasonable and feasible policy alternative, including:

(a) legislative authority,

(b) institutional, legal, or other impediments to implementation,

(c) enforceability, and

(d) sunset provisions;

(3) a comparative analysis of the impacts of these alternatives, including their effects on:

(a) the goals of the National Energy Plan and other energy objectives,

(b) the economic well-being of the Nation as a whole, individual industries, levels of government, geographic regions, and demographic groups,

(c) compliance and reporting requirements;

(d) other relevant costs and benefits, and

(e) the fairness of the distribution of the costs and benefits.

F. The regulatory analysis will be circulated to appropriate program offices, the Office of the General Counsel, the Office of Policy and Evaluation, the Energy Information Administration, and the Office of Intergovernmental and Institutional Relations for review. Concurrence by the Office of General Counsel, Policy and Evaluation, and the lead office will be obtained prior to release of the regulatory analyses.

G. When a proposed regulation is published in the FEDERAL REGISTER, the summary portion of the draft regulatory analysis will be included, and the public will be asked to comment on the findings of the analyses. The FEDERAL REGISTER notice will also indicate how members of the public can obtain the supporting documentation.

H. After the end of the public comment period, the draft regulatory analyses will be reviewed by the lead office in light of the comments received. If any changes are made, the revised analysis must be circulated and concurred in as indicated in (F) above.

I. When the final regulation is published in the FEDERAL REGISTER, the summary portion of the final regulatory analysis will be included. The FEDERAL REGISTER notice will also indicate how members of the public can obtain the supporting documentation.

J. If a significant regulation is determined not to have a major impact, the lead office, in cooperation with the working group, will prepare a statement justifying this determination and describing the anticipated effects of the regulation. This statement will be published in the FEDERAL REGISTER with the regulation. Information copies of the statement will be provided to the office of Policy and Evaluation, the Energy Information Administration, the Office of Intergovernmental and Institutional Relations, the Office of the General Counsel, and the National Energy Information Center.

VII. RESPONSIBILITIES

A. The *Secretary* will approve the publication of the semiannual regulation agenda.

B. The *Secretary, Deputy Secretary,* or *Under Secretary* will be informed of the development of all regulations and will approve the publication in the FEDERAL REGISTER of all proposed and final significant regulations.

C. The *lead office* is responsible for the development of a regulation and the preparation of any regulatory analysis. This includes assigning and coordinating working group tasks, notifying the Secretary, Deputy Secretary, or Under Secretary of the need for the regulation, obtaining their approval for publication of a proposed and final significant regulation, and assuring that the regulation undergoes proper coordination.

D. *Working group members* will perform tasks pertaining to regulation development and analysis assigned by the lead office. They are responsible for representing their Secretarial Officers' views and will keep their Secretarial Officers informed of the progress and content of the regulation under development.

E. *The Assistant Secretary for Policy and Evaluation* (AS/PE) is responsible for coordinating the policy aspects of the DOE's rulemaking activity; ensuring consistency with the Executive Order, the National Energy Plan, and other DOE policy; and acting as interagency liaison on matters concerning the Executive order. AS/PE will assist the lead office in organizing working groups and will participate in the development and analysis of all regulations. AS/PE will review all proposed and final regulations to ascertain whether they are understandable, not unnecessarily burdensome, preferable to nonregulatory alternatives, and consistent with DOE policy. AS/PE will also review draft and final regulatory analyses, and coordinate DOE responses to the interagency Regulatory Analyses Review Group.

F. The *General Counsel* will participate in the development and analysis of all regulations and will review all proposed and final regulations to ascertain whether they are carefully drafted, legally sufficient, and enforceable. The General Counsel is also responsible for maintaining a list of all significant regulations approved for development and preparing for publication in the FEDERAL REGISTER the semiannual regulation agenda.

G. The *Assistant Secretary for Intergovernmental and Institutional Relations* (AS/IR) will assist the working group in soliciting the views of outside persons and organizations, the Congress, and state and local governments, and other Executive agencies. AS/IR will assist the working groups in preparing and distributing press releases, answering press inquiries, coordinating press coverage of hearings, and answering Congressional correspondence.

H. The *Administrator of the Energy Information Administration* (EIA) is responsible for reviewing the data collection requirements of all regulations, ensuring that they are compatible with existing DOE data systems, are properly cleared with OMB, and do not impose unnecessary paperwork or reporting requirements on regulated industries. EIA will also help prepare documentation for regulated analyses at the request of the lead office.

I. All *Secretarial Officers* are responsible for having their representatives participate in the development of regulations in which they have an interest.

VIII. SEMIANNUAL REGULATIONS AGENDA

A. In March and October of each year, the DOE will publish a semiannual regulations agenda in the FEDERAL REGISTER, describing the status of significant regulatory actions approved for development. The General Counsel, in coordination with the Assistant Secretary for Policy and Evaluation, the Administrator of the ERA, and other lead offices will assist in drafting the regulatory agenda. This agenda will list the name and telephone number of the DOE point of contact for each regulation. The Secretary will approve the regulations agenda before publication.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Executive Order 12056 • **April 28, 1978**

Exemption of G. Joseph Minetti from Mandatory Retirement

G. Joseph Minetti, Member, Civil Aeronautics Board, became subject to mandatory retirement for age on July 31, 1977, under the provisions of Section 8335 of Title 5 of the United States Code unless exempted by Executive Order. Mr. Minetti was exempted from mandatory retirement until September 30, 1977, by Executive Order No. 12006 of July 29, 1977, until October 31, 1977, by Executive Order No. 12011 of September 30, 1977, until January 31, 1978, by Executive Order No. 12016 of October 31, 1977, and until May 1, 1978 by Executive Order No. 12037 of January 31, 1978.

In my judgment, the public interest requires that G. Joseph Minetti continue to be exempted from such mandatory retirement.

NOW, THEREFORE, by virtue of the authority vested in me by subsection (c) of Section 8335 of Title 5 of the United States Code, I hereby exempt G. Joseph Minetti from mandatory retirement until August 31, 1978.

Jimmy Carter

THE WHITE HOUSE,
April 28, 1978.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Defense and Department of Housing and Urban Development

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment (1) excepts under Schedule C a position in the Department of Defense because it is confidential in nature, and (2) corrects a final rule appearing on page 5793 in the FEDERAL REGISTER of February 10, 1978 (FR 78-3852) which showed that 213.3384(a)(31) was revoked. This position was revoked in error.

EFFECTIVE DATE: April 18, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3306(a)(52) and 213.3384(a)(31) are added as set out below:

§ 213.3306 Department of Defense.

(a) *Office of the Secretary.* • • •

(52) One Personal and Confidential Assistant to the Assistant General Counsel (Intelligence, International and Investigative Programs).

• • • • • •

§ 213.3384 Department of Housing and Urban Development.

(a) *Office of the Secretary.* • • •

(31) One Special Assistant to the Secretary.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

For the United States Civil Service Commission.

JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc. 78-11707 Filed 5-1-78; 8:45 am]

[6325-01]

PART 213—EXCEPTED SERVICE

Consumer Product Safety Commission and National Transportation Safety Board

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment (1) excepts under Schedule C a position in the Consumer Product Safety Commission because it is confidential in nature, and (2) changes the headnote and title of one position at the National Transportation Safety Board because it more appropriately reflects the duties of the position and the current title of the superior.

EFFECTIVE DATE: April 7, 1978

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3360(d), the headnote of 213.3396 (b) and (b)(1) are amended to read as follows:

§ 213.3360 Consumer Product Safety Commission.

• • • • • •

(d) One Special Assistant and one Staff Assistant to a Commissioner.

• • • • • •

§ 213.3396 National Transportation Safety Board.

• • • • • •

(b) Office of the Managing Director.

(1) One Secretary (Steno) to the Managing Director.

(5 U.S.C. 3301, 3302, EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

For the United States Civil Service Commission.

JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc. 78-11708 Filed 5-1-78; 8:45 am]

[6325-01]

PART 213—EXCEPTED SERVICE

Department of the Interior

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: Schedule A exception for positions of teacher, GS-5/7/9, at schools run by the Bureau of Indian Affairs which become vacant during the school year is amended to permit filling of positions during the months of July through May which become vacant after teachers have reported for duty because it is not practicable to hold an examination to fill such vacancies. The authority is also amended to show that appointments may not exceed the last day of the school year in which they are made.

EFFECTIVE DATE: April 17, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 632-4533.

Accordingly, 5 CFR 213.3112(b)(3) is amended as set out below:

§ 213.3112 Department of the Interior.

• • • • • •

(b) *Bureau of Indian Affairs* • • •

(3) Positions of teacher, GS-5/7/9, at schools run by the Bureau of Indian Affairs, which become vacant after teachers have reported for duty. Appointments under this authority may be made only during the months of July through May and may not exceed the last day of the school year during which they are made.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

For the United States Civil Service Commission.

JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc. 78-11709 Filed 5-1-78; 8:45 am]

[6325-01]

PART 213—EXCEPTED SERVICE

Department of State and Community Services Administration

AGENCY: Civil Service Commission.

M Y 2 — 7 8

UMI

V 4 3 — 8 5 M Y 2 7 8 UMI

ACTION: Final rule.

SUMMARY: This amendment (1) excepts under Schedule C a position at the Department of State because it is confidential in nature, and (2) changes Staff Assistant, Office of Interagency and External Affairs to Staff Assistant to the Deputy Director, Community Services Administration. This organizational transfer does not effect the Schedule C exception.

EFFECTIVE DATE: April 13, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3304(a)(8) and 213.3373(a)(9) are added and 213.3373(g)(2) is amended as set out below:

§ 213.3304 Department of State.

(a) *Office of the Secretary.* • • •

(8) One Staff Assistant to the Ambassador-at-Large.

• • • • •

§ 213.3373 Community Services Administration.

(a) *Office of the Director.* • • •

(9) One Staff Assistant to the Deputy Director.

• • • • •

(g) *Office of Interagency and External Affairs.* • • •

(2) One Special Assistant to the Associate Director.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218.)

For the United States Civil Service Commission.

JAMES C. SPRY,
Executive Assistant to the Commissioners.

[3410-02]

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Peach Reg. 1]

PART 918—FRESH PEACHES GROWN IN GEORGIA

Grade and Size Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes minimum grade and size requirements for fresh peaches grown in Georgia for the 1978 season. These requirements are designed to promote orderly marketing in the interest of producers and consumers.

EFFECTIVE DATE: May 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement, as amended, and Order No. 918, as amended (7 CFR part 918), regulating the handling of peaches grown in Georgia, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Industry Committee, established under this marketing order, and upon other information, it is found that the limitation of handling of peaches, as hereafter provided, will tend to effectuate the declared policy of the act.

The committee met on April 18, 1978, to consider supply and market conditions and other factors affecting the need for regulation. It recommended minimum grade and size requirements for shipments of fresh peaches grown in Georgia, except for those shipped in bulk to adjacent markets, which it deemed advisable for the 1978 season. The exception of peaches shipped in bulk to adjacent markets from grade, size, and inspection requirements follows the practice of prior years, and is designed to permit shipment of peaches which are of a quality and size acceptable in the adjacent markets but are not suitable for distribution in more distant markets in competition with peaches from other areas. The less stringent size requirements early in the season reflect the fact that earlier-maturing varieties of peaches generally mature at smaller sizes than do later maturing varieties.

The committee reports that it expects 1,800 carlots of inspected peaches to be shipped this season, compared with the past 6-year average of 1,514 carlots. It also reports that the developing crop is of good quality, and the fruit is sizing well. Shipment of this season's Georgia peach crop is expected to begin May 3, and ample supplies of peaches meeting the following requirements are expected to be available to satisfy the demand. Peaches failing to meet these requirements may be marketed in Georgia, shipped to adjacent markets, or utilized in processing.

The following regulations reflect the Department's appraisal of the need for regulation based on the current and prospective crop and market conditions.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

§ 918.320 Peach regulation 1.

(a) No handler shall ship, except peaches in bulk to destinations in the adjacent markets, any peaches which:

(1) During the period May 3 through August 31, 1978, do not grade at least 85 percent U.S. No. 1 quality: *Provided,* That peaches with well-healed hail marks or split pits not scored as serious damage, or peaches with not more than 1 percent decay, may be shipped if they otherwise meet the requirements of this subparagraph.

(2) During the period May 3 through May 15, 1978, are smaller than 1¾ inches in diameter, except that not more than 10 percent, by count, of such peaches in bulk lot or any lot of packages, and not more than 15 percent, by count of such peaches in any container in such lot, may be smaller than 1¾ inches in diameter.

(3) During the period May 16 through August 31, 1978, are smaller than 1⅞ inches in diameter, except that not more than 10 percent, by count, of such peaches in any bulk lot or of any lot of packages, and not more than 15 percent, by count, of such peaches in any container in such lot, may be smaller than 1⅞ inches in diameter.

(b) The inspection requirement contained in § 918.64 shall not be applicable to any shipment of peaches in bulk to destinations in the adjacent markets, except for peaches in new containers, during the period May 3 through August 31, 1978.

(c) The maturity regulations contained in § 918.400 of this part are hereby suspended with respect to shipments of peaches to all destinations other than those in the adjacent markets during the period May 3 through August 31, 1978.

(d) As used in this section, "handler," "adjacent markets," "peaches," "peaches in bulk," and "ship" mean the same as defined in this marketing order, and "U.S. No. 1" and "diameter" means the same as defined in the U.S. Standards for Peaches. (7 CFR 51.1210-51.1223).

(Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).)

Dated: April 26, 1978.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 78-11827 Filed 5-1-78; 8:45 am]

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

ADJUSTMENT OF IMMIGRATION STATUS OF INDOCHINA REFUGEES

Final Rule

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations of the Immigration and Naturalization Service to implement Pub. L. 95-145 enacted October 28, 1977, which provides that under certain stated conditions, refugees who are natives of Vietnam, Laos, and Cambodia, may adjust their immigration status to that of lawful permanent residents of the United States. These amendments are necessary to implement that legislation.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536, telephone 202-376-8373.

SUPPLEMENTARY INFORMATION:

I. INTRODUCTION

On October 28, 1977, Pub. L. 95-145 (91 Stat. 1223) was signed by the President, to take effect upon his approval. Title I of that legislation provides that the Attorney General may, in his discretion, and under such regulations as he may prescribe, adjust the status of any alien who is a native or citizen of Vietnam, Laos or Cambodia, to that of a lawful permanent resident of the United States. This final rulemaking document amends various regulations of the Immigration and Naturalization Service to implement that legislation.

II. OUTLINE OF TITLE I OF PUB. L. 95-145 (91 STAT. 1223)

Section 101(b) provides that the benefits of this legislation shall apply to any alien who is a native or citizen of Vietnam, Laos, or Cambodia, who was paroled into the United States as a refugee from those countries under section 212(d)(5) of the Act subsequent to March 31, 1975, but prior to January 1, 1979 or who was inspected and admitted or paroled into the United States on or before March 31, 1975, and was physically present in the United States on March 31, 1975. Under section 101(a), the alien must apply within 6 years after October 28, 1977; he must be otherwise eligible to receive an immigrant visa and be otherwise admissible to the United States for permanent residence, except for the grounds of excludability specified in secs. 212(a) (14), (15), (20), (21), (25), and (32) of the Immigration and Nationality Act; and he must have been physically present in the United States for at least 2 years.

Section 102 provides that upon approval of the application, the Attorney General shall establish a record of the alien's admission for permanent residence as of March 31, 1975, or the date of the alien's arrival in the United States whichever date is later.

Section 103 provides that an alien described in section 101 who acquired lawful permanent residence status prior to the date of enactment of Pub. L. 95-145, may, upon application, have his admission for permanent residence recorded as of March 31, 1975, or the date of his arrival in the United States, whichever date is later.

Section 104 provides that when an alien has been granted lawful permanent residence under this title, his spouse and children, regardless of nationality, may also be granted such status by the Attorney General if they otherwise qualify under section 101(a). The date of their admission for permanent residence shall be the same as that of the alien through whom they derive benefits under this section.

Section 105 provides that any alien who ordered, assisted, or otherwise participated in the persecution of any person because of race, religion, or political opinion shall be ineligible for permanent residence under any provision of this title.

Section 106 provides that there shall be no reduction in the number of visas authorized to be issued when the application of an Indochinese refugee has been approved. Also, under section 106, no fee is to be charged for the filing of an adjustment application under this title.

Section 107 provides that except as otherwise specifically provided in this title, the definitions contained in the Immigration and Nationality Act shall apply in the administration of this title. Nothing contained in this title shall be held to repeal, amend, alter, modify, effect, or restrict the powers, duties, functions, or authority of the Attorney General in the administration and enforcement of the Immigration and Nationality Act or any other law relating to immigration, nationality, and naturalization. The fact that an alien may be eligible to be granted the status of having been lawfully admitted for permanent residence under this title shall not preclude him from seeking such status under any other provision of law for which he may be eligible.

III. OUTLINE OF AMENDMENTS TO CHAPTER I OF TITLE 8 OF THE CODE OF FEDERAL REGULATIONS

In order to implement Pub. L. 95-145, the following described amendments will be made to the indicated sections of Title 8 of the Code of Federal Regulations.

8 CFR 103.1(m)(3) will be added to provide that decisions on Indochinese refugee applications for adjustment of status may be appealed to the Regional Commissioner.

8 CFR 242.17(a) will be amended to include reference to sections 101 and 104 of Pub. L. 95-145.

8 CFR 245.1(c) will be amended to include reference to sections 101 and 104 of Pub. L. 95-145.

8 CFR 245.1(f) will be amended to provide that no fee will be required for filing of an application to overcome exclusionary grounds filed concurrently with an application for adjustment of status in an Indochinese refugee case.

New 8 CFR 245.1(h) will be added to set forth eligibility requirements for the filing of adjustment applications under section 101 and "roll back" applications under section 103 of Pub. L. 95-145.

8 CFR 245.2(a)(1) will be redrafted for clarity and amended to include reference to sections 101 and 104 of Pub. L. 95-145.

8 CFR 245.2(a)(2) will be amended to include regulations for filing applications for adjustment of status under sections 101 and 104 of Pub. L. 95-145.

8 CFR 245.2(a)(3) will be amended to provide that the date of readmission following a temporary absence abroad will be disregarded for purposes of fixing the date of "arrival" in the case of an Indochinese refugee who has no intention of abandoning his U.S. residence.

8 CFR 245.2(a)(4) will be amended to provide that an appeal shall lie from a decision by the district director in the case of an application for adjustment of status filed by an Indochinese refugee under section 101 or 104 of Pub. L. 95-145.

New 8 CFR 245.2(e) will be added to provide regulations for the filing of an application under section 103 of Pub. L. 95-145.

8 CFR 245.4(b) will be deleted. Enactment of Pub. L. 95-145 renders it unnecessary.

8 CFR 245.6 will be amended to include regulations respecting medical examination of applicants for adjust-

V 4 3 — 8 5

ment of status under the provisions of Pub. L. 95-145.

8 CFR 299.1 will be amended to include reference to Form I-485C "Application for Creation of a Record of Lawful Admission for an Indochina Refugee", the application form to be used in connection with applications for adjustment filed under Pub. L. 95-145.

IV. REGULATIONS PRESCRIBED

The following amendments are hereby prescribed to Chapter I of Title 8 of the Code of Federal Regulations:

PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

1. 8 CFR 103.1(m) is amended by adding a new subparagraph (3) to read as follows:

§ 103.1 Delegations of authority

• • • • • •

(m) Regional Commissioners. • • •

• • • • • •

(3) Decisions on Indochinese refugee applications for adjustment of status, as provided in §§ 245.2(a)(4) and 245.2(e);

• • • • • •

PART 242—PROCEEDINGS TO DETERMINE DEPORTABILITY OF ALIENS IN THE UNITED STATES: APPREHENSION, CUSTODY, HEARING, AND APPEAL

2. 8 CFR 242.17(a) is amended by revising the first sentence to read as follows:

§ 242.17 Ancillary matters, applications.

(a) *Creation of the status of an alien lawfully admitted for permanent residence.* The respondent may apply to the special inquiry officer for suspension of deportation under section 244(a) of the Act, for adjustment of status under section 245 of the Act, or under section 1 of the Act of November 2, 1966, or under section 101 or 104 of the Act of October 28, 1977, or for creation of a record of lawful admission for permanent residence under section 214(d) or 249 of the Act; such application shall be subject to the requirements contained in Parts 244, 245, and 249 of this chapter. • • •

• • • • •

PART 245—ADJUSTMENT OF STATUS TO THAT OF PERSON ADMITTED FOR PERMANENT RESIDENCE

§ 245.1 [Amended]

3. The first sentence of 8 CFR 245.1(c) is amended by adding reference to sections 101 and 104 of the Act of October 28, 1977. As amended, the first sentence of 8 CFR 245.1(c) reads as follows:

• • • • • •

(c) *Officials and treaty aliens.* An alien who has a nonimmigrant status under paragraph (15)(A), (15)(E), or (15)(G) of section 101(a) of the Act, or has an occupational status which would, if he were seeking admission to the United States, entitle him to a nonimmigrant status under any of such paragraphs of section 101(a) of the Act is not eligible for the benefits of section 245 of the Act, section 13 of the Act of September 11, 1957, section 1 of the Act of November 2, 1966, or section 101 or 104 of the Act of October 28, 1977, unless he first executes and submits with his application the written waiver required by section 247(b) of the Act and Part 247 of this chapter. • • •

• • • • • •

4. 8 CFR 245.1(f) is amended by adding a new sentence to the end thereof, to read as follows:

• • • • • •

(f) *Concurrent applications to overcome exclusionary grounds.* • • • No fee shall be required for the filing of an application to overcome exclusionary grounds of the Act filed concurrently with an application for adjustment of status filed pursuant to the provisions of the Act of October 28, 1977, and of this part.

• • • • • •

5. 8 CFR 245.1 is amended by adding a new paragraph (h) to read as follows:

• • • • • •

(h) *Indochinese refugee.* An alien who ordered, assisted, or otherwise participated in the persecution of any person because of race, religion, or political opinion is not eligible for the benefits under any provisions of the Act of October 28, 1977. An alien is not eligible for the benefits of any provisions of the Act of October 28, 1977, unless he has been physically present in the United States for at least two years subsequent to March 31, 1975 and prior to the date of filing the application for adjustment of status. An alien is not eligible for the benefits of section 101 or 103 of the Act of October 28, 1977, unless he is a native or citizen of Vietnam, Laos, or Cambodia who was paroled into the United States as a refugee from those countries under section 212(d)(5) of the Immigration and Nationality Act subsequent to March 31, 1975, but prior to January 1, 1979; or who was inspected and admitted or paroled into the United States on or before March 31, 1975, and was physically present in the United States on March 31, 1975.

• • • • • •

§ 245.2 [Amended]

6. 8 CFR 245.2(a)(1) is revised for clarity and by adding reference to §§ 101 and 104 of the Act of October 28, 1977. As revised, § 245.2(a)(1) reads as follows:

(a) *General*—(1) *Jurisdiction.* An alien who believes he meets the eligibility requirements of section 245 of the Act or section 1 of the Act of November 2, 1966, or section 101 or 104 of the Act of October 28, 1977, and § 245.1 shall apply to the district director having jurisdiction over his place of residence. After an alien has been served with an order to show cause or warrant of arrest, his application for adjustment of status under section 245 of the Act or section 1 of the Act of November 2, 1966 or section 101 or 104 of the Act of October 28, 1977, shall be made and considered only in proceedings under Part 242 of this chapter. An adjustment application by an alien paroled under section 212(d)(5) of the Act, which has been denied by the district director, may be renewed in exclusion proceedings under section 236 of the Act only under the following two conditions: First, the denied application must have been properly filed subsequent to the applicant's earlier inspection and admission to the United States; second, the applicant's later absence from and return to the United States must have been under the terms of an advance parole authorization on Form I-512 granted to permit the applicant's absence and return to pursue the previously filed adjustment application.

• • • • • •

7. 8 CFR 245.2(a)(2) is amended by revising the existing eighth sentence; by adding a new ninth sentence between the existing eighth and ninth sentences; by amending the existing tenth sentence; and by adding six new sentences following the existing tenth sentence. The amended provisions of 8 CFR 245.2(a)(2) read as follows:

(a) • • •

(2) *Filing application.* • • • The application under section 245 of the Act shall be made on Form I-485, while the application under section 1 of the Act of November 2, 1966, shall be made on Form I-485A, and the application under section 101 or 104 of the Act of October 28, 1977, shall be made on Form I-485C. A separate application shall be filed by each applicant. Each application shall be accompanied by executed Form G-325A, if the applicant has reached his 14th birthday, which shall be considered as part of the application. An application under this part shall be accompanied by the documents specified in the instructions which are attached to the application. No fee shall be required for filing an application for the benefits of the Act of November 2, 1966 or the Act of October 28, 1977. An application for adjustment of status under section 101 or 104 of the Act of October 28, 1977, shall not be considered properly filed for acceptance and processing unless filed on or before October 28, 1983. An alien is ineligible for the benefits of the Act of October 28, 1977, unless he has been physically present in the United States for at least two years. An applicant is considered to have been physically present in the United States for at least two years within the meaning of the Act of October 28, 1977, only if he has been actually physically present in the United States for a period or periods in the aggregate of at least two years subsequent to March 31, 1975 and prior to the date of filing the application. An application for adjustment of status under the Act of October 28, 1977, by the spouse or child of a native or citizen of Vietnam, Laos or Cambodia shall not be processed under the provisions of section 104 of that Act unless the applicant is ineligible for adjustment under the provisions of section 101 of that Act. For the purpose of section 104 of the Act of October 28, 1977, a spouse or child, regardless of nationality, of a native or citizen of Vietnam, Laos or Cambodia shall, upon approval of an application for adjustment of status, be accorded permanent residence as of the date accorded the alien through whom such spouse or child derives eligibility under section 104 or the date of such spouse or child's arrival in the United States, whichever is later.

• • • • • •

8. 8 CFR 245.2(a)(3) is amended by adding two new sentences at the end thereof to read as follows:

(a) • • •

(3) *Departure.* • • • In determining the date of the alien's "arrival" in the United States within the meaning of section 102 of the Act of October 28, 1977, in the case of an applicant who was physically present in the United States on March 31, 1975 or who was paroled into the United States subsequent to March 31, 1975, but prior to January 1, 1979, and who subsequently departed temporarily with no intention of abandoning his residence in the United States and was readmitted or paroled into the United States upon his return, the date of the applicant's arrival after such temporary absence or absences shall be disregarded. For the purpose of section 102 of the Act of October 28, 1977, the date of the alien's "arrival" in the United States shall be the date of initial parole subsequent to March 31, 1975, but prior to January 1, 1979 as an Indochinese refugee under section 212(d)(5) of the Immigration and Nationality Act.

• • • • • •

9. 8 CFR 245.2(a)(4) is revised by amending the existing second sentence, and by adding two new sentences at the end of the existing paragraph. As revised, 8 CFR 245.2(a)(4) reads as follows:

(a) • • •

(4) *Decision.* The applicant shall be notified of the decision and, if the application is denied, of the reasons therefor. Except as otherwise provided in this subparagraph, no appeal shall lie from the denial of an application by the district director but such denial shall be without prejudice to the alien's right to renew his application in proceedings under Part 242 of this chapter, or under Part 236 if the alien is a parolee who meets the conditions specified in subparagraph (1) of this paragraph. An application for adjustment of status under section 245 of the Act as a preference or nonpreference alien shall not be approved until an immigrant visa number has been allocated by the Department of State. An appeal shall lie from the decision of the district director on an application for the benefits of section 101 or 104 of the Act of October 28, 1977; if the application is denied, the applicant shall be advised of his right to appeal in accordance with the provisions of Part 103 of this chapter. No fee shall be required for filing such appeal.

• • • • • •

10. 8 CFR 245.2 is amended by adding a new paragraph (e) to read as follows:

• • • • • •

(e) *Application under section 103 of the Act of October 28, 1977.* An application by a native or citizen of Vietnam, Laos, or Cambodia who was lawfully admitted to the United States for permanent residence under the provisions of the Immigration and Nationality Act subsequent to March 31, 1975 but prior to October 28, 1977, and who desires such admission to be recorded as of an earlier date pursuant to section 103 of the Act of October 28, 1977, shall be made on Form I-485C. The application shall be submitted to the district director having jurisdiction over the applicant's place of residence in the United States. The decision on the application shall be made by the district director. The applicant shall be notified of the decision and, if the application is denied, of the reasons therefor and of his right to appeal in accordance with the provisions of Part 103 of this chapter. No fee shall be required either for the filing of the application or for the filing of the appeal. If the application is approved, the applicant, upon surrender of his Form I-151, will be furnished with a replacement thereof bearing the new date as of which the lawful admission for permanent residence has been recorded.

• • • • • •

11. 8 CFR 245.4(b) is deleted.

§ 245.4 Adjustment of status of aliens within the proviso to section 203(a)(7) of the Act.

• • • • • •

(b) [Deleted]

• • • • • •

12. 8 CFR 245.6 is amended by adding a new second sentence between the existing first and second sentences thereof, to read as follows:

§ 245.6 Medical examination.

• • • Medical examination of an applicant for adjustment of status under the provisions of the Act of October 28, 1977, who was paroled into the United States under section 212(d)(5) of the Immigration and Nationality Act, and who was medically examined when processed for parole by a Service officer in the United States or abroad, shall not be required unless medical grounds for exclusion existed when the applicant was processed for parole or such grounds presently appear to exist. • • •

• • • • • •

PART 299—IMMIGRATION FORMS

13. Section 299.1 is amended to add the following form in alphabetical and numerical sequence:

M Y 2 — 7 8 UMI

V 4 3 1 85

§ 299.1 Prescribed forms.

Form No.	Title and description
•	•
I-485C	Application for Creation of a Record of Lawful Admission for an Indochina Refugee
•	•

(Title I of Pub. L. 95-145 enacted October 28, 1977 (91 Stat. 1223), sec. 103 of the Immigration and Nationality Act (8 U.S.C. 1103). Interpret or apply secs. 101, 212, 242 and 245 (8 U.S.C. 1101, 1182, 1252 and 1255).)

The amendments contained in this order are issued pursuant to section 552 of Title 5 of the United States Code (80 Stat. 383), as amended by Pub. L. 93-502 (88 Stat. 1561), and the authority contained in section 103 of the Immigration and Nationality Act (8 U.S.C. 1103), 28 CFR 0.105(b) and 8 CFR 2.1. Compliance with the provisions of section 553 of Title 5 of the United States Code as to notice of proposed rulemaking and delayed effective date is unnecessary in this instance because these amendments confer benefits on the persons affected thereby, and are being published in implementation of Pub. L. 95-145 which became effective October 28, 1977.

Effective date. The amendments prescribed in this order become effective on: May 2, 1978.

Dated: April 26, 1978.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

[FR Doc. 78-11896 Filed 5-1-78; 8.45 am]

[7510-01]

Title 14—Aeronautics and Space

CHAPTER V—NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

PART 1205—SPACE SCIENCE FLIGHT INVESTIGATIONS

Subpart 1205.1—Policy Concerning Data Obtained From Space Science Flight Investigations

AGENCY: National Aeronautics and Space Administration.

ACTION: Final regulations.

SUMMARY: The National Aeronautics and Space Administration (NASA) finalizes revision to its policy concerning data obtained from Space Science Flight Investigations. This revision is necessary to redefine the roles and responsibilities of individuals conducting space science investigations, Federal officials concerned with implementation of programs, and the National Space Science Data Center (NSSDC) to insure proper use and preservation of space science data. The revised policy, through the use of a Project Data Management Plan, will reduce the amount of data acquired by the NSSDC and insure that the data deposited in the NSSDC is processed in the most efficient, cost effective manner.

DATE: Effective date May 2, 1978.

ADDRESS: SRT Coordinator, Office of Space Science, National Aeronautics and Space Administration, Washington, D.C. 20546.

FOR FURTHER INFORMATION CONTACT:

Franklin G. Tate, 202-755-3833.

SUPPLEMENTARY INFORMATION: On December 28, 1977, a notice of revision to the Policy Concerning Data Obtained from Space Science Flight Investigations was published in the FEDERAL REGISTER (42 FR 64706). The purpose of the revision is to redefine responsibilities of individuals concerned with implementation of programs and the NSSDC to insure proper use and preservation of space science data in the most cost efficient manner. Interested parties were granted 30 days to submit written comments regarding the proposed revisions. No written comments were received.

The proposed revised Policy Concerning Data Obtained from Space Science regulations is hereby adopted without change, as set forth below.

ROBERT A. FROSCH,
Administrator.

Subpart 1205.1—Policy Concerning Data Obtained From Space Science Flight Investigations

Sec.

1205.100 Scope.
1205.101 Policy.
1205.102 Responsibility.
1205.103 Support of research.

Appendix A—Glossary of terms and abbreviations.
Appendix B—Functions and operation of National Space Science Data Center.

AUTHORITY: 42 U.S.C. 2454.

Subpart 1205.1—Policy Concerning Data Obtained From Space Science Flight Investigations

§ 1205.100 Scope.

(a) This subpart continues the policy and responsibilities for reduction, analysis, reposition, preservation, and dissemination of data obtained from space science flight investigations. For glossary of terms and abbreviations, see Appendix A to this subpart.

(b) These provisions apply to all data obtained from space flight experiments processed by the Space Science Steering Committee and approved by the Associate Administrator for Space Science. The policy and procedures for the conduct of the Space Science Program and the responsibilities for the selection and support of scientific investigations and Investigators are set forth in NASA Management Instruction 7100.11 and NASA Handbook 8030.6.

§ 1205.101 Policy.

(a) In conducting space science flight experiments, NASA shall seek to:

(1) Preserve the integrity of each investigation.

(2) Encourage the participation of the best qualified scientists.

(3) Make the results of investigations generally available to the scientific community at the earliest practicable time.

(4) Document the instrument performance and probable cause of malfunctions that occur.

(b) NASA shall rely on individual scientists as Principal Investigators (PIs) to carry out a complete investigation by:

(1) Selecting, when appropriate, associates known as Co-Investigators (COIs) who have supporting roles in the investigation.

(2) Conceiving specific investigations.

(3) Developing, when appropriate, the instrumentation for the investigation.

(4) Participating actively, wherever appropriate, in the actual conduct of the investigation.

(5) Reducing and analyzing the data obtained.

(6) Publishing their findings as soon as practicable.

(7) Making their Reduced Data Records (RDRs) and Analyzed Data Records (ADRs) along with supporting documentation available on a timely basis for use by the scientific community and the news media, in accordance with a Project Data Management Plan (PDMP).

(8) Documenting any significant malfunctions which occur during the lifetime of the experiment.

(c) For certain missions, NASA shall also rely on Guest Investigators to obtain data within the capability of a given mission, which are additional to the mission's primary objectives, and to perform an analysis of the acquired data. Such projects generally maintain a data retrieval and dissemination system or provide a data analysis system for the life of the project. In such cases the PDMP should address the exchange of information with the National Space Science Data Center (NSSDC) so it can act as a switching center by referring data requesters to the appropriate contact or making requests on their behalf and handling the distribution. In addition, the eventual transfer of appropriate data to a more permanent repository prior to termination of the project shall be addressed in the PDMP.

(d) For facility-class payload missions, NASA may rely on Guest Investigators to obtain and analyze data. In connection with such missions a complete analysis activity may be provided for the Investigators; this activity may involve the creation of an institute with a significant lifetime. In such cases the PDMP should address the exchange of information with the NSSDC so it can act as a switching center by referring data requesters to the appropriate contact or making requests on their behalf and handling the distribution. In addition, the eventual transfer of appropriate data to a more permanent repository prior to termination of the mission activity or institute shall be addressed in the PDMP.

(e) A provision for the release of data obtained by the individual Investigator from the investigation shall be included in an agreement with the Investigator at the time of selection to participate. NASA shall take such action as necessary to insure that data are released as required to meet scientific, technological, and public information needs.

(f) Foreign scientists participating in cooperative space science flight investigations shall be governed by appropriate international agreements and/or memoranda of understanding.

§ 1205.102 Responsibility

(a) OSS. The Associate Administrator for Space Science is responsible for the issuance of implementing management instructions and guidelines consistent with the provisions of this subpart. The Assistant Associate Administrator for Space Science (Science) is responsible for the program management of the NSSDC and for insuring that any noncompliance with PDMPs will be factored into future selection considerations.

(b) OSS Program Scientist. (1) Each Program Scientist is responsible for establishing the data analysis policies for each mission including data sharing and collaborations on data analysis. He/she will review the PDMP to assure that data interpretation meetings will be conducted, that wide dissemination of data through presentations and publications will occur and that data and supporting information will be made available to the scientific community in accordance with the PDMP and, along with the Project Scientist, he/she will monitor the execution of the PDMP. He/she will assist NASA public affairs personnel in meeting public information needs.

(2) Each Program Scientist will insure that the letter of notification of selection stipulates that the Principal Investigator (PI), Team Leader (TL), or Guest Investigator (GI) contributes to a PDMP prior to receipt of flight data which documents the plans for data analysis, dissemination of results and for making ADRs, RDRs and supporting documentation available to the scientific community through the designated data dissemination facility. The notification letter will further stipulate that selection for further opportunities will be jeopardized by failure to meet the commitments of the PDMP. The Program Scientist is also responsible for sending information for the Space Investigations Documentation System (SIDS) to the NSSDC after letters of notification have been sent.

(c) Office of Management Operations. The Head, Scientific and Technical Information Branch is responsible for the issuance of instructions to the Scientific and Technical Information Facility (STIF) to provide to the NSSDC a monthly listing of newly acquired articles and documents that contain information about of results from NASA-supported space science flight experiments, especially those which can be identified through the contract, grant, or NSAS Unique Project Numbers (UPN) supplied by the NSSDC.

(d) Field installations. NASA field installations assigned project management responsibility for space science flight projects are responsible for: (1) Insuring that the project plan includes a statement within the project results (or equivalent) section that the Project Scientist or Mission Scientist, the appropriate scientific personnel associated with the investigations that comprise the mission, and the NSSDC acquisition manager will develop a PDMP. This PDMP will be approved by the project manager with concurrence signatures by the Project Scientist and the Director of the NSSDC.

(2) Insuring that the contracts or written agreements negotiated between the PIs, TLs, or GIs institution and the project management center specify the responsibility of the PI, TL, or GI for data reduction, data analysis, publication of results, and, where appropriate, the preparation of selected ADRs, RDRs and necessary documentation for delivery to a data disseminating repository. The contracts or written agreements will stipulate that the contract number or, in the case of a NASA field center Investigator, that the UPN number appear in all reports or articles. Copies of all reports and preprints shall be sent to the STIF and to the NSSDC. This responsibility will be documented in a PDMP to which the Investigators, the Project Scientists, the NSSDC Acquisition Manager, and the appropriate scientific advisory groups will contribute. The PDMP will commit the Investigator, where appropriate, to supply to a specified repository the following documentation upon submission of the selected ADRs and RDRs:

(i) General information about each data set, such as:

(A) Form of data set—hard copy, magnetic tape, microfiche, microfilm, photographic film, etc.

(B) Quantity of data set—number of units of the form.

(C) External identification for each physical unit of the data set—spacecraft, experiment, Investigator's internal ID.

(D) Time period covered by the data set.

(E) Quantity by which data set is ordered—time, orbit number, spatial coordinate, etc.

(F) Supporting documentation—tape formats, catalog, directory, indexes, User's Guide, etc.

(G) Brief description of the data set (not to exceed 250 words).

(ii) Specific information about each data set, such as:

(A) Magnetic tape—track density, recording density, recording mode, recording parity, make and model number of computer used, number of files, size of physical records, logical record format with specification of each field, etc.

(B) Photographic or microform—type of film, frame and/or reel numbers where supporting data and description are located, index of frames and each reel, assurance that all reels are quality controlled to allow proper duplication, etc.

(C) Hard copy—assurance that copy is clean, legible and of proper contrast so it can be photographed; index or catalog if appropriate; form of binding (burst, unburst, loose leaf, bound); etc.

(iii) A Data Users' Guide which includes a summary of the investigation, a description of the instrument, a discussion of calibration procedures and results, a discussion of pertinent events in the operational history that might affect data interpretation, a discussion of over-all data reduction procedures used in generating the various data sets, and other information useful to a scientifically trained recipient of the data.

(iv) A list of all published articles related to the investigation by the investigator group or team and copies of all reports and preprints.

(3) Insuring that Investigators on these projects fulfill the stipulations of the contracts or written agreements pertaining to the responsibilities described in paragraph (d)(1) of this section.

(4) Delivery of EDRs to Investigators on a timely basis. Conditions for discarding or destroying EDRs shall be specified in the PDMP.

(5) Providing to the NSSDC during the writing of the project plan (and

M Y 2 7 8 UMI

V 4 3 — 8 5

provided updates during revisions and specifically after launch) the following information:

(i) Brief statement of the mission objectives for each launch (not to exceed 200 words).

(ii) The names, addresses and telephone and telex numbers of the program mansger, Program Scientist, project manager, and Project Scientists for each mission.

(iii) The launch site, launch vehicle, spacecraft weight, and planned orbit parameters.

(iv) A brief description of the spacecraft, not exceeding 250 words.

(v) For each investigation the names, addresses and telephone and telex number of all the Investigators and the relevant contract or UPN numbers.

(vi) The name of each experiment, its weight, average power, and approximate bit rate.

(vii) A brief description of each experiment, not exceeding 250 words.

(e) The PI, TL, or GI (NASA, Non-NASA, and foreign). At the time an investigation is selected, the PI, TL, or GI will be notified by letter signed by the Associate Administrator for Space Science of his responsibilities for data reduction, prime analysis, and the archiving of appropriate ADRs and RDRs. These responsibilities (subject in the case of foreign scientists to the specifications of the governing international agreement) will include:

(1) Completion of data reduction and prime analysis of the data from his experiment within the period of time agreed upon between the PI, TL, or GI and the Associate Administrator for Space Science.

(2) Publication of the results of his analyses as soon as practicable.

(3) Preparation of selected ADRs and RDRs together with the necessary background information to make them usable by other scientists as specified in the PDMP.

(f) National Space Science Data Center (NSSDC). The Director, Goddard Space Flight Center (GSFC), is responsible for management of the NSSDC, the central data disseminating repository for data obtained from space science flight investigations. For functions and operation of the NSSDC, see Appendix B. The NSSDC Director, appointed by the Director, GSFC, is responsible for:

(1) Implementing the NASA project plan for the operation of the NSSDC.

(2) Recommending through the Director, GSFC, any changes in policies, procedures, and plans for the operation of the NSSDC deemed appropriate to the effective attainment of project objectives.

(3) Preparing budget estimates for operation of the NSSDC.

(4) Recommending fees for the computer and reproduction services performed by the Center to Director, Financial Management Divisions, NASA Headquarters, and obtaining from that office a fee schedule which is consistent with NASA practice.

(5) Based upon information contained in the PDMPs, compiling schedules for transmission of ADRs and RDRs to the NSSDC by investigators on NASA space science flight projects.

(6) Assigning an NSSDC acquisition manager to each flight project to participate in the development of the PDMP and to assure that the plan is carried out on an established schedule concerning the deposition of any data and documentation in the NSSDC.

(7) Providing to the STIF a monthly listing of contract, grant, or UPN numbers for all NASA funded space science flight experiments and related investigations.

(8) Preparing guidelines for the submission to the NSSDC of ADRs and RDRs with documentation from non-NASA missions, and disseminating these guidelines to appropriate individuals and agencies to serve in lieu of a formal PDMP.

(9) Reporting through the Director, GSFC, to the Assistant Associate Administrator for Space Science (Science) semiannually on the data acquisition, request activities and financial status of the NSSDC operations.

(10) Assessing adequacy of the NSSDC facilities and the effectiveness of their utilization; and recommending through the Director, GSFC, the necessary actions to meet future facility requirements.

(11) Maintaining, protecting, and retiring NASA records in the custody of the NSSDC in accordance with the policies and practices of the NASA Records Management Program, NASA Records Disposition Handbook (NASA Handbook 1441.1A) and other pertinent management instructions.

§ 1205.103 Support of research.

The NSSDC will support investigations in space sciences by making available its scientific data and facilities. However, the NSSDC will not provide financial support for such research. The Office of Space Science will entertain proposals for space science research based on data available in the NSSDC.

APPENDIX A—GLOSSARY OF TERMS AND ABBREVIATIONS

Analyzed Data Records (ADRs). Those records which the Investigator designates as the best to display the scientific results of an experiment and provide the physical quantities by applying calibration curves or algorithms to the corrected observed quantities of the Reduced Data Records. The data may be time averaged and may incorporate model-dependent assumptions to obtain the physical quantities. Charts, graphs, tables, correlation coefficients, model parameters, photographs, and plots are possible forms of these records.

Co-Investigator (Co-I). An associate of the Principal Investigator (PI) who is assigned a supporting role in the investigation. In addition, some data rights may be assigned to the Co-I by the PI.

Experiment. A term used interchangeably with investigation (the latter is preferred). Activity or effort aimed at the generation of data obtained by measurement of space phenomena or the use of space to observe earth phenomena and the resulting analysis of such data.

Experiment Data Records (EDRs). Those records provided to the Principal Investigator, Team Leader, Guest Investigator, Co-Investigator, or team member containing all the data from the mission required to carry out the investigation specified in the contract or launch agreement. These records may include orbital position, spacecraft attitude, instrument attitude, commands, housekeeping data, ground time, spacecraft time, data from other investigations and other information as agreed upon. The exact form of these records and manner in which these data are provided may vary depending upon the policies, procedures, and capabilities of the project, the payload or mission control centers, the data acquisition network, and any support processing facilities. These records shall be specified in the Project Data Management Plan.

Facility-Class Payload Mission. A mission in which the payload is an instrument or set of instruments which serve as a facility for a large group of Guest Investigators who may be selected at different times throughout the life of the mission to participate. This type of mission may not have Principal Investigators or Team Leaders and all the data collected from such a mission is generally maintained by the project for use by Guest Investigators. Availability of data for the scientific community at large shall be specified at the Project Data Management Plan.

Guest Investigator (GI). Investigator selected to conduct observations and obtain data within the capability of a NASA mission, which are additional to the mission's primary objectives, or for a facility-class payload mission.

Investigation. Activity or effort aimed at the generation of data obtained by measurement of space phenomena or the use of space to observe earth phenomena and the resulting analysis of such data.

Investigator. A participant in an investigation. This term may refer to a Principal Investigator, Co-Investigator, Team Leader, team member, Guest Investigator, or any other member of an investigation group.

Mission. One or more flights within an approved payload project.

Mission Scientist. A scientist from a NASA field center assigned to a Spacelab mission, the Mission Scientist has similar functions as the Project Scientist with the exception of direct responsibility for the development of any experiments.

National Space Science Data Center (NSSDC). The main central repository for selected data and documentation from space science flight missions that serves as a disseminator of this archived data and supporting information to users throughout the international scientific community. The NSSDC, located at Goddard Space Flight Center, serves as a switching center for requesters who desire data still held individually by Principal Investigators (PIs) or Team Leaders (TLs) by providing a description of the spacecraft and experiment and the name, address and telephone number of the PI or TL. For missions involving a Guest Investigator program in association with a PI or TL experiment or involving a facility-class payload the role of the NSSDC shall be specified in the Project Data Management Plan.

Principal Investigator (PI). A person who conceives an investigation and is responsible for carrying it out, reporting its results, and providing appropriately selected data and supporting documentation to the scientific community in accordance with the Project Data Management Plan. The PI chooses his Co-Investigators and assigns them roles and privileges. The PI is the primary point of contact with the project office regarding the investigation.

Program Scientist. A NASA Headquarters official assigned to each mission who has a number of roles and responsibilities defined in NASA Management Instruction 7100.11, Attachment D. The most relevant one for this subpart is the responsibility to establish the data analysis, data dissemination, and data archiving policies for the mission, which will be documented in the Project Data Management Plan.

Project Data Management Plan (PDMP). A plan that addresses the total activity associated with the data acquired by a mission from the delivery of the Experiment Data Records to the Investigators to the delivery of selected reduced and analyzed records along with supporting documentation to a specified repository. The plan should provide the milestones in the data reduction, data interpretation, and resource requirements for these phases. Any planned data interpretation meetings, workshops, or other activities should be identified. The type of data records, data products, and compilations that have been selected in concert by the Investigators, the Project Scientist, the Program Scientist, the NSSDC acquisition manager, and any appropriate scientific advisory personnel for general availability to the international scientific community and for delivery to a disseminating repository, such as the NSSDC, shall be specified. For missions where the data will be maintained for many years by the project, the Principal Investigator handling a Guest Investigator program, or by an institute established by the mission, the eventual transfer of appropriate data to a more permanent archive, such as NSSDC or other repository, shall be specified. Conditions for discarding or destroying the Experiment Data Records shall be specified.

Project Scientist. A scientist from a NASA field center assigned to a project to manage the scientific aspects. The roles and responsibilities of this function are given in NASA Management Instruction 7100.11, Attachment E.

Reduced Data Records (RDRs). Those records prepared from the Experiment Data Records by applying corrections, where applicable, for temperature, voltage, gain change, offsets, dead time, drift and other known instrument changes, as well as eliminating unusable noisy periods and periods of questionable instrument performance. The Reduced Data Record should contain all the basic and supporting measurements obtained from the experiment, such as time position, attitude, settings of instrument by command, housekeeping data, and other information needed to analyze the data in an independent fashion. Visual data, such as photographs derived from imaging processing techniques, may also be considered as RDRs.

Scientific and Technical Information Facility (STIF). NASA's document and report acquisition and abstracting facility that produces a biweekly abstract journal, STAR, covering the aerospace report literature and a biweekly abstract journal, IAA, covering the published literature in these fields. The facility also produces microfiche copies of the report literature for primary distribution.

Space Science Flight Investigations. Investigations of natural phenomena of the earth and its environment, the moon, other planets, the sun, interplanetary space, and other celestial objects and regions made from aircraft, balloons, sounding rockets, satellites, probes, and manned spacecraft for the purpose of increasing basic knowledge of these natural phenomena. Biological investigations involving the search for extraterrestrial life are included.

APPENDIX B—FUNCTIONS AND OPERATION OF NATIONAL SPACE SCIENCE DATA CENTER

The National Space Science Data Center (NSSDC) has been established at the Goddard Space Flight Center to provide scientific data and facilities in support of investigations in space science.

(a) *Data to be acquired.* The NSSDC will acquire or accept:

(1) RDRs and ADRs from NASA-sponsored space science flight experiments which are deemed appropriate for secondary distribution and archiving by PDMPs or directly by the Program Scientist. The vast majority of records will be from satellite borne instruments. Any departures from a PDMP shall be approved in writing by the Program Scientist, the Project Manager, and the NSSDC Director.

(2) Unclassifed ADRs and RDRs made available from space science flight experiments by other agencies in accordance with interagency agreements providing the data media meet standards for reproduction and the supporting documentation is adequate.

(3) Ground-based correlative data, only when it is considered absolutely necessary for the utilization of data in the NSSDC.

(4) ARDs and RDRs from foreign space science flight experiments made availble by international exchange of data through the World Data Centers or by cooperative agreements.

(b) *Data not to be acquired.* (1) Data obtained from operational observations made for specific applications such as weather forecasting, navigation, communication, tracking and telemetry, medical investigations, and technological investigations which contribute only to the development of space flight hardware will not be acquired by the NSSDC.

(2) Any data from space science flight experiments that is excluded from archiving in the NSSDC by a PDMP.

(3) EDRs (including magnetic tapes, telemetry records, exposed film and meteorite collection panels) will not be acquired by the Center.

(c) *Availability of data.* Data records in the NSSDC will be available to users on the following basis:

(1) To U.S. residents and organizations upon request.

(2) To foreign nationals in accordance with procedures of World Data Center A.

(3) To foreign nationals on the basis of cooperative agreements between NASA and the space agencies of foreign governments or multi-lateral organizations devoted to space research.

(4) To foreign governments on the basis of bilateral intergovernment agreements made by the U.S. on behalf of NASA.

(d) *Preservation of data.* This should be specifically addressed in the PDMP. In general, data in the NSSDC will be preserved for the longest practicable time consistent with the physical life of the record. Records will be reproduced to extend their storage life only if the record of their past utilization justifies such prolongation. Specific categories of data may be reproduced to extend their storage life regardless of past usage in accordance with international or interagency agreements or with the PDMP.

(e) *Interface with other sources of data from NASA missions.* Certain NASA missions such as those involving national facility payloads or those with Guest Investigator programs may maintain the data within the project for many years. The NSSDC will route requesters of such data to the appropriate facility or make request on their behalf depending on the agreement specified in the PDMP. The distribution of catalogs produced by such a mission shall also be determined by the PDMP.

(f) *NSSDC publications.* The NSSDC will issue or provide publications as necessary to facilitate the use of available data. Publications will include:

(1) *Data users guides.* Provides the data user the experiment information and describes the reduced data available. These will usually be written by the Investigators and supplied to the NSSDC as specified in the PDMP;

(2) *Catalogs of data.* Lists of all data from space science flight experiments available from the NSSDC, issued as needed. The forms in which the data are available will also be indicated; i.e., microfilm, tapes, printouts, etc. Catalogs of data available from projects that maintain their own data base, such as Guest Investigator or facility missions, will also be distributed if the PDMP so specifies.

(3) *Data Announcements.* Announces those data sets which are known to have wide appeal when such sets become available.

(g) *Other services.* The NSSDC will provide technical assistance to data users. In some cases, this may involve the conversion of data records into compatible formats to facilitate correlation of data from various sources. When facilities are available the NSSDC will provide lecture rooms, study rooms, and office space for use by visiting scientists for research involving the use of available data.

(h) *User charges.* (1) User charges will, as a matter of policy, be in accordance with the policies set forth in the Bureau of the Budget Circular A-25 and NASA Financial Management Manual 9080. The methods to be used in computing the user charges will be reviewed by the Director, Financial Management Division, NASA Headquarters.

(2) Appropriate fees will be charged for reproduction, computer and dissemination services provided to individual users by the Data Center. The NSSDC may perform conversion of data records and general technical assistance without charge to individual users. Fees for reproduction and dissemination services may be waived by the NSSDC Director if:

(i) The cost of collecting the fee would be an unduly large proportion of the amount of the fee.

(ii) The data furnished are required to accomplish a research task approved by NASA Headquarters or field installations.

M Y 2 — 7 8
UMI

V 4 3 — 1 8 5

(iii) The data are to be used by a Federal, State, or local government agency or by nonprofit organization.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. 9076]

PART 13—PROHIBITED TRADE PRACTICES AND AFFIRMATIVE CORRECTIVE ACTIONS

Reichhold Chemicals, Inc.

AGENCY: Federal Trade Commission.

ACTION: Final order to cease and desist.

SUMMARY: This order, among other things, requires a White Plains N.Y., manufacturer and distributor of various products, including fiberglass reinforced panels (frp panels) to divest itself completely, within 1 year from service of this order, of The Corrulux Corp., a Houston, Tex., producer of frp panels. Further, the firm is prohibited, for a 2-year period from soliciting (for the purpose of selling fiberglass reinforced plastic panels) those customers who had purchased such panels from Corrulux during the year prior to its acquisition by RCI. Additionally, the order prohibits RCI from acquiring, for 10 years, any domestic company engaged in the production, sale, or distribution of frp panels.

DATES: Complaint issued March 11, 1976; final order issued February 22, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

Alfred F. Dougherty, Director, Bureau of Competition, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3601.

SUPPLEMENTARY INFORMATION: In the matter of Reichhold Chemicals, Inc., a corporation. The prohibited trade practices and/or corrective actions, as codified under 16 CFR 13, are as follows:

Subpart—Acquiring Corporate Stock or Assets: § 13.5 Acquiring corporate stock or assets; 13.5-20 Federal Trade Commission Act.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; (15 U.S.C. 45, 18).)

The final order is as follows:

[1]Copies of the complaint, initial decision, and final order filed with the original document.

FINAL ORDER

This matter having been heard by the Commission upon the appeal of respondent from the initial decision; and

The Commission having considered the oral arguments of counsel, their briefs, and the whole record; and

The Commission having denied in full the appeal of respondent's counsel; and

The Commission having determined that the initial decision and order contained therein shall become the decision and order of the Commission, with the following changes:

Page 15, substitute for finding 21:

21. Except for the limited number of instances noted earlier which amount to no more than about 7 percent of industry frp panel production (findings 19 and 20), all of the producers of frp panels use the continuous line process (CX's 306A, B; RX 83, pp. 9-10; Tr. 311, 313-14, 928, 1180).

Page 46, footnote 53, line 21, change "competition" to "conversion."

Page 52, Finding 115, add at end of line:

The rates of return on equity in 1974 for frp panel producers Fiberglass Plastics, Inc., and Kemlite Corp. were 35 and 28 percent respectively (CX's 189B, C, 122R). Kemlite's average annual rate of return on equity for 1965-74 was 23 percent (CX 122R).

Page 64, substitute for footnote 71:

"The record indicates that frp panels fulfill a unique range of applications (see finding 23). While such versatility may constitute a "peculiar characteristic" under Brown Shoe, or otherwise contribute to the finding of a relevant submarket, see, e.g., *General Foods Corp.*, 69 F.T.C. 380 415 (1966), *aff'd*, 386 F. 2d 936 (2d Cir. 1967), *cert. denied*, 391 U.S. 919 (1968); *Brillo Mfg. Co., Inc.*, 64 F.T.C. 245, 253-54 (1963); *Union Carbide Corp.*, 59 F.T.C. 614, 654 (1961), we are not persuaded of its relevance here. The record does not show, for example, that this versatility is a basis for consumer preference or that it enables producers to withstand fluctuations in demand for particular end uses better than producers of substitute products which are less versatile.

In addition, complaint counsel failed to demonstrate the significance to an frp submarket of the use of frp panels in garage doors, glazing, water towers, and signs (Findings 55-59).

Page 72, footnote 92, line 7, change "kitting" to "kiting."

Page 75, delete lines 5-8 beginning with "Union Carbide" and substitute:

United States v. *Aluminum Co. of America*, 247 F. Supp. 308, 316 (E.D. Mo. 1964), *aff'd mem.*, 382 U.S. 12 (1965) (order required divestiture of plant built after unlawful acquisition); *Union Carbide Corp., supra*, 59 F.T.C. at 657, 673 (divestiture of all post-acquisition improvements and equipment installed on premises of acquired company); see generally Elzinga, *The Antimerger Law: Pyrrhic Victories*, 12 Journal of L. & Econ. 43 (1969).

Page 75, line 13, following "best market price" add "[97]," with text of footnote as follows:

"See *United States* v. *Kennecott Copper Corp.*, 249 F. Supp. 154, 162 (S.D.N.Y.), *aff'd mem.*, 381 U.S. 414 (1965); cf. *Ford Motor Co.* v. *United States*, *supra*, 405 U.S. at 572.

Page 75, line 22, change "[97]" to "[98]," and renumber footnote accordingly.

Therefore, it is ordered, That the initial decision (as modified above) and the order contained therein, shall become the decision and order of the Commission on the date of issuance of this order.

The order to divest and to cease and desist, including further order requiring report of compliance therewith, contained in the initial devision, is as follows:

ORDER

I

It is ordered, That Respondent, Reichhold Chemicals, Inc. (hereinafter "Reichhold"), a corporation, and its officers, directors, agents, representatives, employees, subsidiaries, affiliates, successors, and assigns, shall divest all assets, title, properties, interest, rights, and privileges, of whatever nature, tangible and intangible, including without limitation all real property, buildings, machinery, equipment, raw material reserves, inventory, customer lists, trade names, trademarks, and other property of whatever description acquired by Reichhold as a result of its acquisition of The Corrulux Corp. (hereinafter "Corrulux") together with all additions and improvements to Corrulux which have been made subsequent to the acquisition. Such divestiture shall be absolute, shall be accomplished no later than one (1) year from the service of this order, and shall be subject to the prior approval of the Federal Trade Commission.

II

It is further ordered, That pursuant to the requirements of paragraph 1, none of the stock, assets, properties, rights, privileges, and interests of whatever nature, tangible or intangible, acquired or added by Reichhold, shall be divested, directly or indirectly, to anyone who is at the time of the divestiture an officer, director, employee, or agent of, or under the control, direction or influence of Reichhold, or anyone who owns or controls, directly or indirectly more than one (1) percent of the outstanding shares of the capital stock of Reichhold or to anyone who is not approved in advance by the Federal Trade Commission.

III

It is further ordered, That pending the divestiture required by this order, Respondent shall not knowingly cause or permit the deterioration of the assets and properties specified in paragraph I in a manner that impairs the marketability of any such assets and properties.

IV

It is further ordered, That at the time of the divestiture required by this order, Respondent shall make available to the acquirer of the divested assets a list of all of respondent's customers for fiberglass reinforced panels who have purchased said panels from respondent within 3 years prior to the date this order becomes final.

V

It is further ordered, That respondent, for a period of two (2) years from the date this order becomes final, shall not solicit (for the purpose of selling fiberglass reinforced plastic panels) any customer who purchased said panels from Corrulux during the year prior to the acquisition by respondent of Corrulux.

VI

It is further ordered, That for a period of one (1) year following the divestiture required by this order, respondent shall provide the acquirer of the divested assets, if the acquirer so requests, such know-how as may reasonably be required to enable such acquirer to manufacture and sell fiberglass reinforced plastic panels. For a period of three (3) years following the divestiture required by this order, respondent shall provide the acquirer of the divested assets, if the acquirer so requests, such amounts of suitable polyester resin as the acquirer may reasonably need to produce fiberglass reinforced plastic panels. Respondent shall charge the acquirer no more than its own costs for providing know-how. Respondent shall charge the acquirer no more than the lowest price that it is then charging, on the open market, regardless of volume, for polyester resin.

VII

It is further ordered, That, for a period commencing on the effective date of this order and continuing for ten (10) years from and after the date of completing the divestiture required by this order, Reichhold shall cease and desist from acquiring, directly or indirectly, without the prior approval of the Federal Trade Commission, the whole or any part of the stock, share capital, assets, any interest in or any interest of, any domestic concern, corporate or noncorporate, engaged in the manufacture, production, distribution or sale of frp panels nor shall Reichhold enter into any arrangement with any such concern by which Reichhold obtains the market share, in whole or in part, of such concern.

VIII

It is furthered ordered, That on the first anniversary date of the effective date of this order and on each anniversary date thereafter until the expiration of the prohibitions in paragraph VII of this order, Reichhold shall submit a report in writing to the Federal Trade Commission listing all acquisitions, mergers, and agreements to acquire or merge made by Reichhold; the date of each such acquisition, merger, or agreement; the products involved and such additional information as may from time to time be required.

IX

It is further ordered, That within thirty (30) days from the effective date of this order and every sixty (60) days thereafter, until it has fully complied with paragraph I of this order, Reichhold shall submit a verified report in writing to the Federal Trade Commission setting forth in detail the manner and form in which it intends to comply, is complying or has complied therewith. All such reports shall include, in addition to such other information and documentation as may hereafter be requested: (a) A specification of the steps taken by Reichhold to make public its desire to divest Corrulux, (b) a list of all persons or organizations to whom notice of divestiture has been given, (c) a summary of all discussions and negotiations together with the identity and address of all interested persons or organizations, and (d) copies of all reports, internal memoranda, offers, counteroffers, communications, and correspondence concerning said divestiture.

X

It is further ordered, That respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, or any other proposed change in the corporation, which may affect compliance obligations arising out of this order.

JAMES A. TOBIN,
Acting Secretary.

[Docket No. C-2918]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Ferrara Imports, Ltd., et al.

AGENCY: Federal Trade Commission.

ACTION: Order to cease and desist.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, among other things, requires a New York City importer and manufacturer of men's clothing to cease misrepresenting or failing to affix to their products required fiber disclosure labels. The firm is additionally required to furnish affected customers with a copy of the order.

DATE: Complaint and order issued March 24, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

John F. Dugan, Acting Director, New York Regional Office, Federal Trade Commission, 2243-EB Federal Building, 26 Federal Plaza, New York, N.Y. 10007, 212-264-1200.

SUPPLEMENTARY INFORMATION: On Tuesday, January 17, 1978, there was published in the FEDERAL REGISTER 43 FR 2406, a proposed consent agreement with analysis In the Matter of Ferrara Imports, Ltd., a corporation, and Louis Ferrara, individually and as an officer of said corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows:

Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533-20 Disclosures; 13.533-37 Formal regulatory and/or statutory requirements. Subpart—Misbranding or Mislabeling: § 13.1185 Composition; 13.1185-90 Wool Products Labeling Act; § 13.1200 Content; § 13.1212 Formal regulatory and statutory requirements; 13.1212-90 Wool Products Labeling Act. Subpart—Misrepresenting Oneself and Goods—Goods: § 13.1590 Composition; 13.1590-90 Wool Products Labeling Act; § 13.1605 Content; § 13.1623 Formal regulatory and statutory requirements; 13.1623-90 Wool Products Labeling Act. Subpart—Neglecting, Unfairly or Deceptively, to Make Material Disclosure: § 13.1845 Composition; 13.1845-80 Wool Products Labeling Act; § 13.1850 Content; § 13.1852

[Docket No. 8879-0]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Grolier Inc., et al.

AGENCY: Federal Trade Commission.

ACTION: Final order to cease and desist.

SUMMARY: This order, among other things, requires a New York City publisher and seller of encyclopedia and other educational materials and services, and its subsidiaries to cease misrepresenting, failing to make relevant disclosures, or using any other unfair or deceptive method to recruit door-to-door sales personnel, sell merchandise and services, and collect delinquent accounts.

DATES: Complaint issued January 10, 1973; Final order issued March 13, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

Edward D. Steinman, Acting Assistant Director for Marketing Abuses, Bureau of Consumer Protection, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3355.

SUPPLEMENTARY INFORMATION: In the Matter of Grolier, Inc., a corporation, et al. The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows:

Subpart—Advertising Falsely or Misleadingly: § 13.15 Business status, advantages or connections; 13.15-5 Advertising and promotional services; 13.15-20 Business methods and policies; 13.15-30 Connections or arrangements with others; 13.15-35 Contracts and obligations; 13.15-105 Identity; 13.15-150 Endorsement; 13.15-155 Institutional connections; 13.15-195 Nature; 13.15-245 Prospects; 13.15-247 Publication services; 13.15-265 Service; § 13.42 Connection of others with goods; § 13.60 Earnings and profits; § 13.75 Free goods or services; § 13.105 Individual's special selection or situation; § 13.110 Endorsements, approval and testimonials; § 13.125 Limited offers or supply; § 13.143 Opportunities; § 13.155 Prices; 13.155-5 Additional charges unmentioned; 13.155-15 Comparative; 13.155-33 Demonstration reductions; 13.155-35 Discount savings; 13.155-70 Percentage savings; 13.155-93 Special or test offers; 13.155-95 Terms and conditions; 13.155-100 Usual as reduced, special, etc.; § 13.160 Promotional sales plans; § 13.205 Scientific or other relevant facts; § 13.240 Special or limited offers; § 13.247 Statutes and regulations; § 13.255 Surveys. Subpart—Claiming or Using Endorsements or Testimonials Falsely or Misleadingly: § 13.330 Claiming or using endorsements or testimonials falsely or misleadingly; 13.330-39 Educators, school authorities, etc.; 13.330-94 Users, in general. Subpart—Coercing and Intimidating: § 13.356 Delinquent debtors. Subpart—Contracting for Sale in any Form Binding on Buyer Prior to End of Specified Time Period: § 13.527 Contracting for sale in any form binding on buyer prior to end of specified time period. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.553-20 Disclosures; 13.533-37 Formal regulatory and/or statutory requirements; 13.533-45 Maintain records. Subpart—Enforcing Dealings or Payments Wrongfully: § 13.1045 Enforcing dealings or payments wrongfully. Subpart—Misrepresenting Oneself and Goods—Business Status, Advantages or Connections: § 13.1395 Connections and arrangements with others; § 13.1417 Financing activities; § 13.1440 Identity; § 13.1490 Nature; § 13.1545 Research bureau; § 13.1553 Services.—Goods: § 13.1625 Free goods or services; § 13.1663 Individual's special selection or situation; § 13.1665 Endorsements; § 13.1670 Jobs and employment; § 13.1675 Law or legal requirements; § 13.1697 Opportunities in product or service; § 13.1740 Scientific or other relevant facts; § 13.1747 Special or limited offers; § 13.1757 Surveys; § 13.1760 Terms and conditions; 13.1760-50 Sales contract.—Prices: § 13.1778 Additional costs unmentioned; § 13.1800 Demonstration reductions; § 13.1817 Reductions for prospect referrals; § 13.1823 Terms and conditions; § 13.1825 Usual as reduced or to be increased.—Promotional Sales Plans: § 13.1830 Promotional sales plans.—Services: § 13.1843 Terms and conditions. Subpart—Neglecting, Unfairly or Deceptively, to Make Material Disclosure: § 13.1852 Formal regulatory and statutory requirements; § 13.1863 Limitations of product; § 13.1882 Prices; 13.1882-10 Additional prices unmentioned; § 13.1892 Sales contract, right-to-cancel provision; § 13.1895 Scientific or other relevant facts; § 13.1905 Terms and conditions; 13.1905-50 Sales contract. Subpart—Threatening Suits, Not in Good Faith: § 13.2264 Delinquent debt collection.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended (15 U.S.C. 45).)

The Final Order to cease and desist, including further order requiring report of compliance therewith, is as follows:

FINAL ORDER

This matter having been heard by the Commission upon the cross-appeals of complaint counsel and respondents' counsel from the initial decision and upon briefs and oral argument in support thereof and opposition thereto, and the Commission, for the reasons stated in the accompanying Opinion, having determined to sustain the initial decision with certain modifications:

It is ordered, That pages 1-176 of the initial decision of the administrative law judge be, and they hereby are, adopted as the Findings of Fact and Conclusions of Law of the Commission, except to the extent modified or otherwise indicated in the accompanying Opinion and except for the following: Delete in Finding 126 the first sentence and the word "In fact" in the second sentence.

Other Findings of Fact and conclusions of Law of the Commission are contained in the accompanying Opinion.

It is further ordered, That the following Order to Cease and Desist be, and it hereby is, entered:

ORDER

I

It is ordered, That respondents Grolier, Inc., Americana Corp., Grolier Interstate, Inc., Grolier New Era Corp., Madison Enterprises, Inc., R. H. Hinkley Co., the Grolier Society, Inc., Spencer International Press, Inc. and the Richards Co., Inc., corporations, and their successors, assigns, officers, agents, representatives and employees, directly or indirectly, through any corporation, subsidiary, division or other device, in connection with the recruitment, training, or orientation of any person to sell, rent, lease, or distribute any textbook, encyclopedia, reference or educational material, training course or teaching machine, or any other publication, merchandise or service, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Representing, directly or by implication, either orally or in writing, that:

(1) Any respondent is offering positions in such fields as advertising, education, public relations, marketing, interviewing, or in any field other than door-to-door sales, if door-to-door sales is included, to any extent, in the position for which persons are being recruited; or misrepresenting, in any manner, the job for which any person is being solicited;

(2) Persons will be trained as management trainees, or for other positions of responsibility concerned with administrative office functions, unless, in fact, a formal management training program is available to persons accepting employment on the basis of such representations; or misrepresenting, in any manner, the amount and type of training that will be given;

(3) Any person who may be employed will contact prospects in their homes or places of business for the purposes of conducting surveys, advertising promotions, educational instruction or other nonselling functions; or misrepresenting, in any manner, the purposes for which any person is engaged.

B. Misrepresenting, in any manner, the amount of income to be earned by any person or that may be earned by any person, the method of payment, or any condition or limitation imposed upon the compensation of any person, or the degree of ease or difficulty in performing any said condition imposed.

C. Failing to disclose, clearly and conspicuously, in all advertising offering employment in any way involving door-to-door sales:

(1) That the respondent concerned is recruiting persons for the sole purpose of soliciting or selling;

(2) That such soliciting or selling will be on an "in home" basis;

(3) That the products or services being sold are encyclopedias or services to be used in connection therewith, or in the event that encyclopedias or such related services are not being sold, the products and services being sold; and

(4) The basis for compensating persons so engaged.

D. Failing to clearly and conspicuously advise, both orally and in writing, any prospective salesperson at the initial face-to-face interview, and prior to executing any employment agreement with any such person, the following information:

(1) All those disclosures set forth in Paragraph I C above;

(2) A complete and detailed description of each condition and limitation imposed upon the receipt of any compensation;

(3) Where applicable, notification that such person will not be paid for time spent during orientation and training;

(4) A complete and detailed description of any expense or expenses any such person may incur in performing the required duties; and

(5) The percentage of persons holding similar positions engaged by the office offering the position during the twelve (12) months immediately preceding the offer, who have actually received an equivalent or greater, income than that promised under the terms of any such agreement.

E. Failing to furnish to each applicant at the initial face-to-face interview and prior to executing any employment agreement with any such person, a copy of Paragraphs I, II and V of this Order together with a cover letter as set forth in *Appendix A* attached hereto.

F. Making, distributing or using any training tapes, sales manuals, or any other document, method or device which contains any representation or instruction inconsistent with any provision of Paragraph I or Paragraph II of the Order.

II

It is ordered, That respondents Grolier, Inc., Americana Corp., Grolier Interstate, Inc., Grolier New Era Corp., Madison Enterprises, Inc., R. H. Hinkley Co., The Grolier Society, Inc., Spencer International Press, Inc., and The Richards Co., Inc., corporations and their successors assigns, officers, agents, representatives, and employees, directly or indirectly, through any corporation, subsidiary, division or other device, in connection with the publishing, advertising, offering for sale, sale, rental, lease or distribution of any textbook, encyclopedia, reference or educational material, training course or teaching machine, or any other publication, merchandise or service, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Disseminating or causing to be disseminated, any advertisement or promotional material which solicits participation in any contest, drawing or sweepstakes, or solicits any response to any offer of merchandise, service or information unless any such solicitation clearly and conspicuously discloses the following statement in 10-point bold-face type:

NOTICE TO CONSUMER—PERSONS WHO REPLY AS REQUESTED MAY BE CONTACTED BY A SALESPERSON FOR THE PURPOSE OF SELLING [insert name of applicable product].

B. Providing any return card, coupon or other device which is used to respond to any advertisement or promotional material covered by Paragraph II A above, unless the following statement clearly and conspicuously appears in 10-point bold-face type in immediate proximity to the space provided for a signature or other identification of the responding party:

NOTICE TO CONSUMER—PERSONS WHO RETURN THIS [insert name of applicable device] MAY BE CONTACTED BY A SALESPERSON FOR THE PURPOSE OF SELLING [insert name of applicable product].

C. Failing to disclose clearly and conspicuously, at the beginning of any telephone call to any prospective customer, the fact that the individual making the call is either soliciting the sale, rental or lease of publications, merchandise or services for respondents, or is arranging for a sales solicitation to be made, and that if the prospective customer so agrees, the respondent concerned will send a salesperson to visit said prospect for the purpose of soliciting the sale, rental or lease of said publications, merchandise or services.

D. Visiting the home or place of business of any person for the purpose of soliciting the sale, rental or lease of any publications, merchandise or service, unless at the time admission is sought into the home or place of business of such person, a card 3 inches by 5 inches in dimension, with all words in 10-point bold-face type, with the following information, and none other, in the indicated order, is presented to such person:

(1) The name of the corporation;

(2) The name of the salesperson;

(3) The term "Encyclopedia Sales Representative" [or other applicable product];

(4) The terminology: "The purpose of this representative's call is to solicit the sale of encyclopedias" [or other applicable product].

E. Failing to present the card, required by Paragraph II D, above, to each such person, to direct each such person to read the information contained on such card, and to provide each such person with an adequate opportunity to read the card before engaging any such person in any sales solicitation.

F. Using the words "Mothers Club" or words of similar import and meaning to represent, directly or by impli-

[1] Copies of the Complaint, Order Amending Complaint, Initial Decision, Opinion and Final Order filed with the original document.

V 4 3 — 8 5

cation, the existence of a *bona fide* educational program, club, or business entity which provides educational services or benefits to consumers or using any trade name misrepresenting in any manner the nature or purpose of their business.

G. Representing, directly or by implication, either orally or in writing that:

(1) Any person calling on any prospective purchaser is:

(a) Engaged in or connected with "advertising", "marketing", "promotion", "education", or anything other than the sale of encyclopedias or other educational or reference materials;

(b) Conducting, taking or participating in a survey, opinion poll, interview or any other information gathering activity; or

(c) Calling on said prospect for the primary purpose of delivering or disseminating any vacation gift certificate, prize, gift, gift certificate, chance in any contest, or any other merchandise or item of chance;

(2) Only a few minutes will be required to complete the visit inside the prospective purchaser's home or place of business; or misrepresenting, in any manner, the period of time required to complete the sales or other presentation;

(3) Any person contacted has been specially selected to receive any offer; or misrepresenting, in any manner, the persons or class of persons to whom said offer is available;

(4) Any encyclopedia or other reference material is a new publication, or a publication which has not been previously available to the public unless such is the fact, or misrepresenting, in any manner, the extent of editorial revisions, in any encyclopedia or other reference material;

(5) Any offer is limited, must be accepted immediately or within a specified time period, or is a special offer, unless such is a fact, or misrepresenting, in any manner, the nature, scope or duration of any sales offer;

(6) Any publication, merchandise or service is being offered free, without cost, as a bonus, reduced in price or otherwise to any prospective purchaser of any of respondents' publications, merchandise or services agreeing to perform any advertising promotional or selling function, including but not limited to, any of the following acts or similar acts:

(a) Permitting their names to be listed as local owners of the product or services;

(b) Providing the name of any person who may be interested in purchasing any publication, merchandise or service;

(c) Writing a letter evaluating the merits of any publication or other item which may be used in advertising;

(d) Displaying any publication or other item in a conspicuous location in his home;

(e) Keeping any publication or other item current by purchasing an annual yearbook or by purchasing any research service;

(f) Completing installment payments for any item in a period of time less than the period of time initially represented; or

(g) Paying a membership fee in order to participate in the Consumer Buying Educational Service, or any other program, club, service or entity which provides an opportunity for participants to puchase merchandise at a savings from the retail prices for such merchandise, or paying a fee to participate in any similar program, club, service, or entity; or

(h) Misrepresenting, in any manner, that any publication, merchandise or service is being offered free, without cost, as a bonus, or reduced in price to any person;

(7) Any publication, merchandise or service is being offered free, without cost, or is given as a bonus or otherwise to any purchaser of any of respondents' publications, merchandise or services, pursuant to any agreement to purchase, rent or lease any other publication, merchandise, or service, or combination thereof, from such respondent, unless:

(a) The contract price for the purchase, rental or lease of any such other publication, merchandise, service, or combination thereof, has remained at the said price or above for at least six (6) months within the last twelve (12) months immediately preceding the time at which the representation is made;

(b) No publication, merchandise or service has been offered free, without cost or given as a bonus or otherwise with the sale, rental or lease of any such other publication, merchandise, service or combination thereof, to any person for a period of at least six (6) months within the last twelve (12) months immediately preceding the time at which the representation is made;

(c) No publication, merchandise, service, or combination thereof, of equivalent or greater value, has been eliminated by such respondent from any such other publication, merchandise, service, or combination thereof, with which the free, without cost or bonus publication, merchandise or service is being offered;

Provided however, Any such prices as are restricted by Paragraph II G(7)(a) of this Order may be altered at any time by the respondent concerned to reflect bona fide changes in market conditions.

H. Misrepresenting, in any manner, the terms, conditions, method, rate or time of payment actually made available to any person.

I. Representing, directly or by implication, either orally or in writing that:

(a) Any person using any research service will receive answers to questions on any subject; or misrepresenting, in any manner, the scope of, or restrictions imposed upon the use of, any such research service;

(b) Any answer provided by a research service is the product of detailed, exhaustive or original research generated by the specific question asked by any person utilizing said service unless such is the fact; or misrepresenting, in any manner, the extent of individual attention, research, preparation or quality of any answer furnished by any such research service;

(c) Any answer provided by any research service is a suitable or acceptable substitute for any term paper, theme or other report; or misrepresenting, in any manner, the benefit or use of any answer provided by any research service;

(d) Any research service is being offered at any price or that the research service has a retail value unless such is the fact;

(e) The cost to any respondent of any research service represents a retail value.

J. (1) Failing to disclose, clearly and conspicuously, in writing on all promotional materials describing any research service, and orally during the course of any sales or other presentation relating to said service, each condition or limitation placed upon the use of such research service.

(2) Failing to disclose applicable limitations on the time within which answers will be supplied by any research service in writing on all promotional materials and orally during the course of any sales presentations relating thereto.

K. (1) Representing, directly or by implication, through the use of any oral statement, written quotation, picture or any other means that any publication, merchandise or service has received an endorsement, recommendation, or sponsorship from any educational, religious, or other institution or other entity or from any person, unless the stated endorsement is genuine and authentic in all respects, and discloses the year or edition of the publication to which such endorsements pertain, if a publication is involved.

(2) Using, publishing, or referring to any testimonial or endorsement unless (1) such use, publication, or reference is expressly authorized in writing and unless (2) respondents have good reason to believe that at the time of such use, publication, or reference, the person or organization named subscribes to the facts and opinions therein contained.

(3) Representing, in any manner, than an endorsement or testomonial has been recently executed or is current unless this is the fact.

(4) Misrepresenting, in any manner, that any person is calling on a prospective customer with the endorsement, recommendation, or sponsorship of another person or organization.

L. Failing to disclose:

(1) Clearly to the officials of any educational institution being visited, where a purpose of such visit is to obtain the institution's permission to disseminate through the institution promotional material which solicits the sale of any product to the parents of the children enrolled in the educational institution, and which is designed to secure leads for in-home sales presentations, prior to any such dissemination, that the purpose of disseminating such promotional materials is to secure leads for in-home sales presentations;

(2) Conspicuously on the face of such promotional materials within the scope of L(1) that dissemination of such promotional materials through the educational institution does not constitute an endorsement or a recommendation by the institution or its officials that such materials being promoted should be purchased unless such is the fact.

M. Representing to any person, directly or by implication, either orally or in writing that:

(1) Any price is the retail, regular, usual or words of similar import or effect, price for any publication in any binding, merchandise or service, unless the respondent concerned is making a substantial number of its unit sales for each such publication in each such binding, merchandise or service, individually, at or above the represented price;

(2) Any price is the retail, regular, usual, or words of similar import or effect, price for any set of publications in any binding and in combination with any other publication, merchandise or service, unless the respondent concerned is making a substantial number of its unit sales for each such set of publications in each such binding individually or in combination at or above the represented price;

(3) Savings may be realized by the purchase, rental or lease of any publication, merchandise or service, or any combination thereof, from any of respondents' former prices for its products unless:

(a) Such savings claims are based upon retail, regular, or usual prices, or combination prices, arrived at in accordance with Paragraph II M (1) and (2) above:

(b) Respondents clearly and conspicuously specify the publication, merchandise or service, or combination thereof, and the price from which the savings are to be realized; and

(c) The publication, merchandise or service is of comparable quality in all material respects with the publication, merchandise or service sold at the higher price;

(4) Savings may be realized by the purchase, rental or lease of any publication, merchandise or service, or any combination thereof, from comparable products of competitors unless:

(a) The respondent concerned clearly and conspicuously specifies the publication, merchandise or service, or combination thereof, from which the savings are to be realized;

(b) The price utilized for comparison purposes is the price at which a substantial number of persons have purchased the item referred to in (a) immediately above;

(c) The item referred to in (a) above is of comparable quality in all material respects to the product being sold;

(d) Respondents have in good faith conducted a market survey or obtained a similar representative sample of prices in the trade area where the comparison is made which establishes the validity of said compared price.

N. Misrepresenting in any manner, either orally or in writing:

(1) The amount of savings to be realized by any person who enters into an agreement with any respondent for any publication, merchandise or service; or

(2) That any publication, merchandise or service is being offered free or without charge, or is given to any such person.

O. Failing to comply with any and all provisions of the Commission's Trade Regulation Rule, Cooling-Off Period For Door-To-Door Sales (16 CFR 429.1), which are in effect on the date this Order becomes effective, and with any modifications or changes in the aforesaid Rule which may be made. A copy of the said Rule shall be made a part of this Order for purposes of complying with other provisions hereof.

P. Initiating contact with any purchaser through any means for any reason from the time said purchaser enters into any agreement containing a NOTICE OF CANCELLATION, as required by Paragraph II O of this Order, until said buyer's cancellation period has expired.

Q. Failing to maintain a copy of each NOTICE OF CANCELLATION received pursuant to Paragraph II O of this Order, and making said documents available for inspection and copying by the Commission's staff upon reasonable notice. Any respondent receiving such NOTICE shall maintain it for a period of three (3) years from date of receipt.

R. Failing to create adequate records, which shall be maintained for a period of three (3) years and made available to the Commission's staff for inspection and copying upon reasonable notice, from which the validity of any savings claims, retail price claims, comparative value claims, or other representations of the type described in Paragraphs II G(7), II M and II N of this Order can be determined, and making any pricing claims within the scope of this provision unless there are in existence for at least the six (6) months preceding such claims records from which the validity of such claims can be determined.

S. Failing to attach to any contract for the sale, rental or lease of any publication, merchandise, service or combination thereof a written statement that clearly and conspicuously discloses, and only discloses, the following information in the indicated order and manner:

(1) In 12-point bold-face type size the terminology:

PRICE LIST

THE FOLLOWING PRICES ARE THE *ONLY* AUTHORIZED PRICES AT WHICH THE LISTED ITEMS MAY BE OFFERED. ANY PRICE NOT LISTED BELOW IS UNAUTHORIZED AND FALSE.

(2) A list of all publications, merchandise, services or combination thereof currently offered for sale, rental or lease, and in immediate conjunction thereto each price at which any respondent is authorized to offer said product or service pursuant to Paragraph II M of this Order.

(3) In 12-point bold-face type the terminology, when applicable:

FREE ITEMS

ONLY THE FOLLOWING PRODUCTS AND SERVICES MAY BE OFFERED FREE. YOU ARE PAYING FOR ANY ITEMS RECEIVED AND NOT LISTED BELOW.

(4) A list of all publications, merchandise or services currently offered as free, without cost, or as a bonus pursuant to Paragraph II G(7) of this Order.

T. Failing to orally instruct any person at the time said person signs any contract for sale, rental or lease, of any publication, merchandise, service or combination thereof, pursuant to an oral sales presentation, that a "Price List" is attached to said person's contract.

III

It is further ordered, That respondents Grolier, Inc., American Peoples Press, Inc., Americana Interstate Corp., Career Institute, Inc., Grolier Enterprises, Inc., and Grolier Reading Programs, Inc., corporations, and their successors or assigns, their officers, agents, representatives and employees, directly or indirectly, through any corporation, subsidiary or division, or other device, in connection with the advertising, offering for sale, sale or distribution of any textbook, encyclopedia, reference or educational materi-

al, training course or teaching machine, or any other publication, merchandise or service through the use of any program, plan, method or device, that provides or purports to provide for the sale or distribution of any of said items to any person on an approval basis, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Representing, directly or by implication, either orally or in writing that:

(1) Any person has the option to receive each publication, merchandise or service, separately and individually, and to accept or reject same, unless such person is allowed in all instances to receive and to purchase or reject each such publication, merchandise or service separately and individually;

(2) Any person will not receive any further publication, merchandise or service after the respondent concerned has received a timely notification of the person's cancellation of any such program, plan or method of sale or distribution, unless such is the fact; or misrepresenting, in any manner, any consequence resulting from any person's cancellation of his participation in any such program, plan, or method of sale or distribution; and

(3) Any person incurs no risk or obligation by joining or participating in any such program, plan, or method of sale or distribution; or misrepresenting, in any manner, any condition, right, duty or obligation imposed on any person.

B. Disseminating, or causing the dissemination of, any advertisement which fails to disclose in a clear and conspicuous manner:

(1) A description of the conditions and terms of any such program, plan, or method of sale or distribution, and the duties, risks and obligations of any subscriber thereto; and

(2) A description of each publication, merchandise or service to be offered for sale, the billing charge to be made therefor, the anticipated total number of publications, merchandise or services included in any such program, plan or method of sale or distribution, the number of publications, merchandise or services that will be included in each shipment of such items, and the number of and the intervals between each such shipment.

C. Failing to disclose, clearly and conspicuously, on any return coupon, order form or any other document used for responding to any such program, plan, or method of sale or distribution, the following information:

(1) The anticipated total number of publications, merchandise or services included in any such program, plan, or method of sale or distribution;

(2) The number of publications, merchandise or services that will be included in each shipment of such items; and

(3) The number of and the intervals between each such shipment.

D. Failing to disclose, clearly and conspicuously, in immediate conjunction with any publication, merchandise, service or notice thereof sent to any subscriber the anticipated date on which the respondent from whom the subscriber obtained any of such items will initiate processing of the next shipment of any such item.

E. Failing to provide to any person in conjunction with each notice of any shipment of any publication, merchandise or service, a clear and conspicuous means by which said person may exercise his option or right to cancel said shipment, if such is his right.

IV

It is further ordered, That respondents Grolier, Inc., American Peoples Press, Inc., Americana Corp., Americana Interstate Corp., Federated Credit Corp., Career Institute, Inc., Grolier Interstate, Inc., Grolier New Era Corp., Madison Enterprises, Inc., R. H. Hinkley Co., Spencer International Press, Inc., The Grolier Society, Inc., and The Richards Co., corporations, and their successors, assigns, officers, agents, representatives and employees, directly or indirectly, through any corporation, subsidiary, division or other device, in connection with the collection or attempted collection of any debt allegedly due and owing pursuant to any contract or other agreement relating to the purchase or other receipt of any textbook, encyclopedia, reference or educational material, training course or teaching machine, or any other publication, merchandise or service, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. Representing, directly or by implication, either orally or in writing that:

(1) Any company, corporation, or entity engaged in collection of monies allegedly due or owing to such concerns or any other company, corporation or entity has separate *bona fide* departments or divisions for legal matters, unless such are the facts; or misrepresenting, in any manner, the existence, or functions of any division or department of any company, corporation or entity;

(2) The Code of Federal Regulations, or any other federal regulation or statute, provides that any employee of the Federal Government who has any outstanding debt due or owing may be subject to dismissal from the federal service for failure to pay said debt unless the respondent concerned can demonstrate that sufficient facts exist with regard to the employee to whom the representation was made which establish the propriety of such claim;

(3) Any person who utilizes the United States mails to obtain any publication, merchandise or service and who fails to pay or becomes delinquent in paying for any such item will be subject to prosecution for mail fraud under federal law unless the respondent concerned can demonstrate that sufficient facts exist, with regard to person to whom the representation was made, which established the propriety of such claim; or misrepresenting, in any manner, the rights, duties or obligations of any person arising from any federal, state, or local statute, ordinance, or regulation;

(4) Any respondent utilizes the services of credit reporting companies or other entities for persons who disseminate credit information in a manner which will adversely affect the public or general credit rating of any person who has become delinquent in paying any debt unless the respondent concerned can demonstrate that sufficient facts exist, with regard to the person to whom the representation was made, which establishes the propriety of such claim, or misrepresenting, in any manner, that any person's public or general credit rating will be adversely affected;

(5) Any letter, notice or other communication which has been prepared, originated or composed by any respondent has been prepared, originated or composed by any other person, firm or corporation;

(6) Suit will be instituted to recover any delinquent debt, or that any delinquent debt will be transferred to any attorney with instructions to institute suit, or that any other legal step to collect any outstanding debt will be taken, unless a definite date is set forth for such action and such are the facts; or misrepresenting, in any manner, respondents' relationship with, or instructions to, any attorney, or the course of action that will be taken by any attorney or misrepresenting in any manner that any account has been transferred to any person or entity for collection unless those are the facts.

B. Using any correspondence forms or any written materials which appear to depict official legal process.

V

For the purpose of the following provisions of this order, the term "respondents" shall apply to each of the respondents named in Paragraph I and II of the Order.

It is further ordered, That respondents:

A. Deliver by registered mail, a copy of this Decision and Order to each of their salesmen, agents, solicitors, or other persons engaged by respondents for the promotion, sale or distribution of any of the publications, merchandise or services included in this Order, and to any person engaged by respondents to perform such duties in the future at the time such person is so engaged;

B. Obtain from each person described in Paragraph V A, a signed statement setting forth their intention to conform their business practices to the requirements of this Order; retain said statement during the period of three (3) years thereafter; and make said statement available to the Commission's staff for inspection and copying upon reasonable notice;

C. Advise each such present and future salesman, agent, solicitor, or other person engaged by respondents for the promotion, sale or distribution of any of the publications, merchandise or services included in this Order that respondents will terminate the engagement or services of any such person, unless such person agrees to and does furnish to respondents a statement required by Paragraph V B, above; and

D. If any such person will not agree to file a statement with respondents as required by Paragraph V B above, and be bound by the provisions of this Order, the respondents shall immediately terminate the services of such person.

E. Furnish the Commission on a quarterly basis with a list, including business addresses, of those independent or outside distributors who have purchased or otherwise obtained for resale any of the publications, merchandise or services included in this Order.

VI

It is further ordered, That the respondent shall forthwith distribute a copy of this Order to each of their operating divisions.

VII

It is further ordered, That respondents shall notify the Commission at least thirty (30) days prior to any proposed change in any of the corporate respondents such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of which may affect compliance obligations arising out of this Order.

VIII

It is further ordered, That respondents shall, within sixty (60) days after the effective date of this Order, file with the Commission a report in writing setting forth in detail, the manner and form in which they have complied with this Order.

CAROL M. THOMAS,
Secretary.

APPENDIX A

NOTICE

Attached hereto are the pertinent provisions of a cease and desist order entered against Grolier, Incorporated and certain of its subsidiaries, including Grolier Interstate, Inc. by the Federal Trade Commission, an agency of the Federal Government. Violation of any provision of this Order can result in severe monetary penalties to Grolier, Incorporated and Grolier Interstate, Inc. If you are employed by Grolier, Incorporated or any of its subsidiaries, you will be required to observe the provisions of this Order. Violation of any provision of this Order by an employee constitutes a violation of a federal law.

You should carefully read this Order before agreeing to any employment arranged with Grolier, Inc. or any of its subsidiary companies.

President, Grolier, Inc.

[FR Doc. 78-11831 Filed 5-1-78; 8:45 am]

[6750-01]

[Docket No. C-2788]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Johnson Products Co., Inc.

AGENCY: Federal Trade Commission.

ACTION: Order modifying final order.

SUMMARY: This order modifies a consent order issued February 10, 1976, 41 FR 11172, 87 FTC 206, which was remanded to the Commission for reconsideration by the Court of Appeals for the Seventh Circuit. Modifications in the order exclude references to the advertising firm, restrict provisions of the order to hair straightening products, and are designed to eliminate the significant differences between the original order and that of a competitive company (Revlon, Inc.).

DATES: Final order issued February 10, 1976, order modifying final order issued March 20, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

Albert H. Kramer, Director, Bureau of Consumer Protection, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3727.

SUPPLEMENTARY INFORMATION: In the Matter of Johnson Products Co., Inc., a corporation. The prohibited trade practices and/or corrective actions. as codified under 16 CFR Part 13, for this case appearing at 41 FR 11172, remain unaltered except for the following deletions: § 13.10-5 Knowingly by advertising agent; 13.533-15 Destruction of records and/or data; and § 13.533-53 Recall of merchandise, advertising material, etc.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended (15 U.S.C. 45).)

[1] Copies of the modifying order filed with the original document.

The order modifying final order, is as follows:

ORDER MODIFYING ORDER TO CEASE AND DESIST

On February 10, 1976 the Commission rejected an attempt by respondent Johnson Products Co., Inc. to withdraw from an executed consent order agreement and, on that date, the Commission entered a final cease and desist order. Thereafter, respondent petitioned the Court of Appeals for the Seventh Circuit to review and set aside the order, contending inter alia that the Commission patently abused its discretion by refusing to permit respondent to withdraw from the consent agreement in the face of its claim that the Commission had engaged in an "unfair and arbitrary discrimination between similarly situated competitors * * *" (i.e., Revlon, Inc. and respondent). The Court stayed enforcement of the order and remanded the matter to the Commission, noting the prospect that the proceeding might be reopened and modified to eliminate some or all of the critical disparities between the Revlon and Johnson orders.

After extended negotiations, the parties executed an agreement, which will be treated as a petition to reopen this proceeding, containing an order to cease and desist. The modifications contained in this agreement substantially eliminate the significant differences between the Revlon and Johnson orders.

The Commission has duly considered the modifications encompassed in the agreement and has determined that the order should be so modified. Accordingly,

It is ordered, That the proceeding be, and it hereby is, reopened.

It is further ordered, That the order to cease and desist, as it applies to respondent Johnson Products Co., Inc., be, and it hereby is, modified by striking the section entitled "Order" and substituting therefor the following:

ORDER

I

It is ordered, That respondent Johnson Products Co., Inc., a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, offering for sale, sale, or distribution of Ultra Sheen Creme Relaxer (Ultra Sheen Relaxer) or any hair care product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, do forthwith cease and desist from:

A. Representing in writing, orally, visually, or in any other manner, directly or by implication, that:

V 43 | 85 MY 2 78 UMI

1. Any hair straightening product is comfortable, gentle or safe.
2. Any hair straightening product is easy to use or to apply.
3. Any hair straightening product feels cool to skin or scalp.

B. Representing, in any manner, directly or by implication, the efficacy of any hair straightening product or the ingredients therein, unless, at the time such representation is made, respondent has in its possession a reasonable basis, consisting of competent and reliable controlled tests to support such representation; or misrepresenting in any manner the nature of any such product or its ingredients or the effect of any such product or its ingredients on hair or skin or any other structure of the body.

C. Representing, in any manner, directly or by implication, the safety of any hair care product or the ingredients therein, unless at the time such representation is made respondent has in its possession a reasonable basis, consisting of competent and reliable controlled test, to support such representation. For purposes of this provision, failure to disclose facts shall not constitute a representation.

D. Disseminating or causing to be disseminated any advertisement of Ultra Sheen Relaxer or any hair straightening product of similar composition, which fails to disclose, clearly and conspicuously, with nothing to the contrary or in mitigation thereof, the following statement exactly as it appears below:

"WARNING: Follow directions carefully to avoid skin and scalp irritation, hair breakage and eye injury."

II

It is further ordered, That respondent Johnson Products Co., Inc., a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale, or distribution of Ultra Sheen Relaxer or any hair care product, do forthwith cease and desist from:

A. Disseminating or causing to be disseminated by United States mails or by any means in or having an effect upon commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, for the purpose of inducing or which is likely to induce, directly or indirectly the purchase of any such product, any advertisement which contains a representation prohibited by Paragraph I of this order or which omits a disclosure for such product required by Paragraph I of this order.

B. Disseminating or causing to be disseminated by any means, for the purpose of inducing or which is likely to induce, directly or indirectly, the purchase of any such product in or having an effect on commerce as "commerce" is defined in the Federal Trade Commission Act, as amended, any advertisement which contains a representation prohibited by Paragraph I of this order or which omits a disclosure for such product required by Paragraph I of this order.

III

It is further ordered, That respondent Johnson Products Co., Inc., a corporation, its successors and assigns and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division, or other device in connection with the offering for sale, sale, or distribution of Ultra Sheen Relaxer or any hair straightening product of similar composition in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended, do forthwith cease and desist from failing to include clearly and conspicuously on the information panel of the product package (i.e., the package containing the immediate container of the professional or home use hair straightening product), on the package insert, and on the label of the relaxer container of any such product, with nothing to the contrary or in mitigation thereof, the following disclosures exactly as they appear below:

"WARNING: 1. This product contains sodium hydroxide (lye). You must follow directions carefully to avoid skin and scalp burns, hair loss, and eye injury.

2. Do not use if scalp is irritated or injured.

3. Do not use on bleached hair. Do not use on permanently colored hair which is breaking, splitting or otherwise damaged. For hair that has been permanently colored and shows no sign of damage, use only mild strength formula.

4. If you have previously relaxed your hair, relax only the new growth, as described in the directions.

5. If the relaxer causes skin or scalp irritation, rinse out immediately and wash with the shampoo in the kit. If irritation persists or if hair loss occurs, consult a physician.

6. If the relaxer gets into eyes, rinse immediately and consult a physician."

Provided, however, That if such hair straightening product is offered for sale, sold or distributed without a neutralizing shampoo, respondent will disclose the following in place of Warning No. 5 above:

"5. If the relaxer causes skin or scalp irritation, rinse out immediately and wash with a non-alkaline shampoo (ph below 7). If irritation persists, or if hair loss occurs, consult a physician."

Provided further, however, That respondent may use existing retail product packages, package inserts, and container labels if such packages, inserts and labels conform to the order entered in this matter on February 10, 1976.

IV

It is further ordered, That respondent shall distribute a copy of this order to its present and future officers, directors, and operating division and that respondent secure from each such person a signed statement acknowledging receipt of the order.

V

It is further ordered, That respondent maintain complete business records relative to the manner and form of its continuing compliance with the terms and provisions of this order. Each record shall be retained by respondent for at least three years after it is made.

VI

It is further ordered, That respondent notify the Commission at least thirty days prior to any proposed change in respondent, such as dissolution, assignment or sale resulting in the emergence of a successor corporation or corporations, the creation or dissolution of subsidiaries, a change in the corporate name or address, or any other change in the corporation which may affect compliance obligations arising out of this order.

VII

It is further ordered, That the respondent herein shall, within sixty (60) days after service of this order, file with the Commission a written report setting forth in detail the manner and form of its compliance with this order: *Provided, however,* that such compliance report need not contain materials or information previously submitted to the Commission to demonstrate compliance with the order entered in this matter on February 10, 1976.

JAMES A. TOBIN,
Acting Secretary.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 78-123]

PART 101—GENERAL PROVISIONS

Field Organization; Fairport Harbor, Ohio

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to reflect recent changes in the field organization of the Customs Service. The Fairport Harbor, Ohio, Customs station has been placed under the supervision of the port of Ashtabula/Conneaut, Ohio, and the Lorain, Ohio, Customs station has been placed under the supervision of the port of Sandusky, Ohio. Both stations previously were under the supervision of the port of Cleveland, Ohio. These changes have been made to provide better Customs Service to importers, carriers, and the public.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert Schenarts, Inspection and Control Division, U.S. Customs Service, 1301 Constitution Avenue NE., Washington, D.C., 20229, 202-566-8151.

SUPPLEMENTARY INFORMATION:

BACKGROUND

As part of a continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to importers, carriers, and the public, the Customs Service has placed the Fairport Harbor, Ohio, Customs station under the supervision of the port of Ashtabula/Conneaut, Ohio, and the Lorain, Ohio, Customs station under the supervision of the port of Sandusky, Ohio. Both stations previously were under the supervision of the Customs port of Cleveland, Ohio.

To reflect these changes and to correct the listing for Fairport, Ohio, to its proper name of Fairport Harbor, Ohio, it is necessary to amend § 101.4(c) of the Customs Regulations (19 CFR 101.4(c)), which lists Customs stations and the ports of entry having supervision over these stations.

Because these amendments relate only to matters of agency organization and administration and do not impose any affirmative duty on the public, notice and public procedure thereon are unnecessary, and good cause exists for dispensing with a delayed effective date under 5 U.S.C. 553.

DRAFTING INFORMATION

The principal author of these amendments was Teresa M. Polino, Regulaltions and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

AMENDMENTS TO THE REGULATIONS

Section 101.4(c) of the Customs Regulations (19 CFR 101.4(c)) is amended by making the following changes:

1. "Fairport, Ohio ——" is corrected to read "Fairport Harbor, Ohio ——" in the column headed "Customs stations" opposite the reference to "Cleveland, Ohio" in the column headed "District". "Ashtabula/Conneaut." is substituted for "Cleveland." in the column headed "Port of entry having supervision" opposite the corrected reference to "Fairport Harbor, Ohio ——" in the column headed "Customs stations".

2. "Sandusky." is substituted for "Cleveland." in the column headed "Port of entry having supervision" opposite the reference to "Lorain, Ohio ——" in the column headed "Customs stations".

(Sec. 1, 37 Stat. 434, section 301, 80 Stat. 379; (5 U.S.C. 301, 19 U.S.C. 1).)

G. R. DICKERSON,
Acting Commissioner of Customs.

Approved: April 19, 1978.

BETTE B. ANDERSON,
Under Secretary of the Treasury.

[4810-22]

[T.D. 78-124]

PART 159—LIQUIDATION OF DUTIES

Waiver of Countervailing Duties—Handbags From Colombia

AGENCY: Department of the Treasury, Customs Service.

ACTION: Waiver of countervailing duties.

SUMMARY: This notice is to inform the public that a determination has been made to waive countervailing duties that would otherwise be required by section 303 of the Tariff Act of 1930 on imports of leather handbags from Colombia. The waiver is being issued based on actions by the Colombian handbag exporters to phase out the effective export subsidy on these items. The waiver will expire on January 4, 1979 unless revoked earlier.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Richard B. Self, Director, Office of Tariff Affairs, U.S. Treasury Department, 15th and Pennsylvania Avenue NW., Washington, D.C., 202-566-8585.

SUPPLEMENTARY INFORMATION: In T.D. 78-125, published concurrently with this determination, it has been determined that bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303), are being paid or bestowed directly or indirectly upon the manufacture, production, or exportation of handbags from Colombia.

Section 303(d) of the Tariff Act of 1930, as amended by the Trade Act of 1974 (Pub. L. 93-618, January 3, 1975), authorizes the Secretary of the Treasury to waive the imposition of countervailing duties during the 4-year period beginning on the date of enactment of the Trade Act of 1974 if he determines that:

(1) Adequate steps have been taken to reduce substantially or eliminate during such period the adverse effect of a bounty or grant which he has determined is being paid or bestowed with respect to any article or merchandise;

(2) There is a reasonable prospect that under section 102 of the Trade Act of 1974, successful trade agreements will be entered into with foreign countries or instrumentalities providing for the reduction or elimination of barriers to or other distortions of international trade; and

(3) The imposition of the additional duty under this section with respect to such article or merchandise would be likely to seriously jeopardize the satisfactory completion of such negotiations.

Based upon analysis of all the relevant factors and after consultations with interested agencies and parties with direct interest in this proceeding, I have concluded that steps have been taken to reduce substantially the adverse effects of the bounty or grant. Specifically the manufacturers/exporters of leather handbags in Colombia are formally committed to the total elimination of the net bounty derived from the tax rebate certificate program (CAT) (or any equivalent or comparable benefit) on exports to the United States of leather handbags between May 1, 1978, and January 1, 1979. Such elimination will be staged according to the following schedule: 50-percent reduction on or before May 1, 1978; 50-percent reduction of the remaining balance on or before August 22, 1978; and total elimination of any remaining net bounty on or before January 1, 1979. The Government of Colombia, which under law can adjust the CAT payment only in December of each year, has promised the Treasury that it will accept the voluntary payment by the handbag exporters to the Government of a portion of the CAT to reflect the phase-out expressed above.

In addition the waiver is conditioned on the absence of aggressive marketing of Colombian handbags in the United States, which the Colombian handbag exporters have promised will not take place.

After consulting with appropriate agencies, including the Department of Labor, the

V 4 3 1 8 5

Department of Commerce, and the Office of the Special Representative for Trade Negotiations, I have further concluded:

(1) That there is a reasonable prospect that, under section 102 of the Trade Act of 1974, successful trade agreements will be entered into with foreign countries or instrumentalities providing for the reduction or elimination of barriers to or other distortions of international trade; and

(2) That the imposition of countervailing duties on leather handbags from Colombia would be likely to seriously jeopardize the satisfactory completion of such negotiations.

Accordingly, pursuant to section 303(d) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(d)), I hereby waive the imposition of countervailing duties on handbags from Colombia.

This determination may be revoked, in whole or in part, at any time and shall be revoked whenever the basis supporting such determination no longer exists. Unless sooner revoked or made subject to a resolution of disapproval adopted by either House of the Congress of the United States pursuant to section 303(e) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(e)), this waiver of countervailing duties will, in any event by statute, cease to have force and effect on January 4, 1979.

On or after the date of publication in the FEDERAL REGISTER of a notice revoking this determination, in whole or in part, the day after the date of adoption by either House of Congress of a resolution disapproving this "waiver of countervailing duties," or January 4, 1979, whichever occurs first, countervailing duties will be assessable on handbags imported directly or indirectly from Colombia in accordance with T.D. 78-125, published concurrently with this determination.

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting after the last entry from Colombia under the commodity heading "Handbags," the number of this Treasury decision in the column heading "Treasury Decision," and the words "Imposition of countervailing duties waived" in the column headed "Action."

(R.S. 251, secs. 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2051, 2052 (19 U.S.C. 66, 1303), as amended, 1624)

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

APRIL 24, 1978.

[4810-22]

[T.D. 78-125]

PART 159—LIQUIDATION OF DUTIES

Leather Handbags From Colombia; Final Countervailing Duty Order

AGENCY: Customs Service, U.S. Treasury.

ACTION: Final countervailing duty order.

SUMMARY: This notice is to advise the public that an investigation has been completed which determined that the Government of Colombia has given benefits considered to be bounties or grants to manufacturers who export leather handbags to the United States. However, countervailing duties are being waived, based upon the criteria established by the Trade Act of 1974, including the actions to be taken by the Colombian handbag exporters to reduce significantly the bounty or grant.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Vincent P. Kane, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On November 1, 1977, a "Preliminary Countervailing Duty Determination" was published in the FEDERAL REGISTER (42 FR 57202). The notice stated that it preliminarily had been determined that benefits had been received by Colombian manufacturers and exporters of leather handbags which may constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (referred to in this notice as "the Act"). The notice stated that the benefits included the granting to manufacturers and exporters tax certificates ("CATS") upon export of the leather handbags and preferential financing for exporters.

The notice further stated that programs preliminarily determined not to be applicable included transportation subsidies, reduced credit insurance costs, freedom from taxes for firms located in designated free trade zones, and import duty exemptions for capital goods used in the production of exports.

Finally, the notice stated that import duty exemptions on raw materials used in the production of handbags for export was not a bounty or grant.

The notice provided interested parties 30 days from the date of publication to submit relevant data, views, or arguments, in writing, with respect to the preliminary determination.

The handbags subject to this determination are classified under item number 706.0820 of the tariff schedules of the United States as leather handbags, other than reptile. The term "handbags" as used in the petition covers "pocketbooks, purses, shoulder bags, clutch bags, and all similar articles by whatever name known, customarily carried by women or girls, but not including luggage of flatgoods."

Subsequent investigation led to the conclusion that alleged preferential export financing through PROEXPO, the Government agency responsible for the program, is not a bounty or grant since it was established that the terms provided through PROEXPO loans are identical to those available commercially.

The effect of the export subsidy (CAT) is offset by certain other factors. These include:

(1) The fact that the CAT is paid on the domestic value added component of the handbag, which effectively reduces the ad valorem benefit for handbags from 12 percent to 9 percent. Generally 75 percent of the value of a handbag in Colombia is produced from domestic materials;

(2) The discount paid by holders of CATS in the stock exchange, thus effectively not providing full value of the CAT when sold;

(3) Devaluation of the peso to the dollar since the certificate is not received on an average of 9 months after application has been made for it;

(4) Customs duties paid by the leather tanners on imported chemicals used in the tanning process. Such fiscal charge has the effect of being an indirect tax that, while not rebated, but would be eligible under the concept of drawback;

(5) Municipal sales taxes imposed on the handbag manufacturers and tanners, which are indirect taxes directly related to the exported handbag. While not rebated on export, they would be eligible under the act;

(6) The present value effect of the CAT resulting from the inflationary impact on its delayed payment. Treasury considered only that 90-day period which the Government of Colombia assured that no CATS could be tendered under any circumstances.

After consideration of all information received, it is hereby determined that leather handbags from Colombia are subject to bounties or grants within the meaning of section 303 of the Act. The bounties or grants are in the form of the export certificates referred to in the preliminary determination, taking into account the offsets described in this notice. The net amount of bounty or grant has been ascertained and determined to be 5.46 percent of the f.o.b. price for export to the United States of leather handbags from Colombia.

Effective on or after May 2, 1978, and until further notice, upon the entry for consumption of such dutiable leather handbags imported directly or indirectly from Columbia, which benefit from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration. To the extent that it can be established to the satisfaction of the Commissioner of Customs that imports of leather handbags from Colombia are benefitting from a bounty or grant smaller than the amount which otherwise would be applicable under the above declaration, the smaller amount so established shall be assessed and collected.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be credited or bestowed, directly or indirectly, upon the manufacture, production, or exportation of leather handbags from Colombia.

Notwithstanding the above, a "Notice of Waiver of Countervailing Duties" is being published concurrently with this order which covers leather handbags from Colombia subject to this investigation in accordance with section 303(d) of the Act. At such time as the waiver ceases to be effective, in whole or in part, a notice will be published setting forth the deposit of estimated countervailing duties which will be required at the time of entry, or withdrawal from warehouse, for consumption of each product then subject to the payment of countervailing duties.

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting under the column headed "Country," the name "Colombia," and inserting the words "leather handbags," in the column headed "Commodity," the number of this Treasury Decision in the column headed "Treasury Decision," and the words "Bounty Declared-Rate" in the column headed "Action."

(R.S. 251, as amended, secs. 303, 624, 46 Stat. 687, as amended, 759 (19 U.S.C. 66, 1303, 1624).)

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 (Revision 15), March 16, 1978, and the provisions of the Treasury Department Order No. 165, Revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47); insofar as they pertain to the issuance of a final countervailing duty determination by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM.
General Counsel of the Treasury.

APRIL 24, 1978.

[FR Doc. 78-11812 Filed 5-1-78; 8:45 am]

[4110-03]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

Advisory Committees; Establishment and Terminations

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: Under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463) and the public advisory committee procedures (21 CFR Part 14), this document announces the establishment of one advisory committee and the termination of three others. This document adds to and deletes from the agency's list of standing advisory committees.

EFFECTIVE DATES: May 2, 1978, authority for the committee being established will end on April 10, 1980, unless the Secretary formally determines that renewal is in the public interest.

FOR FURTHER INFORMATION CONTACT:

Richard L. Schmidt, Committee Management Office (HFS-20), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-2765.

SUPPLEMENTARY INFORMATION: Under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463) and § 14.40(b) (21 CFR 14.40(b)), the Food and Drug Administration announces the establishment of the Anti-Infective and Topical Drugs Advisory Committee by the Secretary of the Department of Health, Education, and Welfare.

The committee will review and evaluate data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in infectious diseases, dermatological disorders, and ocular disease, and it will make appropriate recommendations to the Commissioner of Food and Drugs. The committee will consist of 15 members.

Concurrently with the establishment, the Secretary approved the termination of the Anti-Infective Agents Advisory Committee, the Dermatology Advisory Committee, and the Ophthalmic Drugs Advisory Committee. Under § 14.55(b) (21 CFR 14.55(b)), FDA announces the termination of these committees.

Therefore, under the Federal Food, Drug, and Cosmetic Act (section 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 14 is amended in § 14.100 by revising paragraph (c)(2) and deleting paragraphs (c)(8) and (15) and marking them "reserved," as follows:

§ 14.100 List of standing advisory committees.

* * * * *

(c) * * *

(2) Anti-Infective and Topical Drugs Advisory Committee.

(i) Date established: April 10, 1978.

(ii) Function: Reviews and evaluates data concerning the safety and effectiveness of marketed and investigational prescription drugs for use in infectious diseases, dermatological disorders, and ocular diseases, and makes appropriate recommendations to the Commissioner.

* * * * *

Effective date: Since this is a technical conforming amendment to Part 14, the Commissioner finds that there is good cause for the rule to be effective immediately upon publication in the FEDERAL REGISTER, May 2, 1978.

(Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)).)

Dated: April 24, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc. 78-11718 Filed 5-1-78; 8:45 am]

[4110-03]

SUBCHAPTER H—MEDICAL DEVICES

[Docket No. 77N-0110]

EXEMPTIONS FROM FEDERAL PREEMPTION OF STATE AND LOCAL DEVICE REQUIREMENTS

Procedures for Consideration of Applications

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes the procedures for applying to the Food and Drug Administration (FDA) for an exemption from the Federal preemption provisions of section 521 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360k). Section 521(a) preempts certain State or local device laws by providing that no State or local government may establish or

M Y 2 7 8 UMI

V 4 3 — 8 5

continue in effect any requirement with respect to the safety and effectiveness of a medical device that is different from or in addition to a requirement applicable to the device under the act. Section 521(b) provides that, under certain conditions and in accordance with specified procedures, FDA may exempt a State or local requirement from the preemption provisions of section 521(a).

EFFECTIVE DATE: July 3, 1978.

FOR FURTHER INFORMATION CONTACT:

Joseph M. Sheehan, Bureau of Medical Devices (HFK-70), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Avenue, Silver Spring, Md. 20910, 301-427-7114.

SUPPLEMENTARY INFORMATION: The proposal on which this final regulation is based was published in the FEDERAL REGISTER of June 14, 1977 (42 FR 30383). Interested persons were given until August 15, 1977 to comment on the proposal. Twenty comments were received. Most of the comments questioned the agency's interpretation of section 521 of the Federal Food, Drug, and Cosmetic Act.

Section 521(a) of the act provides for preemption of State and local requirements applicable to a medical device intended for human use that are different from or in addition to requirements applicable under the act. Section 521(b) provides that FDA may, by regulation issued after notice and an opportunity for an oral hearing, exempt a state or local medical device requirement from preemption under such conditions as the Commissioner may prescribe if the requirement is: (1) More stringent than Federal requirements applicable to the device under the act, or (2) required by compelling local conditions and compliance with it would not cause the device to be in violation of any applicable requirement under the act.

In the FEDERAL REGISTER of February 15, 1977 (42 FR 9186), FDA issued a proposal relating to an application for exemption from Federal preemption of medical device requirements filed by the State of California. Interested persons were given 60 days to submit written comments on the proposal. An oral hearing on the proposal was held on July 19, 1977. Many views presented in the written comments and at the oral hearing on the California application relate to the general procedures for applying for exemption from preemption and to FDA's interpretation of the scope of section 521 of the act. Accordingly, these views were also considered in the preparation of this final regulation.

In a related action, FDA's new regulations governing professional and patient labeling and conditions for sale of hearing aids became effective on August 25, 1977. Because these new requirements preempted some existing State and local requirements relating to hearing aids, and because five States had filed applications for exemption from preemption, FDA issued a notice in the FEDERAL REGISTER of October 18, 1977 (42 FR 55648) inviting the remaining State and local governments to file within 30 days, applications for exemption from preemption for requirements governing labeling and conditions for sale of hearing aids. This notice was intended to expedite FDA's consideration of applications for exemption from preemption for hearing aid requirements by encouraging simultaneous submissions by affected State and local governments. FDA stated its intention to evaluate each such application on its own merits, but to publish in a single FEDERAL REGISTER notice a proposed regulation to grant or to deny each such application for exemption, and to hold a single hearing on the proposed regulation. Appropriate FEDERAL REGISTER notices will be published in the near future. When appropriate, the Commissioner intends to adopt this consolidated approach in considering future applications for exemption from preemption.

RESPONSE TO COMMENTS

1. Many comments stated that there is no basis in the act or in the legislative history to justify the interpretation of section 521 of the act set forth in the first sentence of proposed § 808.1(d). That sentence stated that State and local requirements are preempted only when FDA has established specific counterpart regulations or there are other specific requirements applicable to a particular device under the act, thereby making any existing divergent State or local requirements applicable to the device different from, or in addition to, the specific FDA requirements.

The comments generally argued that all State and local medical device requirements were preempted as of May 28, 1976, the date of enactment of the Medical Device Amendments of 1976 (Pub. L. 94-295) (the Amendments). Some comments also noted that if there is no FDA requirement then any State requirement is "in addition to" the FDA requirement and is, therefore, preempted by the plain language of section 521 of the act. Other comments disputed the statement in the preamble to the proposal that a regulatory hiatus could result if State and local requirements were considered preempted before FDA could implement Federal requirements. These comments noted that the Amendments provide broad protection to the public from unsafe and ineffective medical devices. Comments also pointed out that the Congressional intent in enacting section 521 was to assure that interstate commerce would not be unduly burdened by the imposition of a substantial number of differing requirements applicable to a medical device by State and local governments and that this indicated that immediate preemption was intended. Comments also compared section 521 of the act to section 903 of S. 510 (the Senate version of the Amendments) which, had it been enacted, would have limited preemption only to devices subject to FDA standards or premarket approval, and to the preemption provisions included in other Federal acts. The thrust of these comments was that the language in section 521 is broader than the language in the other preemption provisions and therefore Congress intended a broader scope of preemption.

The Commissioner believes that both the language of section 521 of the act and the legislative history of the Amendments support the interpretation expressed in the proposal. Section 521(a) clearly states that:

> no State • • • may establish or continue in effect with respect *to a device* intended for human use *any requirement*—
>
> (1) which is different from, or in addition to, any requirement applicable under this Act to *the device*, and
>
> (2) which relates to the safety or effectiveness of *the device* or to any other matter included in a requirement applicable to *the device* under this Act. [Emphasis added.]

Thus, from a plain reading of section 521 of the act it is clear that the scope of preemption is limited to instances where there are specific FDA requirements applicable to a particular device or class of devices. As noted in the preamble to the proposal, a prime example is the preemption of divergent State or local requirements relating to hearing aid labeling and conditions for sale, which occurred when the new FDA hearing aid regulations took effect on August 25, 1977. Here, only requirements relating to labeling and conditions for sale were preempted, not all State or local requirements regulating other facets of hearing-aid distribution.

The language of section 521 of the act also does not support the argument that any State or local requirement is "in addition to" an FDA requirement if there is no FDA requirement. The phrase "or in addition to, any requirement applicable under this Act to the device" means that an FDA requirement must exist before preemption can occur. Moreover, the references in the comments to other Federal preemption statutes and bills do not support a different conclusion.

Finally, the interpretation of section 521 expressed in the regulation is more consistent with the Congressional intent of the Amendments than the interpretation urged by the comments. The entire thrust of the Amendments is to provide FDA with new and additional authority to assure that only safe and effective medical devices are permitted on the market. See, for example, House of Representatives Rept. No. 94-853, 94th Cong., 2d Sess. 3, 5-13, 17, 23, and 59 (1976); House of Representatives Conference Rept. No. 94-853, 94th Cong., 2d Sess. 51 et seq. (1976). There is nothing in the legislative history to indicate Congress intended that the Amendments should result in less protection for the public, which would be the natural consequence of State Controls being eliminated during the considerable period of time it will take for FDA to implement fully the new authorities provided in the Amendments.

Yet, interpretations urged by the comments would provide less public protection from unsafe and ineffective medical devices because State and local regulation of medical devices would be reduced or eliminated before compensating FDA regulations could become effective. For example, many States have laws governing labeling and conditions for sale of hearing aids. Under the theory espoused in the comments, these laws were preempted on May 28, 1976, although the FDA regulations on hearing aids did not become effective until August 25, 1977. In the interim, presumably, hearing aids were regulated neither by the States nor FDA. In the absence of a specific Congressional directive to this effect, however, the Commissioner will not adopt such a position.

The Commissioner also believes that the interpretation expressed in the regulation will not cause an undue burden on interstate commerce because it merely allows State and local requirements to continue in effect until FDA establishes a national policy on the regulation of specific devices. Thus, since there is no duplication between FDA and State programs, there is no greater burden on interstate commerce than if the Amendments had not been enacted.

2. Several comments stated that there is no basis in the act or in the legislative history for the statement in proposed § 808.1(d)(2) that section 521(a) does not preempt State or local requirements that are equal to, or substantially identical to, requirements imposed by or under the act. Some comments argued that if a State or local requirement is not exactly identical to the FDA requirement it is "different from" the FDA requirement. Other comments argued that even if a State or local requirement is exactly identical to the FDA requirement it is "in addition to" the FDA requirement and therefore preempted. Comments also pointed out that a State or local requirement that is exactly identical in language to the FDA requirement may be interpreted or applied in such a way as to make it "different from" an FDA requirement. Some comments also noted that it is not clear in the proposed regulation when FDA would consider requirements to be substantially identical.

The Commissioner believes that a common sense reading of section 521 of the act supports the "substantially identical" concept in § 808.1(d)(2). Thus, while a State or local requirement may differ in some nonessential manner from an FDA requirement, if it is substantially identical to an FDA requirement it is not "different from" the FDA requirement within the meaning of section 521, and therefore not preempted. It is not necessary that a State or local requirement be exactly identical in wording to an FDA requirement in order to be "substantially identical" so long as there is substantial identity between the FDA and the State or local requirement. In determining whether a State requirement meets this criterion, the Commissioner must consider whether the State requirement is so different as to interfere with the FDA requirement or as to injure public health by imposing an undue burden on interstate commerce. Thus, although the wording of a State or local requirement may not be identical to the FDA requirement, it may be substantially identical if the thrust or effect of the State or local requirement is the same as that of the FDA requirement.

The Commissioner also cannot accept the argument that an identical State or local requirement is preempted because it is "in addition to" the FDA requirement. Such an interpretation of section 521 renders meaningless the "different from" language of section 521 because under this theory any State and local requirement would be preempted whether or not it was actually "different from" an FDA requirement.

When determining whether a State or local requirement is preempted, however, the Commissioner will consider how the requirement is interpreted and applied, not merely the literal language of the applicable statute. This approach is consistent with the recent Supreme Court decision in *Jones* v. *Rath Packing Co.*, 97 S. Ct. 1305, 1309 (1977), a case involving the preemptive effects of food labeling requirements under the Fair Packaging and Labeling Act, the Federal Food, Drug, and Cosmetic Act, and the Wholesome Meat Act. The court there noted that in determining whether or not a Federal statute preempts a State statute, it is necessary "to consider the relationship between state and federal laws as they are interpreted and applied, not merely as they are written."

Finally, to clarify when FDA will consider State or local requirements to be "substantially identical," a new definition of "substantially identical" has been added to § 808.3.

3. Several comments objected to proposed § 808.1(d)(6), which stated that section 521(a) of the act does not preempt State or local requirements respecting general enforcement, such as requirements for inspection of factory records, registration and licensing of manufacturers, and prohibition of adulteration and misbranding of devices. The comments argued that there is no basis in the act or in the legislative history to support the contention that these types of requirements are not requirements with respect to a device within the meaning of section 521 of the act.

The Commissioner believes that State laws relating to inspection, registration, and licensing usually are not requirements "with respect to a device" within the meaning of section 521 of the act because they generally pertain either to persons who manufacture or distribute devices or to places where devices are manufactured, and not directly to devices. In order for a State provision to be a requirement with respect to a device within the meaning of section 521 of the act—and thereby a candidate for preemption—it must relate to the device itself.

Similarly, a State statute prohibiting the sale of an adulterated or misbranded device is not a "requirement with respect to a device" because it applies to the person who would sell the device—and thereby cause the violation—and not to the device itself. Thus, as a general proposition, State prohibitions against the sale of adulterated or misbranded devices are not preempted. Where, however, the State establishes a particular substantive provision defining what constitutes adulteration or misbranding, e.g., a specific type of labeling, this would be a "requirement" within the meaning of section 521 of the act because it relates directly to a device. If such a provision were "different from" or "in addition to" an FDA requirement, it would be preempted. Section 808.1(d)(6) is changed to clarify this position. In determining whether the provision is "different from" or "in addition to" an FDA requirement (that is, in determining whether it is "substantially identical"), the key factor is how the statute is actually applied by the State or local government. Thus, if such a State or local provision, as it is drafted, is "substantially identical" to the adulteration or misbranding provisions of sections 501 and 502 of the act (21 U.S.C. 351 and 352), but it is interpreted or applied to a specific device in such a way as to make it "different from" or "in addition to" the FDA requirements, that interpretation or application would be preempted.

UMI

V 4 3 — 8 5

4. Several comments stated that it is unclear in the proposed regulation whether or when State and local premarket approval requirements are preempted.

Like all other medical device requirements, different or additional State and local premarket approval requirements are preempted when FDA establishes specific counterpart regulations or there are other specific requirements applicable to the device under the act. For a device classified in class III under sections 513(f) and 520(l) of the act (21 U.S.C. 360c(f) and 360j(l)), the counterpart FDA requirement—the requirement that the product have premarket approval—was established by operation of the act immediately upon enactment of the Amendments on May 28, 1976. For a device in commercial distribution before the date of enactment of the Amendments (or a substantially equivalent device) that is classified in class I under section 513(d) of the act (21 U.S.C. 360c(d)), the FDA requirement—in this instance actually a determination that the product is not subject to premarket approval or a performance standard—is established on the date of final classification of the device. For a device classified into class II, one part of the FDA requirement—that the product is not subject to premarket approval—is established on the date of final classification; the other part of the FDA requirement will be established when an FDA standard for the product is promulgated. For a device classified in class III under section 513(d) of the act, the counterpart FDA requirement is established on the date the device can not lawfully be marketed without approval of an application for premarket approval under section 501(f)(1)(A) of the act (21 U.S.C. 351(f)(1)(A)). Once these FDA requirements are established, different or additional State requirements are preempted. The Commissioner believes that no change in the final regulation is necessary to reflect this position.

5. Several comments objected to proposed § 808.5, which provided for the granting of advisory opinions on issues related to preemption of State and local requirements. Some comments suggested that FDA should not issue advisory opinions with respect to whether a State or local requirement or proposed requirement would be exempted from preemption unless FDA has all the information required for an application for exemption from preemption and provides an opportunity for a public hearing. These comments argued that if FDA issues an opinion that a requirement may be exempted from preemption and the State or local government later files an application for exemption, the Commissioner would be prejudiced by his previous opinion. Other comments stated that FDA should not issue advisory opinions with respect to proposed legislation pending before a State or local legislative body because the advisory opinion may be based on incomplete information and may have an undue influence on the legislative process.

The Commissioner believes that enough procedural safeguards are built into the process of issuing FDA advisory opinions to overcome the objections raised by the comments. Section 10.85 (21 CFR 10.85), which is incorporated by reference in proposed § 808.5, provides that the Commissioner may refuse a request for an advisory opinion if the request contains incomplete information on which to base an informed advisory opinion. Section 10.85 also provides that an advisory opinion may be amended or revoked at any time. The Commissioner will carefully review an application for exemption from preemption for a State or local requirement where he has previously issued an advisory opinion indicating whether an exemption might be granted, and the application will be judged on its own merits notwithstanding the earlier advisory opinion. In cases in which the Commissioner issues an advisory opinion on pending legislation, application of the advisory opinion will be limited to the facts presented when the opinion is issued, and the opinion will not apply if the legislation is changed significantly upon enactment.

The Commissioner believes that advisory opinions can be very useful in cases in which preemption is uncertain, and he encourages State and local governments, affected industries, and interested individuals to request advisory opinions in such cases. This practice will enable the Commissioner to clarify the uncertain status of State and local regulation of medical devices. As stated in the preamble to the proposed regulation, future FEDERAL REGISTER announcements of FDA actions that involve medical devices will discuss the preemption impact of the proposed actions of different or additional State or local requirements.

6. Several comments argued that FDA should not grant an exemption from preemption merely on a finding that the State or local requirement is more stringent than the FDA requirement or is required by compelling local conditions and would not cause the device to be in violation of any requirement under the act. The comments suggested that FDA should require the State or local government to show that granting an exemption will not cause an undue burden on interstate commerce and will result in a benefit in proportion to the cost of compliance.

It should be noted that section 521(b) of the act makes the granting of an exemption from preemption discretionary with the Commissioner. The two criteria mentioned in the comments are merely initial determinations that must be made before the Commissioner may exercise this discretion. The Commissioner intends to weigh carefully all of the consequences before granting an application for exemption from preemption.

Proposed § 808.25(g)(3) provided that the Commissioner may not grant an exemption if he determines that the granting of an exemption would not be in the best interest of the public health, taking into account the potential effect on the public health of granting or denying an exemption, e.g., additional cost to consumer, availability of needed products, etc. All other factors such as burdens on interstate commerce, compelling local conditions, and stringency will be weighted against these public health considerations. To enable FDA to make more informed judgments on these matters, § 808.20(c) is changed in the final regulation to require applicants to provide information on how the public health may be benefitted and how interstate commerce may be affected if an exemption is granted.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 521, 701, 52 Stat. 1055–1056 as amended, 90 Stat. 574 (21 U.S.C. 360k, 371)) and under authority delegated to the Commissioner (21 CFR 5.1), Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

PART 15—PUBLIC HEARING BEFORE THE COMMISSIONER

1. By revising § 15.1(b) to read as follows:

§ 15.1 Scope.

• • • • •

(b) Pursuant to specific provisions in other sections of this chapter, a matter pending before the food and Drug Administration is subject to a public hearing before the Commissioner. Such specific provisions are in § 330.10(a)(8) of this chapter relating to review of the safety, effectiveness, and labeling of over-the-counter drugs, and in Part 808 of this chapter relating to exemptions from preemption of requirements for devices.

• • • • •

PART 25—ENVIRONMENTAL IMPACT CONSIDERATIONS

2. By adding new § 25.1(d)(6) to read as follows:

§ 25.1 Applicability.

• • • • •

(d) • • •

(6) Promulgation of a regulation exempting from preemption a requirement of a State or political subdivision concerning a device, or publication of a notice denying an application for such exemption.

• • • • •

3. By adding new Part 808 to read as follows:

PART 808—EXEMPTIONS FROM FEDERAL PREEMPTION OF STATE AND LOCAL MEDICAL DEVICE REQUIREMENTS

Subpart A—General Provisions

Sec.
808.1 Scope.
808.3 Definitions.
808.5 Advisory opinions.

Subpart B—Exemption Procedures

808.20 Application.
808.25 Procedures for processing an application.
808.35 Revocation of an exemption.

Subpart C—Listing of Specific State and Local Exemptions [Reserved]

AUTHORITY: Secs. 521, 701, 52 Stat. 1055–1056 as amended, 90 Stat. 574 (21 U.S.C. 360k, 371).

Subpart A—General Provisions

§ 808.1 Scope

(a) This part prescribes procedures for the submission, review, and approval of applications for exemption from Federal preemption of State and local requirements applicable to medical devices under section 521 of the act.

(b) Section 521(a) of the act contains special provisions governing the regulation of devices by States and localities. That section prescribes a general rule that after May 28, 1976, no State or political subdivision of a State may establish or continue in effect any requirement with respect to a medical device intended for human use having the force and effect of law (whether established by statute, ordinance, regulation, or court decision), which is different from, or in addition to, any requirement applicable to such device under any provision of the act and which relates to the safety or effectiveness of the device or to any other matter included in a requirement applicable to the device under the act.

(c) Section 521(b) of the act contains a provision whereby the Commissioner of Food and Drugs may, upon application by a State or political subdivision, allow imposition of a requirement which is different from, or in addition to, any requirement applicable under the act to the device (and which is thereby preempted) by promulgating a regulation in accordance with this part exempting the State or local requirement from preemption. The granting of an exemption does not affect the applicability to the device of any requirements under the act. The Commissioner may promulgate an exemption regulation for the preempted requirement if he makes either of the following findings:

(1) That the requirement is more stringent than a requirement under the act applicable to the device; or

(2) That the requirement is required by compelling local conditions and compliance with the requirement would not cause the device to be in violation of any applicable requirement under the act.

(d) State or local requirements are preempted only when the Food and Drug Administration has established specific counterpart regulations or there are other specific requirements applicable to a particular device under the act, thereby making any existing divergent State or local requirements applicable to the device different from, or in addition to, the specific Food and Drug Administration requirements. There are other State or local requirements that affect devices that are not preempted by section 521(a) of the act because they are not "requirements applicable to a device" within the meaning of section 521(a) of the act. The following are examples of State or local requirements that are not regarded as preempted by section 521 of the act:

(1) Section 521(a) does not preempt State or local requirements of general applicability where the purpose of the requirement relates either to other products in addition to devices (e.g., requirements such as general electrical codes, and the Uniform Commercial Code (warranty of fitness)), or to unfair trade practices in which the requirements are not limited to devices.

(2) Section 521(a) does not preempt State or local requirements that are equal to, or substantially identical to, requirements imposed by or under the act.

(3) Section 521(a) does not preempt State or local permits, licensing, registration, certification, or other requirements relating to the approval or sanction of the practice of medicine, dentistry, optometry, pharmacy, nursing, podiatry, or any other of the healing arts or allied medical sciences or related professions or occupations that administer, dispense, or sell devices. However, regulations issued under section 520(e) or (g) of the act may impose restrictions on the sale, distribution, or use of a device beyond those prescribed in State or local requirements. If there is a conflict between such restrictions and State or local requirements, the Federal regulations shall prevail.

(4) Section 521(a) does not preempt specifications in contracts entered into by States or localities for procurement of devices.

(5) Section 521(a) does not preempt criteria for payment of State or local obligations under Medicaid and similar Federal, State or local health-care programs.

(6)(i) Section 521(a) does not preempt State or local requirements respecting general enforcement, e.g., requirements that State inspection be permitted of factory records concerning all devices, registration, and licensing requirements for manufacturers and others, and prohibition of manufacture of devices in unlicensed establishments. However, Federal regulations issued under sections 519 and 520(f) of the act may impose requirements for records and reports and good manufacturing practices beyond those prescribed in State or local requirements. If there is a conflict between such regulations and State or local requirements, the Federal regulations shall prevail.

(ii) Generally, section 521(a) does not preempt a State or local requirement prohibiting the manufacture of adulterated or misbranded devices. Where, however, such a prohibition has the effect of establishing a substantive requirement for a specific device, e.g., a specific labeling requirement, then the prohibition will be preempted if the requirement is different from, or in addition to, a Federal requirement established under the act. In determining whether such a requirement is preempted, the determinative factor is how the requirement is interpreted and enforced by the State or local government and not the literal language of the statute, which may be identical to a provision in the act.

(7) Section 521(a) does not preempt State or local provisions respecting delegations of authority and related administrative matters relating to devices.

(8) Section 521(a) does not preempt a State or local requirement whose sole purpose is raising revenue or charging fees for services, registration, or regulatory programs.

(9) Section 521(a) does not preempt State or local requirements of the types that have been developed under the Atomic Energy act of 1954 (42 U.S.C. 2011 note), as amended, the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602 (42 U.S.C. 263b et seq.)) and other Federal statutes, until such time as the Food and Drug Administration issues specific requirements under the Federal Food, Drug, and Cosmetic Act applicable to these types of devices.

(e) It is the responsibility of the Food and Drug Administration, sub-

MY 2 78 UMI

V 4 3 1 8 5

ject to review by Federal courts, to determine whether a State or local requirement is equal to, or substantially identical to, requirements imposed by or under the act, or is different from, or in addition to, such requirements, in accordance with the procedures provided by this part. However, it is the responsibility of States and political subdivisions to determine initially whether to seek exemptions from preemption. Any State or political subdivision whose requirements relating to devices are preempted by section 521(a) may petition the Commissioner of Food and Drugs for exemption from preemption, in accordance with the procedures provided by this part.

§ 808.3 Definitions.

(a) "Act" means the Federal Food, Drug, and Cosmetic Act.

(b) "Compelling local conditions" includes any factors, considerations, or circumstances prevailing in, or characteristic of, the geographic area or population of the State or political subdivision that justify exemption from preemption.

(c) "More stringent" refers to a requirement of greater restrictiveness or one that is expected to afford to those who may be exposed to a risk of injury from a device a higher degree of protection than is afforded by a requirement applicable to the device under the act.

(d) "Political subdivision" or "locality" means any lawfully established local governmental unit within a State which unit has the authority to establish or continue in effect any requirement having the force and effect of law with respect to a device intended for human use.

(e) "State" means a State, American Samoa, the Canal Zone, the Commonwealth of Puerto Rico, the District of Columbia, Guam, Johnston Island, Kingman Reef, Midway Island, the Trust Territory of the Pacific Islands, the Virgin Islands, and Wake Island.

(f) "Substantially identical to" refers to the fact that a State or local requirement does not significantly differ in effect from a Federal requirement.

§ 808.5 Advisory opinions.

(a) Any State, political subdivision, or other interested person may request an advisory opinion from the Commissioner with respect to any general matter concerning preemption of State or local device requirements or with respect to whether the Food and Drug Administration regards particular State or local requirements, or proposed requirements, as preempted.

(1) Such an advisory opinion may be requested and may be granted in accordance with § 10.85 of this chapter.

(2) The Food and Drug Administration, in its discretion and after consultation with the State or political subdivision, may treat a request by a State or political subdivision for an advisory opinion as an application for exemption from preemption under § 808.20.

(b) The Commissioner may issue an advisory opinion relating to a State or local requirement on his own initiative when he makes one of the following determinations:

(1) A requirement with respect to a device for which an application for exemption from preemption has been submitted under § 808.20 is not preempted by section 521(a) of the act because it is: (i) Equal to or substantially identical to a requirement under the act applicable to the device, or (ii) is not a requirement within the meaning of section 521 of the act and therefore is not preempted;

(2) A proposed State or local requirement with respect to a device is not eligible for exemption from preemption because the State or local requirement has not been issued in final form. In such a case, the advisory opinion may indicate whether the proposed requirement would be preempted and, if it would be preempted, whether the Food and Drug Administration would propose to grant an exemption from preemption;

(3) Issuance of such an advisory opinion is in the public interest.

Subpart B—Exemption Procedures

§ 808.20 Application.

(a) Any State or political subdivision may apply to the Food and Drug Administration for an exemption from preemption for any requirement that is preempted. An exemption may only be granted to a State or political subdivision for a requirement that it has enacted and that has been enacted, promulgated, or issued in final form by the authorized body or official of the State or political subdivision so as to have the force and effect of law. However, an application for exemption may be submitted before the effective date of the requirement.

(b) An application for exemption shall be in the form of a letter to the Commissioner of Food and Drugs and shall be signed by an individual who is authorized to request the exemption on behalf of the State or political subdivision. Four copies of the letter and any accompanying material, as well as any subsequent reports or correspondence concerning an application, shall be submitted to the Hearing Clerk (HFC–20), Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, Md. 20857. The outside wrapper of any application, report, or correspondence should indicate that it concerns an application for exemption from preemption of device requirements.

(c) For each requirement for which an exemption is sought, the application shall include the following information to the fullest extent possible, or an explanation of why such information has not been included:

(1) Identification and a current copy of any statute, rule, regulation, or ordinance of the State or political subdivision considered by the State or political subdivision to be a requirement which is preempted, with a reference to the date of enactment, promulgation, or issuance in final form. The application shall also include, where available, copies of any legislative history or background materials pertinent to enactment, promulgation, or issuance of the requirement, including hearing reports or studies concerning development or consideration of the requirement. If the requirement has been subject to any judicial or administrative interpretations, the State or political subdivision shall furnish copies of such judicial or administrative interpretations.

(2) A comparison of the requirement of the State or political subdivision and any applicable Federal requirements to show similarities and differences.

(3) Information on the nature of the problem addressed by the requirement of the State or political subdivision.

(4) Identification of which (or both) of the following bases is relied upon for seeking an exemption from preemption:

(i) The requirement is more stringent than a requirement applicable to a device under the act. If the State or political subdivision relies upon this basis for exemption from preemption, the application shall include information, data, or material showing how and why the requirement of the State or political subdivision is more stringent than requirements under the act.

(ii) The requirement is required by compelling local conditions, and compliance with the requirement would not cause the device to be in violation of any applicable requirement under the act. If the State or political subdivision relies upon this basis for exemption from preemption, the application shall include information, data, or material showing why compliance with the requirement of the State or political subdivision would not cause a device to be in violation of any applicable requirement under the act and why the requirement is required by compelling local conditions. The application shall also explain in detail the compelling local conditions that justify the requirement.

(5) The title of the chief administrative or legal officers of that State or local agency that has primary responsibility for administration of the requirement.

(6) When requested by the Food and Drug Administration, any records concerning administration of any requirement which is the subject of an exemption or an application for an exemption from preemption.

(7) Information on how the public health may be benefitted and how interstate commerce may be affected, if an exemption is granted.

(8) Any other pertinent information respecting the requirement voluntarily submitted by the applicant.

(d) If litigation regarding applicability of the requirement is pending, the State or political subdivision may so indicate in its application and request expedited action on such application.

§ 808.25 Procedures for processing an application.

(a) Upon receipt of an application for an exemption from preemption submitted in accordance with § 808.20, the Commissioner shall notify the State or political subdivision of the date of such receipt.

(b) If the Commissioner finds that an application does not meet the requirements of § 808.20, he shall notify the State or political subdivision of the deficiencies in the application and of the opportunity to correct such deficiencies. A deficient application may be corrected at any time.

(c) After receipt of an application meeting the requirements of § 808.20, the Commissioner shall review such application and determine whether to grant or deny an exemption from preemption for each requirement which is the subject of the application. The Commissioner shall then issue in the FEDERAL REGISTER a proposed regulation either to grant or to deny an exemption from preemption. The Commissioner shall also issue in the FEDERAL REGISTER a notice of opportunity to request an oral hearing before the Commissioner or the Commissioner's designee.

(d) A request for an oral hearing may be made by the State or political subdivision or any other interested person. Such request shall be submitted to the Hearing Clerk within the period of time prescribed in the notice and shall include an explanation of why an oral hearing, rather than submission of written comments only, is essential to the presentation of views on the application for exemption from preemption and the proposed regulation.

(e) If a timely request for an oral hearing is made, the Commissioner shall review such a request and may grant a legislative-type informal oral hearing pursuant to Part 15 of this chapter by publishing in the FEDERAL REGISTER a notice of the hearing in accordance with § 15.20 of this chapter. The scope of the oral hearing shall be limited to matters relevant to the application for exemption from preemption and the proposed regulation. Oral or written presentations at the oral hearing which are not relevant to the application shall be excluded from the administrative record of the hearing.

(f) If a request for hearing is not timely made or a notice of appearance is not filed pursuant to § 15.21 of this chapter, the Commissioner shall consider all written comments submitted and publish a final rule in accordance with paragraph (g) of this section.

(g) (1) The Commissioner shall review all written comments submitted on the proposed rule and the administrative record of the oral hearing, if an oral hearing has been granted, and shall publish in the FEDERAL REGISTER a final rule in subpart C of this part identifying any requirement in the application for which exemption from preemption is granted, or conditionally granted, and any requirement in the application for which exemption from preemption is not granted.

(2) The Commissioner may issue a regulation granting or conditionally granting an application for an exemption from preemption for any requirement if the Commissioner makes either of the following findings:

(i) The requirement is more stringent than a requirement applicable to the device under the act;

(ii) The requirement is required by compelling local conditions, and compliance with the requirement would not cause the device to be in violation of any requirement applicable to the device under the act.

(3) The Commissioner may not grant an application for an exemption from preemption for any requirement with respect to a device if the Commissioner determines that the granting of an exemption would not be in the best interest of public health, taking into account the potential burden on interstate commerce.

(h) An advisory opinion pursuant to § 808.5 or a regulation pursuant to paragraph (g) of this section constitutes final agency action.

§ 808.35 Revocation of an exemption.

(a) An exemption from preemption pursuant to a regulation under this part shall remain effective until the Commissioner revokes such exemption.

(b) The Commissioner may by regulation, in accordance with § 808.25, revoke an exemption from preemption for any of the following reasons:

(1) An exemption may be revoked upon the effective date of a newly established requirement under the act which, in the Commissioner's view, addresses the objectives of an exempt requirement and which is described, when issued, as preempting a previously exempt State or local requirement.

(2) An exemption may be revoked upon a finding that there has occurred a change in the bases listed in § 808.20(c)(4) upon which the exemption was granted.

(3) An exemption may be revoked if it is determined that a condition placed on the exemption by the regulation under which the exemption was granted has not been met or is no longer being met.

(4) An exemption may be revoked if a State or local jurisdiction fails to submit records as provided in § 808.20(c)(6).

(5) An exemption may be revoked if a State or local jurisdiction to whom the exemption was originally granted requests revocation.

(6) An exemption may be revoked if it is determined that it is no longer in the best interests of the public health to continue the exemption.

(c) An exemption that has been revoked may be reinstated, upon request from the State or political subdivision, if the Commissioner, in accordance with the procedures in § 808.25, determines that the grounds for revocation are no longer applicable except that the Commissioner may permit abbreviated submissions of the documents and materials normally required for an application for exemption under § 808.20.

Subpart C—Listing of Specific State and Local Exemptions [Reserved]

Effective date: This regulation shall become effective July 3, 1978.

(Secs. 521, 701, 52 Stat. 1055-1056 as amended, 90 Stat. 574 (21 U.S.C. 360k, 371).)

Dated: April 24, 1978.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

[FR Doc. 11719 Filed 5-1-78; 8:45 am]

[4110–03]

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket No. 77F–0374]

PART 172—FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION

Sodium Lauryl Sulfate

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The food additive regulations are being amended to provide for safe use of sodium lauryl sulfate as a wetting agent in the partition of high and low melting fractions of crude vegetable oils and animal fats. A petition had been filed by DeLaval Separator Co. proposing this safe use.

DATES: Effective May 2, 1978, objections by June 1, 1978.

MY 2 78 UMI

V 4 3 — 8 5 M Y 2 7 8 UMI

ADDRESS: Written objections to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C Street SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Notice was published in the FEDERAL REGISTER of January 17, 1978 (43 FR 2445) that a food additive petition (FAP 6A3170) had been filed by DeLaval Separator Co., 350 Dutchess Turnpike, Poughkeepsie, N.Y. 12602, proposing that the food additive regulations be amended to provide for the use of sodium lauryl sulfate as a wetting agent in the partition of high and low melting fractions of crude vegetable oils and animal fats.

The Commissioner of Food and Drugs, having evaluated data in the petition and other relevant material, concludes that § 172.822 *Sodium lauryl sulfate* (21 CFR 172.822) should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))), and under authority delegated to the Commissioner (21 CFR 5.1), section 172.822 is amended by adding new paragraph (b)(4) to read as follows:

§ 172.822 Sodium lauryl sulfate.

. . . . . .

(b) . . .

(4) As a wetting agent at a level not to exceed 10 parts per million in the partition of high and low melting fractions of crude vegetable oils and animal fats, provided that the partition step is followed by a conventional refining process that includes alkali neutralization and deodorization of the fats and oils.

. . . . . .

Any person who will be adversely affected by the foregoing regulation may at any time on or before (June 1, 1978) submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective May 2, 1978.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: April 26, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[FR Doc. 78-11807 Filed 5-1-78; 8:45 am]

[4910-22]

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER J—HIGHWAY SAFETY

PART 920—PAVEMENT MARKING DEMONSTRATION PROGRAM

Revision

AGENCY: Federal Highway Administration, DOT.

ACTION: Final rule.

SUMMARY: The Federal Highway Administration (FHWA) is issuing this document in response to the recommendations of the FHWA Regulations Reduction Task Force. The existing regulations have been amended to eliminate redundancy, reduce detailed instructions, reduce reporting requirements, and provide increased flexibility on the part of FHWA field elements and the States.

EFFECTIVE DATE: May 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. James L. Rummel, 202-426-2131, Office of Highway Safety; or Mrs. Kathleen S. Markman, 202-426-0790, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are Monday through Friday from 7:45 a.m. to 4:15 p.m. e.s.t.

SUPPLEMENTARY INFORMATION: Because these rules contain no substantial changes from the existing pavement marking demonstration program regulations, notice and comments are unnecessary.

NOTE.—The Federal Highway Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949 and OMB Circular A-107.

In consideration of the above, 23 CFR Part 920 is revised to read as follows:

Sec.
920.1 Purpose.
920.3 Objective.
920.5 Eligibility.
920.7 Procedures.
920.9 Standards.
920.11 Reports.

AUTHORITY: 23 U.S.C. 151 and 315; 49 CFR 1.48.

§ 920.1 Purpose.

The purpose of the regulation is to set forth policies and procedures for implementing Section 151 of Title 23, United States Code, "Pavement Marking Demonstration Program."

§ 920.3 Objective.

The objective of the Pavement Marking Demonstration Program is to improve the pavement marking of all highways and to demonstrate the value of such markings in providing greater vehicle and pedestrian safety.

§ 920.5 Eligibility.

Pavement Marking Demonstration Program funds are eligible for expenditure on all public highways (except Interstate) and may be used for the following:

(a) Application of markings on highways which have never been marked, or upgrading to current standards those existing markings which do not conform to the Manual on Uniform Traffic Control Devices (MUTCD),[1]

(b) Restoration of markings on highways previously marked if the previous markings have been substantially obliterated for a sufficient period to provide adequate base data for evaluation,

(c) Renewal of pavement markings placed under this program in order to maintain their effectiveness for a 2-year evaluation period,

(d) Installation of materials or devices having a design life longer than conventional paint markings,

(e) Installation of delineators,

[1]The Manual on Uniform Traffic Control Devices (Stock Number 5001-0021) may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

(f) Materials, labor, and equipment rental or depreciation charges associated with the placement of pavement markings and delineators under this program, and

(g) Surveys of pavement marking and delineation needs and the collection, analysis, and evaluation of data to determine the safety benefits attributable to this program.

§ 920.7 Procedures.

(a) *Programing.* Pavement marking projects shall be included in the Federal-aid highway program developed in accordance with 23 CFR Part 630, Subpart A (Federal-Aid Programs Approval and Authorization). The States shall give priority to projects on highways in rural areas.

(b) *Implementation.* Pavement marking projects shall be implemented using normal Federal-aid project procedures modified to incorporate such timesaving procedures as may be developed by the State highway agency and the Federal Highway Administration (FHWA) including the use of abbreviated plans, grouping of projects, and simplified inspection procedures. In addition, the FHWA finds it to be in the public interest to permit a State or local government to use its own forces to implement pavement marking projects, if so requested.

(c) *Release of Funds.* Funds for this program may be released by the Federal Highway Administrator for other safety projects as specified in 23 U.S.C. 151(f). Funds will not be considered for release until all rural public highways in the State with an average daily traffic volume of 250 vehicles or more have been marked with a centerline when the paved surface is 16 feet (4.88 meters) or wider and marked with a center line and edgelines when the paved surface is 20 feet (6.10 meters) or wider. Projects using such released funds shall be developed and implemented in accordance with 23 CFR Part 655, Subpart E (Highway Safety Improvement Program).

§ 920.9 Standards.

Pavement markings or devices placed under this program shall conform to the standards in the Manual on Uniform Traffic Control Devices.[2]

§ 920.11 Reports.

Annually, each State shall submit to the FHWA Division Administrator a report (OMB 04-R2450 and RCS HHS-20-02) on the progress being made in implementing this program and the effectiveness of the improvements made under it. Each State's annual report shall be prepared as follows:

(a) *Content.* The State's report shall include: (1) Data on the progress made in completing the pavement marking demonstration effort. These data shall include current year information on the number of miles marked (centerline and edgeline); railroad-highway grade crossings, pedestrian crossings, and other special area markings completed; and the nature of the work yet to be completed in the program.

(2) An evaluation of the pavement markings placed by comparing accident data for the period following application of the markings with similar data for the period prior to application of the markings. This analysis shall consider the change in number, rate (per million vehicle miles), and severity of accidents, and present a cost-benefit ratio for the improvements accomplished under this program.

(b) *Submission.* The State's report shall be submitted to the FHWA Division Administrator by August 31 of each year until the end of the second year following completion of the total demonstration program in the State.

Issued on: April 24, 1978.

KARL S. BOWERS,
Deputy Administrator.

[FR Doc. 78-11861 Filed 5-1-78; 8:45 am]

[2]The Manual on Uniform Traffic Control Devices (Stock Number 5001-0021) may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Title 24—Housing and Urban Development

CHAPTER II—ASSISTANT SECRETARY FOR HOUSING—FEDERAL HOUSING COMMISSIONER, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-78-467]

PART 200—INTRODUCTION

Subpart S—Minimum Property Standards

REVISION NO.6 TO HUD'S MINIMUM PROPERTY STANDARDS

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: This notice incorporates new standards and reference standards to prevent condensation on metal frame windows, for plastic siding, for ceramic tile, to establish minimum bathtub width, and to establish a minimum distance between the bottom of subsurface absorption fields and water tables. Energy conservation is achieved through permissible reduction of minimum window area requirements for single family housing and through increasing requirements for tightly sealing air ducts. Requirements are also introduced for vapor barriers on cold water piping to reduce condensation problems.

EFFECTIVE DATE: June 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard A. Gray, Chief, Standards Branch, Office of Housing, Department of Housing and Urban Development, Washington, D.C. 20410, telephone 202-755-6590.

SUPPLEMENTARY INFORMATION: HUD Minimum Property Standards are published in handbooks: Minimum Property Standards for One- and Two-Family Dwellings 4900.1, Multifamily Dwellings 4910.1, and Care-Type Housing 4920.1. The Minimum Property Standards are incorporated by reference into 24 CFR 200.929. All substantive changes in the Minimum Property Standards are required by 24 CFR 200.933 to be published in the FEDERAL REGISTER using the same procedure as for the publication of regulations. The Minimum Property Standards for which these changes are proposed are available for examination in all HUD Field Offices and in Room 6170, Headquarters at the above address during business hours.

On October 14, 1977, (42 FR 55229) HUD proposed changes to Minimum Property Standards. Interested persons were given until November 11, 1977, to comment on the proposed amendment. Sixteen comments were received in response to the proposed changes. There is no significant difference between this final notice and the proposal.

DISCUSSION OF MAJOR COMMENTS

The following is a discussion of major comments on the proposed revisions to the Minimum Property Standards for One- and Two-Family Dwellings, Multifamily Housing and Care-Type Housing.

Comments were received concerning the inclusion of the AAMA 1502.6 for improving the performance of metal windows. One commenter was concerned about the shortage of insulating materials. As the material used in manufacturing insulating metal frames is generally some type of plastic which is a low heat conductor, this is not the type of insulating material which is in short supply. A comment from a major wood window manufacturer questioned the validity of requiring compliance to AAMA 1502.6 which they contend may be misleading to the consumer. Although at present the AAMA standard does not include requirements for U values, work is proceeding to establish such criteria. In

V 4 3 — 8 5
M Y 2
7 8
UMI

the meantime metal windows complying to the present AAMA 1502.6 standard will perform better than those that do not. One aspect of better performance expected from windows complying to AAMA 1502.6 is that they will have fewer condensation problems. This was a major reason for recognizing the AAMA standard.

Two comments pertained to the new criteria in paragraph 515-3.1 which require air ducts in unconditioned spaces to have the seams taped. The objection was centered around the problem of taping longitudinal seams of return air ducts created by the space enclosed by joists and a metal sheet attached to the joists. The intent was to reduce the air leakage from ducts. Taping is a method of doing this but we recognize that it is just one method. To permit other ways of reducing leakage such as using gaskets, this paragraph is changed by dropping the word "taped" and adding the words "tightly sealed."

On Section 615-5.3i of the Minimum Property Standards for Multifamily Dwellings and the MPS for Care-Type Housing, a commenter pointed out that we should require a maximum not a minimum C value to be energy conserving. This confusion has been corrected. Also suggested was to include the English units behind the C value. This, however, is taken care of in Appendix A—Definitions. This commenter also suggested that more specific language be included on how long periods of no flow conditions exist in hot and cold water piping. The requirement for pipe insulation is added not only for freeze protection but for energy conservation and to reduce condensation problems.

Also received were questions on paragraph 401-4.2a which applies to the Minimum Property Standards for One- and Two-Family Dwellings and Multifamily Dwellings.

One question raised was whether the requirement for a bathtub is reasonable. This commenter stated that elderly units are currently exempt from this requirement but no mention is made of an exception for units designed for the handicapped. This is incorrect as the italic type in the MPS applies to housing for both the elderly and handicapped. Further clarification of this is found in paragraph 100-1.2.

Another commenter was concerned with the lack of the inclusion of tolerances. The allowable tolerances are specified in our referenced standard for bathtubs, ANSI A112-19, and need not be repeated in the MPS text.

We received most of the comments on the MPS for Single Family Dwellings paragraph 403-3 concerning the reduction of minimum window sizes. Contrary to the views of some of the commenters, this revision does not require a reduction in window size but it allows such a reduction. Most commenters pointed out the possible energy gains larger windows have over smaller windows. Unfortunately, these grains are realized only when window location and use are properly integrated into the heating and cooling system of the living unit and the occupant adheres to the system's constraints. Also, a consideration for good window design is given in Footnote 3 of Table 6-7.1 of the MPS for Single Family Dwellings. Another commenter pointed out that this change may affect the egress provision of the MPS or model codes. This is not so. Although both egress and light and ventilation requirements have criteria stated in minimums, neither prohibit the use of larger areas or dimensions.

Finally, some reviewers took this opportunity to comment on an issue not included in the proposed revision. These concerns were for the 15% maximum glass to wall area requirement found in paragraph 607-3.3 of the Single Family MPS. Again, Footnote 3 to Table 6-7.1 gives consideration to the well designed residence.

A finding of inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this finding of inapplicability will be available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410.

For clarity, the Handbook section will be cited followed by the revised language. Accordingly, Handbooks 4900.1, 4910.1 and 4920.1 incorporated by reference in 24 CFR 200.933 are revised as follows:

The following technical changes apply to the Minimum Property Standards for Single Family Dwellings, 4900.1; Multifamily Dwellings, 4910.1; and Care-Type Housing, 4920.1.

Section 508-5.1 is changed to read:

General. In areas where experience indicates that condensation on windows is a problem, windows with insulating frames shall be used. Windows conforming to the recommendations of AAMA 1502.6 for the climatic conditions in the area are considered as meeting this requirement. Where wood is used as the insulator, it shall be water repellent preservative treated.

Section 515-3.1 is amended as shown below:

Duct insulation. When supply or return air ducts used for heating, cooling, or both are installed in unconditioned spaces, they shall have the longitudinal and transverse seams tightly sealed to reduce air leakage and shall be insulated with or have thermal characteristics equivalent to: • • •

Appendix A is changed to read:

Conductance, thermal. The time rate of heat flow through a unit area of a material, of given thickness, per unit of temperature difference. Value is expressed in Btu/(hr×sq ft×F). (symbol C).

Conductivity, thermal. The time rate of heat flow through a unit area of a homogeneous material under the influence of a unit temperature gradient. Value is expressed in (Btu×in.)/(hr×sq ft×F). (symbol k).

Appendix C.

Section 509-2 Rigid PVC (polyvinyl chloride) plastic siding PS-55 is added.

Section 509-4 and 509-5 Ceramic tile standard TCA 137 replaces ANSI 137.1.

The following changes apply to the Minimum Property Standards for Multifamily Dwellings, 4910.1 and Care-Type Housing 4920.1.

Section 615-5.3i is amended as shown below:

Cold water piping installed in locations of the building subject to freezing temperatures, or where pipe sweating may create a problem shall be insulated and covered with a vapor barrier. All circulating domestic hot water piping shall be insulated with a material having a maximum thermal conductance (C value) of 0.50.

The following changes apply to the Minimum Property Standards for One- and Two-Family Dwellings, 4900.1 and Multifamily Dwellings, 4910.1.

Section 401-4.2a is amended as follows:

Each dwelling unit shall have one bathroom containing a bathtub with a minimum outside width of 30 in., a lavatory and water closet. In other bathrooms showers may be substituted for bathtubs. Bathrooms shall provide for comfortable access to, and use of, each fixture. Bathrooms shall be convenient to the bedrooms.

The following changes apply to the Minimum Property Standards for One- and Two-Family Dwellings, 4900.1.

Section 403-3 Requirements for minimum natural light glazed area and natural ventilation opening as a percentage of room floor area in living units are changed from 10 percent to 8 percent and 5 percent to 4 percent respectively.

Section 615-5.3i is amended to read as follows:

Cold water piping installed in locations of the building subject to freezing temperatures, or where pipe sweating may create a problem shall be insulated and covered with a vapor barrier.

Section 615-9.6

Added requirement for 3 ft minimum from bottom of subsurface absorption field to water table.

(Sec. 7(d) of the Department of HUD Act (42 U.S.C. 3535(d)).)

Issued at Washington, D.C., April 20, 1978.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing—Federal Housing Commissioner.

[4210-01]

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-4085]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Suspension of Community Eligiblity

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: This rule lists communities where the sale of flood insurance, as authorized under the National Flood Insurance Program (NFIP), will be suspended because of noncompliance with the flood plain management requirements of the program.

EFFECTIVE DATE: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), administered by the Federal Insurance Administration, enables property owners to purchase flood insurance at rates made affordable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (24 CFR part 1909 et seq.). Accordingly, the communities are suspended on the effective date in the fifth column, so that as of that date subsidized flood insurance is no longer available in the community.

In addition, the Federal Insurance Administration has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the the sixth column of the table. Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended, provides that no direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP, with respect to which a year has elapsed since publication of a flood insurance map. This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

In each entry, a complete chronology of effective dates appears for each listed community.

Section 1914.6 is amended by adding in alphabetical sequence new entries to the table.

§ 1914.6 List of suspended communities.

State	County	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Hazard area identified	Dates[1]

Title 41—Public Contract and Property Management

CHAPTER 60—OFFICE OF FEDERAL CONTRACT COMPLIANCE PROGRAMS, EQUAL EMPLOYMENT OPPORTUNITY, DEPARTMENT OF LABOR

PART 60-4—CONSTRUCTION CONTRACTORS—AFFIRMATIVE ACTION REQUIREMENTS

Correction

AGENCY: Office of Federal Contract Compliance Programs, Labor.

ACTION: Correction.

SUMMARY: On April 7, 1978, the U.S. Department of Labor published a final rule in the FEDERAL REGISTER (43 FR 14888) to establish specific affirmative action standards for women in construction and consolidate and standardize requirements for construction contractors and subcontractors subject to Executive Order 11246, as amended (30 FR 12319, 32 FR 14303), to promote equal employment opportunity in the construction industry. This document is published to correct critical errors made in the final rule.

EFFECTIVE DATE: The effective date of the regulations was published as May 8, 1979. The correct effective date is May 8, 1978.

FOR FURTHER INFORMATION CONTACT:

William Raymond, Associate Director, OFCCP, 202-523-9477.

Part 60-4 is corrected as follows: In FR Doc. 78-9083, published on April 7, 1978, (43 FR 14888), the last sentence in paragraph e on page 14896 which reads: "The Contractor shall provide notice of these programs to the sources compiled under 7b above" should be corrected to read, "The Contractor shall provide notice of these programs to the sources compiled under 7b above."

On page 14897, the last sentence in § 60-4.4 (a) which reads:

> Until the Director has issued an order pursuant to § 60-4.6 of this part establishing goals and timetables for minorities in the appropriate geographical areas or for a project covered by Special Bid Conditions, the goals and timetables for minorities to be inserted in the Notice require by 41 CFR 60-4.2 shall be the goals and timetables contained in the Hometown Plan, Imposed Plan or Special Bid Conditions presently covering the respective geographical area or project involved

should be corrected to read:

> Until the Director has issued an order pursuant to § 60-4.6 of this part establishing goals and timetables for minorities in the appropriate geographical areas or for a project covered by Special Bid Conditions, the goals and timetables for minorities to be inserted in the Notice required by 41 CFR 60-4.2 shall be the goals and timetables contained in the Hometown Plan, Imposed Plan or Special Bid Conditions presently covering the respective geographical area or project involved.

On page 14897, the last sentence in § 60-4.6 should be corrected by inserting the word "in" between the words "notices" and "the" so that the sentence reads:

> The goals shall be applicable to each construction trade in a covered contractor's or subcontractor's entire workforce which is working in the area covered by the goals and timetables, shall be published as notices in the FEDERAL REGISTER, and shall be inserted by the contracting officers and applicants, as applicable, in the Notice required by 41 CFR 60-4.2.

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER E—SUPPLY AND PROCUREMENT

[FPMR Amdt. E-219]

PART 101-25—GENERAL

Subpart 101-25.3—Use Standards

USE STANDARDS FOR OFFICE FURNITURE AND CARPETING

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This regulation updates the use standards for office furniture and carpeting to delete references to a volume of the GSA Supply Catalog that has been discontinued and a Bureau of the Budget circular that has been rescinded.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. John I. Tait, Director, Regulations and Management Control Division, Office of the Executive Director, Federal Supply Service, General Services Administration, Washington, D.C. 20406, 703-557-1914.

1. Section 101-25.302-1(a) is revised as follows:

§ 101-25.302-1 Executive type office furniture and furnishings.

(a) The use of executive type wood office furniture, whether new or rehabilitated, shall be limited to personnel in grade GS-15 and above (or the equivalent, including military rank) except as provided for in (b), below. Executive type wood office furniture consists of the unitized, traditional, and modern items of executive wood office furniture listed in the GSA Furniture Catalog. Furnishings matching executive type office furniture are subject to the same grade limitations as executive type office furniture except that carpeting may be supplied for use of other personnel when it is determined to be justified in accordance with the provisions of § 101-25.302-5.

. . . . .

2. Section 101-25.302-5 is revised as follows:

§ 101-25.302-5 Carpeting.

(a) Carpeting is authorized for use where it can be justified over other types of floor covering on the basis of cost, safety, insulation, acoustical control, the degree of interior decoration required, or the need to maintain an environment commensurate with the purpose for which the space is allocated, as when executive or unitized office furniture is authorized under § 101-25.302-1.

(b) In connection with new construction or alteration of space, if it is known that the area will eventually require carpeting, then resilient floor covering should be omitted and the carpeting installed initially.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).)

Dated: April 21, 1978.

ROBERT T. GRIFFIN,
Acting Administrator of General Services.

PART 101-30—FEDERAL CATALOG SYSTEM

Standard Form 1303, Request for Federal Cataloging/Supply Support Action

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This regulation announces the redesignation of GSA Form 1303, Request for Federal Cataloging/Supply Support Action, as Standard Form 1303, Request for Federal Cataloging/Supply Support Action. The impending use of the form by the Department of Defense and civilian agencies has necessitated this change. This regulation changes the FPMR to reflect the redesignation of this form.

EFFECTIVE DATE: May 2, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. John I. Tait, Director, Regulations and Management Control Division, Office of the Executive Director, Federal Supply Service, General Services Administration, Washington, D.C. 20406, 703-557-1914.

The table of contents for Part 101-30 is amended to revise the caption for § 101-30.4901, add § 101-30.4901-1303, reserve § 101-30.4902, and delete § 101-30.4902-1303, as follows:

Sec.
101-30.4901 Standard forms.
101-30.4901-1303 Standard Form 1303, Request for Federal Cataloging/Supply Support Action.
101-30.4902 GSA forms. [Reserved]
101-30.4902-1303 [Deleted]

Subpart 101-30.3—Cataloging Items of Supply

Section 101-30.303(b) is revised as follows:

§ 101-30.303 Responsibility.

. . . . .

(b) Agencies not having the capabilities cited in paragraph (a) of this section shall prepare Standard Form 1303, Request for Federal Cataloging/Supply Support Action (illustrated at § 101-30.4901-1303), or an EAM card of formatted actions for submission to GSA (or to the appropriate Defense Logistics Agency (DLA) supply center for maintenance actions as described in § 101-30.503). GSA of DLA will perform al cataloging functions and/or prepare and transmit data to DLSC. Instructions on the preparation and submission of Standard Form 1303 for requesting Federal cataloging and/or supply support actions and EAM cards for volume add/delete user requests are contained in the GSA Handbook, Federal Cataloging System-Logistics Data (FPMR 101-30.3), issued by the Commissioner, Federal Supply Service.

. . . . .

Subpart 101-30.5—Maintenance of the Federal Catalog System

Section 101-30.503(d) is revised as follows:

§ 101-30.503 Maintenance actions required.

. . . . .

(d) All civilain agencies not authorized to submit catalog data to DLSC shall use Standard Form 1303, Request for Federal Cataloging/Supply Support Action, to request maintenance action. Proposed maintenance requests shall be submitted to GSA for collaboration and submission to DLSC, except that civilian agencies receiving supply support from DLA supply centers, as expressed in the DLSC user record by major organizational entity (MOE) rule, should submit proposed maintenance requests to the appropriate DLA supply center for collaboration and submission to DLSC. When GSA receives maintenance requests for these items, they will be referred to the appropriate DLA supply center.

Subpart 101-30.49—Illustrations of Forms

1. Section 101-30.4901 is revised as follows:

§ 101-30.4901 Standard forms.

(a) Standard forms are illustrated in this § 101-30.4901 to show their text, format, and arrangement and to provide a ready source of reference. The subsection numbers in this § 101-30.4901 correspond with the Standard form numbers.

(b) Standard forms illustrated in this § 101-30.4901 may be obtained by submitting a requisition in FEDSTRIP format to the GSA regional office providing support to the requesting activity.

2. Section 101-30.4901-1303 is added as follows:

§ 101-30.4901-1303 Standard Form 1303, Request for Federal Cataloging/Supply Support Action.

§ 101-30.4902 GSA forms. [Reserved]

3. Section 101-30.4902 is reserved as set forth above.

§ 101-30.4902-1303 [Deleted]

4. Section 101-30.4902-1303 is deleted.

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)).)

NOTE.—The form illustrated in § 101-30.4901-1303 is filed with the original document and does not appear in the FEDERAL REGISTER.

Dated; April 24, 1978.

JAY SOLOMON,
Administrator of General Services.

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 100a—DIRECT PROJECT GRANT AND CONTRACT PROGRAMS

PART 182—COOPERATIVE EDUCATION PROGRAMS

Rules Governing Awards for Planning, Establishing, Expanding or Carrying Out Programs

AGENCY: Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: This document sets forth rules governing awards for planning, establishing, expanding, or carrying out programs of Cooperative Education, and for support of training, research, or demonstration projects. The document amends the existing Cooperative Education Program regulation in order to implement the legislative changes required by the Education Amendments of 1976 and to simplify the language of the regulation. The principal legislative changes are the provision of Federal assistance for cooperative education programs over a period of five years (formerly three) at annually decreasing percentages, and the inclusion of part-time students in cooperative education programs.

EFFECTIVE DATE: October 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. John L. Chase, Chief, Cooperative Education Branch, Bureau of Higher and Continuing Education, Room 3053, Regional Office Building 3, 7th and D Streets SW., Washington, D.C. 20202, 202-245-2146.

SUPPLEMENTARY INFORMATION:

1. *Background.* The purpose of this program is to enrich the quality and scope of postsecondary education through educationally-related work experiences which afford students an opportunity to earn funds needed for their education, while enabling them to become better prepared to achieve their educational or career objectives. Under the Cooperative Education Program, the Commissioner makes awards to eligible institutions of higher education or combinations of those institutions for planning, establishing, expanding, or carrying out programs of Cooperative Education, and for the support of training, research, or demonstration projects.

The Education Amendments of 1976 amend the Higher Education Act by inserting the Cooperative Education Program under Title VIII (formerly title IV-D), and making certain technical amendments to its provisions. These technical amendments allow alternating periods of work and school attendance to be on other than a full-time basis, and authorize the Commissioner to make grants for up to five fiscal years, instead of three.

2. *Applicability.* Awards for the Cooperative Education Program for Fiscal Year 1978 are being made in accord with the notice published in the FEDERAL REGISTER, November 28, 1977. Awards for Fiscal Year 1979 and thereafter will be made in accordance with these regulations.

3. *Summary of Comments and Responses.* The Commissioner published in the FEDERAL REGISTER, on September 9, 1977, a notice of proposed rulemaking to incorporate the technical changes resulting from the Education Amendments of 1976 into existing program regulations. Both written and oral comments were invited regarding the proposed regulations for the Cooperative Education Program. These comments and the Commissioner's responses are as follows:

Comment: A number of comments were received stating that the wording in § 182.2 of the proposed regulation omits any statement of the objectives of the program. It was suggested that language similar to that in the existing program regulation be added to indicate that the purpose of the program is to enrich the quality and scope of postsecondary education through educationally-related work experience which affords students an opportunity to earn funds needed for their education while enabling them to become better prepared to achieve their educational or career objectives.

Response: The regulation has been changed to reflect this comment. Language to indicate the purpose of the program has been included in § 182.2.

Comment: One commenter suggested that the proposed regulation be examined to assure that it is free of sex bias or sex stereotyping.

Response: No change has been made in the regulation. In the development of this regulation a deliberate effort was made to avoid the use of single sex pronouns and adjectives. This regulation contains no statement which implies the preference of one sex over another.

Comment: One commenter suggested that the proposed regulation be amended to include a definition and guidelines for "educationally-related work experience".

Response: No change is made in the regulation. The regulation is sufficient and a definition is not necessary.

Comment: One comment was received urging that § 182.16(a)(1) should include some condition that the placement of students be supervised by the applicant in order to assure work-school ties.

Response: No change has been made in the regulation. The wording in § 182.16(a) (2) and (3) sufficiently addresses this concern. Therefore, the recommended modification is not necessary.

Comment: One commenter suggested that the regulation be revised to provide assurances that the needs of disadvantaged and handicapped students, particularly the needs of women and racial and ethnic minorities are addressed by the applicants for funding. The commenter also suggested that in order to protect the needs of women, minorities, and handicapped, a statement should be included to point out that other applicable regulations assuring equal access to these groups are binding on recipients of program funds.

Response: No change has been made in the regulation. However, projects under this regulation, as is true of projects under all other program regulations, are subject to Title VI of the Civil Rights Act, the section 504 regulation assuring access and participation by the handicapped, and the Title IX regulation prohibiting discrimination on the basis of sex.

Comment: Several comments were received which suggested that § 182.17(b), permitting cooperative education students to work at less than comparable pay rates, be modified by inserting the word "non-profit" before "social work" in the last sentence of the subsection. It was further suggested that the sentence relating to work without pay should also be lengthened to add the phrase "provided that the position is not one for which other persons would be paid a salary by that organization," and that the words "at a lesser rate" be omitted.

Response: The regulation has been modified to incorporate the first and second suggestions in § 182.17. The third comment was not adopted because the option to receive some pay, as well as experience, could be a valuable option to the student.

Comment: One commenter suggested that the wording in § 182.18(a)(4) which states that Federal funds may not be used to pay teaching salaries is confusing. The commenter questioned whether faculty evaluation of a student's learning under the Cooperative Education Program and the faculty's coordination and supervision of students at work could be regarded as teaching.

Response: No change was made in the regulation. Under § 182.19 an allowable cost is explained as including release time for faculty to help administer the program through activities such as student counseling and supervision, job location and placement, and promotional activities. For the purposes of this program, the conduct of these activities shall not be classified as "teaching."

Comment: There were a number of commenters who objected to the weighting of criteria in § 182.16. It was the opinion of some of the commenters that, while they support the notion of clearly defined criteria, the proposed point system may ultimately penalize the newer, smaller, and developing Cooperative Education Programs. In addition, other commenters stated that the use of weighted criteria amounts to over-regulation by the Federal government; discourages institutions from being innovative by inhibiting the diversity of programs; and makes proposal evaluation a mechanical procedure.

Response: No change has been made with respect to weighting the criteria. Weighted criteria provide a more objective review and evaluation of proposals. Moreover, weighted criteria provide guidance to applicants in the preparation of applications and the conduct of projects.

Comment: One commenter suggested that § 182.17 of the proposed rules should be amended to remove language which seemed to contradict other provisions of the regulation and to clarify the rate at which cooperative education students should be compensated. It was pointed out that § 182.17(a) implied that student work experience has to be directly related to his or her academic major, contradicting § 182.16(a)(2). In addition, the commenter suggested that § 182.17(b) be changed to require that a student's rate of compensation be comparable to that of trainee employees who do similar work.

Response: The regulation has been changed to incorporate these suggestions in both § 182.17(a) and (b).

Comment: Several commenters pointed out that the funding criteria in § 182.32 address only the training needs of certain groups of individuals at institutions of higher education. It was suggested that training is necessary for cooperative education directors and coordinators, for high school and college guidance counselors, institutional administrators, personnel officials in business enterprises, and community representatives.

Response: The regulation has been amended to incorporate these suggestions with the exception of high school counselors in § 182.32(a). The criteria used in evaluating proposals will include the extent to which the applicant addresses the special responsibilities of institutional representatives in modifying curricula and teaching practices as well as the special needs of student guidance counselors, employer personnel staffs and community representatives. The extent to which the proposed project will train individuals to operate programs in higher education and improve articulation between two- and four-year colleges, employer cooperative education programs, and college community relations, will also be evaluated.

Comment: One commenter suggested that the emphasis on regional training in § 182.32(e) should be lessened. The commenter stated that there are few if any real regional differences in training needs and that the subsection as proposed ignores the special capabilities unique to certain institutions.

Response: The regulation has been amended by adding the phrase "or for training of a specialized nature addressed to a nationwide clientele" to § 182.32(e) in response to the comment. Since only a limited number of centers may be funded, the intent of the proposed criterion had been to encourage training centers to focus their efforts on regional needs not being met by other programs or being offered in places difficult to reach. However, some training centers may devise specialized programs focusing on national concerns.

Comment: One commenter expressed concerns with the funding criteria for research and demonstration projects outlined in § 182.33. One of the concerns was that four of the proposed criteria representing 75 of the 100 points, focused upon content or substantive intent of the proposed research. A second concern of the commenter was that is was unlikely that a single research proposal could be responsive simultaneously to all of the substantive criteria. The commenter suggested a new list of criteria for consideration which are designed to assign greater importance to the methodologies, operating plans, dissemination plan, time frame, and project staff proposed.

Response: Section 182.33 of the proposed regulations has been rewritten entirely to address the concerns which were raised by the commenter.

Comment: Several comments were received suggesting that the funding criteria under § 182.16 permit no discretion on the part of the Commissioner in making awards. It was suggested that the Commissioner be allowed up to 20 points for factors known to the Office of Education, such as an institution's ability to carry out its commitment to establish or maintain its proposed or existing program, its financial viability, accreditation status, and stability of personnel.

Response: No change was made in the regulation. This suggestion is addressed in part by the points awarded for the criteria in 45 CFR 100a.26(b).

Comment: Several comments were also received urging the addition of a funding criterion relating to an applicant's plans for project evaluation. It was suggested that an applicant should be expected to include plans for an external review and evaluation of the program at appropriate times.

Response: The regulation has been modified to make program evaluation an integral part of a program plan by

M Y 2 7 8 UMI

V 43 | 85

adding § 182.16(h) to the list of funding criteria.

Comment: A number of commenters urged minor modifications in the wording of several of the funding criteria. It was suggested that: the words "and quality" be inserted in § 182.16(a)(1) after "size and scope"; the words "or will develop" be added after "the applicant has" in § 182.16(c)(6); and "and carrying out" be placed after "specialists in planning" in § 182.16(c). It was further suggested that some adjustments be made in the points assigned to the criteria.

Response: The proposed regulation has been modified to reflect those word and point assignment changes in both the content of the regulation and the funding criteria.

Comment: One commenter suggested that the wording in § 182.18(c) could be interpreted to mean that the expenditure of grant funds for such things as transparencies for use with an overhead projector was forbidden without prior approval by the Commissioner.

Response: The regulation has been modified to allow the development of transparencies or other illustrative materials for small scale classroom use. Prior approval is required, however, of any expenditure for large scale production of audio visual materials for which program funds are to be spent.

NOTE: The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Number 13.510; Cooperative Education Institutional Grants)

Dated: March 14, 1978.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: April 26, 1978.

JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare.

Title 45 of the Code of Federal Regulations is amended as follows:

1. Part 100a is amended by revising § 100a.10 to read as follows:

§ 100a.10 Scope.

(a) *Programs.* Unless inconsistent with a statute or regulation, the regulations in this part apply to the following programs:

* * * * *

(25) Cooperative Education programs under Title VIII of the Higher Education Act of 1965 (20 U.S.C. 1133–1133b).

2. Part 182 is revised to read as follows:

Subpart A—General

Sec.
182.1 Scope of part.
182.2 Purpose of the program.
182.3 Definitions.
182.4 General provisions regulations.
182.5 Applications—general.
182.6 Performance reports.

Subpart B—Cooperative Education Programs

182.11 Eligible parties.
182.12 Eligible programs.
182.13 Limit on number of grants.
182.14 Limit on amounts of grants.
182.15 Content of application.
182.16 Funding criteria.
182.17 Student work experience.
182.18 Ineligible costs.
182.19 Allowable costs of administration.

Subpart C—Training, Research, and Demonstration Projects

182.30 Eligible parties.
182.31 Eligible projects.
182.32 Funding criteria for training projects.
182.33 Funding criteria for research and demonstration projects.
182.34 Duration of awards.

AUTHORITY: Title VIII of the Higher Education Act of 1965, as amended, 90 Stat. 2144–2146 (20 U.S.C. 1133–1133b), unless otherwise noted.

Subpart A—General

§ 182.1 Scope of part.

The regulations in this part apply to the Cooperative Education Program (Title VIII of the Higher Education Act of 1965, as amended).

(20 U.S.C. 1133, 1133a, 1133b.)

§ 182.2 Purpose of the program.

(a) The purpose of this program is to enrich the quality and scope of postsecondary education through educationally related work experiences which afford students an opportunity to earn funds needed for their education, while enabling them to become better prepared to achieve their educational or career objectives.

(b) To achieve this purpose, the Commissioner is authorized to make awards to institutions of higher education and combinations thereof, for planning, establishing, expanding, or carrying out programs of cooperative education, and for support of training, research, or demonstration projects for cooperative education.

(20 U.S.C. 1133, 1133a, 1133b.)

§ 182.3 Definitions.

As used in this part:

(a) "Act" means Title VIII of the Higher Education Act of 1965, as amended.

(b) "Cooperative education" means a program of study at an institution of higher education under which students undertake academic study for specified periods of time alternating with work experience in government, industry, business, or social welfare or educational agencies. In cooperative education, work periods and school attendance may be on alternate half days, full days, weeks, or other periods of time.

(c) "Student" means a person who is carrying at least a half-time academic load of course work at an institution of higher education, other than by correspondence. Whether a person comes within this definition must be determined by the institution of higher education on the basis of work loads normally required of students who are full-time degree candidates.

(d) "Institution of higher education" means an institution of higher education as defined in section 1201(a) of the Higher Education Act of 1965, as amended.

(e) "Combination of institutions of higher education" means a group of institutions of higher education which have entered into a cooperative arrangement for the purpose of carrying out a common objective, or a public or private non-profit agency, organization, or institution designated or created by a group of institutions of higher education for the purpose of carrying out a common objective on their behalf.

(20 U.S.C 1133a-1133b, 1141.)

§ 182.4 General provisions regulations.

Assistance provided under this part is subject to the regulations in 45 CFR Parts 100 and 100a (relating to fiscal, administrative, property management, reporting requirements, and other matters).

(20 U.S.C. 1133b, 1133c.)

§ 182.5 Applications—general.

(a) Each applicant under this part shall submit an application which meets the requirements of 45 CFR Part 100a (subpart B).

(b) In addition, each applicant for a continuation award, must submit a satisfactory performance report, as set forth in § 182.6, for each fiscal year for which an award under this part has been previously received.

(20 U.S.C. 1133a, 1133b.)

§ 182.6 Performance reports.

Each recipient under this part shall submit the following performance reports to comply with 45 CFR Part 100a (Subpart Q):

(a) An interim progress report at the end of six months from the beginning of the award period which must include information on:

(1) The extent to which the objectives of the project have been accomplished;

(2) What factors, if any, have prevented the accomplishment of project objectives, and what, if any, corrective measures are being taken; and

(3) Any highly significant aspects of the project.

(b) A final report which must be submitted with the final financial status report.

(20 U.S.C. 1133a, 1133b; H. (Conf.) Rept. 94-1701 at 199 (1976).)

Subpart B—Cooperative Education Programs

§ 182.11 Eligible parties.

An institution of higher education or a combination of institutions of higher education may apply for an award under this subpart.

(20 U.S.C. 1133(a), 1133a(a).)

§ 182.12 Eligible programs.

The Commissioner may make awards under this subpart to plan, establish, expand, or carry out a progam of cooperative education.

(20 U.S.C. 1133(a), 1133a(a).)

§ 182.13 Limit on number of grants.

No institution of higher education, individually or as a participant in a combination of institutions of higher education, may receive grants under this subpart for more than five fiscal years.

(20 U.S.C. 1133a(c).)

§ 182.14 Limit on amounts of grants.

(a) An institution of higher education may not receive an award of more than $175,000 for any fiscal year. A combination of institutions of higher education may not receive in any fiscal year an award of more than $125,000 multiplied by the number of institutions which apply as participants in the combination.

(20 U.S.C. 1133a(a).)

(b) Each award under this subpart may not include more than the following amounts for administering the program of cooperative education:

(1) 100 percent of the total cost of administering the program in the first fiscal year for which an award is made.

(2) 90 percent of the total cost of administering the program in the second fiscal year for which an award is made.

(3) 80 percent of the total cost of administering the program in the third fiscal year for which an award is made.

(4) 60 percent of the total cost of administering the program in the fourth fiscal year for which an award is made.

(5) 30 percent of the total cost of administering the program in the fifth fiscal year for which an award is made.

(20 U.S.C. 1133a(c).)

§ 182.15 Content of application.

Each application under this subpart must meet the requirements of section 802(b) of the Act.

(20 U.S.C. 1133a(b).)

§ 182.16 Funding criteria.

The Commissioner evaluates applications under this subpart in accordance with the criteria in 45 CFR 100a.26(b) (5 points) and with the following additional criteria (maximum of 115 points):

(a) The extent to which the applicant shows in its application that:

(1) The applicant will use its own resources to increase the size, scope and quality of its cooperative education program during the period of Federal support (15 points);

(2) The applicant has arranged for employment opportunities which to the extent practicable are related to its students' educational, professional, or occupational objectives (10 points);

(3) The applicant supervises its students during the work experience (5 points);

(4) The applicant makes continuing efforts to promote close interaction between its students' work experiences and academic study (5 points);

(5) The President and first-line administrators of the applicant support the program (10 points); and

(6) The applicant has or will develop a record-keeping system that keeps track of each student's status, attendance periods, and work periods (5 points);

(b) Whether the length of work experience is sufficient to make a significant contribution toward meeting the students' educational, professional, and occupational objectives (10 points);

(c) The extent to which the applicant has involved administrators, faculty, students, employers, and cooperative education specialists in both planning and, if the program is already in existence, carrying out the program (5 points);

(d) Whether the applicant has procedures for making curriculum and calendar changes as necessary to meet the partricular needs of students (10 points);

(e) Whether the applicant has a written cooperative education philosophy appropriate to the needs and characteristics of the applicant (5 points);

(f) The extent to which programs in the academic discipline with respect to which the application is made have had a favorable reception by employers (10 points);

(g) The extent to which the applicant demonstrates its intention and ability to continue its cooperative education program after Federal financial assistance ends (10 points); and

(h) Whether the applicant includes plans for an outside review and evaluation by independent consultant-evaluators at appropriate times in the development of the program (15 points).

(20 U.S.C. 1133(a), 1133a(b), 1133a(d).)

§ 182.17 Student work experience.

The recipient of an award under this subpart must insure that:

(a) Each student's work experience is related, where practicable, to the student's program of study; and

(b) The student receives compensation from the employer at a rate comparable to trainee employees who do similar work. However, a student may choose to work without pay or at less than the prevailing rate for full-time employees if the student works for a non-profit, social welfare, or educational organization, *Provided,* That the position is not one for which other persons are or have been paid a higher salary by that organization.

(20 U.S.C. 1133 (a), (c).)

§ 182.18 Ineligible costs.

(a) A recipient may not use funds provided under this subpart to:

(1) Compensate any student for his or her work experience or to provide financial assistance to any student to meet the costs of his or her education;

(2) Purchase or lease equipment, unless specifically authorized by the Commissioner in writing;

(3) Purchase or lease land, or purchase, lease, construct, or improve any building; or

(4) Pay teaching salaries or purchase capital equipment.

(b) A recipient may not use funds provided under this subpart for any program which involves sectarian training or which is intended primarily to prepare students to be ministers or teachers of theological subjects.

(c) A recipient may not use funds provided under this subpart for the development and production of audiovisual materials unless specifically authorized by the Commissioner in writing. This is not intended to exclude the costs of reproducing illustrative materials for small-scale classroom use.

(20 U.S.C. 1133(c), 1133a.)

§ 182.19 Allowable costs of administration.

The costs of administering the project may include the following:

(a) Salaries of the director, any coordinators, and secretaries;

(b) Release time for faculty to help administer the program, including student counseling and supervision, job location and placement, and promotional activities;

(c) Salaries of administrative personnel such as job placement staff, or admission counselors who publicize the programs and recruit students;

MY 2 78
UMI

V 4 3 1 8 5

(d) Travel costs of administrative staff, and necessary subsistence costs for them; and

(e) Expendable office supplies and promotional literature.

(20 U.S.C. 1133a(c)); H. (Conf.) Report No. 94-1701 at 199 (1976).)

Subpart C—Training, Research, and Demonstration Projects

§ 182.30 Eligible parties.

The Commissioner may make awards under this subpart as follows:

(a) To institutions of higher education or combinations of institutions of higher education; and

(b) To other public or private nonprofit agencies or organizations, if the awards will make an especially significant contribution to attaining the objectives of this subpart.

(20 U.S.C. 1133b.)

§ 182.31 Eligible projects.

The Commissioner may make awards under this subpart for:

(a) Projects to train persons in planning, establishing, administering, or coordinating programs of cooperative education;

(b) Projects to demonstrate or explore the feasibility or value of innovative methods of cooperative education; or

(c) Projects for research into methods of improving, developing, or promoting the use of programs of cooperative education in institutions of higher education.

(20 U.S.C. 1133b.)

§ 182.32 Funding criteria for training projects.

The Commissioner evaluates applications for training projects under this subpart in accordance with the criteria in 45 CFR 100a.26(b) (5 points) and with the following additional criteria (maximum score of 95 points):

(a) The extent to which the applicant proposes to address the responsibilities of (1) cooperative education directors at institutions of higher education to modify existing undergraduate teaching practices, academic calendars and curricula in order to administer cooperative education programs more effectively; (2) undergraduate guidance counselors to understand the relationship of the work experience to the student's academic program; (3) personnel officers of private or public employers to assist in placing and supervising cooperative education students in work situations; or (4) community representatives (15 points);

(b) The extent to which the applicant has based its project on its experience in cooperative education or on successful cooperative education programs, or on innovations which have been used successfully in a cooperative education program (20 points);

(c) The extent to which the applicant has clearly defined procedures that give evidence of comprehensive planning (20 points);

(d) The extent to which the proposed project has promise of developing trainees who can apply their expertise in more than one type of cooperative education program; or in more effective articulation between two and four-year institutions; or in improved employer participation in cooperative education programs; or in improved college-community relations affecting cooperative education programs (20 points); and

(e) The extent to which the applicant provides evidence of a need for the training in its geographical area or for training of a specialized nature addressed to a nationwide clientele (20 points).

(20 U.S.C. 1133b.)

§ 182.33 Funding criteria for research and demonstration projects.

The Commissioner evaluates applications for research or demonstration projects under this subpart in accordance with the criteria in 45 CFR 100a.26(b) (5 points) and with the following additional criteria (maximum of 100 points):

(a) The extent to which the applicant demonstrates that the proposed research is responsive to a real problem or need in cooperative education and, further, that the findings would be of potential value to the cooperative education community, including directors of cooperative education and other institutional administrators (25 points);

(b) The extent to which the proposal includes:

(1) clear and well-delineated research objectives;

(2) well-defined experimental or data collection methodologies;

(3) a well-defined data analysis plan; and

(4) a well-defined plan for dissemination the research findings (50 points);

(c) The extent to which the applicant presents clear and realistic work schedules for the conduct and completion of the proposed research (10 points); and

(d) The extent to which the applicant demonstrates the availability of competent staff and other resources for conducting the proposed research (15 points).

(20 U.S.C. 1133b.)

§ 182.34 Duration of awards.

(a) Awards made under this subpart will be for a period of up to one year.

(b) Applications may be filed proposing a project with a duration in excess of one year. Such application must be accompanied by an explanation of the need for multi-year support, an overview of the objectives and activities proposed, and estimated budgets to obtain these objectives in any proposed subsequent year. If the Commissioner finds that an application demonstrates that multi-year support is needed to carry out the proposed project, the Commissioner may, in the initial notification of award for the project, indicate an intention to assist the project of an appropriate multi-year basis through continuation awards.

(c) (1) Subject to availability of funds, where the Commissioner has made an initial award to support a project proposal requiring more than one year for completion, continuation awards may be made.

(2) An application for a continuation award will be reviewed to determine:

(i) If the applicant has complied with the terms and conditions of the award, the Act, and the regulations;

(ii) The effectiveness of the project to date based on the criteria found in § 182.32 or § 182.33.

(20 U.S.C. 1133b.)

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

Editorial Amendments Concerning Transmitter Power

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: The Commission is amending § 81.134 of its rules to permit certain radio stations the use of increased transmitter power to overcome power losses between the transmitter and the antenna. Over the years this has been the practice in licensing stations and the rules are being amended to reflect this.

EFFECTIVE DATE: May 5, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Kemp J. Beaty, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

Adopted: April 20, 1978.

Released: April 21. 1978.

Order. In the matter of editorial amendment of 81.134(d) of the Commission's rules.

1. Section 81.134(d) limits VHF coast stations to 50 watts carrier power; however, over the years the Commission has allowed licensees of Class III coast stations to use transmitters with an output power of greater than 50 watts to overcome transmission system losses as long as the power into the input terminals of the antenna did not exceed 50 watts.

2. Accordingly, §81.134(d) of the Commission's rules is being amended to reflect this policy. Authority for this amendment is contained in sections 4(i) and 303 (c) and (r) of the Communications Act of 1934, as amended and § 0.231(d) of the Commission's rules. Since the amendment is editorial in nature and reflects a long standing policy the public notice, procedure and effective date provisions of 5 U.S.C. 553 do not apply.

3. In view of the above, *It is ordered*, That the rule amendment set forth below is adopted effective, May 5, 1978.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082 (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
R. D. LICHTWARDT,
Executive Director.

Part 81 of chapter I of title 47 of the Code of Federal Regulations is amended to read as follows:

In part 81—Stations on Land in the Maritime Services, in §81.134, paragraph (d) table is amended and footnote 2 is added to read as follows:

§ 81.134 Transmitter power.

• • • • • •

(d) • • •

Frequency band (megahertz)	Carrier power (watts)[1]	
	Coast stations[2]	Marine utility stations
156.2625 to 157.4375...	50	10
161.575 to 162.0125.....	50	.....

[1]Higher power may be authorized where a satisfactory showing of need has been made.

[2]Where losses are incurred in the transmission system, between transmitter output terminals and input terminals to the antenna, higher power may be used to compensate for the losses in that transmission system. However, power into the input terminals of the antenna shall not exceed 50 W.

• • • • • •

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Opening of Lake Ilo National Wildlife Refuge, North Dakota, to Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to sport fishing of Lake Ilo National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: May 6, 1978, through September 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Rolland J. Krieger, Acting Project Leader, Des Lacs NWR Complex, Kenmare, N.D. 58746, 701-385-4046.

SUPPLEMENTARY INFORMATION:

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas

Sport fishing is permitted on the Lake Ilo National Wildlife Refuge, North Dakota, only on the areas designated by signs as being open to fishing. These areas comprising 1050 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colo. 80225. Sport fishing shall be in accordance with all applicable State regulations subject to the following conditions:

1. Fishing shall be limited to daylight hours only.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 33. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: April 24, 1978.

ROLLAND J. KRIEGER,
Acting Project Leader, Lake Ilo National Wildlife Refuge, Dunn Center, North Dakota, 58626.

PART 449—SERVICES AND PAYMENT IN MEDICAL ASSISTANCE PROGRAMS

Federal Financial Participation in State Claims for Abortions

AGENCY: Public Health Service (PHS), and Health Care Financing Administration (HCFA), HEW.

ACTION: Final rules with comment period; extension of date of Department response.

SUMMARY: This Notice extends the date by which the Department will respond to comments on its regulations governing the Federal funding of abortions. Those regulations were published in final form on February 2, 1978 (43 FR 4570), and republished on February 3, 1978 (43 FR 4832), and the public was given an opportunity to comment. The preamble indicated that the Department would respond to the comments and amend the regulations, if warranted, by publication in the FEDERAL REGISTER no later than May 3, 1978. The Department received a substantial number of comments on this issue, a number of which were comprehensive.

DATE: In order to carefully review and consider all the comments on this extremely important issue, the Department is extending the date by which it will respond in the FEDERAL REGISTER to June 2, 1978.

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

[9 CFR Part 318, 320]

COOKING REQUIREMENTS FOR COOKED BEEF ROAST

Notice of Proposed Rulemaking

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule proposes to provide alternatives to the minimum cooking requirements for cooked beef roast. The existing rule, published September 2, 1977 (42 FR 44217), requires that all cooked beef roast be prepared by a cooking procedure that producers a minimum internal temperature of 145° F. (63° C.). Since it was published, the rule has apparently accomplished its intended purpose, which was the elimination of Salmonella food poisoning caused by consumption of commerically precooked beef roast. A number of alternative processing procedures have been recently developed which appear to be equally effective. If adopted, this proposed rule would permit the use of these alternative procedures.

DATES: Comments must be received on or before June 1, 1978.

ADDRESSES: Comments to: Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Agriculture Building, Washington, D.C. 20250. See also "Comments" under Supplementary Information.

FOR FURTHER INFORMATION CONTACT:

Dr. Ronald E. Engel, Director, Scientific Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-2326.

SUPPLEMENTARY INFORMATION:

COMMENTS

Interested persons are invited to submit comments concerning this proposal. Comments must be sent in duplicate to the Hearing Clerk and should bear a reference to the date and page number of this issue of the FEDERAL REGISTER. All comments submitted pursuant to this notice will be made available for public inspection in the Office of the Hearing Clerk during regular hours of business.

BACKGROUND

Cooking requirements for cooked beef roast were published by the Administrator on September 2, 1977 (42 FR 44217), as an emergency measure to prevent outbreaks of human salmonellosis caused by the consumption of commercially prepared cooked beef roast. The regulation requires that cooked beef roast be prepared by a cooking procedure that produces a minimum temperature of 145° F. (63° C.) in all parts of each roast. This procedure was deemed necessary to destroy all Salmonella bacteria present in the roast.

Salmonella are common bacteria which are often associated with warm blooded animals including man. Many animals which are not clinically ill are nevertheless carriers of these organisms. The physical nature of raw beef roasts in such that the penetration of micro-organisms, including Salmonella, into the deepest portions of the roasts may occur. Gaps in intermuscular fascia, knife cuts and deep folds are some of the physical features that contribute to such penetration. Deep inoculation of Salmonella bacteria and other micro-organisms may also occur during boning, packing, defrosting and precook handling of the raw roasts or by the flow of natural juices during the cooking process. A significant public health hazard is created when the cooking procedure for the product fails to kill the Salmonella.

Although the 145° F. cooking temperature required by the rule published on September 2, 1977, eliminates the public health hazard, it also results in a product which is overcooked. Many consumers prefer "rare" roasts and the popular item of trade is a rare roast. Because they want to preserve this rare appearance, seven trade associations have funded studies conducted by the American Bacteriological and Chemical Research Corp., which operates an independent research laboratory, to determine safe alternative processing procedures. The experimental design of these studies was reviewed and approved by meat and poultry inspection personnel before they were undertaken. The firm issued two reports— "Fate of Salmonella Inoculated into Beef for Cooking" (December 19, 1977) and "Addendum, Fate of Salmonella Inoculated into Beef for Cooking" (January 12, 1978). These documents may be obtained free of charge by writing to Dr. Ronald E. Engel, Director, Scientific Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250.

These reports demonstrate that alternative processing procedures can provide a number of acceptable time and temperature combinations for cooking beef roast in such a manner that Salmonella bacteria are eliminated. Each alternative processing procedure provided in these reports is equal in Salmonella destruction to the procedure now required. The proposed regulations would allow a processor to choose one of these alternative processing procedures in producing cooked roast beef. The proposal also includes the requirement that records of these alternative processing procedures be kept, and that processors have sufficient monitoring equipment to assure the accuracy of such processing.

Thermal destruction of bacteria is a function of both time and temperature. At higher temperatures bacterial death occurs within a short time, whereas at lower temperatures longer exposures to the lower temperatures are required to destroy equivalent bacterial numbers. The reports provide data on alternative cooking procedures which yield equivalent lethalities for salmonellae to that achieved when roasts are cooked to an internal temperature of 145° F. Consequently, paragraph (b) of the proposed regulations would include a Table of Alernative Processing Procedures for Cooked Beef Roast. Processors could comply with the procedures specified in this table as an alternative to the minumum current temperature requirement, which is retained in paragraph (a) of the proposed regulations.

Though the rate of thermal destruction of Salmonella is a function of time and temperature, as explained above, the change in color from red to gray of muscle myoglobin is affected by a different time temperature relationship. A temperature of 145° F. (63° C.) causes a rapid change of color of the myoglobin, whereas a temperature of 135° F. for prolonged periods produces little color change. Thus it is possible to destroy Salmonella by exposing roasts to low heat for extended time periods

M Y 2 7 8 UMI

V 43 | 85 MY 2 78 UMI

without causing the meat to turn gray or appear overcooked.

In addition to the documentation of these time and temperature relationships, these studies showed that moisture is also important in the death of Salmonella. Salmonella are much more resistant to heat in a dry environment. This becomes very important in beef that is being dry roasted in ovens operated at low temperatures. Because of this factor, the proposed regulations would also require, during dry cooking, the maintenance of either oven temperatures at or above 250° F. (121° C.) or high relative humidities at temperatures below 250° F. The proposed regulation would also require that dry cooked roasts prepared without high relative humidity must weigh 10 pounds or more before processing. This is required because the data in the reports indicate that all Salmonella may not be destroyed in dry cooked roasts of less than 10 pounds when cooked for the time period specified in the table included in paragraph (b). This is so because the smaller roasts reach the proposed mimimum internal temperatures more rapidly than the larger ones. Consequently, bacteria at or near the surface of the smaller roast are not exposed to heat for a sufficient period of time to assure the destruction of these bacteria in a dry environment.

The proposed regulation would also require that moist cooked roasts be vacuum-packaged in impermeable film prior to water immersion or oven cooking. This is designed to insure that roasts processed in this fashion are cooked in their own juices, thereby facilitating convection heating and proper distribution of heat throughout the roast.

Accordingly, it is proposed that the Federal Meat inspection regulations be amended as follows:

1. Section 318.17 (9 CFR 318.17) would be amended to read as follows.

§ 318.17 Cooking requirements for cooked beef roast.

(a) Cooked beef roast shall be prepared by a cooking procedure that produces a minimum temperature of 145° F. (63° C.) in all parts of each roast or prepared as provided in paragraphs (b) and (c) of this section.

(b) Cooked beef roast may also be prepared by any one of the cooking procedures described in the following table provided that the procedure produces and maintains the minimum temperature required, in all parts of each roast, for at least the stated period:

TABLE FOR ALTERNATIVE PROCESSING PROCEDURES FOR COOKED BEEF ROAST

Minimum internal temperature		Minimum processing time in minutes
°F.	°C	
128	53.3	195
129	53.9	153
130	54.4	121
131	55.0	97
132	55.6	77
133	56.1	62
134	56.7	47
135	57.2	37
136	57.8	32
137	58.4	24
138	58.9	19
139	59.5	15
140	60.0	12
141	60.6	10
142	61.1	8
143	61.7	6
144	62.2	5

(c) Cooked beef roast prepared under the procedures specified in paragraph (b) of this section must also meet one of the following criteria for moist or dry cooking:

(1) Each roast which is moist cooked shall be vacuum-packaged in impermeable films prior to immersion cooking in a water bath or cooking in an oven.

(2)(i) Roasts processed entirely by dry heat must weigh 10 pounds or more before processing and must be dry cooked in an oven maintained at 250° F. (121° C.) or higher throughout the process; or

(ii) An oven temperature less than 250° F. (121° C.) may be used for dry cooking of roasts of any size provided that the relative humidity of the oven in which they are prepared is greater than 90 percent for at least 25 percent of the total cooking time for the process, but in no case for a lesser period than 1 hour. This relative humidity may be achieved by use of steam injection or by sealed ovens capable of producing and maintaining the required 90 percent relative humidity.

(d) A processor who selects any of the alternative procedures specified in paragraphs (b) and (c) of this section shall have sufficient monitoring equipment to assure that the time (within 1 minute), temperature (within 1° F.) and relative humidity (within 5 percent) limits required by his process are being met. The processor shall make and keep a record, using a log, recording device, or other method, of these data and shall make such record available to Food Safety and Quality Service inspection officials upon request, as provided in Part 320 of the regulations in this subchapter.

2. Section 320.1(b) would be amended by adding the following subparagraph (4):

§ 320.1 Records required to be kept.

• • • • •

(b) • • •

(4) Records of alternative processing procedures for cooked beef roast as required in § 318.17(d).

The Food Safety and Quality Service has determined that his document contains a major proposal requiring preparation of a Regulatory Analysis under Executive Order 12044 and certifies that a Regulatory Analysis has been prepared.

Done at Washington, D.C., on April 25, 1978.

ROBERT ANGELOTTI,
Administrator,
Food Safety and Quality Service.

NUCLEAR REGULATORY COMMISSION

[Docket No. RN 50-7]

[10 CFR Parts 11, 50 and 70]

AUTHORITY FOR ACCESS TO OR CONTROL OVER SPECIAL NUCLEAR MATERIAL

Notice of Hearing and Related Matters

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of Hearing and Related Matters.

SUMMARY: On April 5, 1978 (43 FR 14672, April 7, 1978) the Commission constituted a Hearing Board (hereinafter "Board") in the above-captioned matter and authorized the Board to adopt procedures for hearing, set the date and location of the hearing, and provide for a procedural planning session or prehearing conference, as the Board deems necessary. This notice discusses each of these matters. It also contains a statement from the presiding officer.

The hearing is scheduled for the week of July 10 to 15, 1978, at the Commission's offices in Washington, D.C.; a procedural planning session is set for May 10, 1978. After familiarizing itself with the proposed rule and the comments submitted to date in this proceeding, the Board is of the belief that the substantive and procedural issues involved do not require the convening of a formal prehearing conference.

The expense such a conference would entail for the participants seems unwarranted and the delay it would cause, unnecessary. Therefore the Board is serving a notice which incorporates in one document the matters that must be set out prior to hearing. To permit suggestions, questions and criticisms to the matters covered in this notice, a procedural planning session is schedued at which participants can make their views known in one of three ways: by written submission, by personal appearance or by telephone communication.

DATES: A procedural planning session will be held on May 10, 1978; a public hearing will be held on July 10, 1978.

ADDRESS: The procedural planning session will be held in Room 1167, 1717 H Street NW., Washington, D.C.; the location of the Public Hearing will be announced later.

FOR FURTHER INFORMATION, CONTACT:

C. W. Reamer, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, phone 202-634-1465.

SUPPLEMENTARY INFORMATION:

HEARING PROCEDURES

The hearing will be conducted as a legislative-type, informal rulemaking hearing, with the opportunity provided for written testimony to be submitted and for questions about the testimony to be proposed to the Board in advance of the hearing. The framework of and general procedures for the hearing were set forth in the Commission's Notice of Hearing on December 28, 1977 (42 FR 64703).

The Board's goal is fully to ventilate all issues in order to provide the Commission with a comprehensive record on which it can decide whether and in what form to issue the proposed rule. Participants should prepare their statements for the hearing with particular attention to the relevant issues identified in the Commission's December notice (42 FR 64704). No questions will be permitted from participants or witnesses during the informal hearing, but an opportunity is provided to request Board permission to conduct cross-examination at the close of the informal hearing (42 FR 64704). The informal hearing process will be conducted by the Board according to the following rules of practice.

1. *Quorum.* A majority of the Board members shall constitute a quorum so long as the presiding officer is present.

2. *Responsibilities and authority of the Board.* The charter of the Board is to conduct a fair and impartial hearing and develop a record that will contribute to informed decisionmaking by the Commission. The Board will take appropriate action to avoid unnecessary delay and maintain order, with the objective of completing the proceedings by the latter part of 1978. The Board has all authority necessary to accomplish these ends, including specifically the authority to:

(a) Rule on offers of proof and receive evidence;

(b) Dispose of procedural requests or similar matters;

(c) Ask questions of witnesses as provided in paragraph 3;

(d) Order consolidation of participants, including panel presentations by witnesses;

(e) Require participants to provide a statement of their positions at an early stage;

(f) Establish an order of presentation by the participants which, if appropriate, may provide for an order of presentation on the basis of subject matter;

(g) Hold conferences before or during the hearing for any proper purpose;

(h) Establish reasonable time limits for the conduct of the proceeding;

(i) Entertain suggestions from participants as to questions which the Board should ask of witnesses for one or more of the other participants as provided in paragraph 3;

(j) Limit the number of witnesses for participants whose testimony may be cumulative;

(k) Strike cumulative or irrelevant evidence of participants;

(l) Certify questions or refer rulings to the Commission for its determination, on the board's initiative, or in its discretion on request by a participant;

(m) Rule on discovery matters as provided in paragraph 4; and

(n) Regulate the course of the hearing and the conduct of the participants.

3. *Evidence and representation.* All participants will be permitted to present evidence at the hearing on matters relevant to the following determination: whether certain individuals in the licensed private sector shall be approved by the Commission for access to or control over special nuclear material under the conditions and implementing regulations as proposed by the Commission (42 FR 14880). Except as provided below, participants' witnesses will be subject to questioning by the Board, either orally at the hearing or in writing before or after the hearing, or both. Questions may be addressed either to individual witnesses or to panels of witnesses. In addition, participants may submit questions to the Board (according to the schedule set out below) which they would like to have answered by the witnesses for other participants. The Board may, in its discretion, refer the questions to the witnesses for response and/or conduct its own examination of the witnesses in the subject areas. No questions will be permitted by the participants or their representatives at the hearing itself. No subpoenas will be granted for attendance and testimony of witnesses or the production of evidence except upon a showing of exceptional circumstances. Any request by a participant for a subpoena shall be in the form of a motion under paragraph 5, but shall be addressed to the Commission. The Board may, for good cause, receive into evidence on behalf of a participant the written testimony of a person who is unable to appear at the hearing. In such cases, the Board may request (but not order) that the person respond to written questions by the Board.

4. *Discovery.* The following rules regarding discovery shall apply:

(a) Pursuant to the Commission's December 28, 1977 notice (42 FR 64703) and except as provided in subparagraph (b) below, there shall be no discovery by document production or otherwise. The NRC staff will make available for public inspection and copying, in a timely fashion, documents which were relied upon in the prepared of its testimony. Documents pertinent to the proposed rule are presently available for inspection and copying in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Participants are encouraged to confer informally for the purpose of exchanging information and documents relied upon in the preparation of their testimony.

(b) Participants seeking Commission documents which they deem relevant but which have not been made publicly available for inspection and copying pursuant to subparagraph (a) may seek documents pursuant to this paragraph. Requests for production of any such additional documents may be served on the NRC staff without leave of the Board. The Board may rule on disputed requests, order production of relevant documents, and grant protective and other appropriate relief.

(c) No request under subparagraph (b) may be served on the NRC staff after the hearing has commenced except by leave of the Board.

5. *Motions or requests.* Except as provided in paragraphs 3 and 4, all motions or requests shall be addressed to the Board. All written motions or requests shall be filed with the Secretary of the Commission and served on participants to the hearing. Service shall be as provided in 10 CFR 2.712. Within 5 days after service of a written motion, or such other times as may be fixed by the Board, any participant may file a written answer in support of, or in opposition to the motion or request. However, the NRC may file such an answer within 10 days after service. Computation of time shall be as provided in 10 CFR 2.710.

6. *Interlocutory appeals; effect of motions, certifications, and referrals.* The Commission's December 1977 and April 1978 notices (42 FR 64703, 43 FR 14672) do not provide for an interlocutory appeal to the Commission from a ruling of the Board. When in the judgment of the Board prompt decision is necessary to prevent detriment to the public interest or unusual delay or expense, the Board may on its own initiative, or in its discretion on request by a participant, refer the ruling or certify the question promptly to the Commission, and notify the partici-

V 4 3 — 8 5

pant either by announcement on the hearing record or by written notice if the hearing is not in session. Unless otherwise ordered, neither the filing of a motion nor the certification of a question or referral of a ruling shall stay any aspect of the proceeding or extend the time for the performance of any act.

7. *Filing of documents; docket; transcripts; public notice of hearing.* Filing of documents in this proceeding by participants shall be as provided in 10 CFR 2.701. All documents shall be served on participants to the hearing, and service shall be as provided in 10 CFR 2.712. A docket for the proceeding shall be maintained as provided in 10 CFR 2.702, and the provisions of 10 CFR 2.750 and 2.751 regarding official reporter, transcript, and public nature of the hearing shall apply.

8. *Requests for additional hearings to permit cross-examination.* It may be that some factual issues in this proceeding cannot be resolved adequately on the basis of a record developed in the manner provided above. As provided for in the Commission's December 1977 notice (42 FR 64704), if any participant believes after completion of the legislative-type hearing provided above that cross-examination on one or more specific factual issues is needed for a sound decision, the participant may request permission for cross-examination. A written request for additional hearings to permit cross-examination should be filed with the Board within 20 days after completion of the legislative-type hearing, or within such greater or lesser time as may be fixed by the Board. Such requests should: (a) Specify with particularity the factual issue or issues as to which cross-examination is requested; (b) identify the witness or witnesses involved; and (c) demonstrate why in the participant's view the legislative-type procedures have not proved adequate for a sound decision with respect to the particular issue and testimony. Other participants, including NRC staff, may file written responses to such requests within 15 days after service, or within such greater or lesser time as may be fixed by the Board. Should any such request be granted by the Board, a supplemental notice of hearing which identifies the factual issue(s) and any necessary additional procedures will be issued by the Board.

9. *Supplementary statements; certification of record.* (a) Within 30 days after completion of the hearing (including any hearing provided under paragraph 8), a participant may file with the Board such supplementary written statement as may be deemed appropriate in light of the hearing record. Participants who are only interested in one or more aspects of the proceeding may confine their supplementary statements to such aspects. Supplementary statements shall include appropriate citations to the transcript of record and exhibits in support thereof.

(b) Following completion of the hearing (including any hearing provided under paragraph 8), and after the 30-day period referenced in paragraph (a) expires, the Board will certify the hearing record to the Commission for decision without rendering any decision or making any recommendations of its own with regard thereto.

10. *Record.* The hearing record will include the transcript of testimony and exhibits, the transcript of oral and written statements and all papers and requests filed in the proceeding.

HEARING SCHEDULE

May 10, 1978: Procedural planning session at the Commission's offices 1717 H Street NW., Washington, D.C. The purpose of this session is for the Board to receive objections, questions or suggestions about the hearing procedures and hearing schedule here proposed and described. In order to facilitate non-time-consuming and low-cost participation, three alternative ways of making views known to the Board are offered: (I) Participants may submit written comments on the above matters, to be filed with the Board by May 10, 1978. (II) Participants may appear in person or by representatives before the Board from 10 a.m. to 1 p.m. (EDT) on May 10, 1978, in Room 1167. (III) Participants may communicate with the Board members by telephone from 2 p.m. to 5 p.m. (EDT) on May 10, 1978, by calling 202-254-7654 or 202-254-8636. Participants also may attend—but not participate in—the afternoon session (Room 1167). A transcript will be kept for both sessions of the May 10 meeting. Participants should choose the method of communication that best meets needs and capacities, having in mind that oral or telephonic appearances should be thought out in advance and concisely delivered. All comments that can be reduced to writing should be made in that fashion. Participants are requested not to utilize more than one method of communication. The Board will rule promptly on objects or suggestions, if any, that require an amendment to the procedures or schedule herein proposed.

May 15, 1978: Submission of written testimony of Commission staff and other proponents of the proposed rule. The staff and other proponents will circulate their testimony to all participants. The staff will make available for public inspection all documents and other materials on which its testimony relies. Each submission shall be introduced by a concise Statement of Position and shall be cross-referenced, as appropriate, to the relevant issue identified in the Commission's December notice (42 FR 64704).

June 1, 1978: Submission of written testimony of opponents of proposed rule, including rebuttal of proponents' testimony. Written testimony from those who consider themselves neither proponents no opponents of the proposed rule is also due at this time. Each submission shall be introduced by a concise Statement of Position, and shall be cross-referenced, as appropriate, to the relevant issue identified in the Commission's December notice.

June 20, 1978: A. Submission of written proposals from all participants for questions to be propounded by the Board to witnesses at the hearing. Each proposed question should contain a clear and concise explanation of its purpose in order to assist the Board in determining its probity and relevance, and should be cross-referenced, as appropriate, to the relevant issue identified in the Commission's December notice.

B. Submission of rebuttal testimony by proponents to opponents' testimony. (There will not be further opportunity for opponents to submit rebuttal testimony.) Rebuttal testimony shall be cross-referenced in the manner described above.

C. Submission of consolidation of positions and requests for hearing times. Participants should wherever possible consolidate their positions with others of like persuasion. Where prior coordination is impossible, participants should recommend to the Board other participants with whom they might appear in a panel presentation. Hearing times should be limited to no more than one (1) hour, except where exceptional circumstances are stated. Dates and specific times will be assigned within the period of July 11-15, 1978.

June 30, 1978: (a) Submission of written objections to proposed questions; (b) the Board will announce consolidation of positions and schedule of witnesses and any other matters to be determined prior to hearing. This announcement will appear in the FEDERAL REGISTER on July 5, 1978. Participants who desire to be informed of the hearing schedule and who have supplied the Board a telephone number for that purpose, will be called on the afternoon of June 30, 1978.

July 10, 1978: Hearing commences at 9 a.m. (EDT) at 1717 H Street NW., Washington, D.C., room (to be announced). Staff presentation will be first and is anticipated to consume the entire day of July 10. All participants and their representatives are invited to observe the staff's presentation but are reminded that they will not be recognized by the Board for any purpose during the hearing. The presentations of the other participants will follow beginning on July 11 or as soon thereafter as the staff has completed its presentation. Precise times for appearances will have been previously announced by the Board, but it is anticipated that all of the proponents to the proposed rule will come after the staff, followed by opponents, and then those who have still not taken firm positions on the merits. The Board may call for conferences during the hearing but will state its plans in that regard at the outset of the hearing on July 10.

EX PARTE COMMUNICATIONS

The Notice of Hearing calls upon the Board to conduct a legislative-type hearing. However, it offers the possibility of later cross-examination on specific issues. (par. 8) Given the hybrid nature of the proceeding, the Board expects all participants (and anyone acting in behalf of any of them) to refrain from offering to Board members any evidence or argument concerning any fact or opinion which is material to this proceeding except through the procedures for submission of written statements, testimony, motions or other documents set forth in the Notice of Hearing.

STATEMENT OF PAUL R. VERKUIL

Upon being named presiding officer of the hearing board, I learned that I have a relationship with two participants to this proceeding. I am a member of the American Civil Liberties Union, and I am employed by the University of North Carolina at Chapel Hill, a constituent institution of the University of North Carolina, as is North Carolina State University which is a participant. I have resolved for myself that these connections create no conflict of interest. First of all, the role I am performing here is not one of deciding the merits of the proposed rule, but only that of ensuring that a full and accurate record is prepared on which the Commission can render a sound judgment. Thus, I am in no sense taking positions or exercising judgments that could benefit individual participants in the proceedings. Beyond those considerations, however, my relationship to the ACLU is that of a sustaining, nonpolicy-making member, and I have no contact with officials at North Carolina State University who might be involved in this proceeding. I have not received any communications from these organizations concerning the matters under scrutiny. For these reasons, I do not believe it necessary for me formally to resign from the ACLU during these proceedings or to alter my relationship with the University of North Carolina. I would be pleased to receive any reactions in writing from the participants to the matters I have here discussed.

Dated: April 27, 1978.

For the Hearing Board.

PAUL R. VERKUIL,
Chairman.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 732-3312]

AUSTRALIAN LAND TITLE, LTD., ET AL

Consent Agreement with Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Los Angeles, Calif. seller of undivided interests in Australian land to cease advertising, selling, transferring or collecting payments on such land. Additionally, the firm would be required to return all payments received on or after July 1, 1977; pay property taxes and other charges levied against the tracts as they become due; and provide consumer redress to eligible parties.

DATE: Comments must be received on or before June 29, 1978.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Albert H. Kramer, Director, Bureau of Consumer Protection, Federal Trade Commission, Sixth Street and Pennsylvania Avenue NW., Washington, D.C. 20580, 202-523-3727.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record, together with material submitted to the Commission that is not exempt from public disclosure under the Freedom of Information Act, for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

[File No. 732- 3312]

AUSTRALIAN LAND TITLE, LTD., SAFEGUARD INDUSTRIES, INC. AND MORLAN INTERNATIONAL, INC., CORPORATIONS

AGREEMENT CONTAINING CONSENT ORDER

The Federal Trade Commission having initiated an investigation of certain acts and practices of Australian Land Title, Ltd., Safeguard Industries, Inc., and Morlan International, Inc., corporations, hereinafter sometimes referred to as "proposed respondents," and it now appearing that proposed respondents are willing to enter into an Agreement containing an Order;

It is hereby agreed by and between proposed respondents by their duly authorized officers and their counsel, and counsel for the Federal Trade Commission that:

1. This Agreement is for settlement purposes only and does not constitute an admission by proposed respondents that the facts as alleged in the draft of complaint attached hereto are true or that any law has been violated.

2. Proposed respondent Australian Land Title, Ltd., is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at 9060 Santa Monica Boulevard, Los Angeles, Calif.

Proposed respondent Safeguard Industries, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of Pennsylvania, with its office and principal place of business located at 630 Park Avenue, King or Prussia, Pa.

Proposed respondent Morlan International, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at Philmont Avenue and Byberry Road, Philadelphia, Pa.

3. For settlement purposes only proposed respondents admit all the jurisdictional facts set forth in the draft of Complaint here attached.

4. Proposed respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's Decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the Order entered pursuant to this Agreement.

5. This Agreement shall not become a part of the official record of the proceeding unless and until it is accepted

MY 2 78 UMI

V 43 | 85 MY 2 78 UMI

by the Commission. If this Agreement is accepted by the Commission it, together with the draft of Complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if, within thirty (30) days after the sixty (60) day period, comments or views submitted to the Commission disclose facts or considerations which indicate that the Order contained in the Agreement is inappropriate, improper, or inadequate.

6. This Agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may, without further notice to the proposed respondents, (1) issue its Complaint corresponding in form and substance with the draft of Complaint here attached and its Decision containing the following Order in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the Order shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other Orders. The Order shall become final upon service. Mailing of the Complaint and Decision containing the agreed-to Order to proposed respondents' addresses as stated in this Agreement shall constitute service. Proposed respondents waive any right they may have to any other manner of service. The Complaint may be used in construing the terms of the Order, and no agreement, understanding, representation, or interpretation not contained in the Order or the Agreement may be used to vary or contradict the terms of the Order.

7. Proposed respondents have read the proposed Compliant and Order contemplated hereby, and they understand that once the Order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the Order, and that they may be lable for a civil penalty in the amount provided by law for each violation of the Order after it becomes final.

8. It is agreed that the relief set forth in the Order contained herein fully satisfies any claim for redress which the Commission has under sections 5(b) and 19 of the Federal Trade Commission Act, as amended, arising out of the acts and practices alleged in the Complaint. By its final acceptance of this Agreement, with such modifications, if any, which the parties may make prior to said final acceptance, the Commission waives its right to commence a civil action under section 19 of the Federal Trade Commission Act, as amended, with respect to the acts and practices alleged in the Commisison's Complaint.

ORDER

For the purpose of this Order, the following definitions apply, unless otherwise specified herein:

A. "Respondents" mean Australian Land Title, Ltd. ("ALT"), Morlan International, Inc., ("Morlan") and Safeguard Industries, Inc., ("Safeguard") and include their successors and assigns.

B. "Tract" means each parcel of land located in Western Australia identified in Appendix A.

C. "Sales Agreement" means any agreement entered into by ALT or any agent, representative or subsidiary of ALT for the sale of any undivided interest (tenancy in common) in any Tract.

D. "Purchaser" means any person or entity that entered into any Sales Agreement, or the person or entity that received the purchaser's interest in any Sales Agreement by transfer, assignment, inheritance, or otherwise, or the person or entity, that purchased an interest in a Tract other than from any respondent or its representatives or agents, but shall not include any person or entity, other than one who has made all Purchase Payments, whose last Purchase Payment pursuant to any Sales Agreement was received by ALT prior to January 1, 1977, or who has arbitrated, settled, released or litigated to final judgment all claims and rights relating to the purchase of an interest in a Tract.

E. "Defaulter" means any person or entity that entered into any Sales Agreement, or the person or entity that received the purchaser's interest in any Sales Agreement by transfer, assignment, inheritance, or otherwise, or the person or entity, that purchased an interest in a Tract other than from any respondent or its representatives or agents, whose last Purchase Payment pursuant to any Sales Agreement was received by ALT on or after January 1, 1974, but before January 1, 1977, but does not include any person or entity who has made all purchase payments or any Defaulter who has arbitrated, settled, released or litigated to final judgment all claims and rights relating to purchase of an interest in a Tract.

F. "Net Sales Price" means the gross sales price of any Tract less the seller's customary share of state or local sales or transfer taxes, transfer of title fees, and brokerage fees (*Provided*, That a broker has in fact been used and that his fees are not more than the prevailing rate for comparable services in Western Australia); no deduction from gross sales price shall be made for attorneys' fees, sellers' pro rata share of property taxes, payoff of mortgages or other liens or charges against the land, cost of appraisal, advertising costs or court costs associated with a judicial proceeding, or other costs of sale.

G. "Purchase Payments" means all sums including downpayments, and periodic payments of principal and interest paid pursuant to any Sales Agreement and dated and received by ALT prior to July 1, 1977.

H. "Purchase Price" means the total purchase price (including interest or finance charges if any) stated in any Sales Agreement.

The acts and practices, prohibitions, affirmative undertakings, requirements and activities subject to this Order are those in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, as amended.

I. *It is ordered*, That ALT, Morlan and Safeguard, directly or indirectly, through any corporation, subsidiary, division, or other device, do forthwith cease and desist from advertising, offering for sale, selling, or transferring any undivided interest in land in Australia to any consumer in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, except as permitted by this Order or as otherwise may be permitted by written approval of the Commission. For the purposes of this part, "consumer" shall mean a natural person to whom rspondents offer to sell any undivided interest in land or other real property; *Provided, however*, That the term"consumer" shall not include a natural person who purchases an interest in land in a single transaction for a sum in excess of $50,000.

II. *It is further ordered*, That ALT:

A. Cease and desist from collecting, directly or indirectly, payments, including principal and interest, due from any Purchaser pursuant to any Sales Agreement and return to any Purchaser, within five (5) days of receipt, any payment received from such Purchaser on or after the date this Order becomes final.

B. Return to each Purchaser all payments, including principal and interest, made by such Purchaser pursuant to any Sales Agreement, that were dated and received by ALT, or its representatives or agents, on or after July 1, 1977, but before the date this Order becomes final.

C. Cease and desist from cancelling any Sales Agreement of any Purchaser except where permitted or required by Part III of this Order.

D. Cease and desist from failing to pay all property taxes, mortgages, liens or charges against any Tract on a timely basis as each becomes due.

III. *It is further ordered*, That ALT, consistent with the procedures set forth below and the laws of Western Australia, sell each Tract and distribute the proceeds. For the purposes of this part, the definition of Purchaser shall not include any person or entity who has sold, devised, assigned, or otherwise transferred his interest in a Tract.

A. Each Tract may be sold by consent of the Purchasers of that Tract or partition and judicial sale pursuant to the Laws of Western Australia: *Provided, however*, That any sale other than by partition and judicial sale shall be made only with the express consent of the Purchasers whose Sales Agreements account for a majority of the undivided interests in that Tract.

B. On or before two years from the date this Order becomes final ALT shall initiate proceedings in the appropriate courts of Western Australia for partition and judicial sale with respect to ten (10) Tracts less the number of Tracts which have been previously sold, or which are already the subjects of partition actions, or which have been excluded pursuant to Paragraph L of this part.

C. On or before three years from the date this Order becomes final ALT shall initiate proceedings in the appropriate courts of Western Australia for partition and judicial sale with respect to twenty (20) Tracts less the number of Tracts which have been previously sold, or which are already the subjects of partition actions under Paragraph B of this part as of that date, or which have been excluded under Paragraph L of this part.

D. On or before four years from the date this Order becomes final ALT shall initiate proceedings in the appropriate courts of Western Australia for the partition and judicial sale of all Tracts which remain unsold and which are not already the subjects of partition actions under Paragraphs B and C of this part as of that date, or which have not been excluded under Paragraph L of this part.

E. ALT shall pursue all such actions for partition and judicial sale pursuant to Paragraphs B–D of this part as expeditiously as possible consistent with the laws and judicial procedures of Western Australia. ALT shall inform the court of the provisions of Part III of this Order at the time any proceeding for partition and judicial sale of a Tract is commenced, and shall provide a copy of Part III of this Order if the court agrees to accept the Order in camera.

F. All Tracts shall be sold and the proceeds distributed within five (5) years from the date this Order becomes final. *Provided, however*, The Commission shall extend the period as to any particular Tract where ALT can establish to the satisfaction of the Commission that a partition action with respect to such Tract was brought and pursued as provided by this part, but that sale and distribution of proceeds cannot reasonable be expected to occur within the period. Upon the granting of such an extension, ALT shall file reports with the Commission every six months until sale and distribution of proceeds have been completed, describing the status of such pending proceeding and any measures taken by ALT to conclude such proceeding. ALT shall bear the costs of the sale of any Tract except such costs as may be duducted from the gross sales price as provided in the definition of Net Sales Price.

G. Except as otherwise provided herein, a share of the Net Sales Price of each Tract shall be distributed to each Purchaser of such Tract in proportion to the percentage interest in the Tract set forth in such Purchaser's Sales Agreement. Each Defaulter who, prior to January 1, 1977, paid one-third or more of the Purchase Price set forth in such Defaulter's Sales Agreement shall receive a cash payment, to be distributed from the remaining proceeds of the Net Sales Price, such payment to be based on the proportion of the Net Sales Price allocable to the percentage interest in the Tract set forth in such Defaulter's Sales Agreement multiplied by the percentage of the Purchase Price actually paid by such Defaulter. *Provided, however*, That any distribution to a Purchaser who is not a citizen or resident of the United States, its territories, or the District of Columbia shall be paid to such Purchaser in an amount equal to the total of his Purchase Payments, and any remainder shall be paid to ALT in an amount equal to the unpaid balance of the Purchase Price, and thereafter any remainder shallbe paid to such Purchaser. *Provided further*, That no Defaulter shall receive from the distribution provided for herein an amount in excess of the total of his Purchase Payments less the distribution provided for in Paragraph B of Part IV of this Order. ALT shall be entitled to the balance of the Net Sales Price remaining after distribution of proceeds to Purchasers and Defaulters under this part.

H. Distributions from the Net Sales Price resulting from the sale of each Tract shall be made to the Purchasers and Defaulters of that Tract within sixty (60) days after the receipt of such proceeds by ALT, except at such other time as the Purchasers may consent to in accordance with paragraph I(ii) of this part or as may be ordered by a court in a proceeding for partition and judicial sale of any Tract.

I. Any Tract may be sold on terms which provide that the buyer will pay the purchase price in installments, or that any payment by the buyer will be deferred for a period in excess of 120 days after the date the sale is consummated: *Provided*, That (i) ALT shall nevertheless distribute to the Purchasers and Defaulters of the Tract, as provided in Paragraph G of this part, an amount equal to the Net Sales Price (not including interest) within sixty (60) days after the sales transaction is consummated, or (ii) ALT shall have first obtained the express consent of the Purchasers whose Sales Agreements account for a majority of the undivided interests in the Tract to the terms of the sale and to distribution of the proceeds of the sale within a specified period exceeding 120 days after the date the sale is consummated. *Provided, however*, ALT shall distribute proceeds received from the installment sale of any Tract in accordance with Paragraph G of this part within sixty (60) days of the receipt of each installment: *And provided further*, That in the event of any default by any buyer, ALT will notify the Commission and promptly initiate proceedings for partition and judicial sale of such Tract.

J. ALT shall not solicit the consent of any Purchaser to any sale of a Tract or any terms of sale without first having obtained, within six (6) months prior to the solicitation, an appraisal from an appraiser licensed in Western Australia who, prior to December 31, 1977, shall not have been employed, retained or otherwise associated with any Respondent, and without having adequately and accurately disclosed to all Purchasers of the Tract whose current addresses have been identified pursuant to the procedures set forth in Part V of this Order (i) the name, address and business of a proposed buyer or buyers; (ii) the nature and extent of any prior or existing relationship—including overlapping ownership interests or business dealings—between the buyers and any of the Respondents; (iii) what efforts, if any, have been made to sell the Tract on cash terms or more favorable terms of sale (including efforts to obtain a higher price or shorter payout) than that offered by the buyers; (iv) what other offers have been made for the Tract; (v) any appraised value of the Tract made within the six month period, and the date of each such appraisal; (vi) the minimum price and conditions upon which the Tract would be sold to any buyer; (vii) that if the Purchasers whose Sales Agreements account for a majority or the undivided interests in the Tract do not consent to such sale, ALT remains obligated to sell the Tract, by partition and judicial sale or otherwise, within five (5) years of the date this Order becomes final.

K. Respondents shall not, directly or indirectly, purchase or acquire any Tract, from any Purchaser, except as follows:

1. In disposing of any Tract through partition and judicial sale, any Re-

V 43 — 85 MY 2 78 UMI

spondent may purchase such Tract only if (i) both the Court administering such sale and the Commission are notified at least thirty (30) days in advance of sale of such Respondent's intention to purchase and the terms of the purchase and (ii) such Respondent reports to the Commission, within sixty (60) days after any such purchase, the amount paid by the Respondent and provides the Commission with such other relevant information concerning the sale as the Commission may request.

2. In disposing of any Tract by consent of the Purchasers of the Tract, any Respondent may purchase such Tract only if (i) within six (6) months prior to such purchase an appraisal shall have been obtained from an appraiser licensed in Western Australia who, prior to December 31, 1977, shall not have been employed, retained, or otherwise associated with any Respondent, (ii) the purchase price paid by the Respondent is not less than the appraised value of the Tract, (iii) the Respondent shall have disclosed to the Purchasers the information set forth in Paragraph J of this part, (iv) the Respondent, at least thirty (30) days in advance notifies the Commission of its intention to purchase and provides to the Commission a copy of the appraisal, (v) the Respondent reports to the Commission within sixty (60) days after sale the amount paid by the Respondent and furnishes such other relevant information regarding the sale as the Commission may request.

3. Except as otherwise may be permitted by written approval of the Commission, no Respondent may purchase the individual interest of a Purchaser in a Tract unless such Purchaser—

(a) Has executed a written document acknowledging receipt of the letter required by Paragraph A of Part IV of this Order and declining to dispose of his interest in the manner provided therein, or

(b) Is represented by legal counsel, either individually or as a member of a class in a class action which has been filed in State or Federal court.

L. Notwithstanding Paragraphs A–K of this part, if the Purchasers whose Sales Agreements account for a majority of the undivided interests in a Tract expressly consent to retain their interests in the Tract and to forego permanently disposition of the Tract pursuant to Part III of this Order, the Commission shall entertain a petition to that end. Such a petition shall set forth sufficient information to demonstrate:

1. The procedure used to ascertain that Purchasers whose Sales Agreements account for a majority of the undivided interests in the Tract have expressly consented to forego disposition of the Tract pursuant to Part III of this Order, and the results of such procedure.

2. The risks, benefits, and burdens of such continued ownership in the Tract and the procedures used to ensure that Purchasers were adequately and accurately informed of such information prior to expressing their consent.

3. That prior to any Purchaser's expression of consent, an appraisal of the Tract was obtained from an appraiser (licensed in Western Australia and who, prior to December 31, 1977, had not been employed, retained or otherwise associated with any Respondent) and such appraisal was provided to the Purchasers in the Tract;

4. That adequate provision has been made for Purchasers to dispose of the Tract in the future;

5. That any Purchaser who does not concur in the majority decision was informed of such Purchaser's right to institute, and the required procedure for instituting, an action for judicial partition or sale;

6. That, for the purposes of Parts 4 and 5 of this Paragraph, adequate provision has been made to enable Purchasers who hold only equitable rights in the Tract to exercise full rights of ownership in the Tract.

If the Commission is satisfied that the prerequisites of this Paragraph have been met, and that there is no countervailing public interest to be served by rejection of the petition, the Commission shall grant the petition.

M. The provisions of this part regarding sale of the Tracts and distribution of the proceeds are subject to the laws of Western Australia, and to any judicial decrees or orders thereunder; *Provided, however,* That to the extent that any Respondent might otherwise have rights in connection with the sale of any Tract, or to the proceeds thereof, different from those provided herein, it has waived such rights and shall proceed according to the terms of this Order.

IV. *It is further ordered,* That ALT make cash payments to Purchasers and Defaulters who are citizens or residents of the United States, its territories, or the District of Columbia, in accordance with the following procedures:

A. Within sixty (60) days after this Order becomes final, ALT shall mail, in accordance with the procedures set forth in Part V of this Order, two (2) copies of the letter set forth in Appendix B to all such Purchasers and two (2) copies of the letter set forth in Appendix C to all such Defaulters. *Provided, however,* With prior approval of the Commission, appropriate modifications or deletions may be made in letters to be sent to Purchasers or Defaulters whose rights under this Order are different from those delineated in the letters set forth in Appendices B and C. Enclosed with each pair of letters shall be a postage-prepaid return envelope for the return of the release form.

B. The amount to be offered to each eligible Purchaser and Defaulter, as indicated in the letter to such Purchaser or Defaulter, shall be the percentage of $2,000,000 equal to the percentage that the total Purchase Payments made by that Purchaser or Defaulter is of the total Purchase Payments made by all eligible Purchasers and Defaulters. Moreover, any Purchaser who purchased an interest in a Tract other than from ALT or its representatives or agents (transferee Purchaser), shall participate in the foregoing payment provided, in calculating the amount of the payment to be made, any consideration paid by a transferee Purchaser to a transferor Purchaser shall, if the transferee Purchaser has first furnished to ALT adequate documentation of such Purchaser's purchase of the interest and the amount paid therefor, be treated as a deduction from the Purchase Payments of the transferor Purchaser and treated as an addition to the Purchase Payments of the transferee Purchaser (in no event, however shall a transferee Purchaser be credited with total Purchase Payments in excess of the total Purchase Payments paid to ALT for such interest.)

C. In calculating Purchase Payments, ALT shall attempt to reconcile with its records any response to the letters required by Paragraph A of this part that contest the accuracy of those records.

D. ALT shall make payments to each such Purchaser and Defaulter who shall have elected to participate by tendering the release set forth in Appendices B and C in a total amount equal to the amount calculated pursuant to paragraphs B and C of this part. The first payment shall be made no later than two-hundred and forty (240) days after the date this Order becomes final, with subsequent payments to be made at least annually over a period not to exceed forty-eight (48) months from the date of the first payment. The payments will be made to each such Purchaser or Defaulter in equal installments, except that the first payment may be larger than the succeeding payments and the last payment will include any additional amounts due by reason of the recalculation provided for in paragraph C of this part.

E. Seven years after the date on which the letters required by Paragraph A of this part shall have been mailed, ALT shall distribute an additional payment in the following circumstance. If, as of such date, less than $1,500,000 shall have been distributed pursuant to this part, and if as of such date no class action litigation against any of the Respondents

shall be pending on behalf of any eligible Purchaser or Defaulter, ALT shall distribute to all Purchasers and Defaulters who shall have tendered the release provided in Appendices B and C the balance of $1,500,000 less such amounts as, subsequent to the date this Order becomes final, shall have been paid pursuant to any arbitration, settlement, release, litigation, or judgment relating to the purchase of any interest in a Tract. In the event that any class action litigation is pending on such date, this distribution shall be deferred until ninety (90) days after such action is dismissed or settled, or any judgment thereon is satisfied, and the amount of such distribution shall be reduced by such amounts as may have been paid pursuant to such settlement, litigation or judgment. Payment of the amounts to be paid under this Paragraph shall be made to each Purchaser and Defaultor in the same proportion as payments under Paragraph B of this part; *Provided, however,* That no Purchaser or Defaulter shall receive from this distribution an amount in excess of the total of his Purchase Payments less the distributions provided for in this part.

V. *It is further ordered,* That;

A. Any mailings or communications required by Parts III and IV of this Order shall be by first-class mail, postage-prepaid and address correction requested, directed to each Purchaser and Defaulter at the most recent address for such Purchaser or Defaulter contained in ALT's files.

B. Sixty (60) days after the mailing required by Paragraph A of Part IV of this Order, ALT shall make a second mailing of such letters by certified first-class mail, postage-prepaid, address correction requested, return-receipt requested with delivery to addressee only, to all Purchasers and Defaulters, directed to their most recent addresses contained in the ALT files, except those Purchasers and Defaulters whose first mailing was returned undelivered or who have tendered either the release or the election not to participate.

C. Within twenty (20) days after return to ALT of any undelivered letter mailed pursuant to Paragraphs A or B or within thirty (30) days after mailing any letter mailed pursuant to Paragraph B of this part for which no return receipt has been received, ALT shall attempt to obtain a current or more recent address for the Purchaser or Defaulter to whom such letter was addressed by requesting the Purchaser's or Defaulter's current mailing address from any relative or representative of the Purchaser or Defaulter whose address appears in ALT's files by sending a communication by first-class mail, postage-prepaid and address correction requested, directed to the most recent address for such relative or representative appearing in ALT's files, and by requesting a current address for the Purchaser or Defaulter from a credit reporting agency located nearby the most recent address for the Purchaser or Defaulter appearing in ALT's files, the current or more recent address to be provided by the credit reporting agency within a reasonable time after the request. If a current or more recent address is received through these procedures, a copy of the appropriate letter required by Paragraph A of Part IV of this Order shall be sent within ten (10) days after receipt of the new address to the Purchaser or Defaulter at the new address by certified first-class mail, postage-prepaid, address correction requested, return-receipt requested and delivery to addressee only.

D. After completion of the procedures set forth in Paragraphs A–C of this part, ALT shall maintain such records as will disclose as to each Purchaser and Defaulter, whether such Purchaser or Defaulter (i) signed a release, (ii) elected not to participate, (iii) did not respond to the letter, but received it as evidenced by a signed certified mail return-receipt, (iv) was not reached by any mailing; and the most recent address in ALT's files or obtained through the procedures set forth in Paragraph C of this part.

E. If at any time prior to the fulfillment of the obligations imposed by this Order, ALT learns of the current address of any Purchaser or Defaulter whose letters were returned undelivered or from whom a record of receipt was not obtained, ALT shall send such Purchaser or Defaulter the letters required by certified first class mail, postage-prepaid, address correction requested, return-receipt requested and delivery to addressee only, and such Purchaser or Defaulter shall be entitled to the benefits provided under Parts III and IV of this Order under the terms and conditions provided therein. Except as provided in Paragraph F of this part, ALT shall not thereafter bear any affirmative duty to seek out Purchasers or Defaulters.

F. All payments or distributions to Purchasers or Defaulters pursuant to Parts III or IV of this Order shall be sent by first-class mail, postage-prepaid, address correction requested to the most recent address for each Purchaser or Defaulter appearing in ALT's files. If any such payment is returned undelivered, ALT shall employ the procedures set forth in Paragraph C of this part in an effort to obtain a current address for such Purchaser or Defaulter.

G. If, at the time of the last payment to eligible Purchasers and Defaulters pursuant to paragraph D of Part IV of this Order, less than $1,500,000 shall have been distributed pursuant to Part IV of this Order, ALT shall inform such Purchasers and Defaulters that they may receive an additional payment pursuant to paragraph E of Part IV of this Order and request such Purchasers and Defaulters to advise ALT of any change of address.

VI. *It is further ordered,* That Respondents shall, subsequent to the date this Order becomes final, for a period of six (6) years or until one year after Respondents have complied fully with all parts of this Order, whichever is later, or such shorter period as the Commission may approve in writing:

A. Grant any duly authorized representative of the Federal Trade Commission access to and the right to copy any records required to be maintained by this Order.

B. Maintain records which show the efforts taken to insure continuing compliance with the terms and provisions of this order, including but not limited to the following:

1. All records used by any Respondent in determining whether any person or entity is a Purchaser or Defaulter, as each term is defined in this Order.

2. All records used by any Respondent in determining the amount of money due any Purchaser or Defaulter pursuant to Parts II, III, and IV of this Order.

3. All records evidencing that any Purchaser or Defaulter has arbitrated, settled, released or litigated to final judgment all claims and rights relating to the purchase of an interest in a Tract and that such Purchaser or Defaulter has received payment pursuant to such arbitration, settlement, release or litigation.

4. All records relating to the purchase or transfer of any Purchaser's undivided interest in a Tract, including all documents filed with or issued by any Australian court pursuant to Part III of this Order.

5. Copies of all written communications between any Respondent and any Purchaser or Defaulter, including any communication which is returned to any Respondent as nondeliverable by the U.S. Postal Service, except those between counsel for a Respondent and counsel for such Purchaser or Defaulter.

C. Obtain prior approval by the Commission of any written communication to any Purchaser or Defaulter which is initiated by any Respondent pursuant to Paragraphs I or K of Part III of this Order, except for any communication written pursuant to Paragraph K(3)(b). Such Respondent shall provide to the Commission such relevant information within its possession, custody or control as the Commission may request to evaluate any such communication. If, within 20 days after mailing such communica-

V 4 3 — 1 8 5

tion to the Commission, the Respondent has received no written notice that the Commission has determined that the communication fails to conform with the provisions of this Order or that the Commission needs additional time to evaluate the communication, the Respondent may send the communication. Otherwise the Commission shall approve the communication or indicate the changes necessary for such approval within 30 days after the submission of such correspondence or as soon thereafter as possible.

D. Send, within 3 days after mailing, copies to the Commission of any written communication, the substance of which has not previously been approved or authorized by the Commission, to any Purchaser or Defaulter which (a) interprets or defines the obligations imposed by this Order, or (b) is written in response to any inquiry from any Purchaser or Defaulter relating to a written communication from any Respondent initiated pursuant to Paragraphs I, K or L of Part III of this Order.

VII. *It is further ordered*, That:

A. Morlan shall be responsible for ALT's compliance with the provisions of this Order and shall be liable for any final judgment against ALT for violating any provision of this Order.

B. Safeguard shall provide such funds on a timely basis as are required for compliance with the provisions of this Order.

C. In the event that ALT is sold, assigned or otherwise disposed of, the agreement for such disposition shall contain a provision requiring the purchaser or assignee to assume the obligations imposed on ALT under this Order.

D. In the event the Commission determines that ALT has failed to comply, or has become incapable of complying, with any provision of this Order, and if the required action is not taken within 30 days after written notice to ALT and Safeguard of such determination, or in the event that the Commission is enjoined, stayed or otherwise prohibited from enforcing any provision of this Order against ALT or Morlan by a bankruptcy court, Safeguard shall assume all obligations (including obligations that have become due, but have not been fulfilled by ALT) remaining to be fulfilled by ALT under this Order; *Provided, however*, That Safeguard shall not be liable for civil penalties by reason of ALT's failure to fulfill such obligations prior to the date of such written notice; *And provided further*, That, in any event, Safeguard shall fulfill the obligations remaining unfulfilled under Part III of this Order either on the dates set forth in such part or twelve (12) months from the date of such written notice, whichever time period is longer. After Safeguard assumes the unfulfilled obligations under this Order by operation of this Paragraph, and upon submission of a petition by Safeguard, the Commission will review each deadline for any unfulfilled obligation and will extend, where appropriate, any deadline which has been established by Safeguard as imposing, under the prevailing circumstances, an unreasonable hardship or burden in its application to Safeguard; *Provided, however*, The Commission need not extend any deadline when extension of the deadline would be contrary to the public interest. The Commission will respond to such petition within 45 days of its submission by Safeguard or as soon thereafter as is possible. Nothing contained in this paragraph shall be construed as otherwise limiting the Commission's authority to pursue against any non-complying Respondent any action for such non-compliance with this Order.

E. ALT shall immediately transfer to Safeguard ownership of one undivided interest in each Tract.

F. Each Respondent herein shall, within ninety (90) days after service upon them of this Order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the applicable provisions of this Order and, commencing 180 days after filing the initial report, shall file semi-annual reports thereafter until it has complied fully with all parts of this Order.

G. For the purposes of this Order, the "Commission" shall include, and all notices, reports, and requests for approval shall be directed to, the Director of the Bureau of Consumer Protection, or his designee, or successor.

H. Should any duty required to be performed on a day certain under this Order fall upon a non-business day, such duty may be performed on the next following business day.

I. The Commission may extend any deadline contained in this Order for good cause shown, and such extension shall not be unreasonably withheld.

J. Each Respondent shall notify the Commission at least thirty (30) days prior to any proposed change in its corporate structure, such as dissolution, assignment or sale resulting in the emergency of a successor corporation, the creation or dissolution of any subsidiary corporation or any other change in the corporation which may affect compliance obligations arising out of this Order.

APPENDIX B

[ALT Letterhead]

(Name) (Address) (City and State)

Re: Sale of Land in Western Australia and Cash Payments

Dear (Name):

Australian Land Title, Ltd., ("ALT") has entered into an Agreement with the Federal Trade Commission which provides certain benefits for which you are eligible. The Agreement basically provides (a) for the sale of the tract of land in which you hold an interest within 5 years, (b) that no further payments need be made by you, (c) that those payments dated and received by the company on or after July 1, 1977, will be returned to you, (d) that your sales agreement will be treated as paid in full—you will receive a full share in the proceeds of the sale of the land in accord with your sales agreement, and (e) a cash payment will be made to you each year for the next five years upon your signing the Release set forth below agreeing to release any claims that you may have arising out of your acquisition of the undivided interest in land located in Western Australia.

Our records show that you hold a ——— percent interest in [description of land] ———, and that as of June 30, 1977, $——— was paid to ALT on your contract. If your records conflict with any of this information please notify us at once, and provide copies of whatever documents you may have which will help in resolving any conflicts. As mentioned above, all payments you made to ALT after July 1, 1977, are being returned to you.

Sale of Land. ALT will, within the next 5 years, arrange for the sale of the land in Australia in which you hold an interest. You will receive a share of the net sales price of the land based upon the percentage interest set forth in your sales agreement. It is not possible at this time to estimate the price for which the land will be sold. Before this happens, however, you will be sent complete details concerning how the land will be sold.

Discontinue Payments. ALT is not collecting any further payments due under your contract for the purchase of an undivided interest in land in Western Australia. Accordingly, do not send any additional payments to ALT. ALT will send back to you any payments you made which were dated and received by ALT on or after July 1, 1977. This will not affect your right to participate in the proceeds from the sale of the land in which you hold an undivided interest. You will receive the full share set forth in your sales agreement.

Eligibility for Cash Payment. You are eligible to receive a cash payment from ALT. Cash payments will be made only to purchasers who agree in writing to release any claims they may have arising out of the sale of undivided interests in land in Western Australia. A copy of this letter containing the Release is being provided for your signature. If you sign the Release, you will receive $ ——— which will be paid in five installments. The first payment will be made by [date] ———, and will be in the amount of $ ———. The four subsequent payments will be made annually. In order to receive the cash payment you must sign the Release and return it in the enclosed postage-paid envelope. You may wish to consult an attorney to determine your rights before signing the Release, and you should be aware that the Federal Trade Commission has expressed no opinion as to whether you should sign the Release.

Even if you do not wish to sign the Release and receive the cash payment, you will still receive you share of the proceeds of the sale of the land in which you have purchased an interest. You should not make any additional payments to ALT and ALT will return any payments you have made since July 1, 1977. If you do not wish to release all claims and participate in the cash payment, sign the statement "I Do Not Wish To Participate In The Cash Payment" and return the copy in the enclosed postage-paid envelope.

Please sign and return the copy of this letter as soon as possible and in no event later than 60 days. Please note your current address and keep us advised of any future change of address, so that we may send you further information, as well as future payments. If you have any questions about this letter, please write to us at once.

Sincerely,

[Title] ———
Australian Land Title, Ltd.

RELEASE

In consideration of the cash payments described above, totaling $ ——— , I hereby release Australian Land Title, Ltd., Safeguard Industries, Inc., and Morlan International, Inc., their subsidiaries, predecessors, and affiliates, and their officers, directors, employees, and agents from any and all claims, known or unknown, that I may have against any of them in connection with my purchase of an interest in land as described above.

[Date] ——— [Signature] ———.

Remember, you must sign and date the above Release and return this letter to receive the Cash Payments.

———

I Do Not Wish To Participate in the Cash Payment.

[Date] ——— [Signature] ———.

APPENDIX C

[ALT Letterhead]

(Name)
(Address)
(City and State)

Re: Eligibility for Cash Payments

Dear (Name):

Australian Land Title, Ltd., ("ALT") has entered into an Agreement with the Federal Trade Commission which provides certain benefits for which you are eligible.

Cash Payments. Cash payments will be made to persons whose last payment on their contracts was received by ALT on or after January 1, 1974, but not later than December 31, 1976. According to our records, your last payment to ALT was made on [date] ———. At this time you had paid $——— on your contract of a ——— percent interest in the following land: [description of land] ———. If your records conflict with any of this information, please notify us at once, and provide copies of whatever documents you may have which will help in resolving any conflicts.

Based on the foregoing, you are eligible for a cash payment of $ ——— from ALT. You can receive this amount only if you agree to release any claims you may have arising out of the sale of undivided interests in land in Western Australia. A copy of this letter containing the Release is being provided for your signature.

The payment will be made in five installments. The first payment will be made by [date] ———, and will be in the amount of $———. The four subsequent payments will be made annually. In order to receive the cash payment you must sign the Release and return it in the enclosed postage-paid envelope. You may wish to consult an attorney to determine you rights before signing the Release, and you should be aware that the Federal Trade Commission has expressed no opinion as to whether you should sign the Release.

If you do not wish to release all claims and participate in the cash payment, sign the statement "I Do Not Wish To Participate In The Cash Payment" and return the copy in the enclosed postage-paid envelope.

Sale of Land. Even if you do not agree to release all claims and participate in the cash payment described above, you will still be eligible to receive a payment from the proceeds of the sale of the land in which you contracted to purchase an interest. The amount of this payment cannot now be estimated, since it will be based on the sales price of the land, as well as the amount you paid on your contract.

Whether or not you choose to participate in the cash payments, the amount you will receive is limited to the amount that you have paid to ALT. In no event will you receive more than the amount you paid.

Please sign and return the copy of this letter as soon as possible and in no event later than 60 days. Please note your current address, and advise us of any future change of address, so that we may send you further information, as well as future payments.

If you have any questions about this letter, please write us at once.

Sincerely,

Australian Land Title, Ltd.
By ———

Release

In consideration of the cash payments described above, totaling $ ———, I hereby release Australian Land Title, Ltd., Safeguard Industries, Inc., and Morlan International, Inc., their subsidiaries, predecessors, and affiliates, and their officers, directors, employees, and agents from any and all claims, known or unknown, that I may have against any of them in connection with my purchase of an interest in land as described above.

[Date] ———[Signature] ———.

Remember, you must sign and date the above Release and return this letter to receive the Cash Payments.

I Do Not Wish To Participate In The Cash Payment

[Cash] ———[Signature] ———.

AUSTRALIAN LAND TITLE, LTD., ET AL FILE No. 732-3312

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement containing a proposed consent order from Australian Land Title, Ltd. (ALT), Morlan International, Inc. (Morlan) and Safeguard Industries, Inc. (Safeguard), the named respondents.

The agreement has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will review the agreement and the comments received and will decide whether it should withdraw from the agreement of make final the proposed order.

The purpose of this analysis is to facilitate public comment on the proposed order, and is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

THE ALLEGATIONS IN COMPLAINT

The complaint accompanying the agreement alleges that ALT, Morlan (ALT's parent corporation as of December 1972) and Safeguard (ALT's parent corporation from February 1970, to December 1972) have engaged in unfair and deceptive practices in connection with the sale of undivided interests (tenancies in common) in land located in western Australia. These practices include the unfair creation and sale of, and the collection and receipt of payments for such undivided interests. The unfairness results from the application of Australian law, the number of tenacies in common, the diversity of citizenship of cotenants and the lack of any means to manage, develop or dispose of the land. These factors make it virtually impossible for the land to be sold or beneficially used. Also, purchasers of the undivided interests were never told of the detrimental legal and practical effects of buying such interests. Moreover, the purchase contracts contain provisions which allowed ALT in the event of default of purchasers to retain payments in excess of its actual damages which imposed unfair penalties on such defaulters.

M Y 2 — 7 8 UMI

V 4 3 | 8 5 M Y 2 7 8 UMI

THE PROPOSED ORDER

A. *Prohibition of Future Sale of Undivided Interests in Australian Land.* The proposed order prohibits the respondents from advertising or offering for sale any undivided interests in land in Australia execpt for non-consumer sales exceeding $50,000.

B. *Classes Entitled to Redress.* The proposed order provides consumer redress to certain persons who previously purchased undivided interest in thirty (30) tracts of land in western Australia. For purposes of the order, categories of eligible persons are created: (1) "purchaser"—any person who completed payments for his or her interest or made a payment on or after January 1, 1977; and (2) "defaulter"—any person who made any payment on or after January 1, 1974, but before January 1, 1977. Anyone who has settled, arbitrated, released or litigated to final judgment all claims relating to purchase of an undivided interests is excluded from being a purchaser or defaulter under the proposed order.

C. *Prohibition of Collection of Contract Payments and Payment of Charges Levied against Australian Land.* The proposed order prohibits any collection of payments, including principal and interest, from purchasers after the order is final. Any payment that is received must be returned within five (5) days of receipt. Also, ALT must return all payments which were dated and received on or after July 1, 1977. Those payments have been placed in an escrow fund which will be distributed to purchasers as part of the proposed order. ALT is required to pay all property taxes and other charges levied against any of the tracts as they become due.

D. *Sale of Australian Property.* Under the proposed order, ALT is required to sell all the tracts within 5 years from the date the order is final. Sale of a tract can be either by consent of a weighted majority of purchasers of the tract or under supervision of an Australian court. However, the Commission can grant an extension of time to sell a tract or agree to the removal of a tract from the mandatory sale provisions of the proposed order. In event of a sale, ALT can only deduct specified costs from the sales price, such as the seller's share of transfer taxes and fees. Furthermore, the proceeds from any sale must be distributed to purchasers and defaulters within sixty (60) days of receipt of the proceeds by ALT. Any other deferred payment of the proceeds must be approved by weighted majority of purchasers. Purchasers are entitled to receive shares of the proceeds equal to their percentage interests in the tracts as set forth in their contracts. Defaulters, who paid in one-third or more of the purchase price of their undivided interests, are entitled to receive shares of the proceeds equal to the percentages of the purchase prices of their contracts which they paid, multiplied by their percentage interests in the tracts as set forth in their contracts. Distribution to foreign purchasers is initially limited to the amount of their total purchase payments. Any additional amounts would go first to ALT, up to the amount of the unpaid purchase price, and then to the foreign purchasers. No defaulter may receive a share of the proceeds in excess of the total amount he or she paid to ALT, less any other refund received under the proposed order.

The proposed order allows respondents to purchase a tract or an interest in a tract from purchasers only under specified and limited circumstances.

Respondents have agreed to waive any rights under Australian law relating to the sale of any tracts or the proceeds from such sale where their rights are different from the terms of the proposed order. To the extent that those person who have purchased from ALT may have greater rights under Australian law then are provided by the proposed order, any rights arising under such law will not be reduced by any provision of the order.

E. *Cash Payments from Redress Fund.* Purchasers and defaulters, who are non-foreign, are eligible to receive cash payments from a $2 million redress fund. The amount of each cash payment will be determined by the amount each person paid on his or her contract when compared to the total amount paid by all eligible purchasers and defaulters. To receive a cash payment, a purchasers or defaulter must sign a statement releasing respondents from any liability arising from the purchase of an undivided interest in Australian land. Before the purchasers and defaulters are asked to sign the release, they will be advised, by letter, of the amount of the cash payment, and of the facts that future contract payments will not be collected, and the land will be sold as provided in the proposed order. Those persons who refuse to sign the release still will be excused from future contract payments, and will be entitled to receive shares of the proceeds from the sale of the land. ALT will being making payments to purchasers and defaulters who sign releases within two hundred and forty (240) days after the date the order is final, with subsequent payments to be made annually over the next 4 years.

Moreover, the proposed order provides that at least $1.5 million of the $2 million fund will be distributed, either as a result of cash payments made to eligible purchasers and defaulters or from monies paid pursuant to settlement, arbitration or litigation arising from the sale of the Australian land. If less than $1.5 million has been paid to purchasers and defaulters who sign releases, or pursuant to settlement arbitration or litigation, the unpaid balance will be paid to purchasers and defaulters who sign releases approximately seven years from the date the order becomes final, unless at that time a class action litigation is pending against any respondent. In such an event, the payment will be deferred until ninety (90) days after completion of the litigation. No additional payment will be made to eligible purchasers or defaulters if the class action litigation results in a judgment which exceeds the unpaid balance of the $1.5 million minimum fund.

F. *Procedures for Locating Purchasers and Defaulters.* Under the proposed order, ALT is to inform purchasers and defaulters of the provisions of the order by sending letters to their most recent address contained in ALT's files. For those persons who do not respond to the letters but whose letters were not returned undelivered, ALT must send a second letter by certified mail. ALT is required to attempt to obtain more current addresses for persons whose letters were undelivered by requesting new addresses from any relatives or representatives appearing in ALT's files and requesting more current addresses from credit reporting companies. If at any time prior to fulfilling the obligations imposed by the proposed order ALT learns of current addresses of persons who could not be previously located, they will be entitled to receive the benefits provided under the order.

G. *Liability of Respondents.* ALT is obligated to comply with the provisions of the proposed order. Morlan is responsible for ALT's compliance and is liable for any judgment against ALT for violating the order.

Safeguard is required to supply all the funds necessary for full compliance with the order. Furthermore, it must assume all the remaining unfulfilled obligations of the proposed order if the Commission determines that ALT is unable to comply with any provisions of the order and such non-compliance is not corrected within thirty (30) days after receipt by Safeguard of notice from the Commission, or if a bankruptcy court prohibits enforcement of the order against ALT or Morlan. Upon assuming the unfulfilled obligations of the order, Safeguard will be allowed one year to sell the tracts and distribute the proceeds or it can fulfill the obligations and meet the time deadlines set forth in the order. However, Safeguard is permitted to petition the Commission seeking extensions of deadlines where they will impose an unreasonable hardship or burden.

H. *Procedures to Ensure Compliance.* The respondents are required to maintain records and grant Commission personnel access to them until one year after compliance with all the provisions of the proposed order. These records include information used by respondents to determine the amounts due purchasers and defaulters from the redress fund and sale of the Australian land. Also, the Commission is given the right to approve the contents of certain letters regarding the sale of the Australian land prior to their mailing to purchasers and defaulters. In addition, copies of all letters to purchasers and defaulters which explain the requirements of the order must be sent to the Commission within three (3) days of mailing.

JAMES A. TOBIN,
Acting Secretary.

Proposed Trade Regulation Rulemaking and Public Hearing

Correction

In FR Doc 78-11323 appearing at page 17967 in the issue for Thursday, April 27, 1978, the eighth line of the third paragraph in column three, the room number now reading, "120," should be "130."

[8120-01]

TENNESSEE VALLEY AUTHORITY

[18 CFR Part 307]

NONDISCRIMINATION WITH RESPECT TO HANDICAP IN PROGRAMS RECEIVING FEDERAL FINANCIAL ASSISTANCE

Implementation of Section 504 of the Rehabilitation Act of 1973

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt a new Part 307 to TVA's regulations. The new part concerns nondiscrimination with respect to the handicapped in programs receiving Federal financial assistance from TVA. These proposed regulations set forth enforcement procedures, standards for determining which persons are handicapped, and guidelines for determining what practices are discriminatory, in accordance with section 504 of the Rehabilitation Act of 1973, as amended.

DATE: Comments must be received on or before May 31, 1978.

ADDRESS: Comments on the proposal may be sent to Justin M. Schwamm, Sr., Assistant General Counsel, Tennessee Valley Authority, 400 Commerce Avenue, E11B25, Knoxville, Tenn. 37902.

FOR FURTHER INFORMATION CONTACT:

Edward F. Hilton, Jr., Division of Personnel, 235 Millers Building, 423 Gay Street, Knoxville, Tenn. 37902, telephone 615-632-2755.

SUPPLEMENTARY INFORMATION: TVA was created by the Tennessee Valley Authority Act of 1933, as amended, as a corporate agency and instrumentality of the Federal Government, with "the duty of constantly studying the whole situation presented by the Tennessee River Valley, and the adjoining territory, with the view of encouraging and guiding in the orderly and balanced development of the diverse and rich resources of that section" (H.R. Rep. No. 130, 73d Cong., 1st Sess. 19 (1933)). Under it broad statutory mandate, TVA engages in a number of programs including experiments and demonstrations concerned with the provision of an ample supply of power for the advancement of the national defense and the physical, social and economic development of the area, the development of agriculture and fertilizers, the improvement of navigation and control of destructive floods, the fostering of recreation, industrial development, and many other things.

The TVA Act does not provide for grants to State or local agencies, as do many Federal social development or welfare programs. However, TVA does carry out many aspects of its programs by contracts which in TVA's view involve the provision of Federal financial assistance within the meaning of section 504 of the Rehabilitation Act of 1973, as amended. The contracts include such activities as providing fertilizer materials to land grant colleges for farm test demonstrations; granting land to State and local entities for recreational purposes; providing recreational planning and other technical services; and providing a variety of other types of assistance to meet the needs of individual communities, including mitigating the effects upon local housing, schools, public health, and law enforcement services, of the construction by TVA of electric power generating plants. Characteristically, the funds and value of property and services involved are relatively small, and the assistance is provided in isolated areas, rather than in regional or statewide areas. Moreover, assistance is often provided on an ad hoc basis as contrasted with the long-range financial assistance programs administered by some Federal departments and other agencies.

The purpose of the proposed regulation is to state the rules which will govern TVA financial assistance contracts in implementing section 504 of the Rehabilitation Act of 1973, as amended, and the enforcement provisions and guidelines which will govern. TVA has generally worked at the local level as the best way of implementing its statutory goals, and understanding and meeting the needs of the people it serves. In the proposed regulation, TVA has paralled the guidelines adopted by the Department of Health, Education and Welfare, so far as is practicable in light of the nature of TVA's programs, the small amount of funds, property or services involved in its financial assistance contracts, and the highly localized impacts.

TVA has attempted to insure sufficient flexibility in the proposed regulations to avoid creating situations in which administrative and other costs required of recipient communities with very limited resources would result in decisions by those communities that these costs exceed the value of the assistance which TVA can provide. Such decisions, of course, would impair the usefulness of both the substantive program carried out by TVA and the purposes of section 504.

All persons who desire to comment on the proposed regulation are encouraged to do so. Comments should be addressed to Justin M. Schwamm, Sr., Assistant General Counsel, 400 Commerce Avenue, E11B25, Knoxville, Tenn. 37902. All communications received on or before May 31, 1978, will be considered before action is taken on the proposed rule, which may be changed in light of the comments. All comments submitted will be available for public inspection at the office of the Director of Information, 400 Commerce Avenue, E12A4, Knoxville, Tenn. 37902, between the hours of 9 a.m. and 4 p.m. Monday through Friday, except federal holidays.

In consideration of the foregoing, it is proposed, under the authority of 16 U.S.C. 831-831dd and section 504 of the Rehabilitation Act of 1974, as amended, 29 U.S.C. 794, to add part 307 to chapter 11 of Title 18 of the Code of Federal Regulations, to read as set forth below.

Dated: April 26, 1978.

H. N. STROUD, Jr.,
Acting General Manager.

Part 307 would be added to read as follows:

PART 307—NONDISCRIMINATION WITH RESPECT TO HANDICAP

Sec.
307.1 Definitions.
307.2 Purpose.
307.3 Application.
307.4 Program discrimination guidelines.
307.5 Employment discrimination guidelines.
307.6 Program accessibility guidelines.
307.7 Assurances required.
307.8 Compliance information.
307.9 Conduct of investigations.
307.10 Procedure for effecting compliance.
307.11 Hearings.
307.12 Decisions and notices.
307.13 Effect on other regulations; supervision and compliance.
307.14-25 [Reserved]

AUTHORITY: TVA Act, 48 Stat. 58 (1933) as amended, 16 U.S.C. secs. 831-831dd (1976), sec. 504 of the Rehabilitation Act of 1973, Pub. L. 93-112, 87 Stat. 394 (29 U.S.C. 794.).

§ 307.1 Definitions.

As used in this part, the following terms have the stated meanings, unless the context otherwise requires.

(a) "Section 504" means section 504 of the Rehabilitation Act of 1973, Pub. L. 93-112, as amended.

(b) "Recipient" means any individual, any state or its political subdivision, or any instrumentality of either, and any public or private agency, institution, organization, or other entity to which financial assistance is extended by TVA directly or through another recipient, including any successor, assignee, or transferee of a recipient as hereinafter set forth, but excluding the ultimate beneficiary of the assistance.

(c) "Financial assistance" means the grant or loan of money; the donation of real or personal property; the sale, lease, or license of real or personal property for a consideration which is nominal or reduced for the purpose of assisting the recipient; the waiver of charges which would normally be

V 4 3 | 8 5

made, in order to assist the recipient; the entry into a contract where a purpose is to give financial assistance to the contracting party; and similar transactions.

(d) "Facility" means all or any portion of buildings, structures, equipment, roads, walks, parking lots, or other real or personal property or interest in such property.

(e) "Federal agency" means any department, agency, or instrumentality of the government of the United States, other than TVA.

(f) "Handicapped person" means any individual who has a physical or mental impairment that substantially limits one or more major life activities, has a record of such an impairment, or is regarded as having such an impairment, as further defined below:

(1) "Physical or mental impairment" means (i) any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genitourinary; hemic and lymphatic; skin; and endocrine; or (ii) any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities. The term "physical or mental impairment" includes, but is not limited to, such diseases and conditions as orthopedic, visual, speech, and hearing impairments; cerebral palsy; epilepsy; muscular dystrophy; multiple sclerosis; cancer; heart disease; diabetes; mental retardation; emotional illness; and drug addiction and alcoholism.

(2) "Major life activities" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

(3) "Has a record of such an impairment" means has a history of, or has been misclassified as having, a physical or mental impairment that substantially limits one or more major life activities.

(4) "Is regarded as having such an impairment" means (i) has a physical or mental impairment that does not substantially limit major life activities but which is treated by a recipient as constituting such a limitation; (ii) has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward the impairment; or (iii) does not have a physical or mental impairment as defined paragraph (f)(1) of this section but is treated by a recipient as having such an impairment.

(g) "Qualified handicapped person" means (1) with respect to employment, a handicapped person who, with reasonable accommodation, can perform the essential functions of the job in question, and (2) with respect to services, a handicapped person who meets the essential eligibility requirements for the receipt of such services.

§ 307.2 Purpose.

The purpose of this part is to effectuate section 504 to the end that no otherwise qualified handicapped individual shall, solely be reason of his or her handicap, be excluded from the participation in, be denied the benefits of, or be subjected to the discrimination under any program or activity receiving financial assistance from TVA.

§ 307.3 Application.

This part applies to any program in which financial assistance is provided by TVA, except that this part does not apply to any (a) TVA procurement contracts, contracts with other federal agencies, or contracts of insurance or guaranty, (b) money paid, property transferred, or other assistance extended to a recipient under any program before the effective date of this part, or (c) assistance to any individual or entity which is the ultimate beneficiary under any such program.

§ 307.4 Program discrimination guidelines.

(a) *Scope.* This section sets forth guidelines as to general and specific actions which may be found to consititute discrimination on the basis of handicap in programs subject to this part.

(b) *General.* No qualified handicapped person, shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity to which this part applies.

(c) *Specific discriminatory actions.* (1) A recipient under any program to which this part applies shall not, directly or through contractual, licensing, or other arrangements, on the basis of handicap:

(i) Deny a qualified handicapped person the opportunity to participate in or benefit from the aid, benefit, or services available under the program;

(ii) Afford a qualified handicapped person an opportunity to participate in or benefit from the aid, benefit, or service that is not equal to that afforded others under program;

(iii) Provide a qualified handicapped person with an aid, benefit, or service that is not as effective in affording equal opportunity to obtain the same result, to gain the same benefit, or to reach the same level of achievement as that provided to others under the program;

(iv) Provide different or separate aid, benefits, or services to handicapped persons or to any class of handicapped persons than is provided to other, unless such action is necessary to provide qualified handicapped persons with aid, benefits, or services that are as effective as those provided to other under the program;

(v) Aid or perpetuate discrimination against a qualified handicapped person by providing significant assistance to an agency, organization, or entity that discriminates on the basis of handicap in providing any aid, benefit, or service to beneficiaries of the recipient's program;

(vi) Deny a qualified handicapped person the opportunity to participate as a member of planning or advisory boards with respect to the program; or

(vii) Otherwise limit a qualified handicapped person in the enjoyment under the program of any right, privilege, advantage, or opportunity enjoyed by others under the program.

(2) A recipient shall not deny a qualified handicapped person the opportunity to participate under the program in activities that are not separate or different, despite the existence of permissibly separate or different activities.

(3) A recipient shall not, directly or through contractual or other arrangements, utilize criteria or methods of administration (i) that have the effect of subjecting qualified handicapped persons to discrimination on the basis of handicap, (ii) that have the purpose or effect of defeating or substantially impairing accomplishment of the objectives of the program with respect to handicapped persons, or (iii) that perpetuate the discrimination of another recipient if both recipients are subject to common adminstrative control.

(4) A receipient shall not, in determining the site or location of a facility under the program, make selections (i) that have the effect of excluding handicapped persons from, denying them the benefits of, or otherwise subjecting them to discrimination or (ii) that have the purpose or effect of defeating or substantially impairing the accomplishment of the objectives of the program or activity with respect to handicapped persons.

(d) The exclusion of nonhandicapped persons from the benefits of a program limited by federal statute or executive order to handicapped persons or the exclusion of a specific class of handicapped persons from a program limited by federal statute or executive order to a different class of handicapped persons is not prohibited by this part.

(e) Recipients shall administer programs and activities in the most integrated setting appropriate to the needs of qualified handicapped persons.

§ 307.5 Employment discrimination guidelines.

(a) *Scope.* This section sets forth guidelines as to general and specific actions which may be found to constitute discrimination in employment on the basis of handicap in programs subject to this part.

(b) *General.* No qualified handicapped person shall, on the basis of handicap, be subjected to discrimination in employment under any program or activity subject to this part.

(c) *Specific discriminatory actions.* With respect to a program or activity subject to this part, a recipient shall not limit, segregate, or classify applicants or employees in any way that adversely affects their opportunities or status because of handicap.

(d) A recipient shall make all decisions concerning employment under any program or activity subject to this part in a manner which ensures that discrimination on the basis of handicap does not occur, including the following activities:

(1) Recruitment, advertising, and processing of applications for employment;

(2) Hiring, upgrading, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff, and rehiring;

(3) Rates of pay or any other form of compensation and changes in compensation;

(4) Job assignments, job classifications, organizational structures, position descriptions, lines of progression, and seniority lists;

(5) Leaves of absence, sick leave, or any other leave;

(6) Fringe benefits available by virtue of employment, whether or not administered by the recipient;

(7) Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leaves of absence to pursue training;

(8) Employer sponsored activities, including social or recreational programs; and

(9) Any other term, condition, or privilege of employment.

(e) A recipient shall not participate in a contractual or other relationship that has the effect of subjecting qualified handicapped applicants or employees to discrimination prohibited by this part, including relationships with employment and referral agencies, with labor unions, with organizations providing or administering fringe benefits to employees of the recipient, and with organizations providing training and apprenticeship programs.

(f) *Reasonable accommodation.* A recipient shall make reasonable accommodation to the known physical or mental limitations of an otherwise qualified handicapped applicant or employee unless the recipient can demonstrate that the accommodation would impose an undue hardship on the operation of the program or activity subject to this part.

(g) *Employment criteria.* A recipient shall not use employment tests or criteria that discriminate against handicapped persons and shall ensure that employment tests are adapted for use by persons who have handicaps that impair sensory, manual, or speaking skills.

(h) *Preemployment inquires.* A recipient shall not conduct a preemployment medical examination or make a preemployment inquiry as to whether an applicant was a handicapped person or as to the nature or severity of a handicap except under the circumstances described in 45 CFR 84.14.

§ 307.6 Program accessibility guidelines.

(a) *Scope.* This section sets out guidelines with respect to general and specific actions which may be found to constitute discrimination with respect to program accessibility on the basis of handicap in programs subject to this part.

(b) *General.* No qualified handicapped person shall, because facilities are inaccessible to or unusuable by handicapped persons, be denied the benefits of, be excluded from participation in, or otherwise be subjected to discrimination under any program subject to this part.

(c) *Existing facilities.* (1) Each program subject to this part shall be operated so that, viewed in its entirety, it is readily accessible to and usable by qualified handicapped persons. This paragraph does not necessarily require a recipient to make each of its existing facilities or every part of an existing facility accessible to and usable by handicapped persons.

(2) If the financial assistance from TVA is expected to extend for at least three years, and structural changes will be necessary to make covered programs or activities in existing facilities accessible, such changes shall be made as soon as practicable, but in no event later than three years from the effective date that financial assistance is extended by TVA. If structural changes are necessary, the recipient shall develop, within one year, a transition plan setting forth the steps necessary to complete the changes. The transition plan shall be developed with the assistance of interested persons, including handicapped persons or organizations representing handicapped persons. TVA may, in its discretion, require structural changes with respect to financial assistance expected to last less than three years, in which case the contract or agreement with the recipient shall specify the date of development of the transition plan.

(3) Alterations to existing facilities shall, to the maximum extent feasible, be designed and constructed to be readily accessible to an usable by handicapped persons.

(d) *New construction.* New facilities required under a program subject to this part shall be designed and constructed to be readily accessible to and usable by handicapped persons.

§ 307.7 Assurances required.

(a) TVA contributes financial assistance only under agreements which contain a provision which specifically requires compliance with this part and the guidelines contained herein. If the financial assistance involves the furnishing of real property, the aggreement shall obligate the recipient, or in the case of a subsequent transfer, the transferee, for the period during which the real property is used for a purpose for which the financial assistance is extended or for another purpose involving the provision of similar services or benefits. Where the financial assistance involves the furnishing of personal property, the agreement shall obligate the recipient during the period for which ownership or possession of the property is retained. In all other cases the agreement shall obligate the recipient for the period during which financial assistance is extended pursuant to the agreement. TVA shall specify the form of the foregoing agreements, and the extent to which an agreement shall be applicable to subgrantees, contractors and subcontractors, transferees, successors in interest, and other participants in the program.

(b) In the case of real property, structures or improvements thereon, or interests therein, acquired through a program of Federal financial assistance, or in the case where Federal financial assistance was provided in the form of a transfer by TVA of real property or interest therein, the instrument effecting or recording the transfer of title shall contain a covenant running with the land assuring compliance with this part and the guidelines contained herein for the period during which the real property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. Where no transfer of property is involved, but property is improved under a program of Federal financial assistance, the recipient shall agree to include such a covenant in any subsequent transfer of such property. Where the property is obtained by transfer from TVA, the covenant against discrimination may also include a condition coupled with a right to be reserved by TVA to revert title to the property in the event of a breach of the covenant where, in the discretion of TVA, such a condition and right of reverter is appropriate to the program under which the real property is obtained and to the nature of the grant and the grantee, In such event, if a transferee of real property proposes to mortgage or otherwise en-

M Y 2 7 8 UMI

V 4 3 | 8 5 M Y 2 7 8 UMI

cumber the real property as security for financing construction of new, or improvement of existing facilities, on such property for the purposes for which the property was transferred, TVA may agree, upon request of the transferee and if necessary to accomplish such financing, and upon such conditions as it deems appropriate, to forbear the exercise of such right to revert title for so long as the lien of such mortgage or other encumbrance remains effective.

§ 307.8 Compliance information.

(a) *Cooperation and assistance.* TVA shall to the fullest extent practicable seek the cooperation of recipients in obtaining compliance with this part and shall provide assistance and guidance to recipients to help them comply voluntarily with this part.

(b) *Compliance reports.* Each recipient shall keep such records and submit to TVA timely, complete and accurate compliance reports at such times, and in such form and containing such information, as TVA may determine to be necessary to enable it to ascertain whether the recipient has complied or is complying with this part. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

(c) *Access to sources of information.* Each recipient shall permit access by TVA during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities, as TVA may require to ascertain compliance with this part. Where any information required of a recipient is in the exclusive possession of any other agency, institution or person and this agency, institution or person shall fail or refuse to furnish this information, the recipient shall so certify in its report and set forth the efforts it has made to obtain the information.

(d) *Information to employees, beneficiaries and participants.* Each recipient shall make available to employees, participants, beneficiaries, and other interested persons such information regarding the provisions of this part and its applicability to the program under which the recipient receives financial assistance, and shall make such information available to them in such manner, as TVA finds necessary to apprise such persons of the protections against discrimination assured them by section 504 and this part.

§ 307.9 Conduct of investigations.

(a) *Periodic compliance reviews.* TVA shall from time to time review the practices of recipients to determine whether they are complying with this part.

(b) *Complaints.* Any individual who claims (individually or on behalf of any specific class of individuals) to have been subjected to discrimination prohibited by this part may, personally or by a representative, file with TVA a written complaint. A complaint must be filed not later than ninety (90) days from the date of the alleged discrimination, unless the time for filing is extended by TVA.

(c) *Investigations.* TVA will make a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation shall include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the recipient has failed to comply with this part.

(d) *Resolution of matters.* (1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, TVA will so inform the recipient and the matter will be resolved by informal means whenever possible. If TVA determines that the matter cannot be resolved by informal means, action will be taken as provided for in § 307.10.

(2) If an investigation does not warrant action pursuant to subparagraph (1) of this paragraph, TVA will so inform the recipient and the complainant, if any, in writing.

(e) *Intimidatory or retaliatory acts prohibited.* No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 504 or this part, or because the individual had made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of complainants shall be kept confidential except to the extent necessary to carry out the purposes of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

§ 307.10 Procedure for effecting compliance.

(a) *General.* If there appears to be a failure or threatened failure to comply with this part, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to grant or to continue financial assistance or by any other means authorized by law. Such other means may include, but are not limited to, (1) a reference to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States, (2) institution of appropriate proceedings by TVA to enforce the provisions of the agreement of financial assistance or of any deed or instrument relating thereto, and (3) any applicable proceeding under State or local law.

(b) *Noncompliance with § 307.7.* If any entity requesting financial assistance from TVA declines to furnish the assurance required under § 307.7, or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section, financial assistance may be refused in accordance with the procedures of paragraph (c) of this section; and for such purposes, the term "recipient" includes one who has been denied financial assistance. TVA shall not be required to provide assistance in such a case during the pendency of the administrative proceedings under such paragraph except that TVA shall continue assistance during the pendency of such proceedings where such assistance was due and payable pursuant to an agreement therefor entered into with TVA prior to the effective date of this part.

(c) *Termination of or refusal to grant or to continue financial assistance.* No order suspending, terminating or refusing to grant or continue financial assistance shall become effective until (1) TVA has advised the recipient of the failure to comply and has determined that compliance cannot be secured by voluntary means, (2) there has been an express finding on the record, after opportunity for hearing, of a failure by the recipient to comply with a requirement imposed by or pursuant to this part, including any act of discrimination on the basis of handicap in violation of the guidelines in this part, and (3) the action has been approved by the TVA Board pursuant to § 307.12. Any action to suspend or terminate or to refuse to grant or to continue financial assistance shall be limited to the particular recipient as to whom such a finding had been made and shall be limited in its effect to the particular program, or part thereof, in which such noncompliance had been so found.

(d) *Other means authorized by law.* No action to effect compliance by any other means authorized by law shall be taken until (1) TVA has determined that compliance cannot be secured by voluntary means, (2) the recipient or other person has been notified of its failure to comply and of the action to be taken to effect compliance, and (3) the expiration of at least ten (10) days from the mailing of such notice to the recipient or other person. During this period of at least ten (10) days additional efforts will be made to persuade the recipient or other person to comply with this part and to take such corrective action as may be appropriate.

§ 307.11 Hearings.

(a) *Opportunity for hearing.* Whenever an opportunity for a hearing is required by § 307.10, reasonable notice shall be given by registered or certified mail, return receipt requested, to the affected recipient. This notice shall advise the recipient of the action proposed to be taken, the specific provision under which the proposed action against it is to be taken, and the matters of fact or law asserted as the basis for this action, and shall either (1) fix a date not less than twenty (20) days after the date of such notice within which the recipient may request of TVA that the matter be scheduled for hearing or (2) advise the recipient that the matter in question has been set down for hearing at a stated time and place. The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of the hearing. A recipient may waive a hearing and submit written information and argument for the record. The failure of a recipient to request a hearing under this subsection or to appear at a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing and a consent to the making of a decision on the basis of such information as is available.

(b) *Time and place of hearing.* Hearings shall be held at the time and place fixed by TVA unless it determines that the convenience of the recipient requires that another place be selected. Hearings shall be held before the TVA Board or before a "hearing officer" who shall be either a member of the TVA Board or, at the discretion of the Board, a person designated by the Board who shall not be employed in or under the TVA division through or under which the financial assistance has been extended by TVA to the recipient involved in the hearing.

(c) *Right to counsel.* In all proceedings under this section, the recipient and TVA shall have the right to be represented by counsel.

(d) *Procedures, evidence, and record.* (1) The hearing, decision, and any administrative review thereof shall be conducted in accordance with such rules of procedure as are proper (and not inconsistent with this section) relating to the conduct of the hearing, giving of notices subsequent to those provided for in paragraph (a) of this section, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both TVA and the recipient shall be entitled to introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the officer conducting the hearing at the outset of or during the hearing.

(2) Technical rules of evidence will not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the officer conducting the hearing. That officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(e) *Consolidated or joint hearings.* In cases in which the same or related facts are asserted to constitute noncompliance with this part with respect to two or more programs to which this part applies, or noncompliance with this part and the regulations of one or more other Federal agencies issued under section 504, the TVA Board may, by agreement with such other agency, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedure not inconsistent with this part. Final decisions in such cases, insofar as this part is concerned, shall be made in accordance with § 307.12.

§ 307.12 Decisions and notices.

(a) *Decision by a member of the TVA Board or a hearing examiner.* If the hearing is held before a "hearing officer" as defined in § 307.11(b), that hearing officer shall either make an initial decision, if so authorized, or certify the entire record including recommended findings and proposed decision to the TVA Board for a final decision. A copy of such initial decision or certification shall be mailed to the recipient. Where the initial decision is made by a hearing officer, the recipient may file with the TVA Board exceptions to the initial decision, which shall include a statement of reasons therefor. Such exceptions shall be filed within thirty (30) days of the mailing of the notice of initial decision. In the absence of exceptions, the TVA Board may on its own motion within forty-five (45) days after the initial decision serve on the recipient a notice that it will review the decision. Upon the filing of such exceptions or of such notice of review, the TVA Board shall review the initial decision and issue its own decision thereon including the reasons therfor. In the absence of either exceptions or a notice of review, the initial decision shall constitute the final decision of the TVA Board.

(b) *Decisions on record or reivew by the TVA Board.* Whenever a record is certified to the TVA Board for decision or it reviews the decision of a hearing officer pursuant to paragraph (a) of this section, or whenever the TVA Board conducts the hearing, the recipient shall be given reasonable opportunity to file with the Board briefs or other written statements of its contentions, and a copy of the final decision of the Board shall be given in writing to the recipient and to the complainant, if any.

(c) *Decisions on record where a hearing is waived.* Whenever a hearing is waived, a decision shall be made by the TVA Board on the record and a copy of such decision shall be given to the recipient, and to the complainant, if any.

(d) *Rulings required.* Each decision shall set forth a ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part (including violations of guidelines) with which it is found that the recipient has failed to comply.

(e) *Approval by TVA Board.* Any final decision (other than a decision by the TVA Board) which provides for the suspension or termination of, or the refusal to grant or continue financial assistance, or the imposition of any other sanction available under this part or section 504 shall promptly be transmitted to the TVA Board which may approve such decision, vacate it, or remit or mitigate any sanction imposed.

(f) *Content of orders.* The final decision may provide for suspension or termination of, or refusal to grant or continue financial assistance, in whole or in part, under the program involved, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of section 504 and this part, including provisions designed to assure that no financial assistance will thereafter be extended under such program to the recipient determined by such decision to have failed to comply with this part, unless and until it corrects its noncompliance and satisfied TVA that it will fully comply with this part.

(g) *Posttermination proceedings.* (1) A recipient adversely affected by an order issued under paragraph (f) of this section shall be restored to full eligibility to receive financial assistance upon satisfaction of the terms and conditions for such eligibility contained in that order, or if the recipient otherwise comes into compliance with this part and provides reasonable as-

V 4 3 | 8 5 M Y 2 7 8 UMI

surance of future full compliance with this part.

(2) Any recipient adversely affected by an order entered pursuant to paragraph (f) of this section may at any time request that TVA fully restore the recipient's eligibility to receive financial assistance. Any such request shall be supported by information showing that the recipient has met the requirements of subparagraph (1) of this paragraph. If TVA determines that those requirements have been satisfied, it shall restore such eligibility.

(3) If TVA denies any such request, the recipient may submit a request for a hearing in writing, specifying its reasons for believing TVA to have been in error. The recipient shall thereupon be given an expeditious hearing, with a decision on the record, in accordance with rules of procedure issued by TVA. The recipient, upon proving at such a hearing that the requirements of subparagraph (1) of this paragraph are satisfied, will be restored to such eligibility. While proceedings under this paragraph are pending, the sanctions imposed by the order issued under paragraph (f) of this section shall remain in effect.

§ 307.13 Effect on other regulations; supervision and coordination.

(a) *Effect on other regulations.* Nothing in this part shall be deemed to supersede or affect any of the following (including future amendments thereof): (1) regulations by TVA and other Federal agencies issued with respect to section 503 of the Rehabilitation Act, or (2) any other regulations or instructions, insofar as they prohibit discrimination on the ground of handicap in any program or situation to which this part is inapplicable, or which prohibit discrimination on nay other ground.

(b) *Supervision and coordination.* TVA may from time to time assign to officials of other Federal agencies, with the consent of such agencies, responsibilities in connection with the effectuation of the purposes of section 504 and this part (other than responsibility for final decision as provided in § 307.12), including the achievement of effective coordination and maximum uniformity within the Executive Branch of the Government in the application of section 504 and this part to similar programs and in similar situations. Any action taken, determination made, or requirement imposed by an official of another Federal agency acting pursuant to an assignment of responsibility under this part shall have the same effect as though such action had been taken by TVA.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social Security Administration

[20 CFR Part 416]

[Reg. No. 16]

SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Evaluating Resources on Basis of Equity Value

AGENCY: Social Security Administriation, HEW.

ACTION: Notice of proposed rule making.

SUMMARY: These proposed rules change the basis for evaluating resources from the current marked values to equity value under the supplemental security income (SSI) program. As the result of a review of the Social Security Administration's (SSA) policy on the evaluation of resources, the Secretary has approved the use of equity value. It is expected that these proposed amendments to the regulations will provide for more euitable determinations regarding eligibility for SSI benefits.

DATE: Comments must be received on or before June 16, 1978.

ADDRESSES: Prior to final adoption of the proposed amendments to the regulations, consideration will be given to any data, comments, or arguments pertaining to the amendments which are submitted in writing to the Acting Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Md. 21203. Copies of all comments received in response to these proposed amendments will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 5131, 330 Independence Avenue SW., Washington, D.C. 20201.

FOR FURTHER INFORMATION, CONTACT:

Mr. Henry D. Lerner, Legal Assistant, Office of Policy and Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Md. 21235, telephone 301-594-7336.

SUPPLEMENTARY INFORMATION: In the past, the Social Security Administration (SSA) has valued resources on the basis of their current market value, which is the price for which the item would sell on the open market, and SSA regulations reflect that policy. However, regulations pertaining to resources for purposes of the aid to families with dependent children (ADFDC) program permit each State to decide whether to use current market value or equity value in evaluating resources for AFDC. At present, a majority of the States use equity value. Therefore, the Secretary reviewed SSA's former policy and directed that resources be valued on the basis of their equity value when a determination is made regarding an individual's eligibility for supplemental security income benefits. The amendments to the SSA regulations reflect the Secretary's decision.

On Friday, April 28, 1978, SSA published a notice of proposed rule making in the FEDERAL REGISTER (43 FR 18206) increasing the reasonable value of household goods and personal effects from $1,500 to $2,000 and the reasonable value of an automobile from $1,200 to $2,000 (i.e., the extent to which they can be excluded from a person's resources when the person's eligibility for SSI benefits is determined). The subject proposed rules also show the reasonable values as proposed by the previously published notice of proposed rulemaking and in addition change the basis for evaluating household goods, personal effects, and an automobile from market value to equity value.

The proposed amendments are to be issued under the authority in sections 1102, 1613(a), 1614(f), and 1631 of the Social Security Act, as amended; 49 Stat. 647, as amended, 86 Stat. 1470, as amended, 86 Stat. 1471, and Stat. 1475; 42 U.S.C. 1302, 1382b(a), 1382c(f), and 1383.

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program.)

NOTE.—The Social Security Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Dated: February 23, 1978.

DON WORTMAN,
Acting Commissioner of Social Security.

Approved: April 24, 1978.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. Section 416.1201 is amended by revising paragraphs (b) and (c) to read as follows:

§ 416.1201 Resources; general.

• • • • •

(b) *Liquid resources; defined.* Liquid resources are those assets that are in cash or are financial instruments which are convertible to cash. Liquid resourecs include cash on hand, cash in savings accounts or checking accounts, stocks, bonds, mutual fund shares, promissory notes, mortgages, and similar properties. Liquid resources, other than cash, are evaluted according to their equity value.

(c) *Nonliquid resources; defined.* (1) Nonliquid resources include all other properties. The term includes both real and personal property. Nonliquid resources are evaluated according to their equity value except as otherwise provided.

(2) For purposes of this Subpart L, the "equity value" of an item is defined as:

(i) The price that item can reasonably be expected to sell for on the open market in the particular geographic area involved; minus

(ii) Any encumbrances.

2. Paragraph (b) of § 416.1216 is revised to read as follows:

§416.1216 Exclusion of household goods and personal effects.

• • • • •

(b) *Limitation on household goods and personal effects.* In determining the resources of an individual (and spouse, if any), household goods and personal effects are excluded if their total equity value is $2,000 or less. If the total equity value of household goods and personal effects is in excess of $2,000, the excess is counted against the resource limitation.

• • • • •

3. Paragraphs (b) and (d) of § 416.1218 is revised to read as follows:

§ 416.1218 Exclusion of the automobile.

• • • • •

(b) *Limitation on automobile.*—(1) *General.* In determining the resources of an individual (and spouse, if any), an automobile is excluded if its equity value is $2,000 or less. If the equity value of the automobile exceeds $2,000, the excess is counted against the resource limitation.

(2) *Total exclusion.* An automobile is totally excluded:

(i) If it is used for employment; or

(ii) If it is used for the medical treatment of a specific of regular medical problem of the individual; or

(iii) If it is used for the medical treatment of a specific or regular medical problem of a member of the individual's household, or

(iv) If it has been modified for operation by a handicapped person; or

(v) If it has been modified for transportation of a handicapped person.

• • • • •

(d) *Equity value.* The "equity value" of an automobile is:

(1) The average price an automobile of that particular year, make, model, and condition will sell for on the open market (to a private individual) in the particular geographic area involved, minus

(2) Any encumbrances.

SUPPLEMENTAL SECURITY INCOME BENEFITS

Replacement of Damaged, Lost, or Stolen Excluded Resources; Decision to Develop Regulations

AGENCY: Social Security Administration, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: The Social Security Administration is planning to publish proposed regulations which will exclude from income and resources any assistance received from any source to repair or replace a damaged, lost, or stolen resource (e.g., home, automobile) the value of which is wholly or partially not countable for the purpose of determining eligibility for supplemental security income benefits. Any interest earned on such assistance will be also excluded from income and resources. The exclusions will apply for specified temporary periods.

MEDICAL DEVICES

Impact Resistant Lenses in Eyeglasses and Sunglasses; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Extension of comment period on proposed rule.

SUMMARY: This document extends the comment period on a proposed rule which would amend present Food and Drug Administration regulations that require use of impact resistant lenses in most eyeglasses and sunglasses. The proposed rule would allow for technological alternatives in testing to assure that lenses are impact resistant.

DATES: The deadline for written comments was March 7, 1978; it is now extended to June 1, 1978.

ADDRESS: Written comments (preferably four copies) to the Hearing Clerk (HFC-20), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No FI-4086]

CITY OF SAN LUIS OBISPO, SAN LUIS OBISPO COUNTY, CALIF.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Tenchnical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of San Luis Obispo, San Luis Obispo County, Calif. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualifed for participation in the national flood insurance program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the office of the City Engineer, Community Development Department, 990 Palm Street, San Luis Obisop, Calif. Send comments to: Mr. Richard Miller, Administrative Officer, City of San Luis Obispo, P.O. Box 321, San Luis Obispo, Calif. 93406.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (110-year) flood elevations for the city of San Luis Obisop, Calif., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies extablished by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

[Docket No. FI-4087]

CITY OF DURANGO, LA PLATA COUNTY, COLO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Durango, La Plata County, Colo.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the City Planner, 965½ Maine Avenue, Durango, Colo.

Send comments to: Honorable Maxine Peterson, Mayor, City of Durango, P.O. Box 221, Durango, Colo. 81301.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator give notice of the proposed determinations of base (11-year) flood elevations for the City of Durango, Colo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat, 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet national geodetic vertical datum
Animas River	Old U.S. Highway 160 [1]	6,485
	Old U.S. Highway 160 [2]	6,484
	Main Ave. (U.S. Highway 550) [1]	6,509

[Docket No. FI-4088]

LA PLATA COUNTY, COLO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in La Plata County, Colo.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the Land Use Administration, La Plata County Courthouse, 1060 Second Avenue, Durango, Colo.

Send comments to: Mr. Patrick Conley, Chairman, La Plata County Board of Commissioners, La Plata County Courthouse, P.O. Box 1711, Durango, Colo. 81301.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for La Plata County, Colo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or toll-free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

The following:

Source of flooding	Location	Elevation in feet national geodetic vertical datum
Tenmile River	At Olive St	112
Sevenmile River	Water Works Dam	104
Chartley Brook	At town boundary of North Attleborough.	105

Should be corrected to read:

Source of flooding	Location	Elevation in feet national geodetic vertical datum
Ten Mile River	1,200 ft downstream of Olive St.	112
Sevenmile River	Water Works Dam	103
Chartley Brook	At town boundary of Norton.	105

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: April 6, 1978.

[24 CFR Part 1917]

[Docket No. FI-4094]

TOWN OF MAYNARD, MIDDLESEX COUNTY, MASS.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Maynard, Middlesex County, Mass. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Clerk's Office, Maynard, Mass. Send comments to: Mr. Alfred T. Whitney, Chairman, Board of Selectmen, Town Hall, Maynard, Mass. 01754.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gived notice of the proposed determinations of base (100-year) flood elevations for the town of Maynard, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4 (a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Assabet River	At Acton-Maynard town line.	146
	120 ft downstream of Waltham St.	146
	700 ft upstream of Waltham St.	152
	At Walnut St	155
	Just downstream of Florida Rd.	160
	1,500 ft upstream of Florida Rd.	165
	100 ft downstream of Mill St.	169
	100 ft upstream of Mill St.	170
	130 ft upstream of Great Rd.	174
	Just downstream of American Woolen Co. Dam.	175
	Just upstream of American Woolen Co. Dam.	179
	At western corporate limits.	180
Fort Pond, brook branch.	160 ft upstream of Stone Culvert.	200
	60 ft upstream of Rockland St.	205
Taylor Brook	At confluence with Assabet River.	179
	20 ft upstream of abandoned Boston & Main RR.	180

(National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: April 12, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

CITY OF GRAND RAPIDS, KENT COUNTY, MICH.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the city of Grand Rapids, Kent County, Mich. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to quality or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 300 Monroe Avenue, Grand Rapids, Mich.

Send comments to: Mr. John L. Hornbach, City Engineer, city of Grand Rapids, City Hall, 300 Monroe Avenue, Grand Rapids, Mich. 49503.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the city of Grand Rapids, Mich., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the township of Portsmouth, Bay County, Mich.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Township Hall, 310 Sheridan Court, Bay City, Mich.

Send comments to: Mr. Donald Krzewinski, Township Supervisor, township of Portsmouth, 110 Stanley Drive, Bay City, Mich. 48706.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the township of Portsmouth, Mich., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Saginaw River	Russell Rd. between Trumbull and Lincoln Rds.	588
	Munger Rd. between Scheurman and Green Rds.	586
	Intersection of German Rd. and Michigan Ave.	586

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

TOWN OF BOW, MERRIMACK COUNTY, N.H.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Bow, Merrimack County, N.H.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to quality or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Office, Bow, N.H.

SEND COMMENTS TO:

Mr. Walter E. Jones, Administrative Assistant, town of Bow, Selectmen's Office, 10 Grandview Road, Bow, N.H. 03301.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Bow, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Merrimack River	South corporate limit	198
	500 ft downstream of Garvins Falls Dam.	205

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	500 ft upstream of Garvins Falls Dam.	225
	North corporate limit	230

(National Flood Insurance Act of 1968 (title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and the Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: April 12, 1978.

[24 CFR Part 1917]

[Docket No. FI-4101]

TOWN OF CANTERBURY, MERRIMACK COUNTY, N.H.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the town of Canterbury, Merrimack County, N.H.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Offices, Canterbury, N.H.

Send comments to: Ms. Mary E. Fifield, Chairwoman, Board of Selectmen, Town Offices, Canterbury, N.H. 03224.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the town of Canterbury, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Merrimack River	South corporate limit	254
	Just upstream of West Road Bridge.	260
	West corporate limit	266

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: April 12, 1978.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

DEPARTMENT OF LABOR

Wage and Hour Division

[29 CFR Part 575]

WAIVER OF CHILD LABOR PROVISIONS FOR AGRICULTURAL EMPLOYMENT OF 10 AND 11 YEAR OLD MINORS IN HAND-HARVESTING OF SHORT SEASON CROPS

Hearing Concerning Provisions Governing Application for and Issuance of a Waiver

NOTE.—This document originally appeared in the FEDERAL REGISTER for Monday May 1, 1978. It is reprinted in this issue to meet requirements for publication on an assigned day of the week. (See the inside cover of this issue for information about agencies publishing on assigned days of the week.)

AGENCY: Wage and Hour Division.

ACTION: Notice of hearing concerning proposed rule.

SUMMARY: The Administrator of the Wage and Hour Division has proposed regulations to implement section 13(c)(4) of the Fair Labor Standards Amendments of 1977. This proposed regulation would provide a waiver from the child labor provisions of the Act for the agricultural employment of 10 and 11 year old minors in the hand-harvesting of short season crops under certain conditions as provided in the proposal published in the FEDERAL REGISTER on April 4, 1978, at page 14068. This hearing will provide an additional forum for comment.

DATES: All comments are due on or before the close of the hearing. The hearing will commence on May 11, 1978, at 9:30 a.m., e.d.t.

ADDRESS: The hearing will be held in Room S-5215 A, B, and C, New Department of Labor Building, 200 Constitution Ave, NW. Washington, D.C. 202110.

FOR FURTHER INFORMATION CONTACT:

Lucille C. Pinkett, Wage and Hour Division, Room S-3022, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C., 20210, telephone 202-523-8412.

SUPPLEMENTARY INFORMATION: In order to give all interested parties an opportunity to present supporting and contrary views and to assist the Administrator in reaching a decision in this matter the Administrator of the Wage and Hour Division, has determined that an informal hearing is desirable.

Beginning at 9:30 a.m., e.d.t., on May 11, 1978, the presiding officer will hold a prehearing conference in order to establish the order and time for the presentations and in order to settle any other matters relating to the proceedings. All persons intending to make presentations should attend the prehearing conference, which is open to

V 4 3 — 8 5 M Y 2 7 8 UMI

the public. The public hearing will immediately follow the prehearing conference.

The oral proceedings shall be reported verbatim. The use of prepared statements by witnesses is encouraged. An original and two copies of all documents to be used should be submitted at the hearing.

Comments submitted in accordance with the notice of April 4,1978, need not be resubmitted as they will be incorporated in and made a part of this record.

The presiding officer shall have all the powers necessary or appropriate to conduct a full and fair informal hearing, including the powers:

(a) To regulate the course of the hearing;

(b) To dispose of procedural requests, objections, and comparable matters;

(c) To confine the presentations to matters pertinent to the requested information;

(d) To regulate the conduct of those present at the hearing by appropriate means;

(e) To permit and to limit cross examination; and

(f) In his discretion, to keep the record open for a short, stated period of time to receive written data from any person who has participated in the oral proceeding.

Following the close of the hearing, the presiding officer shall certify the record thereof to the Administrator of the Wage and Hour Division. The Administrator of the Wage and Hour Division shall, after consideration of the record and other pertinent information, take such action as he deems appropriate.

A copy of the record or portions thereof as it becomes available will be open for public inspection and examination at the office of Xavier M. Vela, Administrator, Room S-3502, Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210. The entire record or any part thereof may be purchased as provided in 29 CFR 70.62(c) at the actual cost of duplication as computed pursuant to the fee schedule in 29 CFR 70.62(b).

The harvest season during which the 10 and 11 year old minors will be employed commences about June 1. In order that appropriate action may be promptly taken it is necessary that less than 15 days notice of the hearing be given.

Signed at Washington, D.C., on this 27th day of April 1978.

HERBERT J. COHEN,
Assistant Administrator,
Wage and Hour Division.

Mine Safety and Health Administration

[30 CFR Part 75]

USE OF FILTER TYPE AND SELF-CONTAINED SELF-RESCUERS IN UNDERGROUND COAL MINES

Public Hearing

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of Public hearing.

SUMMARY: A public hearing will be held under the provisions of the Federal Mine Safety and Health Act of 1977 (Mine Act). The hearing is being conducted in response to requests for a hearing filed with comments and objections concerning proposed amendments to Labor's regulations on availability of approved self-rescue devices; instruction in use and location. The proposed changes would, after a two-year phase-in period, require the use of self-contained self-rescuers in underground coal mines. The proposed amendments would also permit several alternative methods of utilizing and providing access to these self-rescue devices and impose inspection, testing and maintenance requirements.

DATES: The hearing will be held on June 1, 1978, beginning at 9 a.m. Requests to make oral statements for the record at the hearing should be received by May 26, 1978.

ADDRESS: The hearing will be held at the Bureau of Mines Auditorium, 4800 Forbes Avenue, Pittsburgh, Pa. 15213. Persons wishing to make statements at the hearing should make their requests in writing to the Mine Safety and Health Administration, Office of Standards, Regulations and Variances, Room 831, 4015 Wilson Boulevard, Arlington, Va. 22203.

FOR FURTHER INFORMATION CONTACT:

Frank A. White, Office of Standards, Regulations and Variances, 4015 Wilson Boulevard, Arlington, Va. 22203, phone 703-235-1910.

SUPPLEMENTARY INFORMATION: On November 16, 1977, the Mining Enforcement and Safety Administration, Department of the Interior, published in the FEDERAL REGISTER (42 FR 59300) proposed amendments to 30 CFR Part 75 that would govern the use of filter type and self-contained self-rescuers. Interested persons were afforded a period of 49 days to submit written comments, suggestions, objections and requests for hearing.

Under the Federal Mine Safety and Health Amendments Act of 1977 (Amendments Act), the responsibilities of the Secretary of the Interior under section 101 of the Federal Coal Mine Health and Safety Act of 1969 (Coal Act), were transferred to the Secretary of Labor on March 9, 1978. Rulemaking commenced by the Department of the Interior under the Coal Act was authorized to be continued by the Department of Labor under the provisions of the Amendments Act.

Therefore, a public hearing will be held, pursuant to section 101(a)(3) of the Mine Act, in order to receive relevant evidence including oral statements, written comments and data. The following issues have been raised by the written comments received in response to the November 16, 1977, proposed rule:

GENERAL

1. Whether the self-contained self-rescuers, as they have been developed to this point, are reliable and safe to use and store in underground mines.

2. Whether there are viable options, in addition to those contained in the proposed rules, for making the self-contained self-rescuer available for use by miners.

3. Whether an Economic Impact statement should have been prepared under Executive Orders 11821 and 11949. (Note also E.O. 12044, 43 FR 12661.)

SECTION 75.1714

4. Whether the term "person" in paragraph (a) should be changed to "miner" in order to exclude government agency inspectors and visitors from this requirement.

5. Whether the words "and train" in paragraph (b) should be deleted on the grounds that the training of miners is covered under section 115 of the Mine Act and will be the subject of other regulations, and that other persons, such as visitors to the mine, are not subject to the training requirements.

SECTION 75.1714-1

6. Whether the standard should permit self-contained self-rescue devices with a greater capacity then ten minutes to be used in conjunction with a one-hour device as such devices may be developed and approved.

SECTION 75.1714-2

7. Whether the requirement in paragraph (c) that the self-rescue shall be located no more than 25 feet from the person is unreasonable under some circumstances and should be revised.

8. Whether the term "hazardous to the person" in paragraph (c) should be clarified.

9. Whether the term "available at all times" in paragraph (e)(2) should be clarified.

10. Whether the Mine Safety and Health Administration (MSHA) should set forth specific requirements for the use of a ten minute self-contained self-rescuer used in conjunction with a one hour self-contained self-rescuer, which would be applicable to all underground coal mines, in lieu of individual operator plans submitted for approval by the District Manager in paragraph (e)(2).

11. Whether the applicability of the eye protection requirement contained in paragraph (f) should be clarified.

SECTION 75.1714-3

12. Whether there should be a requirement that each self-contained self-rescuer have a visual indicator to determine the integrity of the seal.

13. Whether the proposed requirement in paragraph (b) that a specially trained person perform the inspections should be revised to require each miner to be trained to perform such inspections.

14. Whether the 90-day testing cycle required by paragraph (c) should be revised to permit less frequent testing.

15. Whether paragraph (d) should be revised to clarify that manufacturers will be required to submit testing instructions to MSHA for approval and that operators must test the devices in accordance with the manufacturer's approved instructions.

16. Whether the requirement that test results be recorded in a book should be deleted.

The hearing will be conducted by Frank A. White, Office of Standards, Regulations and Variances. MSHA, and Herschel H. Potter, Chief, Division of Safety, Coal Mine Safety and Health, MSHA. It will be conducted in an informal manner. Each oral presentation will be limited to 20 minutes. There will be no cross-examination of those persons making statements, although at the discretion of the chairman, supplemental statements by those presenting evidence may be permitted. Although formal rules of evidence will not apply, the chairman may, in his discretion, exclude irrelevant or unduly repititous material. A verbatim transcript of the proceedings will be taken. All written comments and data shall be included in the record. The transcript of the proceedings shall be available for public inspection. The record shall remain open until June 15, 1978, for the submission of supplementary statements or data. Within 90 days after the certification of the record, the Secretary of Labor shall promulgate, modify or withdraw the proposed amendments and shall publish his reasons therefor.

Dated: April 24, 1978.

ROBERT B. LAGATHER,
Assistant Secretary for Mine Safety and Health.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 121i]

MEDIA SERVICES

Decision to Develop Regulations

AGENCY: Office of Education, HEW.

ACTION: Notice of decision to develop regulations.

SUMMARY: The Commissioner of Education proposed to make technical changes in the regulations which govern the Media Services and Captioned Films Program. The purposes are to: Eliminate sections of the regulations in Subpart E Area Learning Resource Centers and Subpart G Special Offices which regulated projects that no longer exist; amend Subpart D Research and Training to provide for award of discretionary grants as well as contracts as prescribed by recent legislation; amend Subpart F National Center for Educational Media and Materials for the Handicapped to permit multiple centers as prescribed by the Education for all Handicapped Act; and clarify ambiguous language in Supart A General, Supart B Loan Services for the Deaf and Subpart C Loan Service for Other Handicapped. The regulations increase flexibility in administration of the program and increase the number of grant recipients.

FOR FURTHER INFORMATION CONTACT:

Barry E. Katz, Division of Media Services, Office of Education, 400 Maryland Avenue SW., Room 4819-Donohoe, Washington, D.C. 20202, 202-472-4640.

[CC Docket No. 78-72]

MTS AND WATS MARKET STRUCTURE

Order Extending Time for Filing Suggestions on Issues and Areas of Explorations

AGENCY: Federal Communications Commission.

ACTION: Extension of time. The FCC has extended the time for filing suggestions on issues and areas of exploration in Common Carrier Docket 78-72 from April 25, 1978 to May 24, 1978.

DATE: Comments must be filed on or before May 24, 1978.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Ruth Reel, 203-632-6363.

SUPPLEMENTARY INFORMATION:

Adopted: April 20, 1978.

Released: April 21, 1978.

Order. In the matter of MTS and WATS Market Structure, CC Docket No. 78-72.

1. Pursuant to the Notice of Inquiry and Proposed Rulemaking issued in this proceeding on March 3, 1978 (FCC 78-144) (43 FR 9505), comments suggesting issues and areas of exploration are presently due by April 25, 1978. On April 14, 1978 the U.S. Court of Appeals for the District of Columbia Circuit granted a motion by MCI Telecommunications Corp. et al. for an order directing the Commission and American Telephone and Telegraph Co. to comply with the Court's mandate in *MCI Telecommunications Corp. v. FCC*, 561 F. 2d 365 (D.C. Cir. 1977), cert. denied, U.S., 46 U.S.L. Week 3446 (January 16, 1978). In view of the possible relevance of this judicial action to issues which may be pertinent for consideration in this Docket, we have decided to extend, on our own motion, the April 25 deadline for suggestions by the parties.

2. *Accordingly, it is ordered*, Pursuant to §0.303 of the Commission's rules and regulations, that the time for filing suggestions on issues and areas of explorations is extended to May 24, 1978.

WALTER HINCHMAN,
Chief, Common Carrier Bureau.

TELEVISION BROADCAST STATIONS IN MEDFORD AND GRANTS PASS, OREG

Order Extending Time for Filing Replies to Opposition to Petition for Reconsideration

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein extends the time for filing replies to the oppostion to the petition for reconsideration concerning television assignments in Medford, and Grants Pass, Oreg. Counsel for petitioner, Oregon Broadcasting Co., states that the addi-

V 4 3 — 8 5 M Y 2 7 8 UMI

tional time is needed because the National Association of Broadcasters Convention intervened, thereby delaying the work of preparing material for reply.

DATE: Replies to opposition must be filed on or before May 3, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: April 21, 1978.

Released: April 24, 1978.

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations. (Medford and Grants Pass, Oreg., Docket No. 21109, RM-2748, RM-2853.[1]

1. On February 9, 1978, petitions for reconsideration were filed by Sierra Cascade Communications, Inc., licensee of television Station KTVL, and Oregon Broadcasting Co., licensee of television Station KOBI, both of Medford, Oreg., concerning the above-captioned matter. The date for filing replies to oppositions is April 18, 1978.

2. On April 11, 1978, counsel for Oregon Broadcasting Co., filed a request for an extension of time to and including May 3, 1978, to file a reply to a Limited Opposition to Petition for Reconsideration filed by the Oregon State Board of Higher Education. Counsel states that additional time is needed because the national convention of the National Association of Broadcasters intervened, thereby delaying the work of preparing the material for KOBI's reply. Counsel states that counsel for the Oregon State Board of Higher Education interposes no objection to the request for additional time.

3. We are of the view that the public interest would be served by granting the additional time so that Oregon Broadcasting Co., may file any information which may be helpful to the Commission in resolving the issues in this proceeding.

4. *Accordingly, it is ordered,* That the date for filing replies to the opposition to the petition for reconsideration in Docket 21109, is extended to and including May 3, 1978.

5. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1056]

[Ex Parte No. MC-19 (Sub-No. 23)[1]]

PRACTICES OF MOTOR COMMON CARRIERS OF HOUSEHOLD GOODS

Investigation into Estimating Practices

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: As a result of the investigation into estimating practices of household goods carriers which the Interstate Commerce Commission has conducted in this proceeding, the Commission proposes to amend its regulations governing estimating. The proposed regulations would make estimates binding on carriers when those estimates are provided for individual c.o.d. shippers of household goods. The Commission also proposes to amend other regulations to conform to the modified estimating requirements. New estimating forms would also be adopted.

DATES: Comments are due on or before June 30, 1978.

ADDRESS: Send comments to Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, Assistant Deputy Director, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, 202-275-7292.

SUPPLEMENTARY INFORMATION: The Interstate Commerce Commission has concluded its investigation into the estimating practices of motor common carriers of household goods. That investigation was instituted in Ex Parte No. MC-19 (Sub-No. 23), Practices of Motor Common Carriers of Household Goods (Experiment for Improving the Accuracy of Estimates—Reentitled—Investigation into Estimating Practices), 125 MCC 307 (1976), and all motor common carriers were made parties to the proceeding. Motor carriers and other participants in that investigation were directed to answer a series of questions concerning estimating, with a view toward determining what changes in the Commission's estimating regulations (49 CFR 1056.8) should be adopted to make estimating more meaningful for the household goods shipper.

After examining the submissions of various motor carrier parties, interested transportation and other regulatory agencies and members of the shipping public, the Commission proposes to modify its estimating regulations substantially and to adopt new estimating documents. The proposed amendments reflect the Commission's concern with the intolerable number of underestimates being provided by motor common carriers of household goods, and the inability of the individual c.o.d. shipper to comprehend fully the so-called "110 percent rule" (49 CFR 1056.8(b)). Under the terms of that rule, carriers may collect no more than 110 percent of an estimate upon delivery of a shipment and must defer collection of any remaining charges for a period of 15 working days. The Commission has found that in many instances carriers fail to explain the implications of that rule to individual c.o.d. shippers, with the result that individual shippers select the carrier that provides the lowest estimate with the expectation that charges will be no more than 110 percent of that estimate, Although the 110 percent rule was intended to protect the individual household goods shipper from abusive estimating practices, that rule has not had that effect. Rather, that rule has permitted carriers to hold out the illusory promise of competitive pricing without requiring them to meet the expectations generated.

The Commission, therefore, intends to make estimates binding upon the carriers which provide them when those estimates are provided for individual c.o.d. shippers of household goods, and to that end, it proposes to adopt the rules set forth in the appendix to this notice. The proposed regulations would provide that charges for shipments tendered by individual c.o.d. shippers would be the lesser of (i) the charges as determined by application of the carrier's published tariffs, or (ii) the charges stated in the estimate given to the shipper. The estimate would be binding upon the carrier furnishing it. In the Commission's opinion, the adoption of this rule would tend to eliminate some of the problems associated with "weight bumping" (the use of various devices to increase artificially the weight of a household goods shipment) and to protect consumers from the higher charges which result from weight bumping. The entire text of proposed § 1056.8 (including portions which would not be amended) is set forth in the appendix.

Section 1056.8(a)(1) would continue the requirement that estimates be both mandatory and free. The Commission found no reason to permit carriers to select those persons for whom it would provide estimates and no reason to require potential customers to pay for what amount to sales solicitations by carriers.

[1]The Commission's report in this proceeding embraces its discussion of uniform household goods transportation documentation in Ex Parte No. MC-19 (Sub-No.20) Practices of Motor Common Carriers of Household Goods (Limitations of Liability).

If proposed § 1056.8(a)(2) is adopted, the Commission would discontinue the requirement that a volume/weight conversion factor of not less than 7 pounds per cubic foot be used to determine the estimated weight of a shipment. In place of that requirement, the regulations would specify that an estimator must use a variable density factor (between 4 and 12 pounds per cubic foot) and must apply that factor to each article included in the estimate. As the regulations concerning the use of the proposed estimating forms and the instructions issued with those forms make clear, the estimator would be required to estimate the volume and weight of each article and to indicate on the estimating form the number of pieces into which the article will be divided or broken down for shipment. Proposed § 1056.8(a)(2) would also limit the validity of an estimate to a period not exceeding 60 days. The 60-day expiration period is proposed in order to eliminate problems arising when shippers rely on estimates which no longer reflect the conditions surrounding the move.

Modified § 1056.8(a)(4) would describe the circumstances under which the carrier or the shipper may request that an additional estimate be performed. This provision is intended to emphasize to both shipper and carrier the importance of updating the estimating document to reflect changed transportation conditions, and is designed to implement the Commission's policy to place responsibility for the contents and quality of an estimate fully and exclusively upon the carrier.

Proposed § 1056.8(a)(5) contains the basic, operative rule making estimates binding. The provisions of this subsection would not apply to so-called "national account" shippers (generally corporations which arrange or pay for transportation of their employees' household goods). Although the Commission found that making estimates binding would be a suitable remedy for problems of underestimating encountered by individual c.o.d. shippers, it also found that making estimates binding when provided for national account shippers would be detrimental to competition between those shippers and within the household goods transportation industry. In the event that estimates were made binding when provided for national account shippers, favored shippers would be able to extract undue favors from carriers in return for the furnishing of "low-ball" estimates. Because of the competitive relationship between these national account shippers, a concession to one such shipper would be prejudicial to its competitor and would result in the second shipper's being placed at a competitive disadvantage. Under these circumstances, making estimates binding when furnished for national account shippers would be contrary to the purposes of the Interstate Commerce Act (49 U.S.C. 1 et seq. to prevent unjust, undue, and unreasonable preference and prejudice as between shippers and carriers.

Accordingly, proposed § 1056.8(a)(5) would not apply to national account shippers. For the purposes of that subsection, a national account shipper is identified as a shipper whose employer is responsible, directly or indirectly, for arranging or paying for transportation of the employee's household goods.

Different circumstances surround the shipments of individual c.o.d. shippers. Those shippers do not maintain competitive relationships with one another, nor do they have the economic leverage to extract concessions from carriers as national account shippers can. Making estimates binding is an appropriate remedial measure to alleviate the problems of underestimating, and the Commission is of the view that no preference to one individual or prejudice to another could result *solely* from the operation of the proposed rules. Proposed § 1056.8(a)(5) would also require carriers to publish a tariff rule specifying that estimates will be binding when shipments are transported for individual c.o.d. shippers when the transportation of their household goods is neither arranged nor paid for by their employers.

In order to call attention to the fact that these regulations are not intended to permit carriers to engage in unfair or anticompetitive practices under the guise of compliance with these regulations, the Commission proposes to adopt § 1056.8(a)(6). This subsection would essentially prohibit unfair or anticompetitive acts or practices in connection with the furnishing or use of an estimate.

In light of the proposal to make estimates binding when furnished for individual c.o.d. shippers, the Commission declined to impose a penalty for inaccurate estimates. A penalty system would offer no additional protection for the individual shipper, and under these circumstances the Commission is reluctant to assume the additional burded of administering such a penalty system.

If § 1056.8(a)(7) is adopted, carriers would be required to give potential shippers written notice if the carrier intended to change its rates between the time of the estimate and the time the shipment is tendered to the carrier. That proposed subsection would require carriers to give potential shippers brief notice of the fact that carriers intended to change their rates and of the nature of that rate change and the effective date.

The provisions of § 1056.8(a)(5), which make estimates binding when furnished for individual c.o.d. shippers, would serve the same purpose as the present 110 percent rule. Corporate shippers and others identified as national account shippers for the purpose of this proceeding may obtain credit from motor common carriers of household goods under the provisions of 49 CFR Part 1322. Accordingly, present § 1056.8(b), which contains the 110 percent rule, would be eliminated from the Commission's estimating regulations. However, persons commenting on the proposed regulations are requested to address the issue of whether the 110 percent rule would continue to serve a purpose for employees of national account shippers when those employees are required to pay full charges for transportation of their shipments subject to subsequent reimbursement by their employers. Under the proposed regulations, such an employe would be required to arrange financing for additional charges not stated in an estimate, and the Commission questions whether the 110 percent rule should continue in force to protect such employees in the event that an estimate substantially understated the applicable charges.

No substantive changes have been proposed to present § 1056.8(c), which permits carriers to supply self-estimating forms for the use of potential shippers, or to present § 1056.8(d), which requires the carrier to notify the shipper of actual charges due upon request of that shipper. However, § 1056.8 (c) and (d) would be relettered (b) and (c), respectively, to reflect the deletion of present § 1056.8(b).

Present § 1056.8(d) requires carriers to file quarterly reports of over- and under-estimates. Although that reporting requirement has assisted the Commission in spotlighting problems arising from the estimating practices of motor common carrier of household goods, it would serve little purpose if the proposed regulations were adopted. Accordingly, present § 1056.8(d) would be deleted from the Commission's estimating regulations. Present § 1056.7(b) (ii) and (iii), which require carriers to list the number of over- and under-estimates as part of their performance reports, would also be deleted. The remaining subsections of § 1056.7(b) would be appropriately renumbered.

New estimating forms and printing specifications for those forms would also be adopted. New § 1056.8(d), as proposed, provides minimum printing specifications for household goods transportation estimating forms. The Commission intends to request the Government Printing Office (GPO) to print and sell the forms we prescribe.

V 4 3 — 8 5 M Y 2 7 8 UMI

While carriers will be permitted to arrange for printing of these forms through the firms whose services they now use, the availability of GPO-printed forms will eliminate many problems which this Commission has encountered in attempting to ensure uniformity between the estimating forms of various carriers and will permit all carriers to purchase proper estimating documents on a uniform basis. Proposed § 1056.8(d)(1) provides that estimating documents purchased from GPO will be deemed to comply with the printing requirements specified in that subsection.

Section 1056.8(d)(2) would contain the estimating form which the Commission intends to prescribe. Page 1 of that form includes appropriate blocks for insertion of an expiration date for the estimate provided and continues the requirement that the shipper acknowledge receipt of a copy of ICC Form BOp 103, Summary of Information for Shippers of Household Goods. In addition, the proposed forms contain conspicuous notices and warnings that the estimate covers only the articles and services listed, that shippers are responsible for charges for additional services requested, and that the shipper should independently examine the estimate to ensure its accuracy.

Blocks are provided on page 2 of the form for the estimator to indicate the method by which charges due for the shipment will be calculated. Estimators will be required to sign their names on page 2 of the form and to indicate their full name, the name of their employer, and their business address and telephone number. Requiring this information on the estimating form will eliminate the need to register estimators, since the information to be recorded as part of a registration process could readily be obtained from the estimating document in the event problems arise concerning that estimate.

Page 2 also contains a description of the valuation charges imposed by carriers.

Pages 3 through 5 of the estimating form contain a list of commonly-requested household goods transportation services. Carriers will be required to complete the description of each line number by indicating both the item number applicable to the service requested and by providing a complete description of the charges imposed for that service. Although the proposed estimating documents contain what the Commission believes to be a list of the most commonly requested services, parties and other participants are encouraged to suggest other generally-required services which might properly be included in that list.

Page 6 of the form includes a list of containers and a separate statement of both packing and unpacking charges. This page of the form reflects the proposed amendment to § 1056.3(b) of the Commission's household goods regulations to provide that labor charges for packing and unpacking be separately stated in a carrier's tariffs as an amount per hour and that charges for containers be separately stated in amounts per container. Use of hourly rates for packing and unpacking services (as opposed to rates stated in amounts per container) will eliminate many of the problems associated with "balloon packing" (use of excess packing materials) and will permit a more appropriate allocation of charges for those services. No change is contemplated to the requirement that charges for containers themselves be stated as amounts per container.

Space is provided on the proposed estimating forms for the carrier to indicate the estimated cubic measurements of each article, the volume/weight conversion factor used for that article, the number of articles of each type, the weight of those articles, the number of pieces into which those articles will be broken down or divided for shipment, and the total volume of all articles in a particular class.

The most significant change to the estimating form is the use of generic descriptions for household articles. Elimination of the Commission's presently-required room-by-room list of household items will considerably simplify the estimator's task by eliminating many superfluous items from the list of items included in the estimate. Ample space is provided on the proposed forms for estimators to indicate articles which are not to be shipped. The proposed estimating form may also be used as an inventory document, and sufficient space is provided for the carrier's employees to indicate articles loaded and unloaded.

A set of instructions is included with the proposed estimating forms.

The proposed estimating forms (9 pages in addition to instructions) are longer than the Commission's presently-required estimating forms (2 pages). However, despite their increased length, the proposed forms require little information not now required on existing forms. A great deal of the increased length is accounted for by the application of the proposed minimum printing specifications to those estimating documents.

In the Commission's opinion, that increase in length is more than justified by the increased readability of those forms.

In response to the Commission's order in Ex Parte No. MC 19 (Sub-No. 20), Practices of Motor Common Carriers of Households Goods (Limitations of Liability), Allied Van Lines, Inc., and the American Movers Conference submitted comments on the matter of uniform household goods transportation documents. Essentially, Allied and AMC ask whether the public would be better served if the Commission were to require uniform, simplified language to be used in household goods transportation rather than specifying both the form and contents of those documents. They argue that specifying the format of all household goods transportation documents might interfere with carrier data processing operations and would not necessarily guarantee that shippers better understand the terms and conditions of their shipments.

The uniform estimating form proposed in this proceeding meets many of the objections raised by the parties to the estimating proceeding, and the Commission believes that this form clearly provides the information necessary for the shipper to understand the estimating process and to verify the information placed on that form. That estimating form is subject to further revisions in the public interest, and further comments on that proposed form are invited. The comments of Allied and AMC on the matter of uniform household goods transportation documents have been incorporated in the record in this proceeding, and further consideration will be given to the issue of uniform household goods transportation documentation after final estimating regulations are adopted.

The Commission also proposes to modify slightly certain other regulations governing transportation of household goods.

The Commission's regulation governing weighing of shipments (49 CFR 1056.6) would be modified to permit the person paying the freight charges, the shipper, or the representative of either of them, upon request, to require the carrier to inform that person of the numbers of the vehicles which will be used for transportation of that shipment and to permit that person to observe the weighing of the vehicle both before and after loading. This added requirement will permit household goods shippers to protect themselves from unscrupulous weight practices (including weight bumping).

Minor changes are also contemplated to the regulations governing the order for service (49 CFR 1056.9) and the bill of lading (49 CFR 1056.10). Amendments to § 1056.9(a) (9) and (10) would reflect the fact that applicable charges to be computed under proposed § 1056.8(a)(5) and listed on the order for service. The order for service regulations would also be amended to require carriers to indicate whether the shipper had an opportunity to obtain an estimate under the provisions of 49 CFR 1056.8 but declined to do so.

The Commission also proposes to add a new § 1056.9(d) to the order for

service requirement. This subsection essentially would require that when a carrier has provided an estimate, it must amend that estimate prior to modifying the order for service. It is the Commission's intention to make the estimate the controlling document, and the carrier will be expected to indicate to the shipper the reason for any change in the applicable charges subsequent to the completion of that estimate.

Sections 1056.10(b) (7) and (8) would be modified to require carriers to indicate on the bill of lading the method by which charges will be computed under the provisions of § 1056.8(a)(5), when that provision is applicable.

Section 1056.10(b)(9) would be modified to provide that when an individual c.o.d. shipper receives an estimate under the provisions of proposed § 1056.8(a)(5), that shipper must certify on the bill of lading, in his own handwriting, that he is solely responsible for arranging and paying for the transportation of that shipment.

Although the Commission does not now intend to certify estimators or to regulate the contents of estimator training programs, the administration of estimator training programs by an industry association such as the National Institute of Certified Moving Consultants raises several complex problems. Of particular concern is the possibility that carriers which are influential in the operation of the NICMC may attempt to use that agency to engage in anticompetitive practices. The Commission, therefore, has made NICMC a party to this proceeding and has directed that organization to answer the following questions.

(1) Should standards be developed for or restrictions placed on organizations engaged in training and certification of estimators to prevent those organizations from engaging in unfair competitive practices and from engaging in acts which might be deceptive to the shipping public?

(2) Are organizations such as the NICMC so constituted as to be subject to the exemption from the antitrust laws which the Commission may approve under the provisions of section 5(a) of the Interstate Commerce Act (49 CFR § 5(b))?

NICMC has been requested to include with its response copies of its articles of incorporation, its by-laws and rules of procedure and its canons of conduct and to furnish a complete description of its training programs, a description of the standards used by NICMC to certify estimators, and a description of the measures used by NICMC to enforce those certification requirements. We have also requested the Federal Trade Commission which has been working with the NICMC to improve its program, to participate in this proceeding and to suggest methods by which the Commission can prevent such organizations from engaging in unfair competitive tactics and in practices which deceive the public. Other interested persons are invited to comment on the matter of estimator training and certification by organizations of motor carriers such as the NICMC.

The Commission's Form BOp 103, Summary of Information for Shippers of Household Goods, and its Public Advisory No. 4 require revision in light of several changes which the Commission has recently made to its household goods transportation regulations. The Commission intends to combine these two documents and to simplify them considerably. Because of the importance of the estimating investigation and the significant changes which the Commission proposes to make to those regulations, revisions of these documents will not be made until revisions to final estimating regulations are adopted. Persons commenting on the proposed estimating regulations are, however, encouraged to suggest revisions which might be made to Form BOp 103 and Public Advisory No. 4 to make them simpler and more meaningful to household goods shippers.

Copies of the order in this proceeding, which contains a full discussion of each of the proposed provisions, are available through the Secretary of the Commission.

Persons and parties interested in filing representations and comments as to the matters referred to above and the regulations proposed in this proceeding are hereby invited to comment by the submission of written data, views, statements, or argument. Data, views, statements, or argument should be submitted to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423. When possible, an original and 15 copies should be filed. All submissions become part of the record in this proceeding, and interested persons or parties may view these submissions at the Commission's office in Washington, D.C., during normal business hours. No oral hearings will be scheduled for the receipt of testimony at this time.

This notice of proposed rulemaking is issued under the authority of part II of the Interstate Commerce Act (49 U.S.C. 301 et seq.) and of 5 U.S.C. 552, 553, and 559 (the Administrative Procedure Act).

Issued in Washington, D.C., on the 10th day of April 1978.

H. G. HOMME, Jr.
Acting Secretary.

PROPOSED REGULATIONS

The Interstate Commerce Commission proposes to amend its household goods transportation regulations (49 CFR Part 1056) in the following manner. If the proposed regulations are adopted, § 1056.8 would read as follows:

§ 1056.8 Estimates; charges when estimates furnished.

(a) *Estimates by the carrier.* (1) Every motor common carrier engaged in the transportation of household goods, in interstate or foreign commerce, shall upon request of a shipper of household goods cause to be given to such shipper at no charge an estimate of the charges for proposed services, including specific tariff authority for such charges, in the manner and form specified below.

(2) The estimate shall be made only after a visual inspection of the goods by the estimator. The person performing the estimate shall include, in the appropriate spaces provided on the estimating form described in § 1056.8(d), the estimate volume in (cubic feet) of each article to be shipped and must apply to each article a weight factor of between 4 and 12 pounds per cubic foot. The weight of each article and the total weight of the shipment must be calculated and included on that estimating form, and the estimator must specify the number of pieces into which each article listed in the estimate will be broken down or divided for shipment. The estimate shall be prepared on the form described in § 1056.8(d) in accordance with the instructions printed on that form. No estimate shall be valid for more than 60 days. An estimate shall be binding upon the carrier in the manner specified in § 1056.8(a)(5) if, during the period in which the estimate is valid, the prospective shipper transmits to the carrier a request to perform the services described in that estimate or signs a written order for service.

(3) The estimating form specified in this section shall be fully executed as appropriate in each case and in accordance with this paragraph shall be delivered to the shipper, and a copy of that form shall be retained by the carrier as part of its record of shipment.

(4) A prospective shipper for whom an estimate has been provided may request that an additional estimate be performed, and the carrier must perform such an estimate. If the prospective shipper requests the carrier to perform such an estimate, the carrier may, after completion of that additional estimate, cancel any previous estimates and substitute the additional estimate for its previous estimates. If no order for service has been completed, the carrier may, without the shipper's consent, substitute an additional estimate for a previous estimate only if (i) the prospective shipper requests the carrier to perform additional services not specified in the previous estimate or requests the carrier to transport additional goods not included in that previous estimate and (ii) the car-

V 4 3 | 8 5

rier, in writing, provides the shipper a complete description of the changes made to the previous estimate and a complete statement of the differences in costs which such changes may have caused. If an order for service has been signed, a carrier may amend that order for service only if it modifies the estimate upon which that order for service was based in the manner specified in paragraph (a)(4) (i) and (ii) of this section.

(5) The lawful charges for any shipment on which an estimate has been requested and performed shall be (i) the total tariff charges determined in accordance with the carrier's tariffs, or (ii) the charges stated in the written estimate given to the shipper by the carrier, whichever will result in the lowest charge to the shipper, whether or not the charges stated in that estimate are based upon a misquotation of the tariff provisions. The provisions of this subsection shall only apply to the determination of charges due when those charges are to be collected upon delivery and shall only apply to transportation of household goods as defined in § 1056.1(a)(1). The provisions of this subsection do not apply to the transportation of shipments of household goods when the employer of the owner of those household goods is responsible, directly or indirectly, for arranging or paying for such transportation. When charges due for transportation of a shipment are calculated under the provisions of this subsection, those charges shall be calculated on the basis of the estimated or actual weight of the shipment, whichever is lower. Every motor common carrier of household goods shall publish, as part of its tariffs, a rule which reads as follows: "The charges for any shipment on which an estimate has been performed under the provisions of 49 CFR 1056.8(a) shall be either (*a*) the total tariff charges determined in accordance with the carrier's tariff, or (*b*) the charges stated in the written estimate given to the shipper by the carrier, whichever will result in the lowest charge to the shipper. The provisions of this rule shall only apply to the determination of charges due when those charges are to be collected upon delivery, and shall only apply to transportation of household goods as defined in 49 CFR 1056.1(a)(1). The provisions of this rule shall not appy to the transportation of shipments of household goods when the employer of the owner of those goods is responsible, directly or indirectly, for arranging or paying for such transportation. When charges due for transportation of a shipment are calculated under the provisions of this subsection, those charges shall be calculated on the basis of the estimated or actual weight of the shipment, whichever is lower."

(6) Each estimate shall be prepared in accordance with these regulations, but no person shall, in connection with the preparation, application, or use of such an estimate, engage in unjust, unfair, unreasonable or deceptive acts or practices.

(7) When there is pending before the Commission a proposed change in rates or charges which would affect the cost of a shipment for which an estimate is provided under this section, the carrier, in writing shall inform the person for whom an estimate is furnished of the proposed change in rates and charges and shall further inform that person of the time when the proposed changes in rates or charges are scheduled to become effective and of the general nature of the changes in those rates and charges.

(b) *Estimate form for shipper's use.* Carriers may furnish to shippers or prospective shippers an estimate form which may contain statements of the weights of average pieces of furniture and other household articles of various types for use by the shipper in making his own estimate of the total weight of his goods. Any instructions necessary to enable the shipper to use the estimate for shall be printed in the form. If cubic-foot measurements are used in arriving at the weight, the form shall state that a weight factor of 7 pounds per cubic foot shall be used.

(c) *Notification to shipper of charges.* Whenever the shipper specifically requests notification of the actual weight and charges on a shipment and supplies the carrier with an address or telephone number at which the communication will be received, the carrier shall comply with such request immediately upon determining the actual weight and charges. Such notification shall be made by telephone, telegraph, or in person at the carrier's expense unless the carrier provides in its tariff that the actual cost of such notification shall be collected from the shipper.

(d) *Estimating forms.* (1) Whenever an estimte must be furnished, that estimate shall be executed on the form specified in § 1056.8 (d)(2). All estimating forms shall be plainly printed, planographed, sterotyped, or prepared by other similar durable process, in black ink on white paper of good quality. All information required to be included in those forms shall be presented in a clearly eligible manner. The items included on each page of the estimating form in § 1056.8 (d)(2) shall be included on the corresponding page of each form used to prepare an estimate. The type used shall be of size not less than 8-point or its equivalent (if systems not employing the printers' points standards are used), but in no case may there be more than 9 lines to the vertical inch and 16 printed characters to the horizontal inch, with fractional inches of material to be in proportion. Characters, words, and lines shall be spaced in an uncrowded manner to assure easy readability of the material. The Interstate Commerce Commission reserves the right to require discontinuance of the use of any form if, upon examination of that form it appears that the form in question does not comply with the provisions of this subsection. Forms printed by the Government Printing Office under the direction of the Interstate Commerce Commission shall be deemed to comply with the provisions of this subsection.

(2) The following form shall be used to prepare each estimate.

COMPUTATION OF CHARGES DUE UPON DELIVERY *(Check the provision applicable)*

1. [ ] This section applies to shipments of household goods by individual householders when charges are to be collected upon delivery and when the carrier is responsible for arranging for or paying for the transportation of the goods being shipped is responsible for arranging for their transportation.

   The total charges due for transportation of your shipment will be the lesser of (i) the charges computed in accordance with the carrier's tariffs, or (ii) the charges stated in this estimate.

   All charges are due upon delivery of your shipment.

2. [ ] This section applies when the employer of the owner of the goods being shipped is responsible, directly or indirectly, for arranging or paying for their transportation. The total charges applicable to a shipment when the employer of the owner of the goods being shipped is responsible for or paying for the transportation of such goods will be determined solely by reference to the carrier's tariffs and the actual services performed, which the carrier performs. This estimate is not a final statement of the charges applicable to this shipment; those charges will be determined only after completion of the move.

SIGNATURE OF ESTIMATOR | PRINT OR TYPE FULL NAME OF ESTIMATOR

NAME OF COMPANY EMPLOYING ESTIMATOR | BUSINESS ADDRESS OF ESTIMATOR *(Include Zip Code)*

TELEPHONE NUMBER OF ESTIMATOR *(Include Area Code)* | No. (Street, City, State, Zip Code)

NOTICE TO SHIPPER

SHOULD THE NUMBER OF ITEMS TO BE SHIPPED OR THE SERVICES REQUIRED FOR YOUR SHIPMENT CHANGE BETWEEN THE TIME THIS ESTIMATE IS PERFORMED AND THE TIME OF YOUR MOVE, YOU ARE ENTITLED TO A REVISED ESTIMATE IF YOU REQUEST THE CARRIER TO PERFORM ANOTHER ESTIMATE, AND THE CARRIER MUST PERFORM THAT ESTIMATE. THE CARRIER ALSO HAS THE RIGHT TO CANCEL A PREVIOUS ESTIMATE WHEN IT FINDS THAT THE CONDITIONS SURROUNDING YOUR MOVE HAVE CHANGED. THE CARRIER MUST THEN SUBSTITUTE A NEW ESTIMATE FOR THAT PREVIOUS ESTIMATE.

VALUATION CHARGES

(Line number 4 on page 3 of this estimate)

(1) Protection for your shipment up to, but not exceeding, 60 cents per pound per article is provided at no additional cost to you. Under this valuation provision, if the carrier damages an article weighing 40 pounds, its liability would be $25, or 60 cents times 40 pounds, the Mover's liability would be limited to $25, whether or not the article is worth more than that amount.

(2) If you wish to be paid full value for lost or damaged items, you must pay the extra charge described on line number 4 on page 3 of this estimate. If you do not declare a value or if you sign the valuation statement included in the bill of lading provided by the carrier upon signing an order for service, you will automatically receive the minimum protection provided by law. This is 60 cents per pound per item. Thus, if your shipment weighs 4,000 pounds, lump sum valuation would be $1,000; or $1.25 times 4,000 pounds.

You may also choose to declare a lump sum valuation you consider adequate to cover your shipment. The valuation cannot be less than $1.25 times the weight of your shipment. In the event you choose to state a lump sum valuation, the mover is responsible for the full value of that shipment.

In the event that you choose a valuation under paragraph (2) of this notice, you will be charged 50 cents per $100 valuation for this higher protection.

ESTIMATED COST OF SERVICE | DATE OF ESTIMATE

This is to certify that the following estimate of charges is based upon the following described shipment and the following described services to be performed by the undersigned carrier (or its agent) in connection therewith. This estimate is furnished in accordance with the provisions of 49 CFR 1056.8 and is based upon [ ] my personal inspection of the shipment on (date) _____ [ ] the following description furnished by me (or my agent) on (date) _____ [ ] the following description furnished by the shipper on (date) _____ [ ] the following description furnished by the shipper on (date) _____ [ ] the following description furnished by the shipper

V 4 3 | 8 5
MY 2 78
UMI

1. Estimate the cubic measurement of each article to be shipped, enter these measurements in the column marked CUBIC FEET PER ARTICLE on pages 6 through 9.

2. Estimate the density of each article to be shipped in pounds per cubic foot. For each article, the estimator must use density of not less than 4 pounds per cubic foot nor more than 12 pounds per cubic foot. Do not use fractions. Enter the density of each article in the column marked POUNDS PER CUBIC FOOT on pages 6 through 9.

3. Indicate the number of articles of each type to be shipped in the column marked NUMBER OF ARTICLES on pages 6 through 9.

4. Multiply the numbers entered on each line in the column marked CUBIC FEET PER ARTICLE by the numbers entered on the same lines in that column marked POUNDS PER CUBIC FOOT. Then multiply that figure by the numbers entered on each line in the column marked NUMBER OF ARTICLES. Enter the total in the column marked WEIGHT.

5. In the column marked NO. OF PIECES PER ARTICLE on pages 6 through 9, enter for each article listed in the estimate the number of pieces into which that article will be broken down or divided for shipment.

6. Enter the total weight of the articles listed on each page in the spaces provided on page 9.

7. The estimator must multiply the cubic measurements shown on each line in the column marked CUBIC FEET PER ARTICLE on pages 6 through 9 by the number of articles shown in the column marked NUMBER OF ARTICLES shown on those lines to determine the estimated volume (cubic feet) of all shipment. Enter the total estimated volume of the articles listed on each page in the column marked CUBIC FEET on pages 6 through 9. Enter the total estimated volume of the articles listed on each page in the appropriate spaces provided on page 9.

This form may also be used as an inventory document. For each item loaded, place a mark in the ARTICLES LOADED column. When the item is unloaded, indicate the number of each type of article unloaded in the ARTICLES UNLOADED column.

Line numbers 1 through 20 on pages 3, 4, and 5 contain descriptions of various types of charges commonly applicable to household goods shipments. For each service requested, enter the item number governing that service and the charges in the appropriate columns. If applicable, the charges may include charges for valuation, number of articles, and other factors pertinent to that service. Enter on line numbers 17 through 19 the charges for containers, packing and unpacking computed on page 5 of this form. If a service is requested which is not listed in line numbers 1 through 20, indicate on line number 21 the tariff item governing that service and explain fully the type of service requested, the price per unit of service, and the number of units of service requested.

Indicate in the column marked ESTIMATED CHARGES the total charge for each service requested and described on line numbers 1 through 21.

Add the estimated charges listed in the ESTIMATED CHARGES column on line numbers 1 through 21 and enter the total amount on line number 22 on page 5 and in the appropriate space on page 1.

On page 5, indicate the number of cartons of each type required, the cost for each type of carton, and the total cost for cartons of each type. Also indicate the gross measurements of each carton. Additional space is provided to list the gross measurements of crates and containers designed for various fragile items.

Compute the total estimated container costs and enter that amount on line number 17 on page 4.

Indicate, in the spaces provided, the labor charges for packing and unpacking and the number of hours estimated for packing and unpacking. Enter the total estimated packing and unpacking costs on the appropriate lines. Also enter the total estimated packing costs on line number 18 on page 4, and enter the total estimated unpacking costs on line number 19 on page 4.

PAGES 6, 7, 8 and 9 (TABLE OF MEASUREMENTS AND INVENTORY):

To compute the estimated weight of a shipment, the estimator must follow these steps:

OTHER MODIFICATIONS TO COMMISSION REGULATIONS

§ 1056.3 [Amended]

Section 1056.3(b) would be modified by deleting present § 1056.3(b) and substituting for that subsection the following:

• • • • • •

(b) The tariff charges so established for containers, packing, and unpacking shall provide for separate charges for containers, for packing, and for unpacking, stated for containers as an amount per container, and for packing and unpacking as an amount per hour. Charges for other services shall be separately stated on a unit or hourly, basis whichever is appropriate.

§ 1056.6 [Amended]

Section 1056.6(a) would be modified by deleting the last two sentences from that subsection and substituting for those sentences the following:

(a) • • • The person paying the freight charges, the shipper, or the representative of either of them upon request, shall be permitted without charge to observe the determination of the tare weight of the vehicle into which that shipment will be loaded. The carrier shall, upon request, furnish in writing the vehicle numbers of the vehicles (including power unit) which will be used for the transportation of that shipment. The person paying the freight charges, the shipper, or the representative of either of them, upon request, shall be permitted without charge to accompany, in their own conveyance, the carrier to the weighting station and to observe the weighting use a certified scale which will permit any of the above named persons to observe the weighting of the shipment without causing delay, and the carrier must, prior to any weighing, inform the person paying the freight charges, the shipper, or the representative of either of them, in writing, of the location (including street address) of the scale upon which any such weighing will be performed. The weight upon which the actual charges due for a shipment for which an estimate is performed under § 1056.8(a)(5) of these regulations shall be the lower of the estimated weight of the actual weight of that shipment.

• • • • • •

§ 1056.7 [Amended]

Section 1056.7(b) would be modified by deleting § 1056.7(b) (ii) and (iii) from that section and by renumbering § 1056.7(b) (iv) through (xi) as § 1056.7(b) (ii) through (ix), respectively.

§ 1056.9 [Amended]

Section 1056.9(a) would be amended by deleting present § 1056.9(a) (9) and (10) and substituting for those subsections the following, and by adding to § 1056.9(a) a new § 1056.9(a)(12):

(a) • • •

(9) Amount of estimated charges and method of payment of applicable charges.

(10) Maximum amount required to be paid in cash, certified check, or money order to relinquish possession of c.o.d. shipment when the transportation of that shipment is neither arranged nor paid for by the employer of the owner of the goods.

(12) Whether the shipper had an opportunity to obtain an estimate under the provisions of 49 CFR 1056.8 but declined to do so.

Section 1056.9 would also be modified by adding to that section a new § 1056.9(d), as follows:

• • • • • •

(d) If a carrier provides an additional estimate under the provisions of § 1056.8(a) (4), it may amend any order for service which it may have prepared to reflect any changes in the amount of the charges listed in its previous estimate. The carrier must furnish an additional estimate or amend its previous estimate prior to amending the order for service with respect to the amount of charges to be collected from the shipper.

Section 1056.10 would be amended by deleting from that section § 1056.10(b) (7) and (8) and by substituting the following for those subsections:

• • • • • •

(b) • • •

(7) Amount of estimated charges and method of payment of applicable charges.

(8) Maximum amount required to be paid in cash, certified check, or money order to relinquish possession of c.o.d. shipment when the transportation of that shipment is neither arranged nor paid for by the employer of the owner of the goods being shipped.

• • • • • •

Section 1056.10(b)(9) would be modified to read as follows:

• • • • • •

(b) • • •

(9) Whether the shipper requests notification of actual charges and where such communication will be received. On the same line on which the tare weight is to be entered, there shall be printed the words, "Shipper: The tare weight of the vehicle must be entered on this line prior to loading your shipment on the vehicle." Immediately above the warning required in the next sentence of this subsection, each individual c.o.d. shipper for whom an estimate has been furnished under the provisions of § 1056.8(a)(5) of these regulations shall be required, in his own handwriting, to certify that he is solely responsible for the arrangement of and payment for the shipment in question and shall affix his signature to that certification. Across the bottom of the receipt or bill of lading, and any copies, there shall be printed in red letters not less than ⅛ inch high the words "Any motor carrier, or other person, or any officer, agent, employee, or representative thereof, who shall knowingly and willfully neglect or fail to make full, true, and correct entries or who shall knowingly and willfully falsify, destroy, mutilate, or alter this receipt or bill of lading, shall be subject to a penalty of $5,000 for each such offense. (Sec 222; 49 U.S.C. 322)."

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

[3410-07]

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Designation Number A601]

LOUISIANA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Louisiana Parishes as a result of drought May 2 through July 15, 1977, and excessive rainfall July 28 through November 30, 1977, in both East Feliciana and West Feliciana Parishes; and drought June 15 through September 10, 1977, in Richland Parish.

Therefore, the Secretary has designated these areas as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended, and the provisions of 7 CFR 1904 Subpart C, Exhibit D, Paragraph V B, including the recommendation of Governor Edwin W. Edwards that such designation be made.

Applications for emergency loans must be received by this Department no later than October 17, 1978, for physical losses and April 20, 1979, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 24th day of April, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

[FR Doc. 78-11819 Filed 5-1-78; 8:45 am]

[3410-07]

[Designation Number A602]

MICHIGAN

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Michigan Counties as a result of drought May 1 through July 6, 1977, and excessive rainfall July 7 through November 30, 1977, in Emmet County; drought April 1 to July 18, 1977, excessive rainfall July 19 to October 21, 1977, and late spring frost May 7, May 9, June 3, and June 9, 1977, in Kalkaska County; and drought April 1 through July 31, 1977, and excessive rainfall August 1 through October 31, 1977, in Mackinac County.

Therefore, the Secretary has designated these areas as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended, and the provisions of 7 CFR 1904 Subpart C, Exhibit D, Paragraph V B, including the recommendation of Governor William C. Milliken that such designation be made.

Applications for emergency loans must be received by this Department no later than October 17, 1978, for physical losses and April 20, 1979, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 24th day of April, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

[FR Doc. 78-11820 filed 5-1-78; 8:45 am]

[3410-07]

[Designation Number A603]

NEW MEXICO

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Roosevelt County, New Mexico, as a result of hot weather and dry winds causing abnormal infestation of the Banks grass mite and other insects May 31 through October 31, 1977.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended, and the provisions of 7 CFR 1904 Subpart C, exhibit D, Paragraph V B, including the recommendation of Governor Jerry Apodaca that such designation be made.

Applications for emergency loans must be received by this Department no later than October 17, 1978, for physical losses and April 20, 1979, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 24th day of April, 1978.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

Forest Service

COOPERATIVE GYPSY MOTH SUPPRESSION AND REGULATORY PROGRAM—1978 ACTIVITIES

Notice of Availability of Final Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the forest Service, and Animal and Plant Health Inspection Service, Department of Agriculture, have prepared for the 1978 activities, a Final Environmental Statement for the Cooperative Gypsy Moth Suppression and Regulatory Program, USDA-FS-APHIS (Adm.) 78-02.

The Final Statement concerns a cooperative suppression program with the States of Pennsylvania and New Jersey to protect forests and forest resources on about 171,079 acres of high-value, high-use forest land from unacceptable damage by the gypsy moth. Most areas will be sprayed with carbaryl, trichlorfon, and Dimilin insecticides. The cooperative regulatory program is designed to prevent artificial long-distance spread and to eradicate remote infestations in the United States.

This Final Statement was filed with EPA on April 26, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3210, 12th and Independence Ave. SW., Washington, D.C. 20013.
USDA Animal and Plant Health Inspection Service, Administration Building, Room 302-E, 12th and Independence Ave. SW., Washington, D.C. 20250.
USDA, Forest Service, 370 Reed Road, Broomall, Pa. 19008.

A limited number of single copies are available upon request to John R. McGuire, Chief, U.S. Forest Service, South Agriculture Building, 12th and Independence Avs. SW., Washington, D.C. 20013.

Copies of the Final Environmental Statement have been sent to various Federal, State, and local agencies as outlined in the EPA guidelines.

Date: April 24, 1978.

R. MAX PETERSON,
Deputy Chief, Forest Service.

[FR Doc. 78-11825 Filed 5-1-78; 8:45 am]

[3410-11]

LAND MANAGEMENT PLAN KING PLANNING UNIT—KLAMATH NATIONAL FOREST

Availability of Draft Supplement to the Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft supplement to the final environmental statement for the Land Management Plan, King Planning Unit, Klamath National Forest, California, USDA-FS—R5-FES(Adm)-76-03(S). The draft supplement adds to and revises information contained in the final environmental statement.

The final environmental statement proposed a land management plan for 49,000 acres of the Klamath National Forest known as the King Planning Unit, Siskiyou County, Calif. In addition to the 11,100 acres within the marble Mountain Wilderness, a total of 28,200 acres within the King Planning Unit has been inventoried as roadless and undeveloped lands, 1,800 acres of which is proposed for Wilderness study. Under the preferred alternative, about 17,600 acres will be managed intensively, primarily for the production of timber. The remaining 18,500 acres will be managed for the protection and development of watershed, recreational, visual, cultural, and other resource values. These include the Klamath River area, the Pick-Ya-Wish cultural area, and the Ukonom Creek management area. The proposed plan does not apply to the 500 acres of private land within the Planning Unit boundary.

The draft supplement develops an additional land management alternative; considers a variation of one alternative; and corrects inaccurate or incomplete information in the final environmental statement. The preferred alternative is the same as in the final environmental statement.

The final environmental statement was transmitted to the Council on Environmental Quality on April 5, 1977. The draft supplement to the final environmental statement was transmitted to the Environmental Protection Agency (EPA) on April 24, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3210, 12th Street and Independence Avenue SW., Washington, D.C. 20250.
Forest Supervisor, Klamath National Forest, 1215 South Main Street, Yreka, Calif. 96097.
Regional Forester, U.S. Forest Service, Room 529, 630 Sansome Street, San Francisco, Calif. 94111.
District Ranger, Happy Camp Ranger District, Happy Camp, Calif. 96039.
District Ranger, Ukonom Ranger District, Somes Bar, Calif. 95568.

A limited supply of single copies of the final environmental statement and draft supplement are available upon request from the Forest Supervisor, Klamath National Forest, 1215 South Main St., Yreka. Calif. 96097.

Copies of the enviromental statement and the draft supplement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments on the draft supplement are invited from the public, from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental effects for which comments have not been specifically requested.

Comments and requests for additional information should be addressed to Forest Supervisor Dan B. Abraham, Klamath National Forest, 1215 South Main Street, Yreka, Calif. 96097. Comments must be received within 60 days after transmittal to EPA in order to be considered in the preparation of the final supplement.

Dated: April 24, 1978.

ROBER W. CERMAK,
Acting Regional Forester.

[FR Doc. 78-11796 Filed 5-1-78; 8:45 am]

[3410-11]

Forest Service

FOREST SERVICE POLICY ON PESTICIDE USE

Revised Policy

AGENCY: Forest Service.

ACTION: Notice.

SUMMARY: The Forest Service, in response to concerns raised at the National Symposium on the Use of Herbicides in Forestry, is revising its policy on pesticide use to emphasize quality control, special aerial application considerations, and environmental monitoring. Policy changes will be published as an Interim Directive in the Forest Service Manual.

FOR FURTHER INFORMATION CONTACT:

David Graham, Forest Insect and Disease Management Staff, telephone: 703-235-8209.

SUPPLEMENTARY INFORMATION: The Forest Service uses an integrated approach to managing pests and vegetation in forests and rangelands. This can include the use of pesticides along with biological, silvicultural, manual, and mechanical methods in a fully coordinated program which achieves acceptable effectiveness and environmental safety. However, pesticides will only be used in accordance with the following policies:

1. Pesticides may be recommended and used in operational projects only after consideration of alternatives—based on competent analyses of effectiveness, specificity, environmental impacts, and benefit-cost—clearly demonstrates that use of the pesticide is essential to meet management goals. The full range of alternatives—including manual, mechanical, and silvicultural methods—must be considered. High-priority attention should be given to the utilization of employment opportunity programs and other opportunities to create jobs.

2. The requirements of Title I of the National Environmental Policy Act of 1969 (Pub. L. 91-190) must be met by following the process required in FSM 1950. Title I of NEPA requires Federal agencies to "* * * maintain conditions under which man and nature can exist in productive harmony."

3. Only pesticides registered by the U.S. Environmental Protection Agency (EPA) in full accordance with Federal Insecticide, Fungicide, and Rodenticide Act, as amended, may be used, except as otherwise provided in regulations, orders, or permits issued by EPA. All such exceptions will be closely monitored. EPA-approved label instructions will be followed to the letter.

4. The herbicides 2,4,5-T, Silvex, or other materials containing TCDD may be used only where no other environmentally acceptable and economically feasible alternative, nonchemical or chemical, is registered or available. Cost-effectiveness will not be the sole criterion. When a decision is made to use these pesticides, the Assistant Secretary for Conservation, Research and Education shall be provided the oppor-

M Y 2 — 7 8 UMI

V 43 | 85

tunity to review the decision prior to implementation.

5. Where endangered or threatened animal or plant species habitat is involved, pesticides may be used only after it is determined, in conjunction with Federal and State wildlife management agencies through the environmental impact statement process, that such use will adversely affect neither the species nor its critical habitat.

6. Pesticides will not be used in Wildlife areas; exceptions to this prohibition may be only where necessary to prevent the loss of significant aspects of the Wilderness area or to prevent significant losses to resource values on public or private lands bordering the Wilderness. The use of pesicides in a designated Wilderness must be approved by the Chief.

7. Pesticide application and use must be controlled in a manner that assures adequate safety. Spills, accidents, misapplication, and any other contamination are to be avoided. Quality control monitoring will include a determination of the adequacy of application procedures and accomplishments of objectives. Treated areas will be posted with appropriate signs indicating the name of the material used and date of application to insure that potential forest users, such as berrypickers, are informed of possible exposure to pesticides. In addition, the project officer will confirm that all persons in or near the treatment area are notified in time to leave the area.

8. Pesticides and pesticide containers will be transported, stored, and disposed of in accordance with Federal, State, and local laws and regulations in a manner which will safeguard public health and wildlife, prevent damage to plants, and prevent soil and water contamination.

9. All Forest Service project applications will be supervised by Forest Service personnel trained in pesticide use and with authority to suspend operations, such as when atmospheric conditions change abruptly or other factors make it necessary.

10. The rights-of-way management plans of highway, road, transmission line, railroad maintenance departments and others, and County weed control plans will be reviewed and approved by the Forest Supervisor to ensure that all uses of pesticides on National Forest System lands conform to this Directive and Department policy, and that chemical treatments are necessary and properly applied. Use of alternatives to chemical herbicide treatment may be required.

11. When applying pesticides in sensitive situations, appropriate environmental monitoring will be carried out to determine amount of drift, if any, into nontarget areas and to detect unanticipated nontarget effects.

12. A comparison of ground and aerial applications—including costs, safety, effectiveness, and possible consequences of drift to adjacent lands or water—must be made whenever herbicides are to be used. Aerial application methods shall be used only when advantages over ground methods are significant. Herbicide aerial applications should be made with invert emulsions, particulating agents, or similar materials to ensure positive placement. The possibilities of drift to nontarget areas will be minimized in all applications.

13. Special attention will be given to all restricted-use pesticide handling and use precautions. Restricted-use pesticides shall be used only by personnel who are certified or who are under the direct supervision of a certified applicator (FSM 2143.2).

In addition, it is Forest Service policy to conduct and support research to develop and to evaluate the effectiveness and environmental safety of pest management technology—including new and improved pesticides, formulations, application timing, pest management tools, and methods—and to effectively transfer this technology to minimize costs and adverse environmental and health impacts.

JOHN R. MCGUIRE,
Chief.

[3410-02]

Packers and Stockyards Administration

FARMERS AND RANCHERS LIVESTOCK AUCTION, INC., CHARLOTTE, ARK., ET AL.

Posted Stockyards

Pursuant to the authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. et seq.), it was ascertained that the livestock markets named below were stockyards within the difinition of that term contained in section 302 of the Act, as amended (7 U.S.C. 202), and notice was given to the owners and to the public by posting notices at the stockyards as required by said section 302, on the respective dates specified below.

Facility No., name, and location of stockyard	Date of posting
AR-158, Farmers and Ranchers Livestock Auction, Inc., Charlotte, Ark.	Apr. 8, 1978.
FL-125, Madison Stockyard, Inc., Madison, Fla.	Feb. 21 1978.
KY-163, New Farmers Livestock Market, Somerset, Ky.	Jan. 4, 1978.
MO-243, Adair County Livestock Market Center, Inc., Kirksville, Mo.	Mar. 22, 1978.
VA-150, Lynchburg Livestock Market, Inc., Lynchburg, Va.	Arp. 11, 1978.

Done at Washington, D.C. this 25th day of April, 1978.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and Reports Branch Livestock Marketing Division.

[FR Doc. 78-11823 Filed 5-1-78; 8:45 am]

[3410-02]

VALLEY LIVESTOCK AUCTION COMPANY, FRUITA, COLO, ET AL.

Proposed Posting of Stockyards

The Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards, Agriculture Marketing Service, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in Section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisons of the Act.

CO-148, Valley Livestock Auction Company, Fruita, Colo.
MO-246, Tina Feeder Pig Auction, Tina, Mo.
MO-245, MFA Livestock Association, Inc., West Plains Concentration Point, West plains, Mo.
TX-315, Southwest Livestock Exchange, Inc., Uvalde, Tex.
VA-151, Abingdon Livestock Market, Inc., Abingdon, Va.

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C.181 et seq.), propose to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Act as provided in Section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule, may do so by filing them with the Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards, Agriculture Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, by May 17, 1978.

All written submissions made pursuant to this notice shall be made available for public inspection at such times and places in a manner convenient to the public business (7 U.S.C. 1.27(b)).

Done at Washington, D.C., this 25th day of April, 1978.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and Reports Branch Livestock Marketing Division.

[FR Doc. 78-11822 Filed 5-1-78; 8:45 am]

[3410-02]

MONTROSE AUCTION CO., MONTROSE, COLO., ET AL.

Deposting of Stockyards

It has been ascertained, and notice is hereby given, that the livestock markets named herein, originally posted on the respective dates specified below as being subject to the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), no longer come within the definition of a stockyard under said Act and are, therefore, no longer subject to the provisions of the Act.

Facility No., name, and location of stockyard	Date of posting

Rural Electrification Administration

WESTERN FARMERS ELECTRIC COOPERATIVE, ANADARKO, OKLA.

Proposed Loan Guarantee

Under the authority of Pub. L. 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in REA Bulletin 20-22 (Guarantee of Loans for Bulk Power Supply Facilities), notice is hereby given that the Administrator of REA will consider: (a) Providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of $26,143,000 to Western Farmers Electric Cooperative of Anadarko, Okla., and (b) supplementing such a loan with an insured REA loan at 5-percent interest in the approximate amount of $10,000,000 to this cooperative. These loan funds will be used to finance a project consisting of approximately 320 miles of 138 kV transmission line and related facilities. Also included are funds for additional headquarters facilities at Anadarko and McAlester, Okla.

Legally organized lending agencies capable of making, holding, and servicing the loan proposed to be guaranteed may obtain information on the proposed project, including the engineering and economic feasibility studies and the proposed schedule for the advances to the borrower of the guaranteed loan funds from Mr. Maynard Human, Manager, Western Farmers Electric Cooperative, P.O. Box 429, Anadarko, Okla. 73005.

In order to be considered, proposals must be submitted on or before June 1, 1978, to Mr. Human. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as Western Farmers and REA deem appropriate. Prospective lenders are advised that the guaranteed financing for this project is available from the Federal Financing Bank under a standing agreement with the Rural Electrification Administration.

Copies of REA Bulletin 20-22 are available from the Director, Information Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C., 20250.

Dated at Washington, D.C., this 24th day of April 1978.

DAVID A. HAMIL,
Administrator, Rural Electrification Administration.

CIVIL AERONAUTICS BOARD

[Docket 30697]

CARIBBEAN AREA SERVICE INVESTIGATION

Notice of Prehearing Conference

Notice is hereby given that a prehearing conference in the above-entitled matter is assigned to be held on June 1, 1978, at 9:30 a.m. (local time), in Room 1003, Hearing Room A, Universal North Building, 1875 Connecticut Avenue NW., Washington, D.C., before the undersigned.

In order to facilitate the conduct of the conference, parties are instructed to submit one copy to each party and six copies to the Judge of (1) proposed statements of issues; (2) proposed stipulations; (3) proposed requests for information and for evidence; (4) statements of positions; and (5) proposed procedural dates. The Bureau of Pricing and Domestic Aviation will circulate its material on or before May 15, 1978, and the other parties on or before May 30, 1978. The submisions of the other parties shall be limited to points on which they differ with the Bureau of Pricing and Domestic Aviation, and shall follow the numbering and lettering used by the Bureau to facilitate cross-referencing.

Dated at Washington, D.C., April 25, 1978.

WILLIAM A. KANE, JR.,
Adminsitrative Law Judge.

[Dockets 28515, 28604 and 28578; Order 78-4-151]

VARIOUS AIR CARRIERS

Order Relating to Approval of Various Control Relationships Under Section 408 of the Act or an Exemption Therefrom

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 24th day of April 1978.

By Order 77-11-42, we granted final approval to the proposals of various air carriers to acquire control of tour operator subsidiaries abroad which would market foreign-originating, nonexclusive tour type charters. By that order, we deferred action, however, on the requests of three carriers—Pan American, Trans International (TIA), and World—for additional and expanded authority.[1] By these requests, in Dockets 28515, 28604, and 28578, respectively, Pan American is seeking expanded authority to control its subsidiary in the United Kingdom to the extent that the subsidiary would market inclusive tours in conjunction with its scheduled services; TIA is seeking authority to control additional wholly owned tour operator subsidiaries to market foreign-originating, nonexclusive tour type charters in Luxemburg and Switzerland; and World is seeking blanket authority to acquire control of such tour operator subsidiaries in any country in which the flag-carrier of that nation already controls a tour operator.

In support of these requests for further authority, Pan American states

[1]These requests were filed subsequent to the issuance of our show cause order, Order 77-6-34, and therefore, were not considered on their merits in our final order, Order 77-11-42.

MAY 2 1978
UMI

V 43 | 85

that it needs expanded authority to market inclusive tours in scheduled service through its subsidiary in the United Kingdom because of the requirement of the Association of British Travel Agents that these programs be marketed through a separate subsidiary, rather than on an inhouse basis; TIA states that both Switzerland and Luxemburg have followed liberal policies with respect to the marketing of charters originating in those countries, and that it believes it would be competitively desirable for it to integrate vertically in those countries; and World submits that a grant of blanket authority would enable it to respond more promptly to competitive threats abroad.

We are tentatively prepared to approve the requests of Pan American and TIA for further authority, but have decided to deny World's request for a blanket authorization. Although no answers or comments were received in response to the former requests and although these requests do not appear to raise any significant questions of law, policy or material fact not considered previously by us in Orders 77-6-34 and 77-11-42, we, nonetheless, believe that interested persons should be provided with an opportunity to comment on these proposals and our tentative decision to approve them. As indicated, Pan American is seeking authority to employ its subsidiary in the United Kingdom to market inclusive tours in conjunction with its scheduled services. It states it requires this authority because the Association of British Travel Agents permits the marketing of inclusive tours only through a separate subsidiary, rather than on an in-house basis. Thus, for Pan American, such control is a prerequisite for it to market inclusive tours in the United Kingdom.

Scheduled airlines are already permitted to market inclusive tours on their regularly scheduled flights. By Order 76-12-101, we denied two petitions for rulemaking aimed at precluding such activity. In so doing, we did not find the marketing of these tours to be either adverse to the public interest or anticompetitive. In essence, as far as we are concerned, Pan American is merely seeking authority to do through a subsidiary what it is already permitted to do directly. Moreover, as was the case with the control relationship which we considered in Orders 77-6-34 and 77-11-42, the primary competitive effects of Pan American's expanded control of its subsidiary will take place in the United Kingdom. In view of the foregoing, we tentatively find that Pan American's request for this expanded authority should be granted. Consistently with our earlier findings, we tentatively find that a grant of this authority to Pan American will not affect the control of any air carrier directly engaged in the operation of aircraft in air transportation, result in creating a monopoly or otherwise tend to restrain competition.[2]

TIA is requesting authority to control additional tour operator subsidiaries in Switzerland and Luxemburg. By Order 77-11-42, we permitted the company to acquire control of wholly owned tour operator subsidiaries in Belgium, France, the Federal Republic of Germany, Italy, the Netherlands and the United Kingdom to market noninclusive tour type charters originating in those countries. TIA is now seeking identical authority for similar subsidiaries in Switzerland and Luxemburg. We believe that the policy considerations which prompted us to conclude that it should be permitted to control the other subsidiaries are equally applicable here. Moreover, the primary competitive effect of TIA's control of these additional subsidiaries will take place in foreign markets. Thus, we tentatively find that TIA's request to control these additional subsidiaries should be approved. A grant of such authority would appear to be consistent with the action we took in Order 77-11-42. Moreover, it does not appear that a grant of this additional authority would affect the control of any air carrier directly engaged in the operation of aircraft in air transportation, result in creating a monopoly or otherwise tend to restrain competition.

All interested persons will be given twenty (20) days following the date of service of this order to show cause why our tentative findings, set forth above, should not be made final. Answers to these objections will be due ten (10) days after the time for filing objections to support their objections with legal precedent, detailed facts and economic analysis. If further hearing procedures are requested, the objecting party should state in detail why such procedures are considered necessary, and what relevant and material facts can be expected to be established through such procedures which cannot be established through written pleadings. General, vague or unsupported allegations will not be considered.

We see some merit to World's request for blanket authority to acquire tour operators in countries where the national carrier already controls a tour operator. Many foreign countries allow such control relationships to be established quickly, with only a minimum of government review. If U.S. carriers are subject to formal proceedings before such relationships can be established, they may suffer a competitive disadvantage until the proceedings are completed. This seems all the more unfortunate in light of our findings here and in Order 77-11-42 that the experience in a number of countries failed to demonstrate that such control relationships have adverse consequences for the public. Nevertheless, the World request is rather broad, and it comes at a particularly difficult time for us to make sweeping changes in the relationships between air carriers and tour organizers.

The Board will be receiving public comments soon on very significant liberalizations of the rules governing charter air transportation. A final charter rule is expected by this summer. Many of the proposed liberalizations—elimination of advance purchase and roundtrip requirements, for example—would remove differences between charter and scheduled air transportation that have been cited as factors in the legal distinction between the two types of air transportation. The fact that charter transportation is marketed and sold to the public by a tour operator also has been considered quite relevant to this legal distinction. If we are to allow generalized changes in the relationships between tour organizers and air carriers, it would seem wiser to do so only after the legal implications of our new charter rules are somewhat clearer.

For these reasons, we will deny World's request at this time. At the same time, we emphasize that we do not intend to impose an unnecessary marketing handicap on U.S. air carriers' overseas operations. We will give the speediest possible consideration to specific requests for approval of control relationships of this type in the future.

Accordingly, *It is ordered* That: 1. All interested persons be directed to show cause why the Board should not issue an order making final its tentative findings and conclusions set forth in this order;

2. Any interested person having objection to the issuance of an order making final any of the proposed findings or conclusions set forth in this order shall, within twenty (20) days after the date of service of this order, file with the Board and serve upon all the parties noted in paragraph 5 a statement of objections supported by legal precedent, detailed facts and economic analysis; answers to the objections will be due ten (10) days after the time for the filing of objections has expired;

3. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order in accordance with the tentative findings and conclusions set forth in this order;

[2] We will grant the motion Pan American filed requesting that an order be issued pursuant to Order 77-11-42.

M Y 2 7 8 UMI

4. The outstanding request of World Airways, Inc., in Docket 28578, for further authority be denied; and

5. The motion of Pan American that an order be issued pursuant to Order 77-11-42 be granted.

This order shall be published in the FEDERAL REGISTER, and served on all parties of record in Dockets 28515, 28604 and 28578.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,[3]
Secretary.

[FR Doc. 78-11903 Filed 5-1-78; 8:45 am]

[3] All Members concurred.

DEPARTMENT OF COMMERCE

Industry and Trade Administration

EXPORT MONITORING REPORT FOR COAL AND COKE OF COAL

Week Ending March 31, 1978

Total bituminous coal exports for this week were 214,163 short tons compared with 550 short tons exported the preceding week. All exports for the week were of metallurgical grade. The weighted average price of coal exports for this week was $52.07 per short ton with a high and low price of $60 and $48.73 per short ton, respectively. With the current level of export activity, only a small number of firms reported coal shipments during the week. A breakdown of these exports by volatility and area of destination is, therefore, withheld from this report to prevent disclosure of information deemed to be confidential pursuant to section 7(c) of the Export Administration Act of 1969, as amended.

Exports of coke manufactured from coal for this week were 4,317 short tons compared with 4,488 short tons exported the preceding week and a weekly average of 11,600 short tons for the preceding 6 weeks. The weighted average price of this commodity for the week was $127.48 per short tons with a reported high and low price of $142.79 and $122 per short ton, respectively. Coke of coal export prices for the week indicate no price changes.

Domestic coal production for the week was 11,945,000 short tons, and increase from the 8,355,000 short tons produced the preceding week. On March 24, 1978, the United Mine Workers of America and the Bituminous Coal Operators Association approved a new labor contract which officially ended the coal strike that started on December 6, 1977. This week's increase in production reflects the resumption of mining operations with the end of the strike.

Total bituminous coal consumption for this week was estimated to be 9,655,000 short tons compared with 9,431,000 short tons consumed the preceding week. Total end-of-week coal inventories were estimated to be 81,314,000 short tons, a decrease of 745,000 short tons from the preceding week. This relatively small decrease in total coal inventories indicates that domestic consumer receipts and consumption of coal are approaching a balance.

No movement in domestic coal prices is noted for the week ending March 31, 1978.

STANLEY J. MARCUSS,
Deputy Assistant Secretary for Trade Regulation.

National Oceanic and Atmospheric Administration

PUBLIC HEARINGS ON DRAFT Environmental Impact Statement

Notice is hereby given that the Office of Coastal Zone Management, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, will hold public hearings for the purpose of receiving comments on the Draft Environmental Impact Statement for the Coastal Management Program of the State of Maine.

The hearings will be held on May 22, 1978, in the Council Chambers at the Hampden Town Hall on Main Road, in Hampden, Maine; on May 23, 1978, in Room 113 of the State Office Building on Capitol Street, in Augusta, Maine; and on May 24, 1978, in Room 318 at the Greater Portland Council of Governments, at 331 Veranda Street, in Portland, Maine. Each of the hearings will begin at 7:30 p.m.

The views of interested persons and organizations are solicited. These may be expressed orally or in written statements.

Presentations will be scheduled on a first-come, first-serve basis, but may be limited to a maximum of 10 minutes or as otherwise appropriate. Priority will be given to those with written statements. Time will be available at the end of the meeting for persons without statements to present their views orally. The Office of Coastal Zone Management staff may question any speaker following presentation of his/her statement. No verbatim transcript of the hearing will be maintained; but staff present will record the general thrust of the remarks.

Persons or organizations wishing to be heard on this matter should contact the Office of Coastal Zone Management as soon as possible so that an appearance schedule may be drawn up and definite times established for presentations. Please contact:

June Cradick, Office of Coastal Zone Management, National Oceanic and Atmospheric Administration, 3300 Whitehaven St. NW, phone: 202-634-4242, Washington, D.C. 20235.

Written comments may also be submitted by mail to the Office of Coastal Zone Management. Such comments should be received before June 12, 1978, to assure adequate consideration for inclusion in the Final Environmental Impact Statement.

Copies of the Draft Environmental Impact Statement may be obtained by contacting the Office of Coastal Zone Management or:

Esther Lacognata, State Planning Office, Resource Planning Division, 189 State Street, phone: 207-289-3155, Augusta, Maine 04333.

Comments may address the adequacy of the impact statement and/or the nature of the Maine Coastal Management Program.

Following consideration of the comments received at these hearings, as well as written comments submitted, the Office of Coastal Zone Management will prepare the final environmental impact statement pursuant to the National Environmental Policy Act of 1969 and implementing guidelines.

Dated: April 26, 1978.

R. L. CARNAHAN,
Acting Assistant Administrator for Administration.

National Oceanic and Atmospheric Administration

National Marine Fisheries Service

SEA WORLD, INC.

Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take and import marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: (a) Name: Sea World, Inc., Dr. Lanny Cornell, Vice President. (b) Address: 1720 South Shores Road, Mission Bay, San Diego, Calif. 92109.

2. Type of permit: Public Display and Scientific Research.

3. Name and number of animals: Killer whales (*Orcinus orca*), 4.

4. Type of take: To capture and maintain in a permanent facility. Animals will be utilized for public display, opportunistic research and captive propagation.

5. Location of activity: North Atlantic waters, Iceland or Scandinavia.

6. Period of activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the FEDERAL REGISTER the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.

Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Mass. 01930.

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731.

Dated: April 24, 1978.

ROLAND FINCH,
Acting Deputy Assistant, Director for Fisheries Management, National Marine Fisheries Service.

National Technical Information Service

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161 for $4 ($8 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator, National Technical Information Service.

U.S. DEPARTMENT OF THE ARMY, Office of Judge Advocate General, Patent Division, Room 2C-455, Pentagon, Washington, D.C. 20314.

Patent 3,995,792: Laser Missile Guidance System; filed Oct. 15, 1974; patented Dec. 7, 1976; not available NTIS.

Patent 4,001,287: Reaction Product of Normal Lead Beta Resorcylate and Monobasic Cupric Salicylate; filed Feb. 18, 1972; patented Jan. 4, 1977; not available NTIS.

Patent 4,002,064: Rifled Soft Recovery System; filed Feb. 19, 1976; patented Jan. 11, 1977; not available NTIS.

Patent 4,002,123: Dual Channel Redundant Fuze; filed July 11, 1975; patented Jan. 11, 1977; not available NTIS.

Patent 4,003,659: Single Plane Corner Reflector Guidance System; filed Nov. 15, 1974; patented Jan. 18, 1977; not available NTIS.

Patent 4,003,953: Purification of TNT with Magnesium Sulfite-Bisulfite Mixtures; filed Feb. 23, 1976, patented Jan. 18, 1977; not available NTIS.

Patent 4,004,754: High-Speed, High-G Air Bearing Optical Mount for Rosette Scan Generator; filed July 11, 1974; patented Jan. 25, 1977; not available NTIS.

Patent 4,005,931: Sealed Cassette for Optical Sound Projection; filed Jan. 15, 1974, patented Feb. 1, 1977; not available NTIS.

U.S. DEPARTMENT OF AGRICULTURE, Research and Agreements and Patent Branch, General Services Division, Federal Building, Agricultural Research Service, Hyattsville, Md. 20782.

Patent 4,056,354: Process for Rapid Dyeing of Textiles. Filed Feb. 10, 1976; patented Nov. 1, 1977; not available NTIS.

Patent 4,064,283: Preparation of Protein Concentrates from Whey and Seed Products; filed June 14, 1976; patented Dec. 20, 1977; not available NTIS.

Patent 4,069,106: Immobilization of Enzymes on Keratin; filed Jan. 13, 1977; patented Jan. 17, 1978; not available NTIS.

U.S. DEPARTMENT OF COMMERCE, National Technical Information Service, 5285 Port Royal Road, Springfield, Va. 22161.

Patent application 868,356: Inverse Fourth Power Photometric Calibrator; filed Jan. 10, 1978.

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161 for $4 ($8 outside North American Continent). Requests for copies of patent applications must include the patent application number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator, National Technical Information Service.

U.S. DEPARTMENT OF THE ARMY, Office of Judge Advocate General, Patent Division, Room 2C-455, Pentagon, Washington, D.C. 20314.

Office of the Secretary

NATIONAL LABORATORY ACCREDIATION CRITERIA COMMITTEE FOR THERMAL INSULATION MATERIALS

Open Meeting

The National Laboratory Accreditation Criteria Committee for Thermal Insulation will hold its first meeting on May 22-23, 1978, in the Main Commerce Building, 14th Street and Constitution Avenue NW., Washington, D.C. (public entrance to the building is on 14th Street, between Constitution Avenue and E Street NW.). The Committee will meet from 10 a.m. to 7 p.m. on May 22 in Room 6802 and from 9 a.m. to 1 p.m. in Room 4833 on May 23.

The Committee was established on October 12, 1977 (42 FR 55020) to develop and recommend to the Secretary of Commerce, general and specific criteria for accrediting testing laboratories that test thermal insulation materials. The Committee consists of 21 members; 10 of whom represent producers, distributors, users, consumers, academia, testing laboratories, and general interests in the private sector; 6 of whom represent Federal agency interests; and 4 of whom represent state and local government interests. The Committee is chaired by Dr. Howard I. Forman, Deputy Assistant Secretary for Product Standards, of the Department of Commerce.

Tentative agenda items include:

1. Discussion of Committee objectives and schedules.
2. Background of the National Voluntary Laboratory Accreditation Program for Thermal Insulation Materials.
3. The role of the National Bureau of Standards (NBS) and a discussion of the practical aspects of evaluating laboratories.
4. Concepts used in preparing suggested laboratory evaluation criteria.
5. Suggestions for general and specific criteria.
6. Sources of and criteria for laboratory assessors.

The meeting will be open to public observation. The public may submit written statements or inquiries to the Chairman before or after the meeting. A limited number of seats will be available to the public and to the press on a first-come, first-served basis.

Copies of the minutes and material distributed will be made available for reproduction, following certification by the Chairman, in accordance with the Federal Advisory Committee Act, at the U.S. Department of Commerce Central Reference Service and Inspection Facility, Washington, D.C. 20230.

Additional information may be obtained from Mr. John W. Locke, Coordinator, National Voluntary Laboratory Accreditation Program, Room 3876, U.S. Department of Commerce, Washington, D.C. 20230. Telephone: 202-377-5872.

Dated: April 27, 1978.

JORDAN J. BARUCH,
Assistant Secretary for Science and Technology.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

REPUBLIC OF CHINA

Announcing an Additional Exempt Textile Product

APRIL 27, 1978.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Exempting traditional Chinese caps from the levels of restraint established under the terms of the bilateral textile agreement between the Governments of the United States and the Republic of China.

SUMMARY: The Governments of the United States and the Republic of China have agreed to exempt traditional Chinese caps from the levels of restraint established under the terms of the Interim Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 16, 1977, as amended, in addition to other handmade and traditional textile products, previously designated (See 41 FR 30212). Accordingly, there is published below a letter of April 27, 1978 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, directing that traditional Chinese caps be added to the list of items which are currently exempt from the agreement. A complete list of exempt items is published as an enclosure to that letter.

EFFECTIVE DATE: May 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Judith L. McConahy, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, 202-377-5423.

ARTHUR GAREL,
Acting Chairman, Committee for the Implementation of Textile Agreements.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

APRIL 27, 1978.

COMMISSIONER OF CUSTOMS,
Department of the Treasury, Washington, D.C.

DEAR MR. COMMISSIONER: This directive further amends, but does not cancel, the directive of April 19, 1973 from the Chairman, Committee for the Implementation of Textile Agreements, which established a certification procedure to exempt certain traditional textile products from the levels of restraint of bilateral textile agreements between the Governments of the United States and the Republic of China.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 16, 1977, as amended, between the Governments of the United States and the Republic of China; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, the directive of April 19, 1973, is further amended, effective on May 1, 1978, to exempt traditional Chinese caps, in addition to those items previously designated, when they are properly certified. A complete list of currently exempt items is enclosed.

The actions taken with respect to the Government of the Republic of China and with respect to imports of cotton, wool and man-made fiber textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ARTHUR GAREL,
Acting Chairman, Committee for the Implementation of Textile Agreements.

DESIGNATED EXEMPT TEXTILE PRODUCTS FROM THE REPUBLIC OF CHINA

1. Pincushions.

V 43 | 85 MY 2 78 UMI

2. Embroideries (needlework), of man-made fabrics with designs embroidered with wool thread.
3. Handmade carpets, i.e., in which the pile was inserted or knotted by hand.
4. Christmas or Easter ornaments having a non-textile core or an non-textile structured frame and man-made fiber textile covering.
5. Toy (novelty) animals, birds or insects with a plastic, wire, or other non-textile core that are covered or decorated with textile thread or fiber.
6. Judo Uniforms.
7. Karate Uniforms.
8. Kung Fu Uniforms.
9. Traditional Chinese Padded Jackets.
10. Traditional Chinese Caps.

COMMODITY FUTURES TRADING COMMISSION

PROPOSED FUTURES CONTRACTS

Notice of Availability

The Commidity Futures Trading Commission ("Commission") is making available and requesting public comment on three proposed futures contracts:

1. A cattle contract submitted by the Mid-America Commodity Exchange;
2. A 30 day commercial paper contract submitted by the Chicago Board of Trade; and
3. A Government National Mortgage Association—backed certificate delivery contract submitted by the Chicago Board of Trade.

These Exchanges have applied to the Commission, pursuant to section 6 of the Commodity Exchange Act, as amended ("Act"), 7 U.S.C. 8 (1976), for contract market designation to trade futures contracts in these three commodities under sections 5 and 5a of the Act, 7 U.S.C. 7 and 7a (1976).

Copies of these proposed contracts will be available at the Commission's offices in Washington, New York, Chicago, Minneapolis, Kansas City and San Francisco. The Commission will also furnish copies upon request made to the Executive Secretariat.

Any person interested in expressing views on the terms and conditions of any of these proposed contracts should send comments by July 3, 1978 to Ms. Jane Stuckey, Executive Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.D., 20581. 202-254-6316. Copies of all comments will be available for inspection at the Commission's Washington office.

Issued in Washington on April 27, 1978.

WILLIAM T. BAGLEY,
Chairman.

[FR Doc. 78-11838 Filed 5-1-78; 8:45 am]

[6351-01]

PROPOSED FUTURES CONTRACTS

Notice of Availability

The Commodity Futures Trading Commission ("Commission") is making available and requesting public comment on the proposed futures contract in Government National Mortgage Association-backed certificates ("GNMA's") submitted by the newly formed Amex Commodities Exchange, Inc. ("ACE"). ACE has applied to the Commission, pursuant to section 6 of Commodity Exchange Act, as amended (Act"), 7 U.S.C. 8 (1976), for contract market pursuant to sections 5 and 5a of the Act 7 U.S.C. 7 and 7a (1976). The ACE is in its formative stages and the GNMA contract, if approved, will be the first futures contract to trade on that exchange. In making the proposed contract available to the public, the Commission is not passing upon the merits of the ACE designation request.

Copies of the proposed GNMA contract will be available at the Commission's offices in Washington, New York, Chicago, Minneapolis, Kansas City, and San Francisco. The Commission will also furnish copies upon request to the Executive Secretariat.

Any person interested in expressing views on the terms and conditions of this proposed contract should send comments by July 3, 1978, to Ms. Jane Stuckey, Executive Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, 202-254-6316. Copies of all comments will be available for inspection at the Commission's Washington office.

Issued in Washington on April 27, 1978.

WILLIAM T. BAGLEY,
Chairman.

[FR Doc. 78-11839 Filed 5-1-78; 8:45 am]

[6351-01]

PROPOSED FUTURES CONTRACTS

Notice of Availability

The Commodity Futures Trading Commission ("Commission") is making available and requesting public comment on the proposed futures contracts in milled rice, cotton, and soybeans submitted by the now forming New Orleans Cotton and Commodity Exchange ("NOCCE"). The NOCCE has applied to the Commission, pursuant to section 6 of Commodity Exchange Act, as amended ("Act"), 7 U.S.C. 8 (1976), for contract market designation to trade futures in these three commodities under sections 5 and 5a of the Act 7 U.S.C. 7 and 7a (1976). The NOCCE is in its formative stages. In seeking public comment on these three contracts, the Commission is not passing upon the merits of the designation request.

Copies of the proposed contracts will be available at the Commission's offices in Washington, New York, Chicago, Minneapolis, Kansas City, and San Francisco. The Commission will also furnish copies upon request made to the Executive Secretariat.

Any person interested in expressing views on the terms and conditions of these proposed contracts should send comments by July 3, 1978, to Ms. Jane Stuckey, Executive Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, 202-254-6316. Copies of all comments will be available for inspection at the Commission's Washington office.

Issued in Washington on April 27, 1978.

WILLIAM T. BAGLEY,
Chairman.

COMMUNITY SERVICES ADMINISTRATION

SUMMER YOUTH RECREATION PROGRAM

Acceptance of Applications

Notice is hereby given that the Community Services Administration is accepting applications from eligible agencies for the Summer Youth Recreation Program funded under Section 222(a)(13) of the Economic Opportunity Act of 1964, as amended.

Eligible agencies, application procedures, and rules and regulations governing this program are the same as those promulgated for last year's program with the exception that deadline for submission of applications is extended to May 10, 1978. They can be found in 42 FR 13292 (March 10, 1977) and in CSA Instruction 6168-2b.

Applicants are reminded that the Clearinghouse notification and review process is applicable to this program and, therefore, it is in their best interest to file their notice of intent immediately upon determination to apply for funds from CSA under this program.

Copies of CSA Instruction 6168-2b with an updated list of State School Lunch Directors will be forwarded to SYRP grantees in approximately three to four weeks.

GRACIELA (GRACE) OLIVAREZ,
Director.

[3128-01]

DEPARTMENT OF ENERGY

PRIVACY ACT OF 1974

Systems of Records; Proposed Amendment to System FEA 14

AGENCY: Department of Energy

ACTION: Proposal to revise existing system of records.

SUMMARY: Pursuant to section (3)(o) of the Privacy Act of 1974, 5 U.S.C. 552a(o); the Office of Management and Budget (OMB) Guidelines issued thereunder; and OMB Circular No. 108, September 30, 1975, the Department of Energy (DOE) hereby publishes a notice of proposed revision of an existing System of Records.

DOE has submitted to Congress and to OMB a New System Report, as required by the Privacy Act and the OMB Guidelines. A copy of the report is available for inspection at the DOE Public Document Room, 20 Massachusetts Avenue NW., Washington, D.C. 20545.

The system to be revised was established by the former Federal Energy Administration (FEA) as FEA System 14. Public notice of the existence and character of the system was last previously published on September 30, 1977. 42 FR 53488 (1977). At that time a notice of proposed amendment to FEA 14 was also published. 42 FR 52483 (1977). No comment was received which resulted in a change and the system became effective as therein amended. The authority to maintain FEA 14 was transferred to the Department of Energy, effective October 1, 1977, by notice published on October 11, 1977. 42 FR 54856 (1977). The system will continue to be known as FEA 14 until a consolidated DOE system of records is developed and notice of any changes are published.

The system description, including the proposed revisions, is published in its entirety. The "system location" is amended to indicate that the System of Records is now partially located at the Richland Operations Office. "Categories of individuals" covered by the system is amended to include employees of the Richland Operations Office, of DOE contractors and of other nearby employees. The Headquarters portion of the system is amended to include all DOE employees in the Washington D.C. Metropolitan area.

"Categories of records" in the system is expanded to include participants' payroll or other assigned number, telephone number, and carpooling information. "Routine uses" of records maintained in the system is amended to indicate that the information will be made available to individuals seeking to join a carpool which operates from their residence area. "Storage" is amended to indicate that magnetic tape is used as a storage medium.

"Retrievability" is amended to add address, license number and payroll or other assigned number as retrieval methods. The description of "safeguards" is amended to indicate that magnetic tapes will be stored in a restricted area and paper records in lockable file cabinets. Access to the records is limited to DOE personnel who need the information to perform their official duties. "Retention and disposal" is amended to indicate that carpool records will be retained for two years and that parking records will be retained until new parking assignments are made (approximately six months).

"System manager" is amended to add, for records at the Richland Operations Office, Manager, Richland Operations Office, Department of Energy, P.O. Box 550, Richland, Wash. 99352. The "system manager" for Headquarters is Director, Office of Administrative Services, Department of Energy, 20 Massachusetts Avenue NW., Washington, D.C. 20545.

Interested persons who wish to submit written comment or suggestions for consideration in connection with this notice should send them to George Barrow, Department of Energy, 20 Massachusetts Avenue NW., Washington, D.C. 20545. Comments on the proposed document may be examined at the Richland Operations Office, Department of Energy, Richland, Wash. and the DOE Public Document Room, 20 Massachusetts Avenue NW., Washington, D.C. If no comments are received, the DOE will institute the system as amended on June 1, 1978. Should DOE receive any comments in response to this notice of proposed revision which would result in a change in the amended system description as published herein, DOE will publish notice of such changes and amend the description of the system of records.

In consideration of the foregoing DOE hereby proposes to amend the notice of September 30, 1977 last previously publishing FEA System 14 (42 FR 53488 (1977)) to read as set forth below.

Issued in Washington, D.C., April 26, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration.

FEA-14

System name:

Employee Carpool Parking.

V 4 3 — 8 5
M Y 2
7 8
UMI

Security classification:

Unclassified.

System location:

For Headquarters the location of records is:

Office of Administrative Services, Department of Energy, 20 Massachusetts Avenue NW., Washington, D.C. 20545.

For the Richland Operations Office the location of records is:

Richland Operations Office, Department of Energy, P.O. Box 550, Richland, Wash. 99352.

Categories of individuals covered by the system:

All DOE employees located in Washington D.C. Metropolitan area who apply as members of a carpool of DOE controlled parking spaces; and employees of DOE, of DOE contractors and of nearby employers at Richland, Wash.

Categories of records in the system:

Name; Federal service computation date; payroll or other assigned number; office address and telephone; home address and telephone; make, year, state of registration, and tag number of pool vehicles; and number of days per week in the carpool; and carpooling information.

Authority for maintenance of the system:

Department of Energy Organization Act, Pub. L. 95-91; Federal Management Circular 1-74.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Dissemination to individuals seeking to join a carpool which operates from their residence area. Other routine uses are listed in Appendix B.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records and magnetic tape.

Retrievability:

Name, location of parking assignment, home address, payroll or other assigned number, and license number.

Safeguards:

Paper records are maintained in a lockable metal file cabinet. Magnetic tapes are stored in a restricted area. Access is limited to DOE and contractor personnel who need the information to perform their official duties.

Retention and disposal:

Parking records are retained until new parking assignments are made (approximately six months). Carpool records are retained for two years.

System manager(s) and address:

For records at Headquarters:

Director, Office of Administrative Services, Department of Energy, 20 Massachusetts Avenue NW., Washington, D.C. 20545.

For records at the Richland Operations Office:

Manager, Richland Operations Office, Department of Energy, P.O. Box 550, Richland, Wash. 99352.

Notification procedure:

Requests by an individual to determine if a system of records contains information about him should be directed to the Privacy Act Officer, Department of Energy, Washington, D.C. 20461, in accordance with DOE's Privacy Act Regulations (10 CFR 206.3, 42 FR 53578 (September 30, 1977)).

Record access procedures:

Requests by an individual for access to a system of records that contains information about him should be directed to the Privacy Act Officer, Department of Energy, Washington, D.C. 20461, in accordance with DOE's Privacy Act Regulations (10 CFR 206.3, 42 FR 53578 (September 30, 1977)).

Contesting record procedures:

Request by an individual to correct or amend the content of a record containing information about him should be directed to the Privacy Act Officer, Department of Energy, Washington, D.C. 20461, in accordance with DOE's Privacy Act Regulations (10 CFR 206.7, 42 FR 53581 (September 30, 1977)).

Record source categories:

The individual who is the subject of the record.

Systems exempted from certain provisions of the act:

None.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP78-49]

ALABAMA-TENNESSEE NATURAL GAS CO.

Order Accepting for Filing and Suspending Proposed Rate Increase, Initiating Hearing, and Establishing Procedures

APRIL 24, 1978.

On March 24, 1978, Alabama-Tennessee Natural Gas Co. (Alabama-Tennessee) tendered for filing in the captioned docket proposed changes to its FERC Gas Tariff[1] which would increase its jurisdictional rates by approximately $1,100.00 based on costs and sales volumes for the 12 months ended December 31, 1977, as adjusted for known and measureable changes through September 30, 1978. Alabama-Tennessee requests that the proposed increase be permitted to become effective on April 25, 1978. For the reasons stated below, the Commission shall accept the proposed rate increase for filing, suspend it for five months, and set the matter for hearing.

Public notice of Alabama-Tennessee's filing was issued on April 10, 1978, providing for protests or petitions to intervene to be filed on or before April 21, 1978.

Alabama-Tennessee states that the principal reasons for its proposed rate increase are (1) increases in its operating costs, (2) the need to recover fixed costs over the reduced volumes of gas available for sale, and (3) the need for increases in its allowed depreciation rate and rate of return. Alabama-Tennessee claims an increase in its depreciation rate from 4 percent to 5.75 percent, and an overall rate of return of 13.65 percent, including a return of 15.50 percent on common equity.

Based on a review of Alabama-Tennessee's filing herein, the Commission finds that the proposed higher rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, or otherwise unlawful. Accordingly, the Commission shall accept Alabama-Tennessee's proposed rate increase for filing, suspend its use for five months or until September 25, 1978, when it shall be permitted to become effective, subject to refund, and shall set the matter for hearing, as hereinafter conditioned.

Alabama-Tennessee has included in its filing costs associated with certain facilities which have not been certificated and placed in service at this time. Consequently, Alabama-Tennessee shall be required to file revised rates and supporting materials reflecting the elimination of costs associated with facilities not certificated and placed in service by September 25, 1978, the effective date of the rates suspended by this order.

For purposes of its filing, Alabama-Tennessee has used the Atlantic-Seaboard[2] method of cost classification in determining rates. The Commission believes that the use of the Atlantic Seaboard method may be inadequate and contrary to the public interest under the present conditions of gas supply shortages and resulting curtailments of service. The Commission also notes that because of successive pipeline rate filings which create locked-in periods, the Commission's efforts to adopt a just and reasonable cost classification, allocation, and rate design differing from Atlantic Seaboard may be frustrated. To the extent that the rate structure found just and reasonable for Alabama-Tennessee after hearing and decision departs from the Atlantic Seaboard methodology by assigning additional fixed costs to the commodity component of its rates, undercollections may occur. Alabama-Tennessee is hereby placed on notice that it may be subject to undercollections if, after hearing and decision, the Commission finds its proposed use of the Atlantic Seaboard method to be improper.

We note that section 21.1 of the General Terms and Conditions of Alabama-Tennessee's Tariff provides that Alabama-Tennessee shall refund to its resale customers only those amounts "• • • which have been received by Seller from Supplier pursuant to final and non-appealable action by the Commission or the Courts in any pending or other proceeding." This tariff provision may not be in the public interest in that it could be used to prevent the timely flow-through of supplier refunds which have been ordered by the Commission. Accordingly, we direct the parties to this proceeding to address the issue of whether this tariff provision is just and reasonable.

The Commission finds: It is necessary and proper in the public interest and in carrying out the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the rates propposed by Alabama-Tennessee and that the same be accepted for filing and suspended as hereinafter ordered.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 8, 9, and 15 thereof, and the Commission's rules and regulations, a public hearing shall be held concerning the lawfulness of the increased rates proposed by Alabama-Tennessee.

(B) Pending hearing and decision, Alabama-Tennessee's proposed rate increase is accepted for filing and suspended until September 25, 1978, when it shall be permitted to become effective, subject to refund, upon motion filed by Alabama-Tennessee in accordance with the provisions of the Natural Gas Act.

(C) Alabama-Tennessee shall file revised tariff sheets on or before September 25, 1978, reflecting the elimination of costs included in the proposed rates associated with facilities which have not been certificated and placed in service by September 25, 1978. Alabama-Tennessee shall also submit supplemental cost and revenue data reflecting the elimination of such costs from its cost of service.

(D) The Commission Staff shall prepare and serve top sheets on all parties on or before August 4, 1978.

(E) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge, for that purpose (18 CFR 3.5(d)), shall convene a settlement conference in this proceeding to be held within 10 days after the service of top sheets by the staff, in a hearing or conference room of the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Presiding Administrative Law Judge is authorized to establish such further procedural dates as may be necessary and to rule upon all motions (except motions to consolidate, sever, or dismiss), as provided for in the rules of practive and procedure.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission. Chairman Curtis voted present.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP78-123]

ALCAN PIPELINE CO. (NORTHWEST ALASKAN PIPELINE CO.)

Filing for Succession in Interest, Transfer of Conditional Certificate, and Approval of Partnership Agreement

APRIL 24, 1978.

Take notice that on April 19, 1978, Northwest Alaskan Pipeline Co. (Northwest Alaskan) and Alaskan Northwest Natural Gas Transportation Co., a partnership formed under the laws of the State of New York (the Partnership), filed in the above-captioned proceeding a document entitled "Notice of Succession in Interest and Application for Transfer of Certificate of Public Convenience and Necessity (Application)." The Application recites that it is being filed pursuant to the provisions of the Alaska Natural Gas Transportation Act of 1976 (ANGTA), the Natural Gas Act and the Rules and Regulations of the Federal Energy Regulatory Commission (FERC).

By order issued December 16, 1977, the Commission, acting pursuant to ANGTA and in accordance with the President's Decision and Report to Congress on the Alaska Natural Gas Transportation System, issued conditional certificates of public convenience and necessity to the sponsors of the Alcan Pipeline Project Alcan Pipeline Co. received such a certificate in Docket No. CP78-123 to construct and operate that portion of the Alaskan pipeline project lying within the State of Alaska.

The instant Application states that, effective January 1, 1978, the name of "Alcan Pipeline Co." was changed to "Northwest Alaskan Pipeline Co." The Application further states that, on March 3, 1978, Northwest Alaskan Pipeline Co. entered into an agreement which provided for the formation of a partnership effective January 31, 1978 to act as a successor to the rights, titles and interests of Alcan Pipeline Co. under ANGTA, the President's Decision and Report, and related Commission proceedings and orders. A copy of this partnership agreement is appended to the instant Application.

In light of the circumstances described above, Applicants request appropriate orders from the Commission transferring the conditional certificate heretofore issued to Alcan Pipeline Co. to the successor Partnership, and approval of the Partnership arrangements. Applicants further request an order by the Commission that the Partnership provided for in the Partnership Agreement, and the manner of its formation, is in all things and in all respects consistent with and in conformity with the Presidential Decision and Report and related FERC orders and as such is accepted and approved.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C., 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 15, 1978. Protests will be considered by the Commission in determining the action to be taken, but will not serve to make protestants parties to this proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

MY 2 78
UMI

the above-referenced proceeding. By Notice issued February 9, 1978, the Commission established April 17, 1978, as the deadline for filing petitions to intervene or protests to the captioned license application.

The instant motion states that recent developments indicate that the City of Portland, Oreg., intends to modify and supplement its application in order to reduce the project's potential impact on water quality. The motion further states that such modifications may significantly reduce the number of contested issues in this proceeding.

Upon consideration, notice is hereby given that an extension of time is granted to and including May 15, 1978, within which to file petitions to intervene or protests in the above referenced proceeding.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket Nos. ER78-19 (Phase I) and ER78-81]

FLORIDA POWER & LIGHT CO.

Briefing Schedule

APRIL 24, 1978.

The Initial Decision in this proceeding was filed with the Secretary on April 24, 1978. As provided by §§ 1.30(a) and 1.31 of the rules of practice and procedure, Briefs On Exceptions would be due on or before May 24, 1978, and Briefs Opposing exceptions would be due on or before June 13, 1978.

As the Presiding Judge pointed out in a memorandum to the Secretary accompanying the Initial Decision, it is stated in the Initial Decision that the parties agreed to file Briefs On exceptions on or before May 8, 1978, and Briefs Opposing Exceptions on or before May 12, 1978, because of the expiration of the suspension period in this case on June 1, 1978. Notice is hereby given that the briefing schedule is shortened as the parties have agreed.

The parties are reminded, however, that the proper method for altering dates for briefs on an Initial Decision is through a formal motion to the Commission as provided for in the Commission's Rules, so that the Commission has an opportunity to rule on matters coming before it and so that the change and reasons therefor are formally called to the attention of the Commission.

LOIS D. CASHELL,
Acting Secretary.

[6740-02]

[Docket No. RI77-128]

HERBERT S. WOODS & ASSOCIATES

Amended Petition for Special Relief

APRIL 25, 1978.

Take notice that on April 1, 1978, Herbert S. Woods & Associated (Woods), P.O. Box 1367, El Dorado, Ark. amended his petition for special relief to a reduced rate of $1.55/Mcf for the sales of his estimated 200,000 Mcf of remaining recoverable reserves to Natural Gas Pipe Line Co. of America.

Woods' original petition pursuant to 18 CFR 2.76 was noticed September 29, 1977.

Any person desiring to be heard or to make any protest with reference to said petition should on or before May 15, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-11874 Filed 5-1-78; 8:45 am]

[6740-02]

[Docket No. ES78-22]

IOWA PUBLIC SERVICE CO.

Order Authorizing the Issuance of Common Stock

APRIL 24, 1978.

On February 21, 1978, Iowa Public Service Co. (Applicant) filed an application seeking an order pursuant to section 204 of the Federal Power Act authorizing the issuance of up to 100,000 shares of Common Stock (par value $5 per share), in the manner, and at prices determined pursuant to a formula, described below.

Applicant is incorporated under the laws of the State of Iowa, with its principal business office in Sioux City, Iowa, and is engaged in the electric utility business in northwestern, north central and east central Iowa and a few small communities in South Dakota.

Applicant proposes to sell the Common Stock pursuant to its Dividend Reinvestment and Stock Purchase Plan, a voluntary plan whereby employees and stockholders are able to (a) have dividends on their shares of Common and/or Preferred Stock automatically reinvested in additional shares of the Applicant's Common Stock or (b) continue to receive their cash dividends on shares registered in their names and invest in the Applicant's Common Stock by making optional cash payments of not less than $10 per payment nor more than $10,000 per quarter or (c) invest both their cash dividends and such optional cash payments. Employee participants are able to make optional cash payments through payroll deductions. No service charge or commission is paid by participants in connection with purchases under this plan, and no underwriting fee is involved. The purchase price of shares is the average of the high and low sales prices of Applicant's Common Stock on the New York Stock Exchange on each investment date (or the next preceding day on the investment date). If no trading occurs in the Applicant's Common Stock on the investment date, the purchase price is the average of the reported bid and asked prices on the New York Stock Exchange on that date. Participants are able to withdraw from the plan at any time.

The net proceeds from the sale of the Common Stock will be used to reduce existing short-term loans and those to be incurred prior to the sales. The revenue will also be used for construction purposes or for other lawful corporate purposes.

Applicant requests an exemption from the competitive bidding requirements of § 34.1a of the Commission's regulations. Applicant argues that the lack of underwriting fees, the sale of stock based upon the market price, and the ability of the small investor to purchase shares without payment of a brokerage commission or service charge warrants an exemption from competitive bidding pursuant to § 34.1a(a)(4) of the regulations.

Written notice of this application has been given to the Public Service Commissions of South Dakota and Iowa and to the Governors of those States. Notice was also given by publication in the FEDERAL REGISTER stating that any person desiring to be heard or to make any protest with reference to said application, shall file petitions or protests on or before March 15, 1978, with the Federal Energy Regulatory Commission, Washington, D.C. No petition, protest, or request to be heard in opposition has been received.

The Commission finds: (1) Iowa Public Service Company, a corporation, is a public utility within the meaning of section 204 of the Federal Power Act, subject to the jurisdiction of the Federal Energy Regulatory Commission as heretofore described and set forth in the Federal Power Commission Order issued August 22, 1963, *Iowa Public Service Company*, Docket No. E-7115 (30 FPC 536).

(2) The proposed issuance and sale of Common Stock as described above, will constitute an issuance of securities within the purview of section 204 of the Federal Power Act.

(3) Applicant is not organized and operating under the laws of a state in which the security issue here involved is regulated by a State Commission within the meaning of section 204(f) of the Federal Power Act. The proposed issuance of securities is, therefore, not exempt by virtue of that section from the requirements of section 204 of the Federal Power Act.

(4) Under the circumstances of the case, sufficient cause has been shown for exempting the proposed issuance of Common Stock from the competitive bidding requirements of § 34.1a(b) and (c) of the regulations under the Federal Power Act.

(5) The proposed issuance and sale of Common Stock, as hereinafter authorized, will be for a lawful object within the corporate purposes of the Applicant and compatible with the proper performance by Applicant of service as a public utility and which will not impair its ability to perform that service, and is reasonably necessary and appropriate for such purposes.

(6) The period of public notice given in this matter is reasonable.

The Commission orders: (A) The proposed issuance and sale of 100,000 additional shares of Common Stock, par value $5 per share, upon the terms and conditions and for the purposes specified in the application, as described above, is hereby authorized subject to the provisions of this order.

(B) The proposed issuance of Common Stock shall be exempted from compliance with the competitive bidding requirements of § 34.1a(b) and (c) of the regulations under the Federal Power Act.

(C) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates, or determinations of cost or any other matter whatsoever now pending or which may come before this Commission.

(D) Nothing in this order shall be construed to imply any guarantee or obligation on the part of the United States with respect to any securities to which this order relates.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-11875 Filed 5-1-78; 8:45 am]

[6740-02]

[Docket No. RI77-26]

J & J ENTERPRISES, INC. ET AL.

Order Accepting Settlement Agreement, Granting Special Relief and Permitting Intervention

APRIL 25, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977 by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR—provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

On January 14, 1977, J & J Enterprises, Inc., Fairman Drilling Co., Castle Gas Co. Inc. (Original Producers) filed a petition seeking special relief pursuant to § 2.56a(g) and § 2.76 of the General Policy and Interpretations and § 154.107(e) of the Commission's[1] regulations from the area rates for the Appalachian Basin Area prescribed in Order No. 411, as amended, to collect a rate of 55.02 cents per Mcf at 14.73 psia. Also the original producers sought relief from the national rates prescribed by Opinion No. 699-H, as amended, and Opinion Nos. 770 and 770-A to collect a rate of 177.99 cents per Mcf at 14.73 psia for post-January 1, 1973 sales.

The special relief petition was noticed by the Commission on January 31, 1977. Columbia Gas Transmission Corp. and Consolidated Gas Supply Corp. filed timely interventions. National Fuel Gas Supply Corp. filed for leave to intervene out of time.

On February 18, 1977, the Original Producers filed to amend their petition by the inclusion of Additional Parties,[2] (Additional Producers). The petition for inclusion of Additional Parties was noticed by the Commission on March 14, 1977.

On February 13, 1978, J & J Enterprises, Inc., *et al*, (Petitioners), thirty-three independent small producers[3] (as defined in § 157.40 of the regulations) in Pennsylvania who are selling gas in jurisdictional transactions to three interstate pipelines[4] filed a settlement agreement and a motion to waive hearing with the Commission in the above-captioned docket.

In the settlement agreement, the Petitioners have agreed to request a rate of 61 cents per Mcf for all gas sold from Eligible Stripper Gas Wells[5] (Old

[5]Eligible Stripper Gas Wells (Old Gas Stripper Wells) shall mean those wells first commencing production prior to January 1, 1973, from which gas is sold to the Buyers under the Contracts and which continously produced or shall have produced an average of 60 Mcf per day or less per well during any continuous 12-month period commencing with the 12-month period ended December 31, 1975, or any continuous 12-month period thereafter; provided, however that the average production volume for each well whose production is measured by a single multiwell meter shall be determined for any such 12-month period by dividing the aggregate production of all wells measured by such meter by the number of wells whose production is so measured. If a well shall once have qualified for purposes hereof as an Eligible Strip-

Footnotes continued on next page

V 43 | 85

Gas Stripper Wells) and to the applicable area or national rates per Mcf for all gas from all other wells from which gas is sold pursuant to the contracts[6] subject to adjustments for production or severance taxes, Btu content, gathering allowances, escalation and other similar matters sanctioned by the Commission. In addition, the Petitioners request an annual escalation of 1 cent per Mcf commencing as of January 1, 1978, for gas purchased from Old Gas Stripper Wells. The settlement agreement, inter alia, also sets forth provisions for Petitioners to file for an increase in rates should the Old Gas Stripper Well rate prove to be uneconomical; however, should the Commission approve this settlement agreement and grant special relief, the Petitioners have agreed not to seek increased rates for gas sold pursuant to the contracts earlier than January 1, 1979 (unless eligible for special pricing arrangements under future Federal legislation or regulation applicable to such gas).

The settlement agreement was noticed by the Commission on March 7, 1978; Columbia, Consolidated, and National filed timely comments in support of the settlement agreement.

Cost Data

Data from four[7] of the thirty-three producers was used by Staff as a cost sample for pre-1973 wells. These four producers have sales encompassing over 50 percent of the total small producer jurisdictional sales in Pennsylvania. As well, this cost sample represents the cost, production and reserve experience of 240 gas wells. The other small producers have inadequate or imcomplete records with the resultant inability to furnish the data necessary for cost and gas reserve estimates. The accounting firm of Arthur Anderson & Co. and geologic consultants, Huntley & Huntley Inc. were hired by Petitioners and worked with Staff to obtain and verify the necessary basic cost, production and reserve data.

Staff also relied on the case record developed in IOGA in which the Commission approved the request of threehundred West Virginia small producers for special relief based on the same cost methodology at a base price of 2.85 cents plus 1 cent annual escalations for pre-1973 wells. It should be noted that there is a similarity between the geology and gas well drilling of West Virginia and Pennsylvania.

The Cost Method

The method approved by the Commission in IOGA and employed by Staff in this case, permits recovery of and return on net remaining investment averaged over the remaining 13.81 year life of the 240 well sample. This cost consists of the drilling and equipping cost of the gas wells as other investment costs such as lease acquisition are insignificant. For purposes of determining a return allowance, a rate base consistent with *Permian I*[8] methodology was employed which means a 15 percent rate of return is applied to 50 percent of net remaining investment for each year of the average remaining life of the wells. Other methods such as the DCF method require more precise projections of annual production data which is difficult to determine for 240 pre-1973 drilled wells of various age spud dates involved herein. Staff estimated that the remaining gas reserves as of 1975 were about 20 Bcf or 27.16 percent of the original reserves and that on the average the pre-1973 wells would produce for another 13.81 years.

Staff noted that the projected 13.81 years of operating expense of $4,264,680 is very conservative. This amount represents $309,811 per year for 240 gas wells or $1,287 per well per year or $107 per well per month. This is hardly an adequate amount if proper labor and maintenance is to be applied to these wells; in fact, the rental of one compressor would cost from $1,000 to $1,500 per month depending on the size. The subject wells are known to have poor deliverability averaging about 40 Mcf per day.

The Petitioners initially sought a Federal Income Tax (FIT) allowance at the full statutory corporate rate of 48 percent contending that the Petitioners consist mainly of partnerships with hundreds of individual taxpayers in the 50 percent tax bracket. Staff and Arthur Anderson and Co. reviewed some of the tax returns and partnership agreements and found it would be virtually impossible to determine an actual effective tax rate projected into the future for the hundreds of small individual investors in the subject wells. Staff therefore agreed to an effective tax rate of 38 percent as the "typical investor" within the Pennsylvania group. See attached Appendix A.

On the basis of this investigation, Staff agrees with Petitioners that the settlement provisions for a rate of 61 cents per Mcf for all gas sold from Old Gas Stripper Wells plus an annual escalation of 1 cent per Mcf commencing on January 1, 1978 is cost justified.

Staff believes that a 61 cent price for stripper gas wells will serve many purposes benefitting both the consumer and the producer. The higher price is particularly beneficial in Pennsylvania where small producers and low deliverability wells are commonplace. Most importantly the higher price should be compensatory of future costs such as increased unit operating costs by virtue of added maintenance and declining production as well as provide incentive to producers to invest in workovers, facilities etc., necessary to save production. The higher price would be a preventive measure which would eliminate where possible premature abandonment requests and special relief applications where producers have the resources to comply with the requirements. However, many small producers do not have the necessary resources for special relief. The Pennsylvania producers will receive about a $5 million cash flow above operating costs and FIT over about the next 14 years to repair, workover or replace well equipment and facilities for 240 wells. This amounts to about $21,000 per well which is very conservative compared to those indicated in special relief cases.

Upon consideration of the data submitted and Staff's analysis thereof, we conclude that the settlement should be accepted and special relief granted.

The Commission orders: (A) The settlement agreement filed by the Petitioners on February 13, 1978 is approved.

(B) Effective upon the date of issuance of this order, Petitioners are authorized to collect a total rate of 61 cents per Mcf at 14.73 psia for all gas sold from Old Gas Stripper Wells plus an annual escalation of 1 cent per Mcf commencing on January 1, 1978.

(C) Columbia, Consolidated and National are permitted to intervene in the above-captioned proceeding subject to the rules and regulations of the Commission: *Provided, however,* That participation of said intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene: and *Provided, further,* That the admission of said intervenors shall not be construed as recognition by the Commission that it might be aggrieved because of any order of the Commission entered in this proceeding and that said intervenors agree to accept the record as it now stands.

Footnotes continued from last page

per Gas Well, subsequent changes in its production or metering shall not thereafter disqualify it as an Eligible Stripper Gas Well.

[6]Contracts shall mean those contracts, whether or not now in existence, by and between the Petitioners and each of the Buyers for the sale of gas by the Petitioners to the Buyers in jurisdictional transactions for wells in Pennsylvania.

LONE STAR GAS CO. (A DIVISION OF ENSERCH CORP. AND GORDON OIL CO., INC.)

Order Deferring Hearing and Instituting Investigation

APRIL 25, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.[1]

[1]The "Commission" when used in the context of an action taken prior to October 1, 1977, refers to the FPC; when used otherwise, the reference is to the FERC.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)(1) or 402(a)(2) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR ——, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

On March 13, 1978, Commission counsel, on behalf of the Commission's Office of Enforcement, filed a motion requesting the Commission to indefinitely defer hearings in the above-referenced consolidated proceeding and to institute an investigation therein to be conducted by the Office of Enforcement.

This proceeding involves a Commission-ordered hearing into possible violations of the Natural Gas Act by Lone Star Gas Co. (Lone Star) and Gordon Oil Co. (Gordon). Lone Star is alleged to have diverted gas produced from the Sherman Field, Grayson County, Tex., from its interstate transmission line to its intrastate system during the period 1961-1976. Gordon, one of a number of producers in the Sherman Field, appears to have abandoned certain previously certificated sales to Lone Star in the Sherman Field for a period of 40 days commencing on January 1, 1977, without receiving approval of this Commission pursuant to section 7(b) or the Natural Gas Act.

On April 22, 1977, Lone Star filed in Docket No. CP77-368 a petition for a declaratory order requesting the Commission to declare exempt from its jurisdiction natural gas proposed to be taken by Lone Star from its intrastate system to pay back any deficiencies caused by past diversions of gas from its interstate syste,. On September 12, 1977, Lone Star filed a supplement to its petition for a declaratory order proposing to pay back approximately 17 Bcf of gas over a three year period. In response to Lone Star's petition, the Commission on November 4, 1977, issued an order which consolidated the captioned dockets and initiated a hearing into the matter in order to establish the facts surrounding Lone Star's apparent violation of the Natural Gas Act. The order also directed Gordon to show cause why it should not be held in violation of section 7(b) of the Act. Procedural dates in the case have been previously deferred and no hearings have been held.

In its motion, the Office of Enforcement states that the case was referred to it on December 19, 1977, and that on February 15, 1978, it transmitted a data request to Lone Star. However, after reviewing the documents submitted by Lone Star in response to its data request, the Office of Enforcement states that "signficant unanswere questions remain." The Office of Enforcement further states that the development of the issues in this proceeding can best be accomplished in an "investigatorial setting" and that this procedure will permit it to "either further refine the present issues or expand the scope of the proceeding as the facts dictate."

On March 20, 1978, Lone Star filed an answer to the staff's motion, stating that while it does not oppose the deferral of hearings, it does question the need to institute a formal investigation. Lone Star argues that the issues involved in this proceeding can be resolved informally through discussion and stipulations with the Commission staff, and that it would be more expeditious to proceed on the basis of a cooperative effort than to convert the proceeding into a formal investigation. In support of its position Lone Star in its answer states as follows:

As indicated in the Staff motion filed March 13, not only did Lone Star bring this situation to the Commission's attention last April through the filing of its petition, and subsequently proposed a specific method to restore the balance between its intrastate and interstate lines, but also Lone Star has willingly provided vast quantities of documents and responses to Staff data requests. These were furnished within the 10-day and 20-day periods, respectively, as requested by the Staff.

. . . . . .

Lone Star has previously requested the opportunity to discuss with the Staff appropriate means to restore the balance, or otherwise resolve the proceeding. It is entirely possible that this can be accomplished after adequate opportunity is avilable for completion of the Staff's analysis, together with additional data, if any, that may be needed.

. . . . . .

In view of the foregoing, Lone Star does not object to the postponement of further proceedings, but is anxious to bring the matter to an appropriate conclusion as soon as possible. We believe this can be accomplished more readily through the flexible procedure initiated by the Staff through its data and information requests, to be followed hopefully by an agreed-upon disposition, rather than instituting a formal investigation.

These proceedings involve serious questions regarding possible violations

V 4 3 1 8 5

of the Natural Gas Act and the appropriate remedy or remedies therefor. We believe it is important that sufficient flexibility be provided the Commission's Office of Enforcement to investigate the background facts and issues in this matter before moving into formal hearing procedures should that be deemed necessary after full investigation and consideration of appropriate remedies, if any. The Commission finds that the Office Of Enforcement should be accorded some latitude in developing procedures for carrying out its assigned responsibilities. Therefore the motion of the Office of Enforcement for deferral of hearings and for an investigation shall be granted. Moreover, we will appoint officers pursuant to section 14(c) of the Natural Gas Act. Such officers shall have the authority to administer oaths and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, or other records deemed relevant and material to the inquiry and to perform all other duties in connection therewith as prescribed by law.

The investigation herein ordered shall involve any and all matters related to the activities surrounding the above cited alleged violations of the Natural Gas Act by Lone Star Gas Co. and Gordon Oil Co., and their affiliates and/or subsidiaries. Upon completion of its investigation, the Office of Enforcement shall report its findings with recommendations to the Commission.

Lone Star and Gordon are entitled to a prompt resolution of the allegations which have been made against them. Lengthy delay have been experienced in this proceeding and the investigative phase necessary to the preparation of the staff's case has not according to staff's motion, yet been completed. The investigation ordered herein should therefore be carried out without further delay and completed as soon as possible.

The Commission orders: (A) Pursuant to the Natural Gas Act, particularly section 14, and the Commission's rules and regulations, an investigation is hereby directed to be instituted by the Office of Enforcement to determine whether the actions of Lone Star and Gordon referred to in this order and in the order of November 4, 1977, were in violation of the Natural Gas Act or any rule, regulation, or order of the Commission.

(B) In carrying out its investigation, the Office of Enforcement is authorized to exercise fully the powers specified in section 14(c) of the Natural Gas Act. More specifically, it is ordered, pursuant to the provisions of section 14(c) of the Natural Gas Act that for the purpose of this investigation, Jeanne M. Zable, Joel F. Zipp, and James L. Lewis, and each of them, are hereby designated officers of this Commission and are empowered to administer oaths, and affirmations, subpoena witnesses, compel their attendance, take evidence, and require the production of any books, papers, correspondence, memoranda, or other records deemed relevant and material to the inquiry and to perform all other duties in connection therewith as prescribed by law.

(C) Hearings in this proceeding are deferred pending completion of the investigation instituted by this order and further Commission order.

(D) Upon completion of its investigation, the Office of Enforcement shall report its findings with recommendations to the Commission.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket Nos. RI77-102; CI65-421; FERC Gas Rate Schedule No. 551]

SUERTE OIL CO. (OPERATOR), ET AL., AND ATLANTIC RICHFIELD CO.

Order Granting Special Relief and Amending Certificate To Delete Assigned Acreage

APRIL 25, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (Aug. 4, 1977) and Executive Order No. 12009, 42 FR 46267 (Sept. 15, 1977), the Federal Power Commission (FPC) ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977 by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR ——, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above-mentioned authorities.

On June 8, 1977, Suerte Oil Co. (Suerte)[1] filed in Docket No RI77-102 a petition for special relief pursuant to § 2.76 of the Commission's General Policy and interpretations (18 CFR 2.76) with respect to a sale of natural gas to Kansas-Nebraska Natural Gas Co., Inc. (Kansas-Nebraska) from the F. E. Good No. 1 Well located in Hamilton County, Kans. Suerte also requested waiver of § 157.40(c) of the Commission's regulations (18 CFR 157.40(c)) in order to amend its small producer certificate to cover sales of natural gas previously covered under Atlantic Richfield Co.'s (ARCO's) FERC Gas Rate Schedule No. 551.[2]

Suerte is the operator of the F. E. Good No. 1 Well and owns a 45 percent working interest in the well. Western owns the remaining 55 percent working interest. Suerte was issued a small producer certificate in Docket No. CS74-248 on April 15, 1974, and Western was issued a small producer certificate in Docket No. CS72-307 on January 17, 1972.

On July 1, 1970, Suerte and Western acquired Skelly Oil Co.'s 50 percent interest in the subect well, and have since been making sales of gas attributable to such interest to Kansas-Nebraska pursuant to a gas sales agreement dated May 28, 1963. On January 1, 1977, Suerte and Western succeeded to ARCO's 50 percent interest in the subject well, and propose to continue sales of gas attributable to such interest to Kansas-Nebraska pursuant to a gas sales agreement dated October 20, 1964. Prior to the assignment of its intrerest to Suerte and Western, ARCO had been making sales of gas to Kansas-Nebraska under its FERC Gas Rate Schedule No. 551. ARCO filed a copy of the assignment with the Commission on March 28, 1977, as a supplement to its rate schedule.

The F. E. Good No. 1 well is currently shut-in. In order to restore the well to production, Suerte proposes to install well pumping equipment and to rework the well to repair a casing leak. Suerte requests authorization to collect a rate of 60.58 cents per Mcf[3] for the sales to Kansas-Nebraska to compensate for the proposed work. On April 1, 1977, Suerte and Kansas-Nebraska executed an amendment to their contracts by which Kansas-Nebraska agreed to pay a rate approved by the Commission for the subject sales.

Notice of Suerte's petition for special relief was issued on July 6, 1977, and appeared in the FEDERAL REGISTER on July 13, 1977, at 42 FR 36028. No protests or petitions to intervene have been filed.

Suerte proposes to invest $25,800 to perform the operations necessary to restore the well to production. Based on data submitted by Suerte, Staff accepts as resonable Suerte's remaining net book investment of $3,455, its proposed investment of $25,800, and its estimated production expenses, which Staff projects to be $42,436 over the remaining life of the well, using a 5 percent annual inflation factor. Staff estimates that a total of 96,960 Mcf of gas reserves remain to be produced from the subject well over a period of five years.

Using the above costs and reserves in a traditional cost study, Staff has determined that the requested rate is cost-supported

Upon consideration of the data submitted and Staff's analysis thereof, we conclude that it is in the public interest to grant special relief to Suerte and Western.

On January 30, 1978, the Commission issued an order in Docket No. RM76-15[4] in which the Commission granted all requests for waiver of § 157.40(c) involving sales made by small producer certificate holders from developed reserves acquired in place from large producers that were pending at the time of issuance of Order No. 568. Although Suerte and Western were not included in the appendices which listed all known pending requests for waiver, the Commission's order effectively granted their requests for waiver, effective as of the date of motion for waiver, June 8, 1977. Suerte and Western may therefore make under their small producer certificates sales of gas from the F. E. Good No. 1 Well attributable to the acreage acquired from ARCO, effective June 8, 1977, subject to the condition that between June 8, 1977 and the effective date of the special relief rate authorized herein, Suerte and Westen are entitled to collect for the sales of such gas rates that are no higher than those which ARCO would be entitled to collect for sales from such reserves.

Suerte's contract amendment with Kansas-Nebraska authorizing the special relief rate contains impermissible indefinite pricing provisions. We will waive § 154.93 of the Commission's regulations to the extent necessary to permit the filing of the contract amendment.

The Commission orders: (A) the petition for special relief filed by Suerte on June 8, 1977, is hereby granted.

(B) Suerte and Western are authorized to collect a total rate of 60.58 cents per Mcf at 14.65 psia, inclusive of Btu adjustment, for the sale of natural gas to Kansas-Nebraska from the F. E. Good No. 1 well located in Hamilton County, Kans., effective as of the date of issuance of this order or the date of completion of the reworking of the well and the installation of the well pumping equipment, whichever is later, subject to the conditions set forth in Ordering Paragraphs (C) and (D).

(C) Within 30 days of the effective date of the rate authorized herein, Suerte shall file a statement signed by Kansas-Nebraska that the proposed work has been completed to the satisfaction of Kansas-Nebraska.

(D) Within 30 days of the date of issuance of this order, Suerte shall file an appropriate notice of rate change reflecting the rate authorized herein in accordance with § 154.94 of the Commission's Regulations under the Natural Gas Act (18 CFR 154.94).

(E) The contract amendment between Suerte and Western and Kansas-Nebraska, dated April 1, 1977, is accepted for filing, to be effective as of the effective date specified in Ordering Paragraph (B). Section 154.93 of the Commission's regulations is hereby waived to accept for filing the contract amendment, which contains impermissible pricing provisions. The granting of such waiver, however, does not constitute approval of such provisions, and any rate increase based on said pricing provisions to the extent it is inconsistent with the provisions of § 154.93 of the Commission's regulations is subject to rejection.

(F) The assignment dated February 28, 1977, and filed by ARCO on March 28, 1977, pursuant to which Suerte and Western acquired interests from ARCO, is accepted for filing as Supplement No. 6 to ARCO's FERC Gas Rate Schedule No. 551 effective as of January 1, 1977, the date of transfer of the property involved, and the subject acreage is hereby deleted from dedication under the related certificate issued to ARCO in Docket No. CI65-421.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-205]

UTAH POWER & LIGHT CO.

Cancellation

APRIL 24, 1978.

Take notice that Utah Power & Light Co. (Utah), on April 5, 1978, tendered for filing, proposed changes in its FERC Electric Service Tariff, Volume No. 1.

Utah states that these changes were necessitated by a change in voltage, from 46 Kv to 138 Kv, for Utah's delivery to Strawberry Water Users Association. Utah further states that Utah has been delivering Colorado River Storage Project power to Stawberry at 46 Kv under a wheeling agreement with the United States Government and recently has been supplying Strawberry's requirements in excess of CRSP amounts under Utah's FERC Electric Tariff. Utah indicates that Utah has also been delivering power and energy to the City of Springville, Utah, at 46 Kv under the same circumstances. Utah further indicates that with the increase in delivery voltage to Strawberry, the contract with Springville was terminated, since Strawberry will hereafter furnish Springville's requirements.

Utah proposed an effective date of December 20, 1978, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Captiol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 1, 1978. Protests will be

[1] Suerte filed on behalf of itself and Western Petroleum Co., Inc. (Western).

[2] Suerte requested waiver of § 157.40(c) as that provision existed prior to July 14, 1977, the date of issuance of Order No. 568, Order Amending and Clarifying Small Producer Regulations, in Docket No. RM76-15. Order No. 568 eliminated prospectiveiy the need for a waiver in a situation such as is presented here.

[3] In a letter filed with the Commission on July 15, 1977, Suerte specified that its requested rate is 60.58 cents per Mcf inclusive of Btu adjustment.

[4] "Order Granting Motion For Supplemental Order," Regulation of Small Poducers, Docket No. RM76-15.

FEDERAL COMMUNICATIONS COMMISSION

1979 WARC

Eighth Notice of Inquiry

The Federal Communications Commission on April 18 adopted an "Eighth Notice of Inquiry" in its preparation for the 1979 World Administrative Radio Conference (WARC) of the International Telecommunication Union to be convened in Geneva, Switzerland, on September 24, 1979.

The document consists of approximately 180 pages. Because of the cost of printing so voluminous a text, it will not be published in the FEDERAL REGISTER. However, the FCC has prepared a limited number of copies that are available upon request at its Public Information Office, Room 202, 1919 M Street NW., Washington, D.C. 20554.

The Commission said the eighth notice was designed to present for comment, revisions to the table of frequency allocations as contained in article 5 of the international radio regulations. This notice of inquiry is a coordinated effort between the FCC and the Office of Telecommunications Policy (now National Telecommunications and Information Administration—NTIA).

The Commission invited public comments on the proposed table of frequency allocations, highlighting a number of problem areas affecting public and Federal Government needs. These included: High frequency (HF) requirements; mobile requirements between 27.5 and 1215 MHz; and mobile satellite requirements and feeder links between 1215 MHz-10.7 GHz.

Comments are due by June 30 and reply comments July 21, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

[Docket No. 20271; FCC 78-263]

PREPARATION FOR A GENERAL WORLD ADMINISTRATIVE RADIO CONFERENCE OF THE INTERNATIONAL TELECOMMUNICATION UNION

Revision of the International Radio Regulation; Sixth Notice of Inquiry

AGENCY: Federal Communications Commission.

ACTION: Sixth Notice of Inquiry (Docket No. 20271) issued seeking comments from interested parties about proposed changes in the International Radio Regulations and Additional Radio Regulations regarding methods of accounting and operating for public correspondence in maritime mobile service.

SUMMARY: The CCITT has adopted provisional Recommendations for presentation to the 1979 World Administrative Radio Conference (WARC) concerning methods of accounting and operating for public correspondence in maritime mobile service. The purpose of the Sixth Notice of Inquiry is to determine whether the Commission should recommend that the U.S. continue to support adoption of the recommendations by the 1979 WARC or whether it should submit alternative proposals.

DATES: Interested persons may file comments on or before June 2, 1978, and reply comments on or before June 19, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Earl S. Barbely, International Programs Staff, Common Carrier Bureau, 202-632-3214.

Adopted: April 18, 1978.

Released: April 25, 1978.

In the matter of an inquiry relative to preparation for a General World Administrative Radio Conference of the International Telecommunication Union to consider revision of the International Radio Regulations, Docket No. 20271.[1]

1. The Commission initiated this proceeding for the purpose of preparing U.S. Proposals for the General World Administrative Radio Conference (WARC) of the International Telecommunication Union (ITU) to be held in 1979. Five notices of inquiry have been adopted seeking comments about proposed changes in the International Radio Regulations and Additional Radio Regulations.[1] This Sixth Notice of Inquiry seeks comments from interested parites regarding proposals of the Joint Working Party for Maritime Mobile Service (SMM) of the International Telegraph and telephone Consultative Committee (CCITT) for changes in the methods of accounting and operating for public correspondence in maritime mobile service.[2]

2. The proposals consist of two draft CCITT Recommendations (see Appendix A and Appendix B) and draft Regulatory Provisions (see Appendix C) to be considered by the WARC as amendments to the ITU Radio Regulations and Additional Radio Regulations. The draft Recommendations were prepared as a result of a study conducted by a CCITT Study Group (Joint Working Party SMM) to determine improvements on current methods of accounting and operating for public correspondence in maritime mobile service. That study was requested by the World Maritime Administrative Radio Conference (Geneva, 1974) in its Resolutions Nos. Mar 2-22 and Mar 2-23 asking the CCITT to determine:

(1) What Amendments to the principles and methods of accounting for public correspondence in maritime radio communications are necessary to improve present methods, including accounting for ship charges, and to provide for foreseeable future developments?

(2) To what extent is it useful and desirable to revise those parts of Chapter IX of the Radio Regulations and those of the Additional Radio

[1]Notice of Inquiry, FCC 75-6 No. 29504, January 10, 1975, (40 FR 3245, January 20, 1975); Second Notice of inquiry, FCC 75-990, No. 36758, September 19, 1975 (40 FR 44606, September 29, 1975); Third Notice of Inquiry, FCC 26-1099, No. 43086, December 6, 1976, (41 FR 54309, December 13, 1976); Fourth Notice of Inquiry, FCC 77-285, May 17, 1977, Fifth Notice of Inquiry, FCC 77-349, No. 69533, May 23, 1977 (42 FR 27756, May 31, 1977). See also 42 FR 55641, October 18, 1977.

[2]The CCITT is an international consultative committee of the ITU concerned with the study of technical, operating and tariff question relating to telephone and telegraphy, including data communication. All ITU member countries and certain private companies operating telecommunications services can participate in its work. The CCITT may entrust the study of questions put before it to Study Groups composed of experts from different countries. The Study Groups draw up Recommendations which are submitted to a CCITT Plenary Assembly for adoption and publication. The bulk of the CCITT Recommendations specify standard design parameters and operating procedures for international communication facilities and services. Unlike the ITU Convention, which has treaty status, the Recommendations are not legally binding on the administrations of ITU member countries. However, compliance is virtually universal in actual practice since they provide the technical and operational basis for a unified global communications network.

Regulations not already included in the study carried out under Resolution No. Mar 2-22 and to transfer them to the CCITT Recommendations?

The Resolutions recommended that the requested CCITT report include a complete set of basic and detailed accounting rules to be produced as a CCITT Recommendation and that administrations and recognized private operating agencies bring these draft rules into use as soon as possible following their approval as Recommendation by CCITT VIth Plenary Assembly, October, 1976, Geneva, Switzerland. They also recommended that Administrations make proposals to the next competent World Administrative Radio Conference as to which, if any, of the draft rules should be included in the Radio Regulatons.

3. The Joint Working Party SMM initially prepared two draft Recommendations for submittal to the CCITT VIth Plenary Assembly in 1976 which the VIth Plenary Assembly adopted in principle with the exception of points relating to ship station charges and a single accounting authority.[3] The VIth Plenary Assembly requested the Joint Working Party SMM to further consider these points. The Joint Working Party SMM continued its studies and, as a result, prepared the draft Recommendations now before us for consideration. It determined that the Recommendations should not enter into force until any conflicting Articles in the Radio Regulations and the Additional Radio Regulations have been amended or revoked by the 1979 WARC. To this end, it prepared the draft Regulatory Provisions also now before us.

4. The Joint Working Party decided to circulate the draft Recommendations to Adminsitrations of ITU member countries for provisional approval since Plenary Assembly approval could not be obtained before the 1979 WARC. The United States cast its vote in favor of provisional approval during the worldwide letter balloting. Provisional approval was announced by the CCITT on November 7, 1977. The Recommendations therefore now have a status as if they had been approved in full by a CCITT Plenary Assembly and can be presented by the ITU Secretary-General to the 1979 WARC for consideration. The purpose of this inquiry is to determine whether this Commission shoud recommend that the U.S. continue to support adoption of the Joint Working Party's draft Recommendations and the draft Regulatotry Provisions by the 1979 WARC or whether it should submit alternative proposals.

5. Generally, the draft Recommendations and Regulatory Provisions would restructure the framework in which ITU Accounting Provisions currently exist. They would remove most of those provisions in the Radio Regulations and Additional Radio Regulations relating to accounting and transfer them to CCITT Recommendations. Only certain basic provisions considered to require continued regulatory status would remain in the Radio Regulations including provisions involving accounting responsibility, exchange and verification of maritime accounts, payment of balances, and period of retention of accounting records. This approach is intended to permit easier amendment of most of the accounting provisions to meet changing circumstances and, where possible, allow the elimination of many differences concerning accounting procedures and operations that now exist between the Radio Regulations and Additional Radio Regulations and the Telegraph and Telephone Regulations.

6. Additionally, the draft Recommendations and Radio Regulations would effectuate specific changes in accounting and operating procedures for public correspondence in maritime mobile service. In particular, they would (1) reduce the number of accounting authorities in each country to which accounts for the services of maritime mobile stations may be sent by setting a maximum number of 25, (2) define the responsibility of each Administration for payment of bad debts incurred by ship stations licensed by it, (3) eliminate by 1988 ship station charges for shore-to-ship traffic from all international accounts, and (4) propose uniform rates for ship stations charges that would be effective until such charges are eliminated in 1988. The rates proposed, of course, could be imposed by ship stations only pursuant to the authority of the Administration that has issued their license.

7. Pursuant to applicable procedures set forth in § 1.415 of the Commission's Rules, interested persons may file comments on or before June 2, 1978, and reply comments on or before June 19, 1978. All relevant and timely comments and reply comments, along with any pertinent information which the Commission may have available, will be considered.

8. Although § 1.419 of the Commission's Rules requires that an original and five copies of all statements, briefs or comments be filed in response to a Notice, the Commission's conference preparatory organization necessitates the filing of an original and nineteen copies. All responses received will be available for public inspection during regular business hours in the Comission's Public Reference Room at its headquarters in Washington, D.C.

9. This Notice is issued pursuant to the authority set forth in section 4(i) of the Communications Act of 1934, as amended 47 U.S.C. 154(i).

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

[3]In addition to providing comprehensive recommendations regarding maritime accounting and charging, the draft Recommendations provided, that accounting for mobile station charges should be specified more accurately, including a limitation on the number of accounting addresses.

APPENDIX A

DRAFT RECOMMENDATION D. 90/F. 111 ("X")

Charging, Accounting and Refunds in the Maritime Mobile Service

INTRODUCTORY NOTES

1. For the purposes of this Recommendation, the term Maritime Mobile Service should be understood to embrace the Maritime Mobile Satellite Service as well as the MF, HF and VHF radio media, unless specifically stated otherwise.

2. Throughout this Recommendation the Asterisk * used after "Administration(s)" means that recognized private operating agency/agencies are included.

CONTENTS

Preamble

PREAMBLE

The CCITT

considering

(a) Resolution No. Mar 2-22 of the World Maritime Administrative Radio Conference (Geneva, 1974) relating to accounting for public correspondence in maritime radiocommunications;

(b) Recommendation No. Mar 2-18 of the same conference relating to the same subject;

(c) Resolution No. Sat-10 of the World Administrative Radio Conference for the planning of the Broadcasting Satellite Service in the 12 GHz band (Geneva, 1977) relating to the possible rearrangement of the Radio Regulations and the Additional Radio Regulations;

(d) That the provisions of the Telegraph Regulations and the Telephone Regulations (Geneva, 1973) and the Protocols annexed thereto, taking into account CCITT Recommendations (particularly those in the E and F Series) shall apply to radiocommunications;

(e) That the VIth Plenary Assembly of the CCITT (Geneva, 1976) adopted the Recommendation below, with the exception of the points relating to mobile station charges and a single accounting authority, which points have now been considered further and have resulted in amendments being carried into the texts given below;

(f) That the provisions for charging, accounting and refunds in the Maritime Mobile Service and in the Maritime Mobile Satellite Service are presently contained in the Radio Regulations and the Additional Radio Regulations, which will remain in force until they are reviewed by the World Administrative Radio Conference (1979).

recommends

That Administrations take this Recommendation into account when formulating their proposals for consideration at the World Administrative Radio Conference for the General Revision of the Radio Regulations and the Additional Radio Regulations (Geneva, 1979). Annex 2 shows the correspondence between the 1976 edition of the Radio Regulations and the Additional Radio Regulations and the provisions of this recommendation. Annex 3[1] offers a preliminary draft Article that includes all the basic provisions considered to require regulatory status. A consequence of this is that Article 40A of the Radio Regulations and Articles 4A, 5A, 5B, 6A and 8 of Section I of the Additional Radio Regulations would no longer be required.

NOTE.—Administrations may also wish to consider whether Article 40 of the Radio Regulations and those parts of the Additional Regulations not listed above would also no longer be required.

Division A

INTRODUCTION

I. Definitions

A1 1. *Accounting authority.*
The administration of the country that has issued the license for a mobile station (or the recognized private operating agency or other entity/entities designated by the Administration in accordance with C1 to C6) to whom maritime accounts in respect of mobile stations licensed by that country may be sent.

[1]Appendix C herein.

A2 2. *Maritime account*
The account issued by the Admininstration* operating a land station in respect of telecommunication traffic exchanged between the land station and a mobile station.

A3 3. *Landline charge*
The charge relating to transmission over the general network of telecommunication channels, national and international.

A4 4. *Land station charge*
The charge relating to the use of facilities provided by the land station.

A5 5. *Mobile station charge*
The charge relating to the use of facilities provided by the mobile station.

Division B

CHARGING

I. General

1. *General*

B1 1.1 The charges for radiocommunications consist of:

B2 (a) the landline charges;

B3 (b) the land station charges;

B4 (c) the mobile station charges (if any);

B5 (d) any charges for special services for telegrams that have to be considered in the accounting; and

B6 (e) any special charges for special facilities.

B7 1.2 The landline charge for national telecommunication channels applicable to readiocommunications between a mobile station and the country of the land station is notified in gold francs to the Secretary-General of the ITU by the land station Administration*.

B8 1.3 The landline charges applicable to radiocommunications between a mobile station and a country other than that of the land station, are the collection charges fixed or applied for telecommunication services in the international relation concerned; they shall be notified in gold francs to the Secretary-General of the ITU by the land station Administration*.

B9 1.4 The land station charges shall be expressed in gold francs; Adminstrations* shall notify to the Secretary-General of the ITU the charges fixed by them.

B10 1.5 The landline and land station charges notified to the Secretary-General of the ITU in accordance with B7 to B9 will be published in Part IV of ITU List IV, the List of Coast Stations.

NOTE.—For countries that have not introduced banded collection charges for international services, only a limited number of charges, for routes in frequent use, will be published. Adminstrations* of these countries should indicate to the Secretary-General of the ITU which charges should be published in the List of Coast Stations.

B11 1.6 Where mobile station charges are applied, the Adminstration of the country that has issued the licence shall so notify the Secretary-General of the ITU for inclusion of this information in the List of Ship Stations.

B12 1.7 Mobile station charges may be applied in the radiotelegram, radiotelephone and radiotelex services in the MF and HF bands. They shall not be applied in any of the VHF services nor in any of the Mobile Satellite Services, nor in any service with automatic operation; however, mobile station charges may also be applied for radiotelegrams transmitted via VHF.

B13 1.8 Mobile station charges shall be abolished for traffic exchanged after 2359 hours GMT 31 December 1987.

B14 1.9 Until 31 December 1987, the following standardized mobile station charges shall be applied worldwide:

B15 (a) radiotelegrams, 0.40 gold francs per ordinary word;

B16 (b) radiotelephone calls in the MF band, 1.50 gold francs per minute;

B17 (c) radiotelephone calls in the HF band, 2.00 gold francs per minute;

B18 (d) radiotelex calls in the MF and HF bands, 1.50 gold francs per minute.

B19 1.10 The Adminstration of the country that has issued the license for a mobile station may authorize it to collect on board and to retain mobile station fees when mobile station charges are no longer applicable. The Administration may set an upper limit to these fees.

B20 1.11 Mobile stations must be acquainted with the tariffs necessary for charging. However, they are authorized, where necessary, to obtain such information from land stations. Charges furnished by land stations are expressed in gold francs.

2. *Tariff changes*

B21 2.1 New or modified charges shall not come into effect for international traffic for countries other than that which establishes the charges until the first day of the month following the expiry of the following periods, counted from the day after the despatch of the first notification by the Secretary-General of the ITU:

B22 (a) for traffic from mobile station to land, 1 month and 15 days;

B23 (b) for traffic from land to mobile station, 15 days, except that for changes to bring charges into line with those on competing routes the period shall be 10 days.

3. *Radiocommunications between mobile stations*

B24 3.1 When a single land station is used as an intermediary between mobile stations, two land station charges are collected. If the land station charge applicable to traffic with the origin mobile station is different from that applicable to traffic with the destination mobile station, the sum of these two charges is collected.

B25 3.2 When it is necessary to use two land stations as intermediaries between two mobile stations, the land station charge for each station is collected and also the landline charge for the section between the two land stations.

II. Radiotelegrams

1. *General*

B26 1.1 The land station charge and the mobile station charge are fixed on the basis of a word charge.

B27 1.2 The total charge for radiotelegrams is collected from the sender, with the exception of charges applicable to radiotelegrams to be redirected as the request of the addressee (as provided in Recommendation F.1).

B28 1.3 No additional charge shall be made when acknowledgement of receipt of a radiotelegram is made through another mobile station or land station by service advice, or when an intermediate mobile station assists in the forwarding of a radiotelegram.

2. *Special charging arrangements*

2.1 *Radiotelegrams of immediate general interest*

B29 2.1.1 No charge for radio transmission in the mobile service is made for radiotelegrams of immediate general interest, provided that they are:

B30 (a) distress radiotelegrams or replies thereto;

B31 (b) radiotelegrams originating in mobile stations notifying the presence of icebergs, derelicts, mines and other dangers to navigation, or announcing cyclones and storms;

B32 (c) radiotelegrams announcing unexpected phenomena threatening air navigation or the sudden occurrence of obstacles at airports;

B33 (d) radiotelegrams originating in mobile stations notifying sudden changes in the position of buoys, the working of lighthouses, devices connected with buoyage, etc.; or,

B34 (e) service radiotelegrams relating to the mobile service.

2.2 *Radiotelegrams relating to medical advice*

B35 2.2.1 No charge for radio transmission is made for radiotelegrams relating to medical advice provided that:

B36 (a) they are exchanged directly between mobile stations and land stations that are shown in the List of Radiodetermination and Special Service Stations as providing such a service, and,

B37 (b) they are addressed in accordance with the conditions indicated in that List.

2.3 *Meteorological radiotelegrams*

B38 2.3.1 Land station charges and mobile station charges applicable to meteorological readiotelegrams (see Recommendation F.1) should be reduced by at least 50 percent in all relations.

2.4 *Radiotelegrams concerning persons protected in time of war*

B39 2.4.1 Radiotelegrams concerning persons protected in time of war by the Geneva Conventions of 12 August 1949, are accepted under the conditions specified in number 4 of the Annex to the Telegraph Regulations (Geneva, 1973) taking into account CCITT Recommendation (F.1).

B40 2.4.2 The land station charges and the mobile station charges for these RCT radiotelegrams shall be decreased in the same proportion as the charges for transmission on the general network of telecommunication channels.

2.5 *Press radiotelegrams*

B41 2.5.1 For those land stations that accept press radiotelegrams, for the relations admitted the land station charge and the mobile station charge should be the same as those for ordinary private radiotelegrams reduced by 50 percent.

B42 2.5.2 Press radiotelegrams are subject to any landline press rate that may be in force in the land station country or between the land station and destination countries.

3. *Radiomaritime letters*

B43 3.1 Except as otherwise provided in B44 to B47, radiomaritime letters may be accepted, taking into account CCITT Recommendations relating to letter telegrams, if the telegram service is used to convey radiomaritime letters.

B44 3.2 The total charge shall include the postal charge (by ordinary letter or airmail letter) due for delivery in the land station country.

B45 3.3 An additional charge may be collected where delivery is to be made to a country other than that of the land station.

B46 3.4 The following charges are added where applicable:

B47 (a) charges due for special services;

B48 (b) the landline charge when transmission on the land section is exceptionally by telegraph.

III. Radiotelephone and radiotelex calls

1. *Land station and landline charges*

B49 1.1 If no uniform charges apply in respect of the land stations of a country, different land station charges shall be fixed for the MF, HF and VHF bands.

B50 1.2 The unit charge is the charge for an ordinary private call of one-minute duration.

B51 1.3 The minimum charge for a call with manual or semi-automatic operating is three charge units.

B52 1.4 Fully automatic calls should be charged by one of the following two methods, taking into account CCITT Recommendations:

B53 (a) charging minute by minute;

B54 (b) charging by periodic pulses of the type used in the national automatic service.

B55 1.5 The charge for a call is normally collected from the calling party with the exception of collect calls (if collect calls are admitted). For collect calls, the charge shall be payable by the called party.

B56 1.6 When handled through a land station, the chargeable duration of a call will be fixed at the end of the call by the land station; if two land stations are participating in the handling of the call, the opinion of that land station will prevail which has accepted the call from the originating mobile station.

B57 1.7 The decision of this land station will also be valid for international accounting.

2. *Special charges*

B58 2.1 The special charges for personal radiotelephone calls (from mobile station to land) and collect calls, if admitted, shall be applied.

B59 2.2 The charge for special call facilities shall be calculated on the basis used for an international call, applied to either:

B60 (a) the landline charge only; or

B61 (b) all components of the call charge.

B62 2.3 When the booking of a radiotelephone call that is liable to the payment of a special charge (for example, a collect call) is accompanied by a booking of a personal call, only one special charge shall be collected.

Division C

ACCOUNTING

I. General

C1 1. Charges for radiocommunications from ship-to-shore are in principle, and subject to national law and practice, to be collected from the maritime mobile station licensee:

C2 (a) by the Administration that has issued the licence, or

C3 (b) by a recognized private operating agency, or

C4 (c) by other entity or entities designated by the Administration to carry out this accounting.

C5 2. The Administration or the recognized private operating agency or the designated entity (or entities) is referred to in this Division as the "accounting authority".

C6 3. The name(s) and address(es) of the accounting authority(ies) shall be notified to the Secretary-General of the ITU for inclusion in the List of Ship Stations; the number of such names shall be limited as far as possible and should not exceed 25.

C7 4. For responsibility for payment of accounts rendered in accordance with C1 to C6, see C46 to C49.

II. Establishment of accounts

1. *Maritime accounts*

C8 1.1 In the case of radiocommunications originating in mobile stations, the land station Administration* shall depit the accounting authority for the origin mobile station with:

C9 (a) the land station charges;

C10 (b) the landline charges;

C11 (c) the total charges collected for prepaid replies;

C12 (d) any charges for special services for telegrams;

C13 (e) where appropriate, the special charges for radiotelephone calls with special facilities;

C14 (f) where appropriate, postal charges on radiomaritime letters.

C15 1.2 In the case of radiocommunications addressed to mobile stations and originating in a country other than that of the land station, the land station's Administration* shall debit the Administration* of the country from which the radiocommunication originated with:

C16 (a) the land station charges; and

C17 (b) the mobile station charges (if any).

C18 1.3 In the case of a radiotelegram that has been forwarded by means other than radio (see Recommendation E.190/F.110; B57 and B58), only the land station charge shall be debited.

C19 1.4 In the case of a completed radiocommunication in the direction to a mobile station, the land station Administration* credits the accounting authority for the destination mobile station with:

C20 (a) the mobile station charge (if any), and

C21 (b) the total charge collected for or prepaid reply, if occasion arises.

C22 1.5 In the case of radiocommunication exchanged between mobile stations:

C23 1.5.1 through the medium of a single land station: the land station Administration* debits the accounting authority for the origin mobile station with the appropriate charges. Thereafter, if occasion arises, the provisions of C19 to C21 are applied.

C24 1.5.2 through the medium of two land stations: the first land station Administration* debits the accounting authority for the origin mobile station with the appropriate charges, taking into account C8 to C14. Thereafter, C15 to C18 and C19 to C21 are applied by the second land station, the first land station being regarded as the office of origin as far as the accounts are concerned.

C25 1.6 For accounting purposes, collect calls shall be regarded as originating in the destination country or mobile station.

C26 1.7 Accounts are prepared monthly by the land station Administration* and rendered by it to the accounting authority responsible for the mobile station, with the exception referred to in C30.

2. *International accounts*

C27 2.1 The international landline charges shall be included in the international

V 43 | 85 MY 2 78 UMI

telegraph and telephone accounts and shall be accounted for in accordance with the provisions of the Telegraph Regulations and Telephone Regulations, taking into account CCITT Recommendations. The agreed international accounting rates shall apply.

C28 2.2 The country on whose territory is established a land station serving as intermediary for the exchange of radiocommunications betwen a mobile station and another country, is considered, as far as the application of landline charges is concerned, as the origin or destination country and not as a transit country.

C29 2.3 In principle, land station charges and mobile station charges shall not be entered in the international telegraph and telephone accounts.

C30 2.4 However, by previous agreements, Administrations* may establish a system by which the land station charges and the mobile station charges are included in the international accounts by the origin Administration*.

3. *Accounting for Single-operator Service*

C31 3.1 Except as otherwise provided, the following provisions apply to single-operator radiotelephone and radiotelex services, in which land subscribers and land station operators of different countries call each other without the aid of an intermediate operator.

C32 3.2 The operating and charging procedures are described in Recommendation E.190/F.110.

C33 3.3 The billing and settlement procedures for single-operator radio-maritime calls to mobile stations are as follows:

C34 3.3.1 Except as provided for in C36, the call details are forwarded at least monthly to the Administration* in question in the caller's country.

C35 3.3.2 The Administration* charges the call in its internal billing system and includes the total amount in a quarterly statement of accounts to the credit of the land station Administration*.

C36 3.3.3 In the case of collect radiotelephone calls to a mobile station in the international maritime mobile service (if admitted by the land station Administration*), the total amount of the bill shall be debited to the mobile station licensee in the maritime accounts (see C8 to C14).

C37 3.3.4 If bilaterally agreed between the Administrations* concerned, the land station Administration* may collect the charge by presenting a bill directly either to the foreign subscriber who booked the call or to his registered representative in the land station country.

III. Exchange and verification of maritime accounts

C38 1. Exchange and verification of accounts shall be carried out in accordance with the Telegraph Regulations and the Telephone Regulations, taking into account CCITT Recommendations.

C39 2. The accounts, in duplicate, are forwarded before the end of the third month following that to which they relate.

C40 2. Radiotelegrams, radiotelephone calls and radiotelex calls shall be entered individually with all necessary particulars in the monthly accounts that serve as a basis for the accounting mentioned in this division.

C41 4. The entries in accounts shall be spaced in such a way that the duplicate of the account can be divided and used for the accounting with the mobile station licensee by the accounting authority for the mobile stations. The entries shall be grouped under mobile station name and call sign, with a total charge shown for each mobile station.

C42 5. However, Administrations* may establish accounts for each mobile station with all necessary particulars mentioned above. These individual accounts shall be included in a recapitulatory statement.

C43 6. A specimen statement is given in Annex 1.

C44 7. In principle, an account shall be considered as accepted without the need for specific notification of acceptance to the Administration* that sent it.

C45 8. However, any accounting authority shall have the right to question the contents of an account for a period of six months after dispatch of the account.

C46 9. All maritime accounts shall be paid by the accounting authority without delay and in any case within 6 months after dispatch of the account.

C47 10. If international maritime accounts remain upaid after 6 months, the Administration that has licensed the mobile station shall on request take all possible steps, within the limits of applicable national law, to ensure settlement of the accounts from the licensee.

C48 11. In the case referred to in C45, if the account is seriously delayed in transit, the receiving accounting authority should at once notify the originating Administration* that queries and payment may be delayed. However, the delay shall not exceed 3 months from the date of receipt of the account.

C49 12. The debtor accounting authority may refuse the settlement and adjustment of accounts presented more than eighteen months after the date of handing-in of the radiotelegrams or the date of establishment of the radiotelephone calls or radiotelex calls to which the accounts relate.

IV. Payment of balances

C50 1. Payment of balances shall be carried out in accordance with the Telegraph Regulations and the Telephone Regulations.

V. Archives

C51 1. The originals of radiotelegrams and documents relating to radiotelegrams, radiotelephone calls and radiotelex calls retained by the Administrations* shall be held, with all necessary precautions from the point of view of secrecy, until the settlement of the relative accounts and, in any case, for at least six months counting from the month in which the accounts were sent. Administrations* may preserve the information by any other means, e.g. magnetic or electronic records.

C52 2. However, should an Administration* deem it desirable to destroy such documents before the above-mentioned period, and hence is not in a position to carry out an inquiry in respect of the services for which it is responsible, such Administration* shall bear all the consequences both as regards refund of charges and any difference in the accounts in question that might otherwise have been observed.

Division D

REFUNDS

I. Radiotelegrams

1. *General*

D1 1.1 The provisions of Recommendation F.42, Division C shall apply with the following exceptions.

2. *Radiomaritime letters*

D2 2.1 When a radiomaritime letter fails to reach its destination due to the failure of the postal service, only the charges in respect to the services not carried out are refunded.

D3 2.2 Refund of charges is admitted when, through the fault of the telegraph or radiotelegraph service, a radiomaritime letter has not reached its destination, as well as in the cases provided for in Article 12 of the Telegraph Regulations (Geneva, 1973), taking into account CCITT Recommendations.

II. Radiotelephone and radiotelex calls

D4 1. When, through any fault of the service, the booking of a call is not followed by the calling and called stations being placed in communication, no charge shall be payable. If the amount of the charge has been paid, it shall be refunded.

D5 2. In order to simplify operating and accounting procedures, Administrations* may decide that no charge shall be payable when a requested connection has not been set up, whatever the reason.

D6 3. However, Administration* may decide to collect charges in cases where there is no fault of service. In that case the basis of charging shall be notified to the Secretary-General of the ITU for inclusion in the List of Coast Stations.

D7 4. When, through any fault of the service, difficulty is experienced in the course of a call, the chargeable duration of the call shall be reduced to the total time during which transmission conditions have been satisfactory, taking into account CCITTRecommendations.

ANNEX 1

[To recommendation D.90/F.111]

Specimen form of statement of maritime accounts

Account between country A and country B in respect of radiotelegrams, radiotelephone calls, and radiotelex calls sent through the land stations of country A during the month of——

Date	Land station	Origin	Call sign	Destination	Number of		Category	Credit or debit for country A (gold francs)		Remarks
					Words	Minutes		Credit	Debit

Notes

1. Under "status," MOD=modified, SUP=suppressed, and NOC=no change (except for the cases in note 2).
2. Where necessary the term "coast station" has been replaced with "land station," "aeronautical station" with "land station," "ship" with "mobile station," and "message" with "telegram."

APPENDIX B

DRAFT RECOMMENDATION E.190/F.110 ("Y")

Operational Provisions for the Maritime Mobile Service

INTRODUCTORY NOTES

1. For the purposes of this Recommendation, the term "Maritime Mobile Service" should be understood to embrace the Maritime Mobile Satellite Service as well as the MF, HF, and VHF radio media, unless specifically stated otherwise.

2. Throughout this Recommendation the asterisk * used after "Administration (s)" means that recognized private operating agency/agencies are included.

CONTENTS

Preamble
Division A General
Chapter I Order of priority
Division B Radiotelegrams
Chapter I Preparation and handing-in of radiotelegrams:
1. Plain language.
2. Indication of station of origin.
3. Time of handing-in.
4. Address.
Chapter II Counting of words
Chapter III Routing of radiotelegrams
Chapter IV Transmission of radiotelegrams:
1. Doubtful reception.
2. Long distance radiocommunications.
3. Routing retransmission by mobile stations.
4. Period of retention of radiotelegrams at land stations.
Chapter V Advice of non-delivery
Chapter VI Radiomaritime letters
Chapter VII Special services
Division C Radiotelex
Chapter I General:
1. Routing of calls.
2. Information to be supplied, as necessary, by the calling party.
3. Call duration.
4. Validity of requests.
5. Exchange of radiotelegrams by radiotelex.
Chapter II Traffic from mobile stations:
1. Manual service.
2. Single-operator service.
3. Automatic service.
4. Procedures.
Chapter III Traffic to mobile stations:
1. Manual procedure.
2. Single-operator procedure.
3. Automatic procedure.
Division D Radiotelephone
Chapter I General:
1. Language to be used.
2. Priority.
3. Routing of calls.
4. Information to be supplied by the calling party.
5. Call duration.
6. Validity of requests.
7. Exchange of radiotelegrams by radiotelephony.
Chapter II Traffic from mobile stations:
1. Manual service.
2. Single-operator service.
3. Automatic service.
4. Procedures.
Chapter III Traffic to mobile stations:
1. Manual procedure.
2. Single-operator procedure.
3. Automatic procedure.
Annex—Correspondence between the 1976 Edition of the Radio Regulations and the Additional Radio Regulations and the Provisions of Recommendation E.190/F.110

PREAMBLE

The CCITT

considering

(a) Resolution No. Mar2-23 of the World Maritime Adminstrative Radio Conference (Geneva, 1974) relating to the interpretation of the provisions affecting the public correspondence services;

(b) Resolution No. Sat-10 of the World Administrative Radio Conference for the planning of the broadcasting satellite service in the 12 GHz band relating to the possible re-arrangement of the Radio Regulations and the Additional Radio Regulations;

(c) That the provisions of the Telegraph Regulations and the Telephone Regulations (Geneva, 1973) and the Protocols annexed thereto, taking into account CCITT Recommendations (particularly those in the E and F series) shall apply to radiocommunications;

(d) That the VIth Plenary Assembly of the CCITT (Geneva, 1976) adopted the Recommendation below, with the exception of the points relating to mobile station charges and a single accounting authority, which points have now been considered further and have resulted in amendments being carried into the texts given below;

(e) That the operational provisions for the Maritime Mobile Service and the Maritime Mobile Satellite Service are presently contained in the Radio Regulations and the Additional Radio Regulations, which will remain in force until they are reviewed by the World Administrative Radio Conference (1979),

recommends

That Administrations take this Recommendation into account when formulating their proposals for consideration at the World Administrative Radio Conference for the General Revision of the Radio Regulations and the Additional Radio Regulations (Geneva, 1979). The Annex shows the correspondence between the 1976 edition of the Radio Regulations and the Additional Radio Regulations and the provisions of this Recommendation. It is considered that all the basic operating provisions in this Recommendation are covered in the Telegraph and Telephone Regulations (Geneva, 1973) and therefore the only provision that requires regulatory status is one requiring observance of those Regulations in the Maritime Mobile Service (see section I of the preliminary draft Article in Annex 3[5] of Recommendation D.90/F.111[6]). A consequence of this is that Articles 37A, 38 and 39 of the Radio Regulations and Articles 1A, 7A and 10A of the Additional Radio Regulations would no longer be required.

NOTE.—Administrations may also wish to consider whether Article 37 of the Radio Regulations and those parts of the Additional Radio Regulations not listed above would also no longer be required.

Division A

GENERAL

I. Order of priority

A1. 1. The order of priority for communications[7] in the maritime mobile service shall be as follows, except where technically impracticable:

A2 1.1 Distress calls, distress messages and distress traffic;

A3 1.2 Communications preceded by the urgency signal;

A4 1.3 Communications preceded by the safety signal;

A5 1.4 Communications relating to radio direction-finding;

A6 1.5 Communications relating to the navigation and safe movement of aircraft engaged in search and rescue operations;

A7 1.6 Communications relating to the navigation, movements and needs of ships, and weather observation messages destined for an official meteorological service;

A8 1.7 Radiotelegrams relative to the application of the United Nations Charts (ETATPRIORITENATIONS);

A9 1.8 Government radiotelegrams with priority (ETATPRIORITE) and government calls for which priority has been expressly requested;

A10 1.9 Service communications relating to the working of the telecommunication service or to communications previously exchanged;

A11 1.10 Government communications other than those shown in A9, ordinary private communications, RCT radiotelegrams and press radiotelegrams;

A12 1.11 Radiomaritime letters.

[5] Appendix C herein.
[6] Published in GM SMM-No. 16.
[7] The term *communication* as used in A1 to A12 means radiotelegram, radiotelephone calls and radiotelex calls.

V 43 | 85 MY 2 78 UMI

Division B

RADIOTELEGRAMS

I. Preparation and handing-in of radiotelegrams

1. *Plain language*

B1 1.1 Groups of letters and figures from the International Code of Signals are considered as plain language in radiotelegrams.

2. *Indication of station of origin*

B2 2.1 When, because of duplication of names, the name of a station is followed by it call sign, the latter shall be joined to the name of the station by a fraction bar. Examples: OREGON/OZOC (not OREGONOZOC); ROSE/DDOR (not ROSEDDOR).

B3 2.2 When a land station retransmits over the general network of telecommunication channels a radiotelegram received from a mobile station, it shall transmit, as office of origin, the name of the mobile station in which the radiotelegram originated as this name appears in the appropriate list of stations, followed by its own name. Where appropriate, B2 shall also apply.

B4 2.3 In order to avoid any confusion with a telegraph office or a fixed station of the same name, the land station may, if desirable, complete the indication of the name of the mobile station of origin by the work SHIP of AIRCRAFT, placed before the station of origin.

3. *Time of handing-in*

B5 3.1 In the transmission of radiotelegrams originating in a mobile station, the date and time of handing-in at this station are given by two groups of figures in the preamble line, the first indicating the day of the month (1 to 31) and the second consisting of a group of figures (0001 to 2400) indicating the hours and the minutes.

B6 3.2 The time of handing-in is indicated in Greenwich Mean Time (GMT).

4. *Address*

B7 4.1 The address of radiotelegrams destined for mobile stations must be as complete as possible and must include:

B8 (a) the name or the designation of the addressee, with supplementary particulars, if necessary;

B9 (b) the name of the mobile station followed, when necessary, by its call sign, the letter joined by a fraction bar to the name of the station as shown in the List of Ship Stations;

B10 (c) the name of the land station through which the radiotelegram is to be forwarded, as it appears in the appropriate list of stations.

B11 4.2 If the mobile station does not appear in the List of Ship Stations, the sender should, if possible, indicate the nationality and route followed by the mobile station.

B12 4.3 However, the name and call sign required under B9 may be replaced, at the risk of the sender, by particulars of the passage made by such mobile station, indicated by the names of the ports or airports of departure and of destination, or by any equivalent indication.

B13 4.4 Mobile stations not suplied with the international List of Telegraph Offices may add to the telegraph office of destination:
the name of the territorial subdivision;
the destination or country;
both of the above;
if it is doubtful whether, without such addition, the radiotelegram could be correctly routed without difficulty.

B14 4.5 The land station operator receiving the radiotelegram retains or deletes these particulars, or further amends the name of the office of destination as is necessary or sufficient for forwarding the radiotelegram to its proper destination.

II. Counting of words

B15 1. The word count of the office of origin is decisive in the case of radiotelegrams destined for mobile stations, and that of the land station is decisive in the case of radiotelegrams originating in mobile stations.

B16 2. If two land stations participate in the handling of a radiotelegram, the opinion of the land station that has accepted the radiotelegram from the originating mobile station will prevail. The decision of this land station will also be valid for international accounting.

III. Routing of Radiotelegrams

B17 1. Radiotelegrams should be routed via the land station that is considered most suitable in relation to the mobile station concerned.

B18 2. However, to expedite or to facilitate the routing of radiotelegrams to a land station, a mobile station may transmit them to another mobile station. The latter shall dispose of such radiotelegrams in the same manner as if they originated with itself (see B38 to B41).

B19 3. If the sender of a radiotelegram handed in at a mobile station has indicated the land station to which he desires his radiotelegram to be sent, the mobile station shall, in order to effect this transmission to the land station indicated wait, if necessary until the conditions specified in B17 and B18 are fulfilled.

B20 4. In order to facilitate disposal of traffic, and subject to such restrictions as individual Administrations may impose, land stations may, in exceptional circumstances and with discretion, without incurring additional charges, exchange radiotelegrams and service messages relating thereto.

IV. Transmission of Radiotelegrams

1. *Doubtful reception*

B21 1.1 In the mobile service, when communication becomes difficult, the two stations in communication make every effort to complete the radiotelegram in course of transmission. The receiving station may request not more than two repetitions of a radiotelegram of which the reception is doubtful.

B22 1.2 If this triple transmission is ineffective, the radiotelegram is kept on hand in case a favourable opportunity for completing its transmission occurs.

B23 1.3 If the transmitting station considers that it will not be possible to re-establish communication with the receiving station within twenty-four hours, it proceeds as follows:

B24 1.3.1 If the transmitting station is a mobile station, it immediately informs that sender of the reason for the non-transmission of his radiotelegram. The sender may then request:

B25 (a) that the radiotelegram be transmitted through another land station or through other mobile stations; or

B26 (b) that the radiotelegram be held until it can be transmitted without additional charge; or

B27 (c) that the radiotelegram be cancelled.

B28 1.3.2. If the transmitting station is a land station, it applies the provisions of B42 to B58 to the radiotelegram.

B29 1.4 When a mobile station subsequently transmits a radiotelegram thus held to the land station that incompletely received it, this new transmission must bear the service instruction AMPLIATION at the end of the preamble line of the radiotelegram.

B30 1.5 However, if the radiotelegram is transmitted to another land station subject to the same Administration*, the new transmission must bear, at the end of the preamble line, the service instruction AMPLIATION VIA . . . (insert here the call sign of the land station to which the radiotelegram was transmitted in the first instance) and the Administration* in question may claim only the charges relating to a single transmission.

B31 1.6 The other land station, which thus forwards the radiotelegram, may claim from the origin mobile station any additional charges resulting from the transmission of the radiotelegram over the general network of telecommunication channels between itself and the office of destination.

B32 1.7 When the lans station designated in the address as the station by which the radiotelegram is to be forwarded cannot reach the destination mobile station and has reason to believe that such mobile station is within the service area of another land station of the Administration* to which it is itself subject, it may, if no additional charge is incurred thereby, forward the radiotelegram to this other land station.

B33 1.8 A station of the mobile service that has received a radiotelegram and has been unuable to acknowledge its receipt in the usual way, must take the first favourable opportunity to give such acknowledgement.

B34 1.9 When the acknowledgement of receipt of a radiotelegram transmitted between a mobile station and a land station cannot be given direct, it is forwarded through another mobile or land station by service advice if the latter is able to communicate with the station that has transmitted the radiotelegram is question. In any case, no additional charge shall result.

2. *Long distance radiocommunications*

B35 2.1 Administrations* reserve the right to organize a long-distance radiocommunication service between land stations and mobile station, with deferred acknowledgement of receipt or without any acknowledgement of receipt.

B36 2.2 Each Administration* designates the land station or stations participating in the long-distance radio service. An indication to this effect shall appear in the list of Coast Stations.

B37 2.3 When there is doubt about the accuracy of any part of a radiotelegram transmitted under either of the systems mentioned in B35, the indication "doubtful reception" is entered on the copy delivered to the addressee, and the doubtful words or groups of words are underlined. If words are missing, blanks are left in the places where these words should be.

3. *Routing retransmission by mobile stations*

B38 3.1 When a land station cannot reach the mobile station for which a radiotelegram is destined, the land station may, in order to forward the radiotelegram to its destination, have recourse to the help of another mobile station provided that the latter consents. The radiotelegram is then transmitted to this other mobile station. The help of the latter is given free of charge.

B39 3.2 The same provision is also applicable to traffic from mobile stations to land stations, when necessary.

B40 3.3 The station assisting in the free retransmission in accordance with B38 and B39 must enter the service abbreviation QSP . . . (name or call sign of the mobile station) at the end of the preamble line of the radiotelegram.

B41 3.4 In order that a radiotelegram thus forwarded may be considered as having reached its destination, the station that has made use of this indirect route must have obtained the regular acknowledgement of receipt, either direct or by an indirect route, from the mobile station for which the radiotelegram was destined or from the land station to which it was to be forwarded, as the case may be.

4. *Period of retention of radiotelegrams at land stations*

B42 4.1 The sender of a radiotelegram destined for a mobile station may specify the number of days during which the land station may hold the radiotelegram.

B43 4.2 In that case, the service indication Jx (x days), specifying the number of days (ten at the most) exclusive of the day of handing-in of the radiotelegram, shall be shown before the address.

B44 4.3 When it has not been possible for a land station to transmit to a mobile station:
(a) a radiotelegram bearing the service indication Jx within the prescribed period, or
(b) a radiotelegram not bearing this service indication up to the morning of the fourth day following the date of handing-in,
the land station informs the office of origin, which notifies the sender.

B45 4.4 The sender of the radiotelegram may then ask, by paid service advice addressed to the land station, either that his radiotelegram be cancelled as regards the section between the land station and the mobile station or that further attempts at transmitting it to the mobile station be made during a period of another seven days at the most.

B46 4.5 Failing such a request, the radiotelegram is treated as undelivered by the land station three days after the dispatch of the advice of non-transmission.

B47 4.6 The same applies upon the expiry of any period for further attemtps that may have been requested by the sender if it has been impossible to reach the mobile station.

B48 4.7 The office of origin shall be immediately advised if the land station transmits the radiotelegram during the period of three days mentioned in B46. The same shall apply if the land station transmits the radiotelegram during any additional period that may have been requested by the sender.

B49 4.8 On the morning of the day following that day on which a radiotelegram to a mobile station, is treated as undelivered by the land station, the latter shall advise the office of origin, which notifies the sender.

B50 4.9 The periods mentioned in B44 to B47 shall be ignored if the land station is sure that the mobile station will soon come within its service area.

B51 4.10 On the other hand, the lapse of those periods is not awaited when the land station is sure that the mobile station, being in course of a voyage, either has definitely left its service area or will not enter it.

B52 4.11 If there is reason to believe that no other land station of the Administration* to which it is subject is or will be in touch with it, the land station cancels the radiotelegram as far as concerns the section between itself and the mobile station and informs the office of origin, which notifies the sender.

B53 4.12 In the contrary case, the land station forwards the radiotelegram to the land station believed to be in touch with the mobile station, provided, however, that no additional charge results therefrom.

B54 4.13 The land station that carries out the redirection alters the address of the radiotelegram by placing after the name of the mobile station that of the new land station charged with the transmission and adding at the end of the preamble line the service instruction REDIRECTED FROM . . . RADIO, which must be transmitted throughout the course of the radiotelegram.

B55 4.14 If, within the limits of the requisite period of retention of radiotelegrams, the land station that has redirected a radiotelegram to another land station is subsequently in a position to transmit the radiotelegram direct to the destination mobile station, it does so by inserting the service instruction AMPLIATION at the end of the preamble line.

B56 4.15 It shall then transmit to the land station to which the radiotelegram had been redirected a service advice informing the latter of the transmission of the said radiotelegram.

B57 4.16 When a radiotelegram cannot be transmitted to a mobile station owing to the arrival of the latter in a port near the land station, the latter station may, according to circumstances, forward the radiotelegram to the mobile station by other means of communication, at the same time informing the office of origin by service advice of the delivery.

B58 4.17 In this case (B57), the land station charge is retained by the Administration* to which the land station is subject and the mobile station charge is refunded to the sender by the origin Administration*.

V. Advice of Non-delivery

B59 1. When, for any reason, a radiotelegram originating in a mobile station and destined for a place on land cannot be delivered to the addressee, an advice of non-delivery is addressed to the land station that received the radiotelegram.

B60 2. After checking the address, the land station forwards the advice, when possible, to the mobile station, if necessary by way of another land station of the same country or of a neighbouring country, as far as existing conditions or special agreements permit.

B62 4. In the case of a radiotelegram originating on land, this service advice is sent, whenever possible, to the land station through which the radiotelegram passed, or, if necessary, to another land station of the same county or of a neighbouring country, as far as existing conditions or special arrangements permit.

B63 5. In such cases the name or call sign of the station from which the radiotelegram was received is quoted.

VI. Radiomaritime Letters

B64 1. Each Administration* may organize a service of radiomaritime letters between mobile stations and its land stations.

B65 2. Such correspondence is transmitted by radio between the mobile and the land stations.

B66 3. They may be forwarded on the land section:

B67 (a) wholly or partly by post (ordinary or airmail);

B68 (b) exceptionally by telegraph, in which case delivery is subject to the periods of delay fixed for letter telegrams.

B69 4. Radio retransmission of radiomaritime letters is not permitted in the mobile service.

B70 5. Radiomaritime letters shall be addressed only to places in the country in which the land station is situated, unless it is indicated in the List of Coast Stations that the station concerned will accept such traffic for onward transmission by post to places in other countries.

B71 6. Radiomaritime letters bear the service indication SLT. This indication precedes the address.

B72 7. Except as otherwise provided in B64 to B74, radiomaritime letters may be accepted, taking into account CCITT Recommendations relating to letter telegrams, if the telegram service is used to convey radiomaritime letters.

B73 8. The address must enable delivery to be effected without enquiry or requests for information. Registered or abbreviated addresses are admitted when, exceptionally, radiomaritime letters are forwarded telegraphically on the land section.

B74 9. Radiomaritime letters rank for radio transmission after ordinary radiotelegrams on hand. Those that have not been transmitted within 24 hours of handing-in are sent concurrently with ordinary radiotelegrams.

VII. Special Services

B75 1. Telegrams with special services are admitted, provided that the Administrations* concerned accept them.

B76 2. Refer to Recommendation F.1 A362 to A422 for the provisions concerning special services that may be applied for telegrams.

Division C

RADIOTELEX

I. General

1. *Routing of calls*

C1 1.1 A radiotelex call should be set up via the land station that is considered most suitable in relation to the mobile station concerned.

C2 1.2 For radiotelex calls in the direction land station to mobile station, the caller should give the geographical position if possible and may also indicate the land station to be used. Such requests should be respected as far as is practicable.

V 43 | 85
M Y 2 7 8
UMI

C3 1.3 For radiotelex calls in the direction mobile station to land station, the mobile station shall call the land station it desires to use. The land station shall either handle the call itself or advise the mobile station to use another land station that is more suitable to the mobile station.

2. *Information to be supplied, as necessary, by the calling party*

C4 2.1 Calls to a mobile station:
(a) telex number and/or answerback code of the calling subscriber;
(b) telex number of the mobile station;
(c) name or call sign of the mobile station; (d) telex number and/or name of the land station to be used, or the approximate geographical position of the mobile station.

C5 2.2 Calls from a mobile station:
(a) telex number of the mobile station;
(b) destination country and/or network;
(c) called subscriber's telex number and/or answerback code.

3. *Call duration*

C6 3.1 When handled through a land station, the chargeable duration of a call will be fixed at the end of the call by the land station.

C7 3.2 If two land stations participate in the handling of the call, the opinion of the land station that has accepted the call from the originating mobile station shall prevail.

C8 3.3 When, through any fault of the service, difficulty is experienced in the course of a call, the chargeable duration shall be reduced automatically or manually to the total time during which transmission conditions were satisfactory, taking into acount CCITT recommendations (F.60 and F.61).

4. *Validity of requests*

C9 4.1 If it becomes obvious that the required mobile station is outside the coverage area of the land station, the caller shall be informed as soon as possible in order to have the call cancelled.

5. *Exchange of radiotelegrams by radiotelex*

C10 5.1 Stations of the maritime service that are equipped for radiotelex may transmit and receive radiotelegrams by means of radi telex.

II. Traffic from mobile stations.

1. *Manual service*

C11 1.1 The land station operator applies manual procedures; i.e. he will contact the international telex centre in his own country if neither single-operator (C12) nor automatic working is possible.

2. *Single-operator service*

C12 2.1 The land station operator applies semi-automatic procedures; i.e. he selects the called subscriber directly via the automatic telex network if fully automatic working is not possible.

3. *Automatic service*

C13 3.1 Whenever possible fully automatic procedures should be used; i.e. the calling subscriber should contact the called subscriber directly without the aid of an operator.

C14 3.2 After connection with the*desired land station is established, the mobile station operator should select directly the appropriate telex destination code (Recommendation F.69) and the number of the subscriber of an Administraton's* telex network.

4. *Procedures*

C15 4.1 The manual, semi-automatic and fully automatic procedures for the terrestrial telex network, as laid down in Recommendations F.60 and F.61, should be taken into account.

III. Traffic to mobile stations

1. *Manual procedure*

1.1 *Booking*

C16 1.1.1 The subscriber should make his booking at the international telex centre of the outgoing country or network.

C17 1.1.2 If conditions permit, the international telex position should select the foreign land station in question directly. Otherwise the international telex position of the land station country should be selected to give the necessary assistance to obtain contact with the land station in question.

1.2 *Setting up*

C18 1.2.1 The land station operator obtains the caller directly or with the assistance of his own international telex position, which selects the caller. Otherwise he selects his own international telex position in order to be connected to the international telex position of the outgoing country, which then selects the caller.

C19 1.2.2 Within 24 hours of the call's termination, the land station shall pass the following information to the international telex centre of the origin country, where it is recorded for charging and accounting purposes:
(a) the calling subscriber's telex number;
(b) the mobile station's call sign;
(c) the chargeable duration of the call;
(d) the landstation charge to be collected;
(e) the mobile station charge to be collected.

2. *Single-operator procedure* (direct access by the calling subscriber to a foreign land station)

2.1 *Booking*

C20 2.1.1 The subscriber selects the foreign land station in question using automatic direct selection and submits the call details to the land station operator.

C21 2.1.2 Where an Administration* permits its subscribers to book a call directly with a land station in another country, the charges set by the land station must be levied by the calling subscriber's Administration*.

C22 2.1.3 In addition to the information in C4, the calling subscriber must designate his national telex network.

C23 2.1.4 As an alternative to C21 and C22, land stations may accept direct calls from foreign subscribers provided that the calling subscriber supplies the name and address of a party in the land station's country that will take responsibility for the payment of charges.

C24 2.1.5 The procedures described in C21 and C23 may only be applied when an appropriate bilateral agreement exists between the two Administrations* concerned. If such an agreement does not exist, the land station should refuse such calls to avoid accounting difficulties.

C25 2.1.6 In C20 and C23 above, the call to the foreign land station will be charged as an ordinary international telex call for its entire duration, regardless of whether it merely serves the purpose of booking the radiotelex call or whether the land station can extend the connection to the mobile station without having to recall the originating subscriber.

2.2 *Setting-up*

C26 2.2.1 When demand operation cannot be used, the caller will be disconnected until the mobile station is available. The land station operator then recalls the caller using automatic direct selection; the land station's country being considered as the outgoing country for the call.

C27 2.2.2 In case C26, the land station includes in the bill:
(a) the landline charge;
(b) the land station charge;
(c) the mobile station charge.

C28 2.2.3 When demand operation has been used, the bill made out by the land station operator includes only:
(a) the land station charge;
(b) the mobile station charge.

C29 2.2.4 All information regarding collection of charges for single-operator calls (see C12) should be submitted by the land station Administration* on a regular basis to be determined by the Aministrations* involved.

C30 2.2.5 The methods to be used in collecting the charges are described in Recommendation D.90/F.111.

3. *Automatic procedure* (direct access by the calling subscriber to the called subscriber)

C31 3.1 Whenever possible fully automatic procedures should be used; i.e. the calling subscriber should contact the called subscriber directly without the aid of an operator.

C32 3.2 The subscriber of an Administration's* telex network should select the appropriate address code, if necessary including the ocean area and mobile station number, to connect him through a land station with which his Administration* has established routing of maritime traffic for the ocean area desired.

C33 3.3 If for some technical reason contact cannot be established with the mobile station, the subscriber may select the international telex position of his Administration* to determine if alternate routing is available.

C34 3.4 On international telex links the destination code 58x will be used in accordance with Recommendation F.69, unless otherwise agreed bilaterally.

DIVISION D

RADIOTELEPHONE

I. General

1. *Language to be used*

D1 1.1 Where applicable and where language difficulties exist, the abbreviations and signals in appendix 13A of the Radio Regulations and the Phonetic Alphabet and Figure Code in Appendix 16 of the Radio Regulations should be used in radiotelephone communications between land stations and mobile stations.

2. *Priority*

D2 2.1 Apart from the general order of priority shown in A1 to A12, radiotelephone calls shall have precedence, so far as possible, over other telephone calls of the same class.

3. *Routing of calls*

D3 3.1 A radiotelephone call should be set up via the land station that is considered most suitable in relation to the mobile station concerned.

D4 3.2 For radiotelephone calls in the direction land station to mobile station, the caller should give the geographical position if possible and may also indicate the land station to be used. Such requests should be respected as far as is practicable.

D5 3.3 For radiotelephone calls in the direction mobile station to land station, the mobile station shall call the land station it desires to use. The land station shall either handle the call itself or advise the mobile station to use another land station that is more suitable to the mobile station.

4. *Information to be supplied by the calling party*

D6 4.1 Calls to a mobile station:
(a) complete telephone number of the calling subscriber;
(b) appropriate identification of the mobile station;
(c) name of the land station to be used or the approximate geographical position of the mobile station;
(d) name of the called party.

D7 4.2 Calls from a mobile station:
(a) appropriate identification of the mobile station;
(b) the information specified in Article 60 of the Instructions for the International Telephone Service.

5. *Call duration*

D8 5.1 When handled through a land station, the chargeable duration of a call will be fixed at the end of the call by the land station.

D9 5.2 If two land stations participate in the handling of the call, the opinion of the land station that has accepted the call from the originating mobile station shall prevail.

D10 5.3 When, through any fault of the service, difficulty is experienced in the course of a call, the chargeable duration shall be reduced automatically or manually to the total time during which transmission conditions were satisfactory, taking into account CCITT Recommendations.

6. *Validity of Requests*

D11 6.1 In principle the provisions of Article 74 of the Instructions for the International Telephone Service shall apply.

D12 6.2 However, if it becomes obvious that the required mobile station is outside the coverage area of the land station, the caller shall be informed as soon as possible in order to have the call cancelled.

7. *Exchange of Radiotelegrams by Radiotelephony*

D13 7.1 Stations of the maritime mobile service that are equipped for radiotelephony may transmit and receive radiotelegrams by means of radiotelephony.

II. Traffic from mobile stations

1. *Manual service*

D14 1.1 The land station operator applies manual procedures; i.e. he will contact the international telephone centre in his own country if neither single-operator (D15) nor automatic working is possible.

2. *Single-operator service*

D15 2.1 The land station operator applies semi-automatic procedures; i.e., he selects the called subscriber directly via the automatic telephone network if fully automatic working is not possible.

3. *Automatic service*

D16 3.1 Whenever possible, fully automatic procedures should be used; i.e. the calling subscriber should contact the called subscriber directly without the aid of an operator.

D17 3.2 After connection with the desired land station is established, the mobile station operator should select directly the appropriate telephone country code (Recommendation E.160) and the number of the subscriber of an Administration's* telephone network.

4. *Procedures*

D18 4.1 The manual, semi-automatic and fully automatic procedures for the terrestrial telephone network, as laid down in Recommendation E. 141 and the Instruction for the International Telephone Service should be taken into account.

III. Traffic to mobile stations

1. *Manual procedure*

1.1 *Booking*

D19 1.1.1 The subscriber should make his booking at the international centre of the outgoing country.

D20 1.1.2 If conditions permit, the international position should select the foreign land station in question directly. Otherwise the international position of the land station country should be selected to give the necessary assistance to obtain contact with the land station in question.

1.2 *Setting up*

D21 1.2.1 The land station operator obtains the caller directly or with the assistance of his own international telephone centre which selects the caller. Otherwise he selects his own international telephone centre in order to be connected to the international telephone centre of the outgoing country, which then selects the caller.

D22 1.2.2 After the call's termination, the land station shall pass the following information to the international telephone centre of the origin country, where it is recorded for charging and accounting purposes:
(a) the calling subscriber's telephone number;
(b) the mobile station's call sign;
(c) the chargeable duration of the call;
(d) the land station charge to be collected;
(e) the mobile station charge to be collected.

D23 1.2.3 Otherwise all information regarding collection of charges should be submitted to the caller's Administration* on a regular basis to be determined by the Administrations* involved.

2. *Single-operator procedure* (direct access by the calling subscriber to a foreign land station).

2.1 *Booking*

D24 2.1.1 The subscriber selects the foreign land station in question using automatic direct selection. The land station operator records the call details.

D25 2.1.2 Where an Administration* permits its subscribers to book a call directly with a land station in another country, the charges set by the land station must be levied by the calling subscriber's Administration*.

D26 2.1.3 In addition to the information in D6, the calling subscriber must designate his country and national telephone number.

D27 2.1.4 As an alternative to D24 and D25, land stations may accept direct calls from foreign subscribers provided that the calling subscriber supplies the name and address of a party in the land station's country that will take responsibility for the payment of charges.

D28 2.1.5 The procedures described in D25 and D27 may only be applied when an appropriate bilateral agreement exists between the two Administrations* concerned. If such an agreement does not exist, the land station should refuse such calls to avoid accounting difficulties.

D29 2.1.6 In D24 and D27 above, the call to the foreign land station will be charged as an ordinary international telephone call for its entire duration, regardless of whether it merely serves the purpose of booking the radiotelephone call or whether the land station can extend the connection to the mobile station without having to recall the originating subscriber.

2.2 *Setting up*

D30 2.2.1 When demand operation cannot be used, the caller will be disconnected until the mobile station is available. The land station operator then recalls the caller using automatic direct selection; the land station country being considered as the outgoing country for the call.

D31 2.2.2 In case C26, the land station includes in the bill:
(a) the landline charge;
(b) the land station charge;
(c) the mobile station charge.

D32 2.2.3 When demand operations has been used, the bill made out by the land station operator includes only:
(a) the land station charge;
(b) the mobile station charge.

D33 2.2.4 All information regarding collection of charges for single-operator calls (see D15) should be submitted by the land station Administration* on a regular basis to be determined by the Administrations* involved.

D34 2.2.5 The methods to be used in collecting the charges are described in Recommendation D.90/F.111.

3. *Automatic procedure* (direct access by the calling subscriber to the called subscriber)

D35 3.1 Whenever possible, fully automatic procedures should be used; i.e. the calling subscriber should contact the called subscriber directly without the aid of an operator.

D36 3.2 The subscriber of an Administration's* telephone network should select the appropriate address code, if necessary including the ocean area and the mobile station number, to connect him through a land station with which his Administration* has established routing of maritime traffic for the ocean area desired.

D37 3.3 If for some technical reason contact cannot be established with the mobile station, the subscriber may select the international telephone centre of his Administration* to determine if alternate routing is available.

1. Under "Status" below, MOD=modified, SUP=suppressed and NOC=no change (except for the cases in Note 2.)
2. Where necessary the term "coast station" has been replaced with "land station," "aeronautical station" with "land station," "ship" with "mobile station," "message" with "telegram" and "preamble" with "preamble line."

M Y 2 — 7 8 UMI

APPENDIX C

DRAFT REGULATORY PROVISIONS

Radio Regulations Article "Z"

Public Correspondence in the Maritime Mobile Service

Section I. General

1. The provisions of the Telegraph Regulations and the Telephone Regulations and the Protocols annexed thereto, taking into account CCITT Recommendations; shall apply to radiocommunications in so far as the provisions of the Radio Regulations do not provide otherwise.

Section II. Accounting Authority

1. Charges for radiocommunications from ship-to-shore are in principle, and subject to national law and practice, to be collected from the maritime mobile station licensee:
(a) by the Administration that has issued the license; or
(b) by a recognized private operating agency; or
(c) by other entity or entities designated by the Administration to carry out this accounting.
2. The Administration or the recognized private operating agency or the designated entity (or entities) is referred to in this Article as the "accounting authority".
3. The name(s) and address(es) of the accounting authority(ies) shall be notified to the Secretary-General of the ITU for inclusion in the List of Ship Stations; the number of such names and addresses shall be limited as far as possible, taking into account CCITT Recommendations.

Section III. Accounting

1. Exchange and verification of accounts shall be carried out in accordance with the Telegraph Regulations and the Telephone Regulations, taking into account CCITT Recommendations.
2. The accounts shall be sent as promptly as possible but in any case before the end of the third month following that to which they relate.
3. In principle, an account shall be considered as accepted without the need for specific notification of acceptance to the Administration* that sent it.
4. However, any accounting authority shall have the right to question the contents of an account for a period of six months after dispatch of the account.
5. All maritime accounts shall be paid by the accounting authority without delay and in any case within 6 months after dispatch of the account.
6. If international maritime accounts remain unpaid after 6 months, the Administration that has licensed the mobile station shall on request take all possible steps, within the limits of applicable national law, to ensure settlement of the accounts from the licensee.
7. In the case referred to in 4 above, if the account is seriously delayed in transit, the receiving accounting authority should at once notify the originating Administration* that queries and payment may be delayed. The delay shall, however, not exceed 3 months from the date of receipt of the account.
8. The debtor accounting authority may refuse the settlement and adjustment of accounts presented more than eighteen months after the date of handing-in of the radiotelegrams or the date of establishment of the radiotelephone calls or radiotelex calls to which the accounts relate.

Section IV. Payment of Balances

1. Payment of balances shall be carried out in accordance with the Telegraph Regulations and the Telephone Regulations.

Section V. Archives

1. The originals of radiotelegrams and documents relating to radiotelegrams, radiotelephone calls and radiotelex calls retained by the Administrations* shall be held, with all necessary precautions from the point of view of secrecy, until the settlement of the relative account and, in any case, for at least six months counting from the month in which the accounts were sent. Administrations* may preserve the information by any other means, e.g. magnetic or electronic records.
2. However, should an Administration* deem it desirable to destroy such documents before the above-mentioned period, and hence is not in a position to carry out an inquiry in respect of the services for which it is responsible, such Administration* shall bear all the consequences both as regards refund of charges and any difference in the accounts in question that might otherwise have been observed.

*or recognized private operating agency/agencies.

[FR Doc. 78-11727 Filed 5-1-78; 8:45 am]

[6712-01]

[Docket No. 20271; FCC 78-264]

PREPARATION FOR A GENERAL WORLD ADMINISTRATIVE RADIO CONFERENCE OF THE INTERNATIONAL TELECOMMUNICATION UNION

Revision of the International Radio Regulations; Seventh Notice of Inquiry

AGENCY: Federal Communications Commission.

ACTION: Seventh Notice of Inquiry (Docket No. 20271) issued seeking comments from interested parties concerning proposed changes to the International Radio Regulations relating to the procedural provisions of advance publication, coordination, notification and recording of frequency assignments.

SUMMARY: The 1979 World Administrative Radio Conference (WARC) will review Articles 9 and 9A, and related Appendices. The purpose of the Seventh Notice of Inquiry is to obtain public comments on draft proposed changes to these provisions and to determine if other changes should be proposed.

DATES: Interested persons may file comments on or before June 9, 1978, and reply comments on or before June 23, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Donald F. Weiland, International and Operations Division, Office of Chief Engineer, 202-632-7054.

Adopted: April 18, 1978.

Released: April 26, 1978.

In the matter of an inquiry relative to preparation for a General World Administrative Radio Conference of the International Telecommunication Union to consider revision of the International Radio Regulations, Docket No. 20271.[1]

1. The Commission instituted this Docket in January 1975 for the purpose of eliciting public comments for consideration in the development of our national proposals to be considered at the World Administrative Radio Conference to be convened in Geneva, Switzerland on September 24, 1979. Six Notices of Inquiry have been issued to date.

2. The emphasis of previous Notices has been on possible changes to the in-

ternational table of frequency allocations and technical matters related to the use of the spectrum. The purpose of this Notice is to solicit comments on the procedural provisions of the International Radio Regulations relating to the requirements for the advance publication, co-ordination and notification of frequency assignments. These procedures, the bulk of which are contained in Articles 9 and 9A, afford protection to administrations who follow certain prescribed steps. Article 9 specifies the procedures for terrestrial frequency assignments. The Commission believes that the procedures which deal with the determination of the status of a terrestrial assignment with respect to other terrestrial assignments is satisfactory and substantial changes are therefore not proposed. Nevertheless, the Commission would consider any new ideas which may be offered in response to this Notice.

3. The procedures relating to frequency assignments to stations in the space services and also to terrestrial stations in bands shared with the space services are the primary concern of this Notice. These procedures are embodied in section IIB of Article 9, Article 9A and Resolution Spa2-3 of the International Radio Regulations. Although they are lengthy and complex, they are also important, useful and allow for the orderly introduction of satellite technology. In the absence of a viable alternative, it is not only desirable to maintain these procedures but also to improve and clarify those provisions for which there is some degree of uncertainty as to their intent. The proposals which appear in the attached Appendix 1 of this Notice were drafted with this in mind, and comments on them are requested.

4. Comments are also sought as to the desirability of retaining the Amateur-Satellite Service under the provisions of Article 9A. Administrations authorizing stations to operate in the Amateur-Satellite Service are currently required to send data to the International Frequency Registration Board on the basic characteristics of their systems as outlined in Appendices 1A and 1B to the international Radio Regulations for the purpose of advance publication of the information, co-ordination (if a geostationary satellite is to be used), and subsequent notification, just as in all other satellite services. If this is considered to be an unnecessary requirement for the Amateur-Satellite Service, substantial justification should be provided in light of the position of most administrations at the 1971 WARC for Space Telecommunications that the Article 9A procedures apply to all satellite systems.
